Here it is. I would print off a copy, and just have Sandra sign the 202 page, and we can keep that for later. This is the one that can be sent out to everyone, put on sharepoint, etc.

- Also send it out to the SEOC MDARD desk email.

Is there is a sit rep in the works for today?

Nice work getting this together!

To: Hainstock, Lisa (MDARD) <hainstockl@michigan.gov>
Subject: IAP draft pieces

Hi Lisa,

Here's draft forms for the IAP. Jennifer has the 204, which is still waiting for Tom's approval. You might check in with her on that status.

On the 202, I'll add the weather to situational awareness box when I PDF them, so don't worry about that.

Here's how I would proceed:

- Check over each one and make whatever edits you see fit
- Run them by Sandra (print or digital is fine)
- After her approval, get them to me – email, S:, sharepoint, whatever.
- I will PDF them into a final form
- Print one hard copy out, for Sandra so sign and us to keep on file.
- The rest can be ready for distribution by Monday

requirements under the Food Law/Food Code to assure the water they are using is safe.

We would like to begin posting on a daily basis to the Flint Water site a PDF of the updated results of these compliance checks. Below (in italics) is a proposed statement to post with the PDF. A document that outlines the requirements for food businesses should already be posted on the Flint Water site, but I can't find it. I have attached it as an FYI so you know what I'm talking about. This needs to be linked from the underlined word in the proposed statement below.

The most recent compliance tracker PDF is also attached. This is the document that will be updated each day. MDARD's plan is to forward the updated compliance document each day by noon to the JICManager (or to a designee) for posting each week day.

I am seeking approval of the wording and instructions for how best to share this information with the JIC each day for posting. Please call if you have questions! Sorry this is so convoluted. Hopefully the actual posting will be simple!

Proposed statement:

*The following Flint food establishments have received compliance checks and have been found to be following the **requirements** for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.*

Thanks,

Jeanne

Thanks, Jen and Brad.

To make it easier, I have attached the draft compliance list with the verbiage and disclaimer included at the top of the document. It started as an Excel spreadsheet, so it's not pretty. I can work on improving the format as we move forward.

I will wait to hear from others before this is finalized.

Have looped in the SEOC Ag desk.

Should there be something in the statement, like a disclaimer that we are not certifying that the establishment is lead free? Or whatever words we need to use. I'm concerned that people will assume, seeing the names on the list, that we are certifying they are "safe".

Done.

No "memo" has been issued, however, MDARD has been contacting vets, animal shelters, etc. to see whether or not they are using Flint water and proving them the same guidance that is on the flint water website (eg., use filtered water to water your pets.)

Have looped in the SEOC Ag desk.

Should there be something in the statement, like a disclaimer that we are not certifying that the establishment is lead free? Or whatever words we need to use. I'm concerned that people will assume, seeing the names on the list, that we are certifying they are "safe".

Good morning. As you know, MDARD food inspectors have been conducting compliance checks of food establishments in Flint to make sure they are following *requirements under the Food Law/Food Code to assure the water they are using* is safe.

We would like to begin posting on a daily basis to the Flint Water site a PDF of the updated results of these compliance checks. Below (in italics) is a proposed statement to post with the PDF. A document that outlines the requirements for food businesses should already be posted on the Flint Water site, but I can't find it. I have attached it as an FYI so you know what I'm talking about. This needs to be linked from the underlined word in the proposed statement below.

The most recent compliance tracker PDF is also attached. This is the document that will be updated each day. MDARD's plan is to forward the updated compliance document each day by noon to the JICManager (or to a designee) for posting each week day.

I am seeking approval of the wording and instructions for how best to share this information with the JIC each day for posting. Please call if you have questions! Sorry this is so convoluted. Hopefully the actual posting will be simple!

Proposed statement:

*The following Flint food establishments have received compliance checks and have been found to be following the **requirements** for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.*

Thanks,

Jeanne

Ron,

Can you guys double check the phone number was given to us for Jill Fritz, National Humane Society 517-515-3819. When we dial this number, the phone rings once and then we get a fast beep.

Thanks.

Flint Water Response Team Plan
Saturday, 01.31.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher		Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	***Type:** Type V **Quantity:** 10 (10 ERV)*				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		1/31/16	8:00 am
ARC ERV	10	10		1/31/16	8:00 am
ARC ERV Driver	10	10		1/31/16	8:00 am
Team Member	20-40	20-40		1/31/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		1/31/16	8:00 am
Team Transport Vehicle Driver	10	10		1/31/16	8:00 am
iPads	10	10		1/31/16	8:00 am
Hand Warmers	40	40		1/31/16	8:00 am
Distribution Kit	1000	1000		1/31/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Priority – City Sections 27, 29, 30, 31, 22, 33, 4

Secondary – City Sections 7, 1, 13

Map Support

Maps will be provided daily to provide detailed information on city sections. Teams will target specific homes not originally reached during the first two rounds of canvassing.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

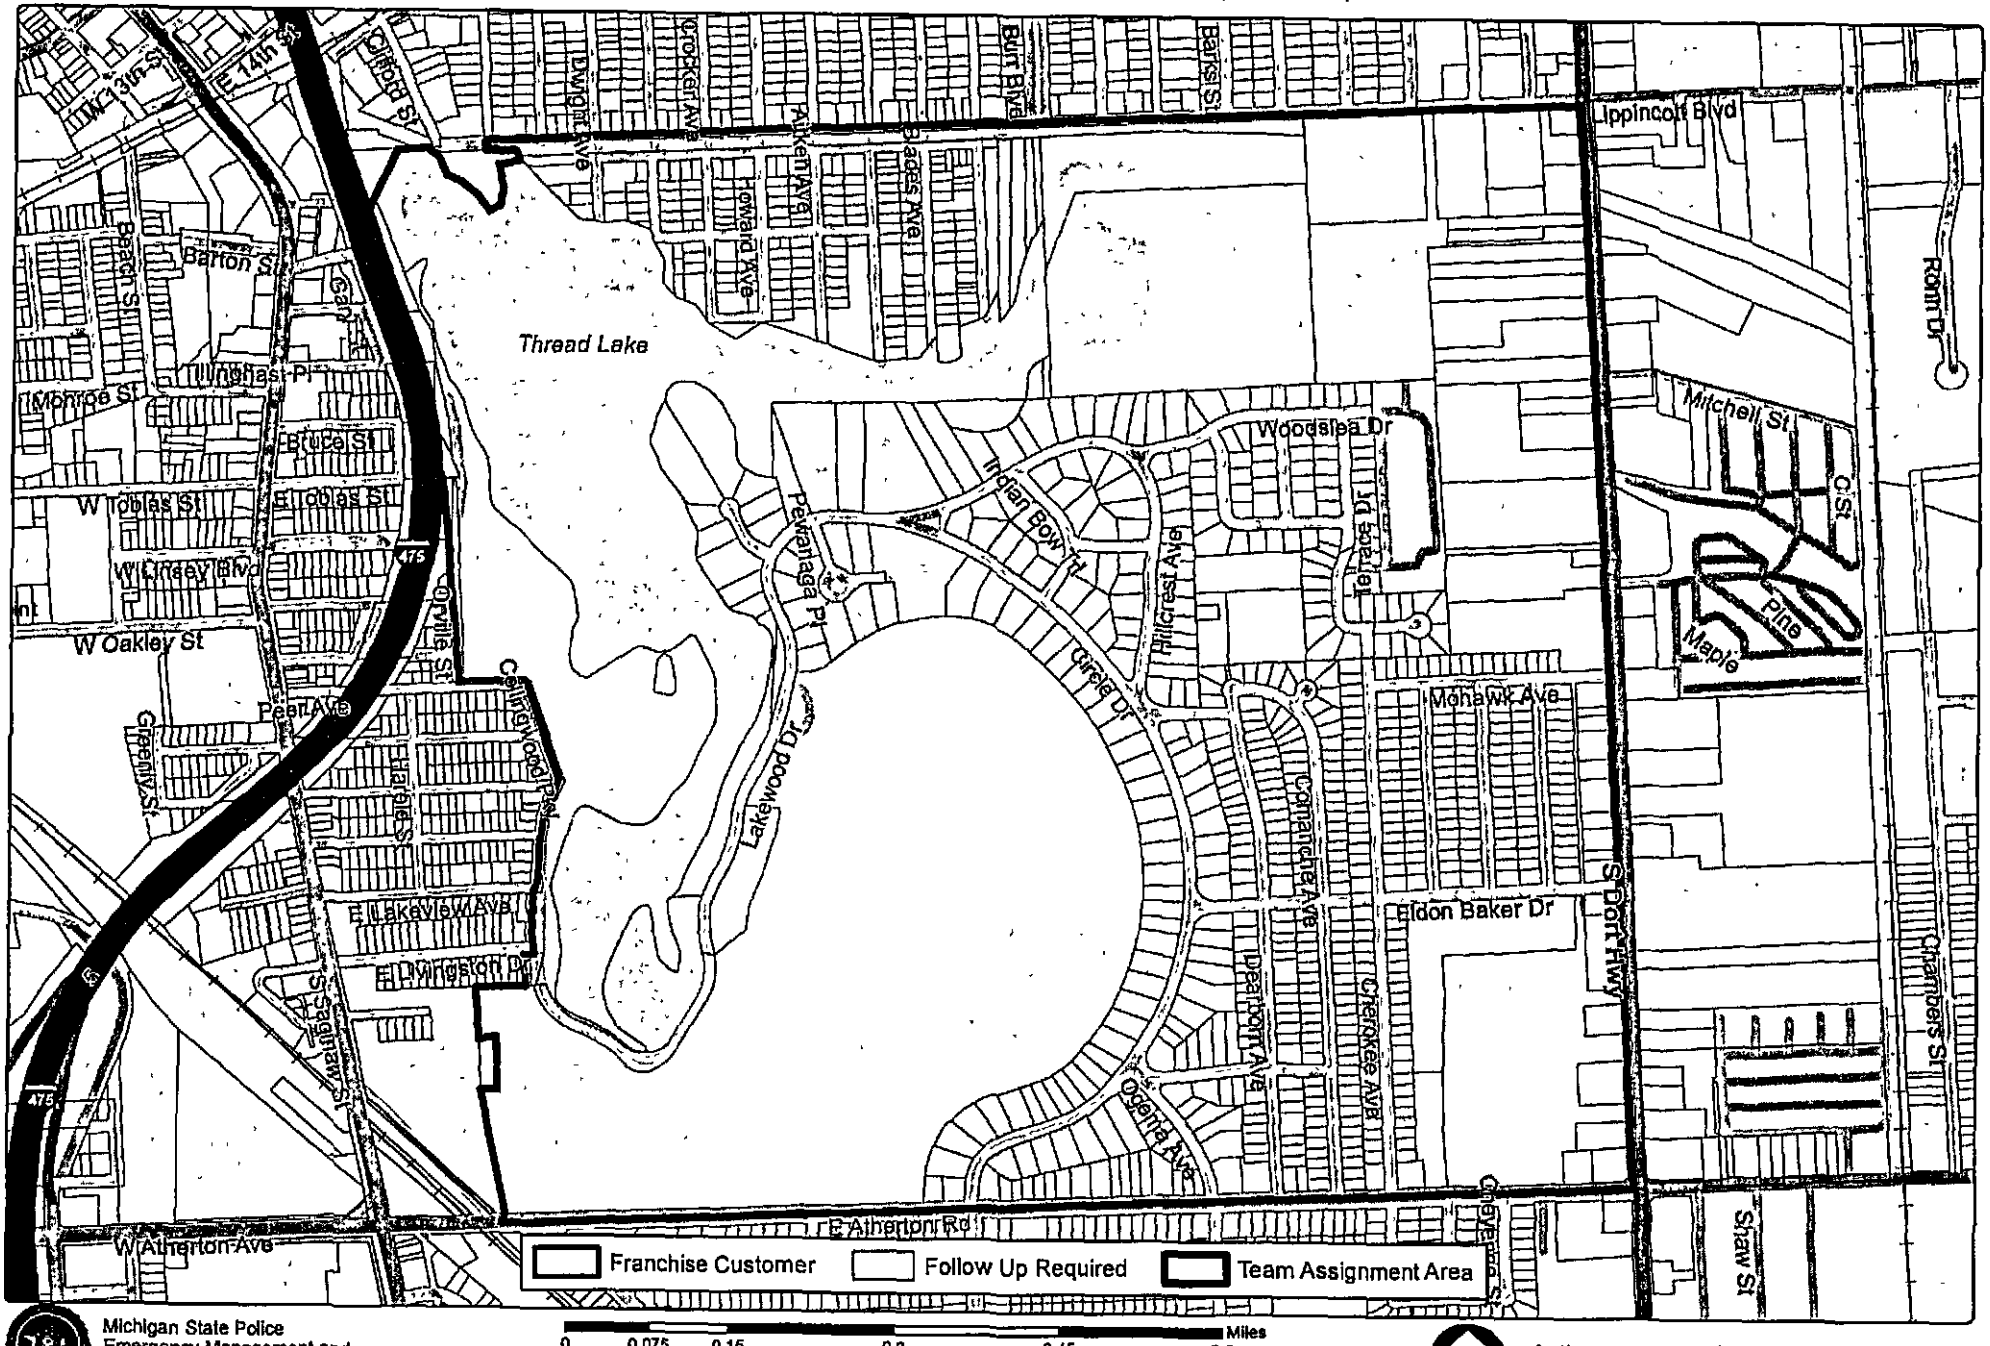
Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

Team Assignment Area 1

(Flint Water Response Team Activity as of January 29, 2016)



Michigan State Police
Emergency Management and
Homeland Security Division

Flint Water Response Team Plan
Saturday, 01.30.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher	Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	Type: Type V Quantity: 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		1/30/16	8:00 am
ARC ERV	10	10		1/30/16	8:00 am
ARC ERV Driver	10	10		1/30/16	8:00 am
Team Member	20-40	20-40		1/30/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		1/30/16	8:00 am
Team Transport Vehicle Driver	10	10		1/30/16	8:00 am
iPads	10	10		1/30/16	8:00 am
Hand Warmers	40	40		1/30/16	8:00 am
Distribution Kit	1000	1000		1/30/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Priority – City Sections 28, 29, 30, 31

Secondary – City Sections 27, 17 and 11

Map Support

Maps will be provided daily to provide detailed information on city sections. Teams will target specific homes not originally reached during the first two rounds of canvassing.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

DRAFT

January 29, 2016

Information for Cottage Food Producers Using City of Flint Water

As a cottage food producer, you are required to follow requirements of the Michigan Food Law and Michigan Modified Food Code when preparing food products for sale to consumers, including using water from an approved source.

In January 2016, Governor Snyder's declared a state of emergency in Flint due to concerns over the safety of the City of Flint's water supply. With that declaration, the Michigan Department of Agriculture and Rural Development determined Flint municipal water is not considered an approved source for food establishments, including Cottage Food producers, unless certain precautions are taken to reduce the risk of food safety issues.

If your home is serviced with water from the City of Flint, you must take certain steps to assure your water is safe for use in food preparation. Food inspectors may verify you are taking one or more of the following steps:

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers. Homeowners in the City of Flint can request free water testing by contacting the City of Flint (810-648-6942) or the Genesee County Health Department ( ).

- Unless the water has been tested and found to not have a lead concern, do the following:

    - Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use.
    - Install an NSF Standard 53 certified filter on the faucet where you obtain drinking/cooking water. Household water filters are available to Flint residents at locations throughout the city. For a list of pick-up sites, visit www.michigan.gov/flintwater. Filters must be changed according to the manufacturer's recommendations.
    - Always use cold water for drinking, cooking and cleaning/rinsing food.
    - Hot water must be used for dishwashing.

- A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

If you have questions regarding food and water safety for your home-based Cottage Food business, please contact the Michigan Department of Agriculture and Rural Development at 800-292-3939. For questions about the Flint Water Response, dial 211 or visit www.michigan.gov/flintwater.

Flint Water Response Team Plan
Thursday, 01.28.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher		Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		1/28/16	8:00 am
ARC ERV	10	10		1/28/16	8:00 am
ARC ERV Driver	10	10		1/28/16	8:00 am
Team Member	2-4	2-4		1/28/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		1/28/16	8:00 am
Team Transport Vehicle Driver	10	10		1/28/16	8:00 am
iPads	10	10		1/28/16	8:00 am
Hand Warmers	40	40		1/28/16	8:00 am
Distribution Kit	1000	1000		1/28/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas – Continuation of January 28th Team Assignment list – see below

Priority – City Sections 3, 9, 11, 17, 19, 20, 23

Secondary – City Sections 2, 10, 28

Map Support

Maps and addresses will be provided daily to provide detailed information on city sections. Teams will target specific homes requiring follow up.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

Flint Water Response Situation Report - As Of: January 28, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: N/A

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk**- 19 (8-GCHD, 11-FDD), **Medium-Risk**- 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: January 25 - 29, 2016

Continue rapid assessments of Flint food establishments prioritized on risk (see attached risk criteria)

- Schedule requests for water testing by Division staff
- Schedule mandatory water sampling of high risk firms
- Coordinate tracking and reporting of rapid assessments and water sampling
- Ensure Responder Safety

Activity Report for the Operational Period: January 28, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Facilities Contacted/Informed				
By Weights & Measures Staff	Task Completed	74	74	74
By FDD Staff	11	86	176	175
Assessment In-Compliance Rate 69.15% (130 firms)				
Assessments Completed				
High risk	0	1	17	19
Medium	4	36	134	156
Other	6	23	49	

Water Sampling Activity				
Scheduled	8	56	120	
Collected	13	45 (18 additional collected 1/27)	63	
Test Results				
Elevated	4	4	4	
Total tested	8	8	8

STATE OF MICHIGAN
JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
January 29, 2016
Release #: 23

Gov. Snyder Approves $28 Million in Immediate Aid for City of Flint

Appropriation will fund several programs to address Water Crisis

Flint, Mich. – Gov. Rick Snyder today, signed a $28 million budget supplemental which assists Flint residents by addressing the city's on-going water crisis. The supplemental, which Snyder called for in his State of the State Address January 19th, was approved by the legislature Thursday and signed by the Governor this morning.

"I thank the Legislature for their quick action to make this additional $28 million a reality. It is a necessary next-step in ongoing recovery efforts for the city," Snyder said. "We know that more money will be needed to address long-term concerns and I want to reassure the families of Flint that I remain dedicated to fixing this problem."

House Bill 5220, approved unanimously in both the House and Senate, will help ensure Flint residents have access to safe, clean drinking water in addition to the following:

- Supply free bottled water, faucet filters, and testing kits for Flint residents;
- Put nine nurses in local schools to monitor student health and well-being;
- Provide better nutrition for students and infants through WIC and in-school nutrition programs;
- Replace fixtures in schools, daycares, nursing homes and hospitals;
- Provide for an infrastructure study using independent experts;
- Treat any children who have high lead levels in the blood, using diagnostic testing, nurse visits and environmental assessments in the home.

Gov. Snyder will propose a long-term funding solution to address the ongoing needs of Flint in his Feb. 10 formal budget recommendation to the legislature.

In the continuing effort to identify the location of lead pipes and other components of Flint's water infrastructure, Geographic Information Systems (GIS) experts from the

Release #: 22

City of Flint, State of Michigan, the University of Michigan–Flint, and Federal Emergency Management Agency (FEMA) have translated hundreds of hand-drawn plat maps and hand-written notes from the 1980's into digitized maps. The maps are helping the State target its response and determine where safe water is needed.

"Since most of the water system infrastructure is underground, we can't simply walk out and survey it," said Capt. Chris A. Kelenske, deputy state director of emergency management and homeland security and commander of the Michigan State Police Emergency Management and Homeland Security Division. "This mapping will be a critical component of the State's coordinated response in Flint."

Once maps are fully digitized, they will be synced with 2015 parcel data and can then be overlaid with Census and infrastructure information which will allow analysts to pinpoint which inhabited homes have lead service lines.

Additionally, efforts continue to ensure city-wide distribution of bottled water, filters, water replacement cartridges and water testing kits.

Water response teams continue door-to-door delivery efforts with American Red Cross and other volunteers visiting 924 Flint homes today. Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 216,605 cases of water
- 98,641 water filters
- 31,111 water testing kits

Additionally, water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle recycling site)
3402 Western Rd.

Fire Station #6
716 West Pierson Rd.

NOTE: **ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632). FOR FLINT WATER EMERGENCY DONATION INFORMATION, GO TO www.helpforflint.com.**

Executive Summary for a Health-Based Drinking Water Lead Level

October 23, 2015

Objective: Identify health-based drinking water lead level(s) to allow re-opening of school and/or daycare water fountains/faucets for student use.

Public Health Assumptions Included in the Model

The model estimates are only accurate if the following assumptions are met:

1. Children are not exposed to lead paint chips or lead paint dust (at home or elsewhere).
2. Children's drinking water at home is filtered and contains no more than 1 ppb of lead.
3. Children are exposed to lead soil concentrations typical of the urban environment in Flint (i.e. soil has not been impacted by lead-based paint).

Children's risk of having an elevated blood lead level will be greater than the model estimates if these assumptions are not met.

Resulting risk from drinking water with the following lead concentrations:

The goal is that a child should have ***no more than a 5 percent risk*** of having a blood lead level greater than 5 micrograms per deciliter.

Risk of a child having an elevated blood lead level		
Daycare or School Drinking Water Lead Levels	less than 1 year old	less than 7 years old
2 ppb	**5 percent**	**3 percent**
11 ppb	**8 percent**	**5 percent**
15 ppb	**10 percent**	**6 percent**
30 ppb	**18 percent**	**11 percent**
100 ppb	**55 percent**	**42 percent**

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Priority – City Sections 3, 9, 11, 17, 19, 20, 23

Secondary – City Sections 2, 10, 28

Map Support

Maps and addresses will be provided daily to provide detailed information on city sections. Teams will target specific homes requiring follow up.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

The following Flint food establishments have received compliance checks and have been found to be following the requirements for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.

Inclusion of businesses on this list does not represent endorsement of the businesses by the Michigan Department of Agriculture and Rural Development, nor does it guarantee food safety at these facilities. The companies listed have demonstrated they are taking precautions to reduce the risk of foodborne illness from water that may be contaminated, as outlined in the Michigan Food Law and Michigan Modified Food Code.

Flint Food Establishments Verified to be in Compliance as of January 22, 2016:

Assessment Date	Name	Street Address	Zip Code
1/21/2016 18:16	4 way party store	1302 DuPont	48504

SBA Disaster Assistance Program

SBA's Role in Disaster Recovery

Michigan District Office

Gerald Moore
District Director
Detroit, MI

U.S. Small Business Administration

Mission

To provide low interest disaster loans to businesses of all sizes, private nonprofit organizations, homeowners and renters to repair or replace real estate, personal property, machinery & equipment, inventory and business assets that have been damaged or destroyed in a declared disaster.

U.S. Small Business Administration

SBA History in Making Disaster Loans

The SBA's low interest loan program was designed by Congress to enable those affected by unforeseen catastrophic events to recover with as little adverse impact as possible.

SBA has been making disaster loans since 1953, and has approved more than $53 billion in disaster loans to over 1.9 million businesses, homeowners and renters.

U.S. Small Business Administration

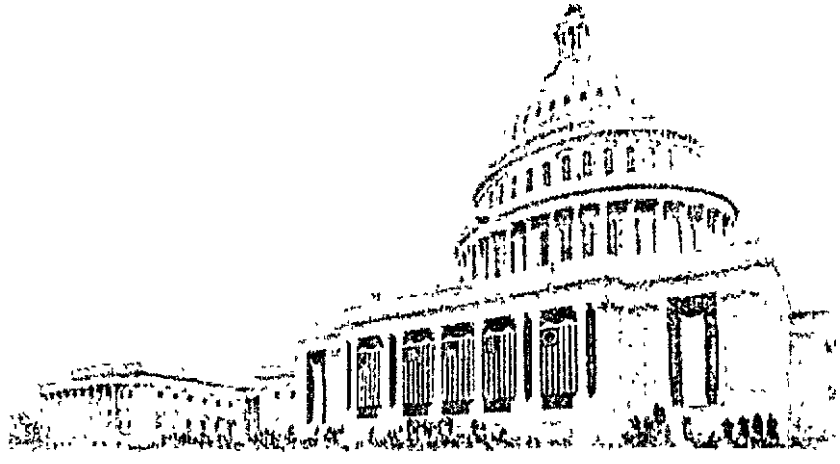
Disaster Loan Program

The SBA disaster loan program is activated in conjunction with approval of a major (Presidential) declaration; or an SBA-only (Agency) disaster declaration (for small disasters).

- Disaster loans are only for uninsured or otherwise uncompensated losses.
- These loans are direct from the federal government; not from a bank.

Types of SBA Disaster Declarations

- Presidential (Individual / Public Assistance)
- Administrative (Agency)
- Governor's Certification
- Secretary of Agriculture
- Military Reservist



U.S. Small Business Administration

Presidential Declaration for Individual Assistance (IA)

- If the President declares a major disaster declaration for Individual Assistance, SBA's disaster loan program is automatically activated.

- Businesses of all sizes private nonprofit organizations, homeowners and renters are eligible to apply for their uncompensated physical losses.

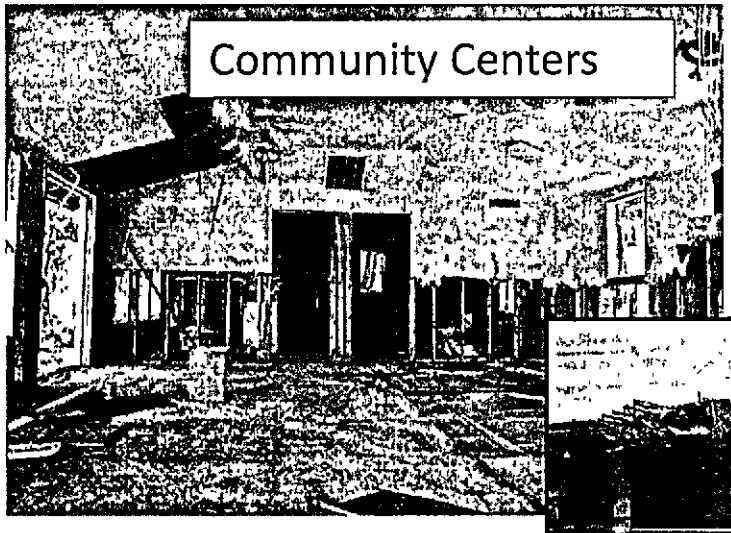
- Small businesses, small cooperatives, small aquaculture businesses and private nonprofits, can apply for economic injury disaster loans to meet their working capital needs.

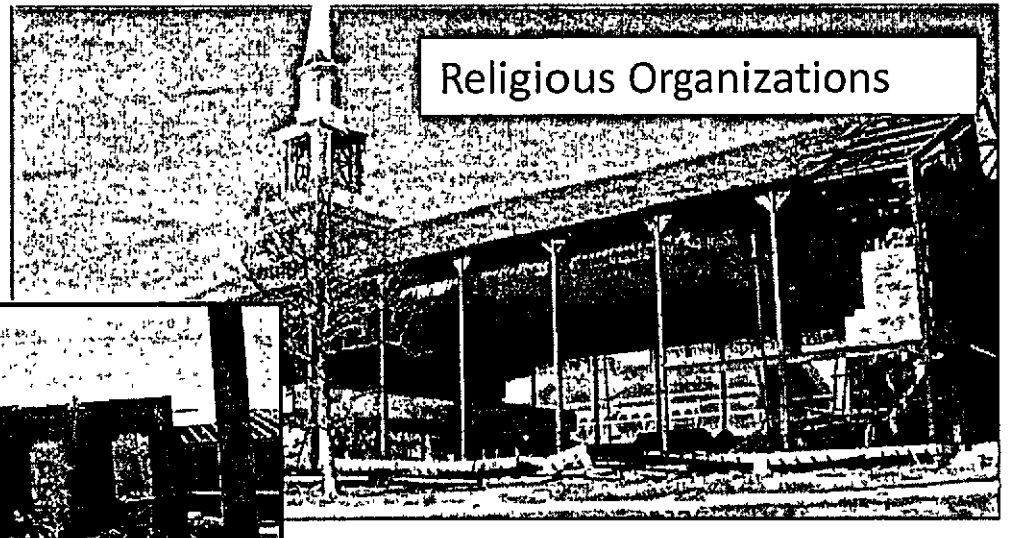
President Barack Obama

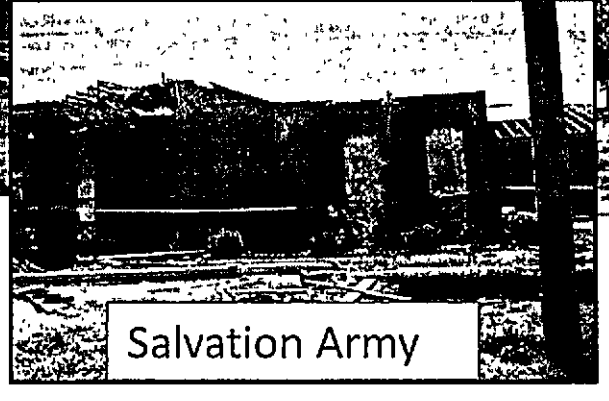
U.S. Small Business Administration

Presidential Declaration for Public Assistance (PA)

If the President declares a major disaster declaration for Public Assistance, SBA's disaster loan program is activated only for eligible Private NonProfit organizations for physical damage and economic injury.







SBA
U.S. Small Business Administration

Administrative (Agency) Declarations

When the physical damage assessment indicates the threshold is insufficient for a Presidential declaration, the Governor can request an Administrative (Agency) declaration through the SBA Administrator.

SBA's Administrator Maria Contreras-Sweet

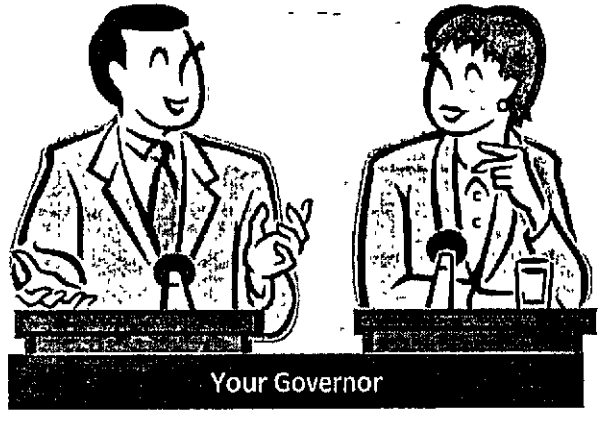
Threshold for 'Agency' Declaration:
At least 25 businesses and/or homes in a county with uninsured losses of 40% or more of their estimated fair market value.

U.S. Small Business Administration

Governor's Certification

If a Governor certifies that at least five (5) small businesses in a disaster area have suffered substantial economic injury as a result of the disaster, and need financial assistance not available on reasonable terms, SBA activates its Economic Injury Disaster Loan (EIDL) program only.

Note: Physical Disaster Loans are not available under this type of declaration.



This declaration provides working capital for ordinary and necessary operating expenses.

SBA
U.S. Small Business Administration

Secretary of Agriculture Declarations (Sec-Ag)

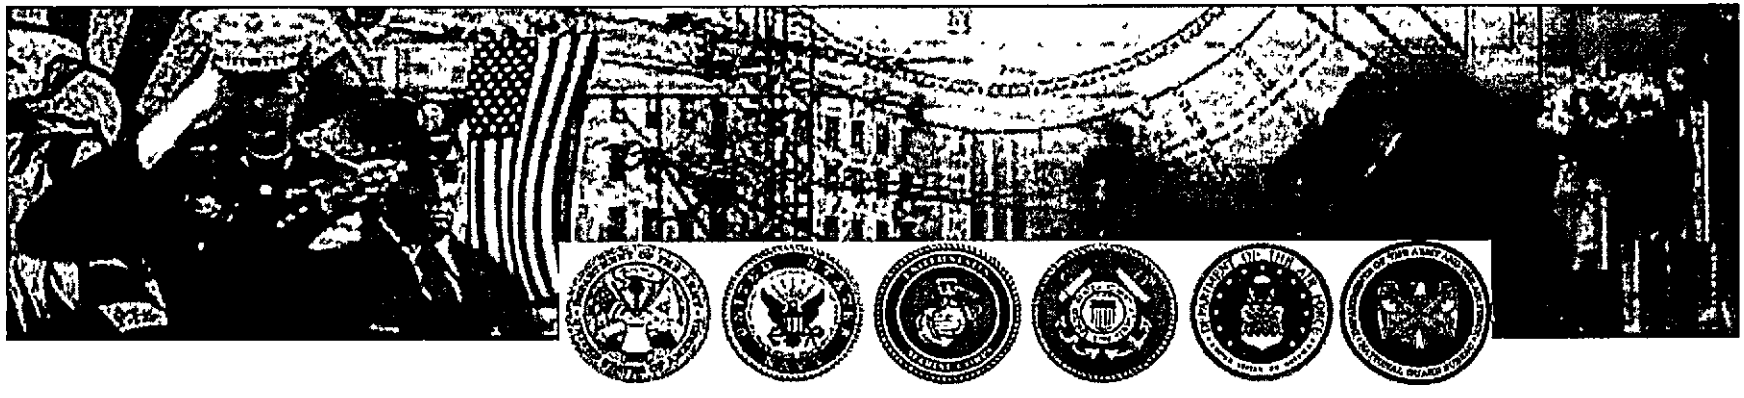
If the Secretary of Agriculture designates an area an agricultural disaster, SBA automatically activates its Economic Injury Disaster Loan (EIDL) program.

Loans are made available to eligible small businesses, small agricultural cooperatives and private nonprofit organizations that have suffered substantial economic injury as a result of the declared disaster.

SBA
U.S. Small Business Administration

Military Reservist Economic Injury Disaster Loans (MREIDL)

Eligible small businesses that are not able to meet their ordinary and necessary operating expenses because an "essential employee" is called up to active duty in their role as a military reservist can apply for an SBA Military Reservist Economic Injury Disaster Loan.



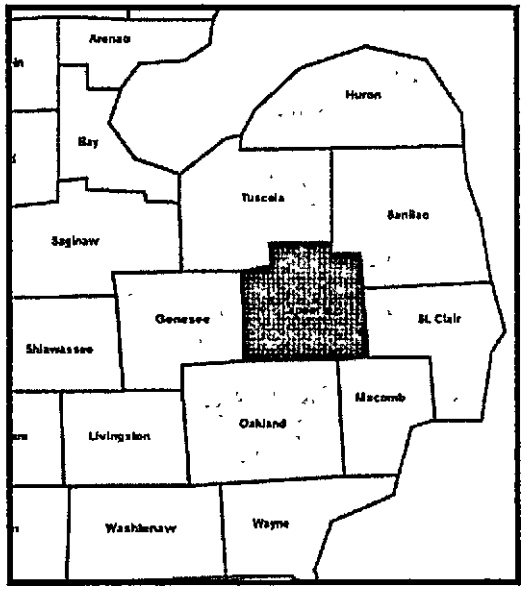
The filing period begins the date the essential employee receives a notice of expected call-up and ends 1 year after the date the essential employee is discharged or released from active duty.

U.S. Small Business Administration

Differences in Presidential Versus Agency Declarations

The declared disaster area and eligibility is different.

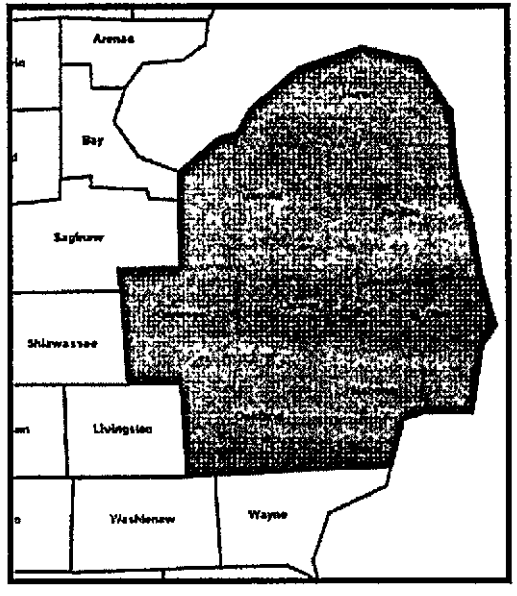
Presidential declaration (IA)



Indicates that SBA Disaster Loans for physical and economic injury losses are available in the "Primary" County.

Indicates that only SBA Disaster Loans for economic injury are available in "Contiguous" Counties.

SBA Administrative declaration



Indicates that SBA Disaster Loans for physical and economic injury losses are available in both the "Primary" County and "Contiguous" Counties.

SBA

U.S. Small Business Administration

How Much Survivors Can Borrow

Types of Loans	Borrowers	Purpose	Max Amount
Business Loans "Physical"	Businesses and private nonprofits	Repair or replace real estate, equipment, furniture, etc.	$2 million *
Economic Injury Loans	Small businesses & private nonprofits	Economic injury disaster loans or working capital loans	$2 million *
Home Loans	Homeowners	Repair or replace real property	$200,000
Home Loans	Homeowners & Renters	Repair or replace personal property	$40,000
Mitigation	Businesses, private nonprofits and homeowners.	Mitigate / prevent future loss to real property	20% of verified physical damage. Homeowners limited to $200,000.

*The maximum business loan is $2 million, unless the business qualifies as a Major Source of Employment (MSE).

SBA
U.S. Small Business Administration

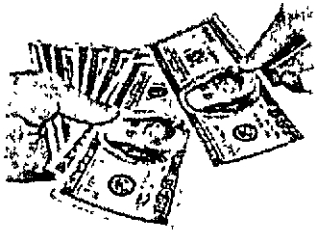
Features of SBA Disaster Loans

- Loan terms – Up to 30 years based on ability to repay; fixed interest rate.
- If approved, borrower can choose to use all, some or none of the approved loan amount.
- Relocation and refinancing may be considered on a case by case basis for businesses and homeowners

Requirements for Loan Approvals

- **Eligibility**
  - Damaged property must be in a declared county and owned by the disaster applicant.

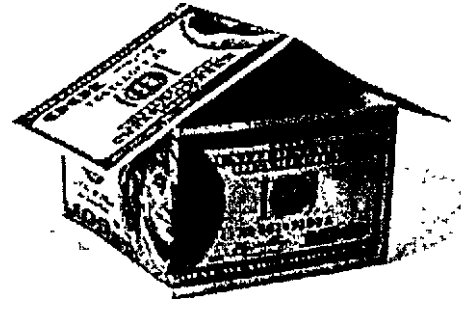
- **Credit History**
  - Applicant must have a credit history acceptable to SBA.



- **Repayment**
  - Applicant must show the ability to repay the SBA loan.

U.S. Small Business Administration

Collateral Requirements



Presidential Declaration:

- Physical loans over $25,000 require collateral

Agency (Administrative) Declaration:

- Physical loans over $14,000 require collateral

In All SBA Declarations:

- Economic injury loans over $25,000 require collateral

SBA will not decline a loan for lack of collateral, but requires collateral that is available.

SBA
U.S. Small Business Administration

The Three Step Process: Disaster Loans

In Presidential declarations, survivors should first register with FEMA at **1-800-621-3362 or www.disasterassistance.gov**

STEP 1:
Apply for Loan

There are three ways to apply:

- Apply on-line at SBA's secured website: https://disasterloan.sba.gov/ela;
- Apply in person at a recovery center; or
- Submit an application by mail.

SBA
U.S. Small Business Administration

The Three Step Process: Disaster Loans

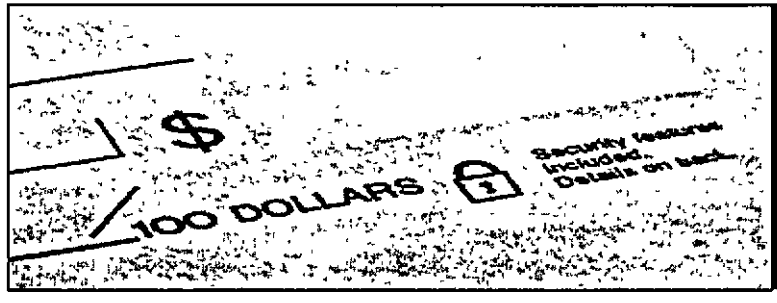
STEP 2:
Property Verified
and
Loan Processing Decision Made

Upon receipt of completed loan application, losses are verified and the file is processed to a decision.

If approved, loan documents are forwarded to borrower. The applicant is advised of appeal rights, if declined.

U.S. Small Business Administration

The Three Step Process: Disaster Loans



STEP 3:
Loan Closed and Funds Disbursed

Disbursements are generally made in installments after required loan closing documents are submitted.

U.S. Small Business Administration

SBA Resource Partners

Small Business Development Centers (SBDCs)

Women's Business Development Centers (WBCs)

SCORE Chapters

Work with SBA to help businesses recover from disaster.

U.S. Small Business Administration

SBA Resource Partners

Resource Partners are able to:

- Provide follow-up assistance to businesses whose disaster loan applications are either approved, declined or withdrawn
- Assist businesses in requesting reconsideration or reacceptance of a declined/withdrawn disaster loan application
- Provide management and technical services to disaster business loan applicants

Disaster Preparedness

Generally, it takes several years to build a successful business, but minutes or hours to be destroyed by a disaster.

Business owners should:

- Understand their vulnerabilities
- Plan for a disaster
- Periodically conduct drills to test the effectiveness of their plans

Are You Prepared for a Disaster?

- Blizzards
- Earthquakes
- Fire
- Floods
- Hail storms
- Hurricanes
- Power outages
- Pandemics
- Severe Storms
- Tornadoes

SBA
U.S. Small Business Administration

Disaster Planning & Preparedness

"A business continuity plan is an essential factor of a small company's long-term success and will contribute to the community's economic recovery in the aftermath of a disaster."

-Maria Contreras-Sweet
Administrator, U.S. Small Business Administration

SBA
U.S. Small Business Administration

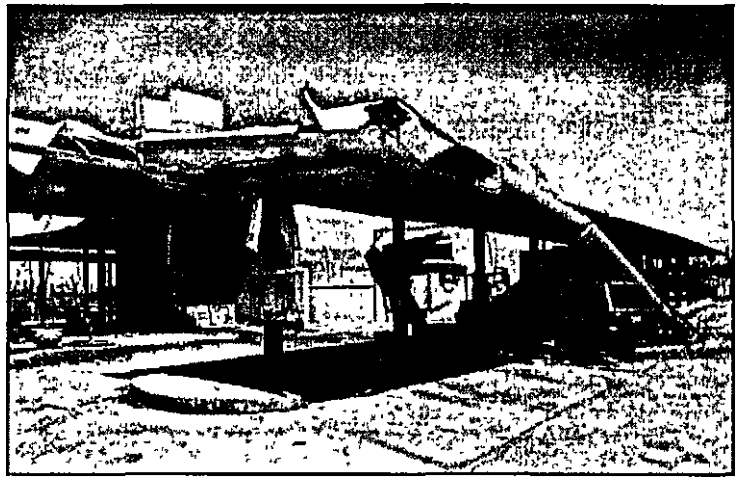
Why Prepare for Disasters

The Federal Emergency Management Agency (FEMA) estimates 40% of businesses do not reopen after a disaster, and of those that do reopen, 25% fail within one year.

SBA
U.S. Small Business Administration

Are You Disaster Ready?

Getting back to business after a disaster depends on how prepared you are today.



Small business owners invest significant time, money and resources to make their ventures successful. Emergency planning is important but maybe put on the back-burner in the face of more immediate concerns.

For small business owners, being prepared can mean staying in business following a disaster.

SBA
U.S. Small Business Administration

Are You Taking A Risk?

Do you have insurance?
What does your policy cover?
Is your coverage adequate?

Insurance should be sufficient to cover the cost to repair or rebuild your business or home.

Replacement cost of your property is not the same as its real estate value.

Coverage should include attached structures, such as a garage, storage building or deck.

Flood coverage and business interruption are normally separate policies.

Prepare a Business Disaster Toolkit

-Check insurance coverage, including business interruption.

-Communicate your disaster preparedness plan with all employees.

-Back up computer records often and store critical paper and electronic records off site.

-Make sure you have essential phone numbers for insurance agents, employees, vendors and customers.

-Consider using a website to post information about your business, so vendors and suppliers can stay informed.

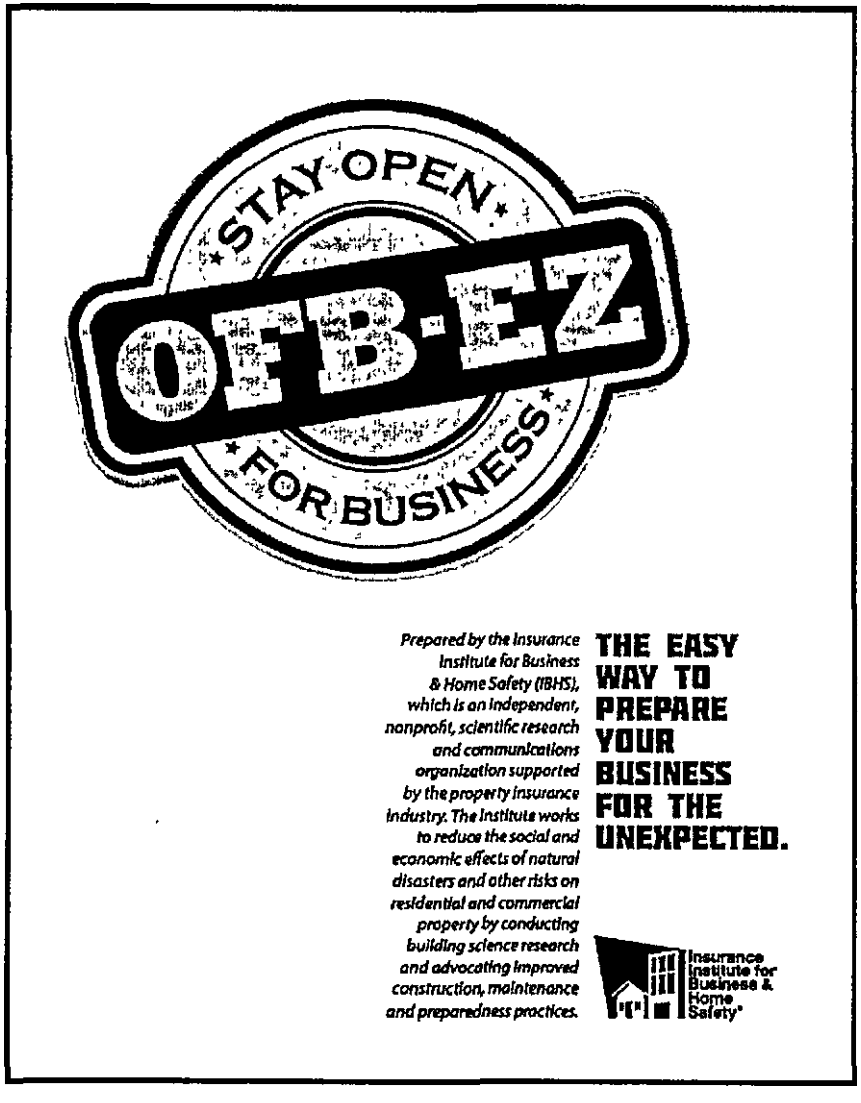
Prepare a Disaster Survival Kit

Begin by creating a disaster survival kit that is both waterproof and fireproof. Update it regularly. Include:

- Cash
- Non perishable food (3 day minimal supply) including a can opener
- Water for each person/pet (1 gallon per day, per person)
- First aid supplies and medications (eye glasses/contacts)
- Radio, flashlight, batteries, blankets
- Whistle to signal for help
- Sanitation supplies
- Basic tool kit

SBA
U.S. Small Business Administration

Disaster Planning Resources



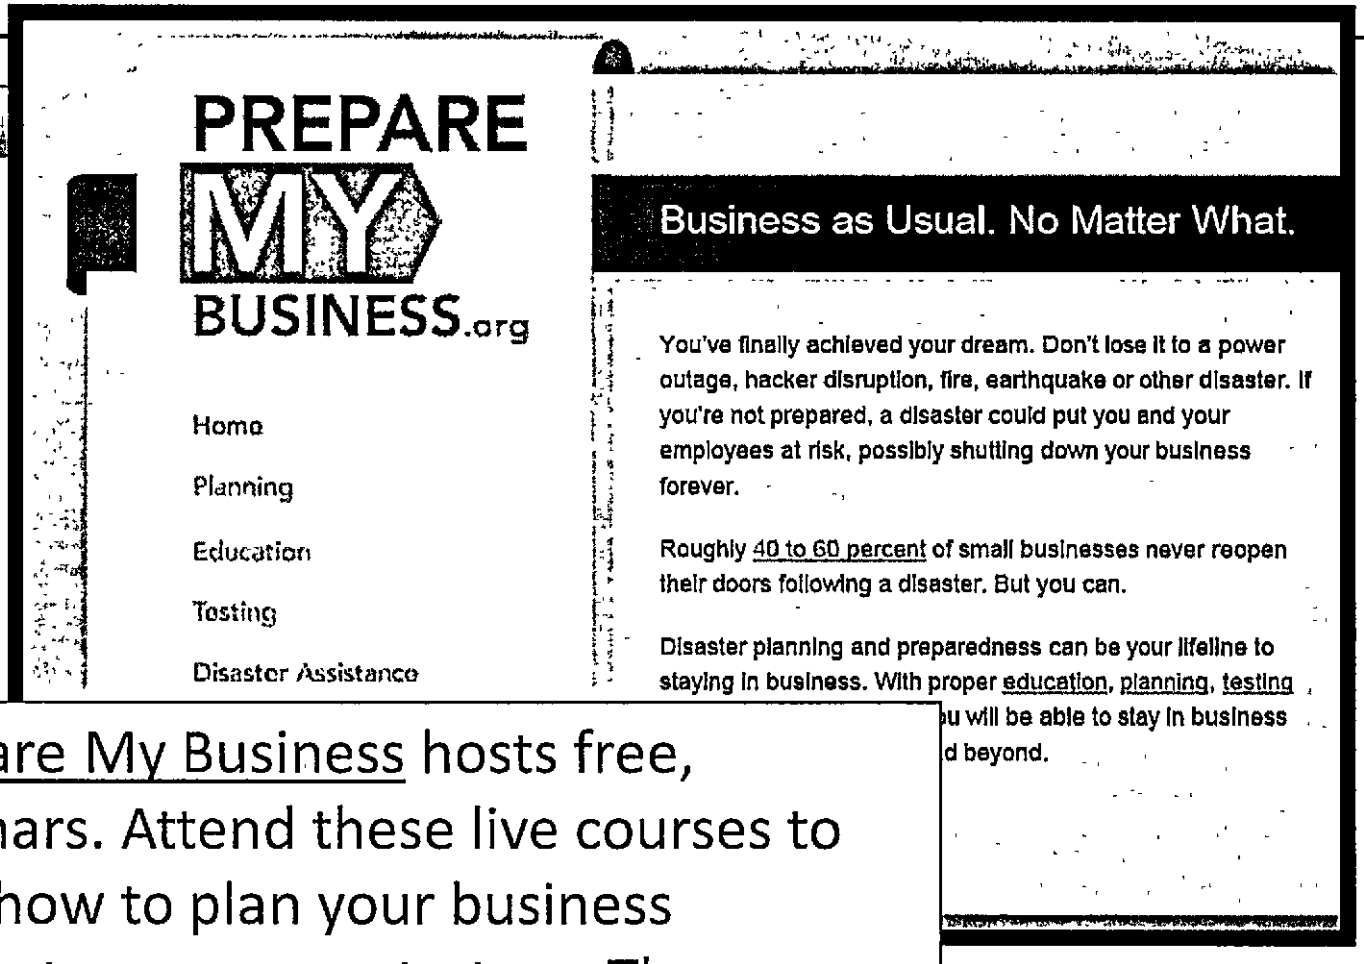
Look at the Insurance Institute for Business and Home Safety website and review the "Open for Business – EZ toolkit."

The information helps small businesses take the steps needed to keep functioning in the event of a major disaster or a smaller disruption.

SBA

U.S. Small Business Administration

Disaster Planning Resources



Each month, Prepare My Business hosts free, educational Webinars. Attend these live courses to learn more about how to plan your business continuity and disaster recovery strategy. The more you know, the more you can help reduce your business's risk and quickly recover in a disaster.

SBA

Flint Water Response Situation Report - As Of: January 26, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health

Response Phases and Timelines:

	Timeline (Week of)

Execution:

Key Locations

Team	Assembly Area	Hours of Operation
LEOC	Genesee County Administration Building 1101 Beach St, Flint	0830-1600

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Map Support

Maps will be provided daily to provide detailed information on city sections. Teams will target specific homes not originally reached during the first two rounds of canvassing.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

City of Flint-Water Contamination / Shortage

LEAD IN FLINT WATER

GENERAL INFORMATION

- The amount of lead found in some Flint homes' drinking water could affect kids' health.
  - o Even small amounts of lead can harm kids' health because they are still growing.
  - o Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using a National Sanitation Foundation (NSF)-approved filter.
  - o You can receive a free a NSF-approved filter if you use City of Flint water.
  - o Call 2-1-1 to find out where you can pick up a free water filter.
- Some filters can remove up to 99 percent of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
  - o Run only cold water through the filter.
  - o Change the filter cartridge as often as the instructions say.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop.
- Lead is hard to avoid completely. It can be found in water pipes and brass water faucets, old paint, in dirt, at some job sites, and in metal used for some hobbies.

There are a number of steps you can take to keep yourself and your family healthy. Use the tips below to learn more about how to stay healthy:

LEAD IN WATER

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- You can't see, smell, or taste lead in water.
- Lead won't change the color of your water.
- The only way to know what your home's lead levels are is by having your water tested.

LEAD IN BLOOD

- If your children live in Flint or go to school or childcare in the City of Flint, their blood-lead level should be tested.
- You should contact your doctor about testing.
- Testing is available for free at the Genesee County Health Department. Call 2-1-1 if you need help getting there.
- If you are pregnant or nursing, and you have tested negative for high blood-lead levels, it is safe to breastfeed.
- If you are pregnant or nursing and have tested positive for high blood-lead levels, talk to your doctor about the safety of breastfeeding.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

WATER FILTERS

- Get your water tested. It's free. Call 2-1-1.
- Use a water filter. Call 2-1-1 for a free filter.
- If you do not have a water filter, use bottled water for drinking and mixing formula.
- Use cold, filtered water for cooking.
- Wash fruits and vegetables with filtered water.
- If you must use unfiltered water, run the water for at least five minutes before you use it. To save time and water in the future, it's a good idea to fill up as many containers as you can once you've run your water for five minutes.
- Drain and flush your water heater tanks regularly to remove any lead that has accumulated. Follow manufacturers instructions for maintenance or contact a licensed professional for assistance.

CLEANING

- Wash dishes, bottles and toys with unfiltered soapy water and dry before use.
- It is safe to use unfiltered tap water to mop floors and wipe down countertops.
- It is safe to wash clothes in your washer and dryer.
- Use door mats. Take your shoes off when indoors.
- Vacuuming carpets may pull more lead dust to the surface. Use a non-motorized sweeper to clean carpets.
- Clean windowsills and play areas often with paper towels and soapy water.

FLINT WATER RESPONSE TEAM

www.michigan.gov/flintwater

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

IN THE BATHROOM

- Use filtered tap water to brush your kids' teeth.
- Adults can use unfiltered tap water to brush their teeth.
- You can use unfiltered tap water to shower or bathe, but don't let kids drink the water when they play in the tub.
- Studies done by the Centers for Disease Control and Prevention show that parents can continue bathing their children in the tub but bath time should be used for bathing only, rather than allowing children to play in the water for a long time.
- Lead will not cause rashes or other skin problems. However, if levels of chlorine or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

CARING FOR PETS

- Use filtered tap water for your family pets' water bowls.
- You can use unfiltered tap water to bathe your pets.
- If you notice your pet acting differently than normal, contact your vet.

HEALTHY DIET

- Eat foods high in iron, calcium and vitamin C.
- Wash hands with soap and warm water before eating.
- If you need fresh and healthy food, call the WIC office at 810-237-4537, or for SNAP food assistance apply at www.michigan.gov/mibridges or visit your local Michigan Department of Health and Human Services office.

GOOD SOURCES OF IRON INCLUDE:

- Lean red meats, fish, and chicken
- Cereals with added iron
- *Dried fruits (raisins, prunes)*

GOOD SOURCES OF CALCIUM INCLUDE:

- Milk
- Yogurt
- Cheese
- Green leafy vegetables (spinach, kale, collard greens)

GOOD SOURCES OF VITAMIN C INCLUDE:

- Oranges, orange juice
- Grapefruit, grapefruit juice
- Tomatoes, tomato juice
- Green peppers

LEAD INFO

The Flint water response team is focused on the lead in water crisis. In additon to water, scientists have long been concerned about all sources of lead including lead paint, dust, soil, etc.

LEAD PAINT

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

DIRT

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.

DUST

- The dust in your home can have tiny amounts of lead from paint and dirt.

HOBBIES AND JOBS

- Solder, fishing sinkers, bullets, and stained glass framing materials are some items that may contain lead. You could also track home lead dust from your job site.

HAVE QUESTIONS?

- For more information about protecting yourself and your family from lead, visit www.michigan.gov/flintwater.
- To find out where you can get a free water filter, call 2-1-1.
- For a free water test, call 2-1-1.
- For more information about lead in your home and what you can do, call the Michigan Department of Health and Human Services at 1-800-648-6942.
- For information on how to help, visit www.helpforflint.com.

The following Flint food establishments have received compliance checks and have been found to be following the requirements for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.

Inclusion of businesses on this list does not represent endorsement of the businesses by the Michigan Department of Agriculture and Rural Development, nor does it guarantee food safety at these facilities. The companies listed have demonstrated they are taking precautions to reduce the risk of foodborne illness from water that may be contaminated, as outlined in the Michigan Food Law and Michigan Modified Food Code.

Flint Food Establishments Verified to be in Compliance as of January 22, 2016:

Assessment Date	Name	Street Address	Zip Code
1/21/2016 18:16	4 way party store	1302 DuPont	48504

FDD Flint Water Emergency Response

Incident Action Plan

Department of
AGRICULTURE
& Rural Development

Operational Period

01/25/2015 0500 to 01/29/2016 1700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From: 1/25/2016	Date To: 1/29/2016
FDD Flint Water Emergency Response		Time From: 0500	Time To: 1700

3. Objective(s):

- Ensure responder and public safety
- Schedule and perform water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct risk-based compliance/enforcement assessments at food establishments on the City of Flint water supply for adherence to current MDARD water source requirements
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

4. Operational Period Command Emphasis:

- Site visits will be conducted in teams of two inspectors, to address possible community anger issues. Be mindful of safety while out in the field. Immediately contact your ICS supervisor or the Safety Officer (Tom Tederington) with any concerns.
- Be aware that the FDD response is taking place within the scope a much larger state and local response effort New information may come in at any time, everyone's flexibility is appreciated.
- Follow the chain of command as appropriate. It will help us stay as organized as possible.
-

General Situational Awareness

Inspectors encountering potentially violent situations should leave the area immediately. All needing access to Flint Water Plant need to have access cards issues. Flint weather for the operational period.

MON Jan 25	42°/33°	Mostly Cloudy	10%	S 12 mph	63%
TUE Jan 26	36°/25°	AM Snow Showers	50%	W 15 mph	82%
WED Jan 27	30°/22°	Mostly Cloudy	20%	W 10 mph	65%
THU Jan 28	37°/27°	Partly Cloudy	20%	SW 14 mph	71%
FRI Jan 29	37°/29°	Mostly Cloudy	20%	W 9 mph	84%

Requirements for Licensed Food Establishments Using City of Flint Water

January 13, 2016

Attention: This applies to licensed restaurants, grocery stores, convenience stores, food processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test." Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 a.m. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. Then flush other equipment such as pop machines for at least 1-2 minutes.
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

All -

If a PSA or any outside messaging is developed, it needs to be coordinated through the joint information center. Additionally, I think a discussion with DCPAH would also be warranted.

We have consistently said that companion animal owners should be following the same recommendations for their pets as they do for themselves as well as urging owners to work with their veterinarian.

I have looped in the JIC as well.

Jen

>
> As additional information, we are already working on crafting more comprehensive messaging. Lead toxicity is a reportable condition to the State Veterinarian's office. We have already contacted nearly all veterinary clinics in Genesee County with information about lead toxicity and the state's already established reportable disease program. The most important thing people can do for all their pets is to assure they follow the same drinking water guidelines as for people.

Kay,

Can you take a look at the below email and consider adding the requested information into your PSA for pets?

"ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link."

Genesee County Animal Control has a basic outline already created if needed.

Thanks,
Gabe

Please work with agriculture on the issues identified below. Can we develop some sort of PSA that addresses these concerns?

If we don't assist I believe they will move forward without our messaging...

Subject: RE: Information for pets

Michelle:
Thanks for getting into this so quickly – funny thing is, this document/link is something I've never seen before, can you tell me where/how it's published, so I and my staff can direct people to it? I think it looks great and the fact that it's out there gives us some traction right out of the gate.

ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link. I don't know if that's something that you're capable of; in what venue or in what form, or if you're even interested at this point.

I have a basic outline from our Shelter vet if you want it. Please advise....and thanks again!

Paul,

Please see the fact sheet below

http://www.gchd.us/docs/Popular_Pages/Lead/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

This appears to be the extent of the messaging on animal safety. There is a little section in this PDF. This same information is also being included in a new flyer from the state.

Do you find this an appropriate first step in message? What additionally would these special interest groups like to see as far as messaging is concerned?

Subject: RE: JIC inquiry on Flint water's impact on puppies' growth, reproductive health

I spoke with Mr. Smith and had a productive conversation. He breeds German Shepherds for police and protection purposes. He is part of a large network of breeders with a similar interest. He indicates dog owners are interested in blood testing their dogs to determine lead levels. He suggested the use of SART to coordinate locations and people for collecting samples. He would be interested in a research project and believes there would also be interest from 20 some breeders in his network. He indicates that with the poverty level in Flint being about 50%, many pets are not getting routine veterinary care and people cannot afford to have their pets tested for lead. I let him know we were working on additional information about lead toxicity in pets and will send him the information next week. Mr. Smith provided me a phone number of an engineer that was at his house recently to check his water filter. He said the engineer was familiar with the incident of lead in water in Washington DC. I plan to call the engineer next week to see if he has any information on the impact to animals related to that incident.

MSP-EOC-MDARD

From: Deacon, Brad (MDARD)
Sent: Friday, January 22, 2016 5:04 PM
To: Clover Adams, Jamie (MDARD); Wenk, Gordon (MDARD); Blakely, Matthew (MDARD); Besey, Kevin (MDARD); Walker, Sandra (MDARD); Tederington, Thomas (MDARD); Slater, Steve (MDARD); Averill, James (MDARD); Frank, Nancy (MDARD); Johnson, James (MDARD); Alessandri, Gina (MDARD); VanBuren, Craig (MDARD); Fritz, Kay (MDARD); MSP-EOC-MDARD; Holton, Jennifer (MDARD); Anastor, Peter (MDARD); Dethlefsen, Richard (MDARD)
Subject: today's update

This is what was shared in the State of Michigan Situation Report for today:
Friday, Jan. 22 - 1) MDARD is continuing their assessments and water sampling at food establishments. We are talking with businesses about their needs and potential needs before making resource requests. 2) MDARD is coordinating closely with FDA-Detroit District Office and sharing information for possible joint activities. 3) Animal Industry Division has been calling veterinary clinics in Genesee County and talking personally with veterinarians and staff. 4) MDARD is coordinating with MDEQ to get water lead level results to food businesses faster.
MDARD response strategy is to assess all designated as high and medium-risk establishment; 100% assessment and water sampling of high-risk establishments. Total Number of Establishments Planned for Assessments for MDARD Food & Dairy (FDD) and Genesee County Health Department (GCHD): 175 (FDD-84, GCHD-91)
High-Risk- 19 (8-GCHD, 11-FDD), Medium-Risk- 156 (83-GCHD, 73-FDD)

Cumulative totals:

95 assessed to date
67 found in compliance (working with those other businesses on specific needs)
18 water samples have been collected
26 assessment will require follow-up visits within 10 days

58 calls have come in for scheduling water sampling appointments.

In addition,

- MFQ/W&M completed personal notification of all licensed gas stations (Kay, you can mention that in tomorrow's a.m. briefing).
- We've received questions on potential impacts to commercial agriculture (have not been able to identify any taking place in the area), and potential impacts on small scale / urban / backyard production. <u>We need to identify someone to be the lead on reaching out to those networks</u>.
- The Jan 13 Requirements document is now up on the State of Michigan site.
- We've identified back-ups in FDD's Incident Management Team to take on roles for Monday so managers can attend the MDARD Managers Training
- We're working on additional guidance on animals to help address questions from veterinarians and the public
- Need to further determine what kinds of assistance food businesses are asking for.
- Kay Fritz will be back in the SEOC for Saturday and I will be there Sunday.
- FYI – the State Emergency Operations Center will be moving over the next week to the new facility at the Secondary Complex.

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: Daily Summary

Kay,

Our Food & Dairy response strategy is to assess **all** designated as high and medium-risk establishment; **100%** assessment and water sampling of high-risk establishments. **Total Number of Establishments Planned for Assessments:** 175 (FDD-84, GCHD-91)

High-Risk- 19 (8-GCHD, 11-FDD), **Medium-Risk**- 156 (83-GCHD, 73-FDD)

Cumulative totals:

95 assessed to date
29 establishments were found in violation of Food Code 5-101.11 (A) "Water obtained from an approved source...."
28 do not have an approved water filter in place
20 Are not flushing water lines as required
17 Are not using bagged ice in drinking water
7 are not using cold water as required
67 found in compliance
18 water samples have been collected
26 will require enforcement follow-up visits within 10 days

58 calls for scheduling water sampling appointments.

Subject: RE: Question on Priority for MDARD Samples

I agree that the food establishment samples should take priority over the residential samples provided that there is some balance. We have made a commitment to turn the residential samples in three weeks but that includes the time needed for the Flint WTP to take our report, and then make the modifications etc. that they do and then send those out to the residents.

I have copied Mike Glasgow on this e-mail so that he is in the loop and so that we can ensure that he has the resources he needs to get those reports turned around. Mike, please let the EOC know if you have resource needs for getting the reports out. I think we identified this need earlier but I want to ensure that nothing falls through the cracks.

Based on the information below I suggest that the MDARD samples from each shipment be put to the front of the line of all the samples within that individual shipment. They should not however, be placed in front of samples from previous shipments. Let's try this initially and see how it works. We can make modifications as we go along if necessary.

Thank you everyone!
George

Subject: Question on Priority for MDARD Samples
Importance: High

Hi George

Kirby asked a good question about whether the lab should put a higher priority on analyzing samples from the food establishments submitted by MDARD than the residential water samples. Subsequent discussion with DARD here at the EOC also raised questions about turn-around time for results.

DARD and I just spoke with the Captain and asked his thoughts. He suggested running up to you/Director.

My recommendation is to make the food establishment (restaurants, grocery stores, c-stores & food processors) *samples a higher priority, particularly to minimize further economic impact.* I also recommend we seek 5 day turnaround time. My understanding from DARD is that the DARD samples are taken to the water treatment plant and shipped with the rest of our samples but put in a separate box labeled MDARD.

Do you concur with the strategy to put a priority on these samples and seek a 5 day turnaround?

Also had an inquiry confirming there are no dairy farms on city water – (Confirmed with Barb Koeltzow; also there's no dairy processing there).
We do not have any commercial livestock farms on City of Flint water; it would be unusual and generally economically infeasible for commercial livestock to be any municipal supply rather than on a well. Talked with John Hill about commercial greenhouses – he doesn't think so but will confirm with the area inspector. I can't imagine that any commercial field production would be using municipal water in Flint – or any other city.
That said, we don't and would not know what numbers there are for backyard chickens – for that we have been pointing back to the existing guidance on providing pets/animals with filtered water.
We also wouldn't have lists of urban gardening; we can connect again with the Flint Farmers' Market to see what inquiries they're getting.

Subject: SEOC Request on Pet Information

Hello,

If we are distributing a document to shelters and other organizations in the Flint area about pets we would like to use the following already existing document:
http://www.michigan.gov/documents/deq/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf?20160121171248

It has sufficient information on pets (page 2), covers the human aspects and also points them towards important resources for filters.

MSU CVM is working on a shareable, public-facing graphic we can also give to our clinics, shelters and other pet organizations to use for further client education, which I will share with the JIC.

In addition, we will begin working on information for veterinarians on lead and testing, which we will send through the JIC for approval when it is drafted.

Please let me know if this satisfies the request from the SEOC.

Thank you,

Talked to the Education rep here at the SEOC. While initial contacts have been made to schools, their flyer is in the approval process and hasn't yet been distributed. I've copied the contact info and web addresses on it that has content on the web for people to see:

For more information on childhood lead poisoning prevention:

I'm looking for the stuff that DHHS sent out, no luck yet. Will keep looking. Talked to LARA (who licenses day care center) and they have not sent anything out directly, but are referring people to the Flint Water Website. They are currently calling all their licensees in the affected area to make sure they are aware of the issue (who isn't?) and that they know of the Flint water website. I believe once the flyer is done, all agencies will be using it. We'll make sure you get a copy once it's finalized.

Subject: Lab questions from MDARD

Hi Jen,

A couple questions for you:

1. Is the DEQ list of certified labs acceptable to consider water testing submitted by establishments as acceptable.
2. Is the EPA is taking over water sampling, what is their objective and if so, how will this impact MDARD's sampling activities at City of Flint food establishments. (*MDARD is scheduling water sampling through to* February 5, 2016.)

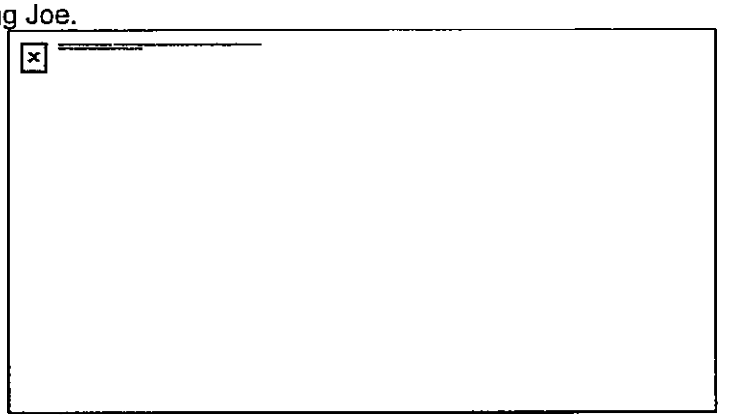
How we are fixing the Flint water crsis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

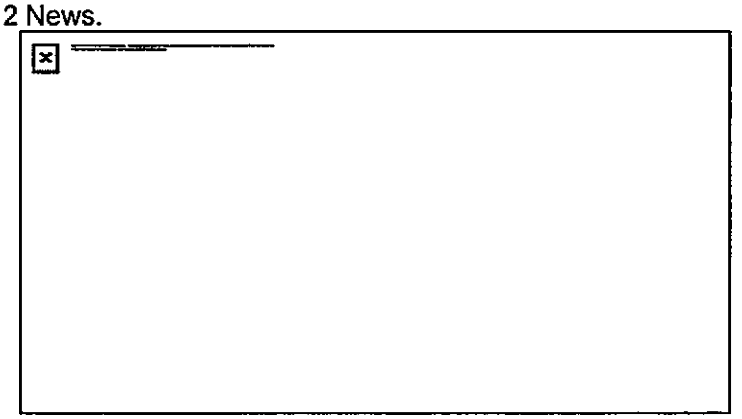
"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.



Governor Snyder with Charlie LeDuff on Fox 2 Detroit

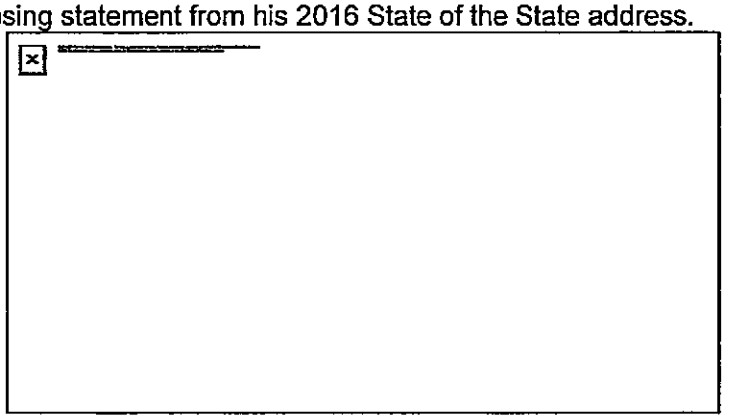
"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

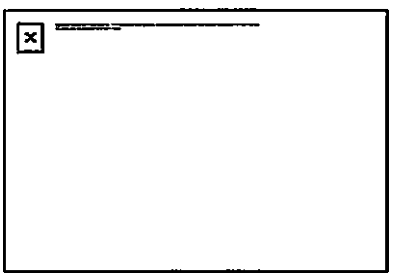


Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.



Governor in USA Today: "I will fix this, and I mean it."



"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." **Click here to read the Governor's full op-ed.**

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. **Click here to read the full story in the Washington Post.**

Cc: Thursam, Lisa
Subject: Flint Water update from DET-DO
Attachments: Flint firms inventory.xls

Good afternoon, MDARD,
In the interest of having a common operating picture, I wanted to have this call, and provide everyone with some updates from our end, and hear any updates from your end.

Here's a little background from October, when intel indicated that switching from Flint River water back to Detroit City water would resolve contamination issues. We worked with inventory lists from our database and MDARD's provided by Kevin Besey, and identified food processors to assess. See attached list- note that duplicates were removed and items in blue are firms that do NOT appear in our inventory, but MDARD only. I also removed all retail locations and warehouses from MDARD's list.

The information obtained in phone calls to the following locations did not lead us to believe that additional follow-up was necessary at the time. The locations contacted by phone in early October were:

FEI Number	Firm Name	Address
1813635	Balkan Baking Co	1325 W Dayton St
3004783968	Country Home Creations	G-5132 Richfield Road
1823089	Donlan Fish & Seafoods, Inc.	3116 Corunna Rd
3004028327	Frito -Lay Inc., Distribution center	6400 Taylor Dr
3007920139	R & J Almonds, Inc.	G4254 Fenton Rd
3005946886	R & J Almonds, Inc. DBA Jonny Almond Nut Co.	3341 S Linden Rd
1821882	Real Treat Popcorn Co.	431 Asylum St
3004667081	Spring Mountain Water Co.	425 S Dort Hwy

With new information in January, we determined additional follow-up was necessary at Donlan and Spring Mountain, as well as some ITP locations (Delta, Envoy-American, Southwest, United, AvFlight, and a blood bank (ARC).

- completed site visits to the ITP locations of concern determined that they are supplied by Flint Twp water, per a statement from the Airport Authority and their water bills
- On 1/20/16, we conducted site visits to 2 processors, summaries are below:

Spring Mountain Water Company:
The firm bottles two types of water- Purified Spring Mountain Water and Natural Spring Water. The Purified Spring Mountain Water is bottled with the Flint city municipal water (75% business), and the Natural Spring Water (25% of business) is bottled from Pinegrove Springs located in Lancaster, OH (received via bulk tanker). All products are distributed within Michigan only, with 98% of the business being sold retail from their on-site storefront. The bottles are returned after use and are rinsed with the city water that has been carbon filtered and softened only.

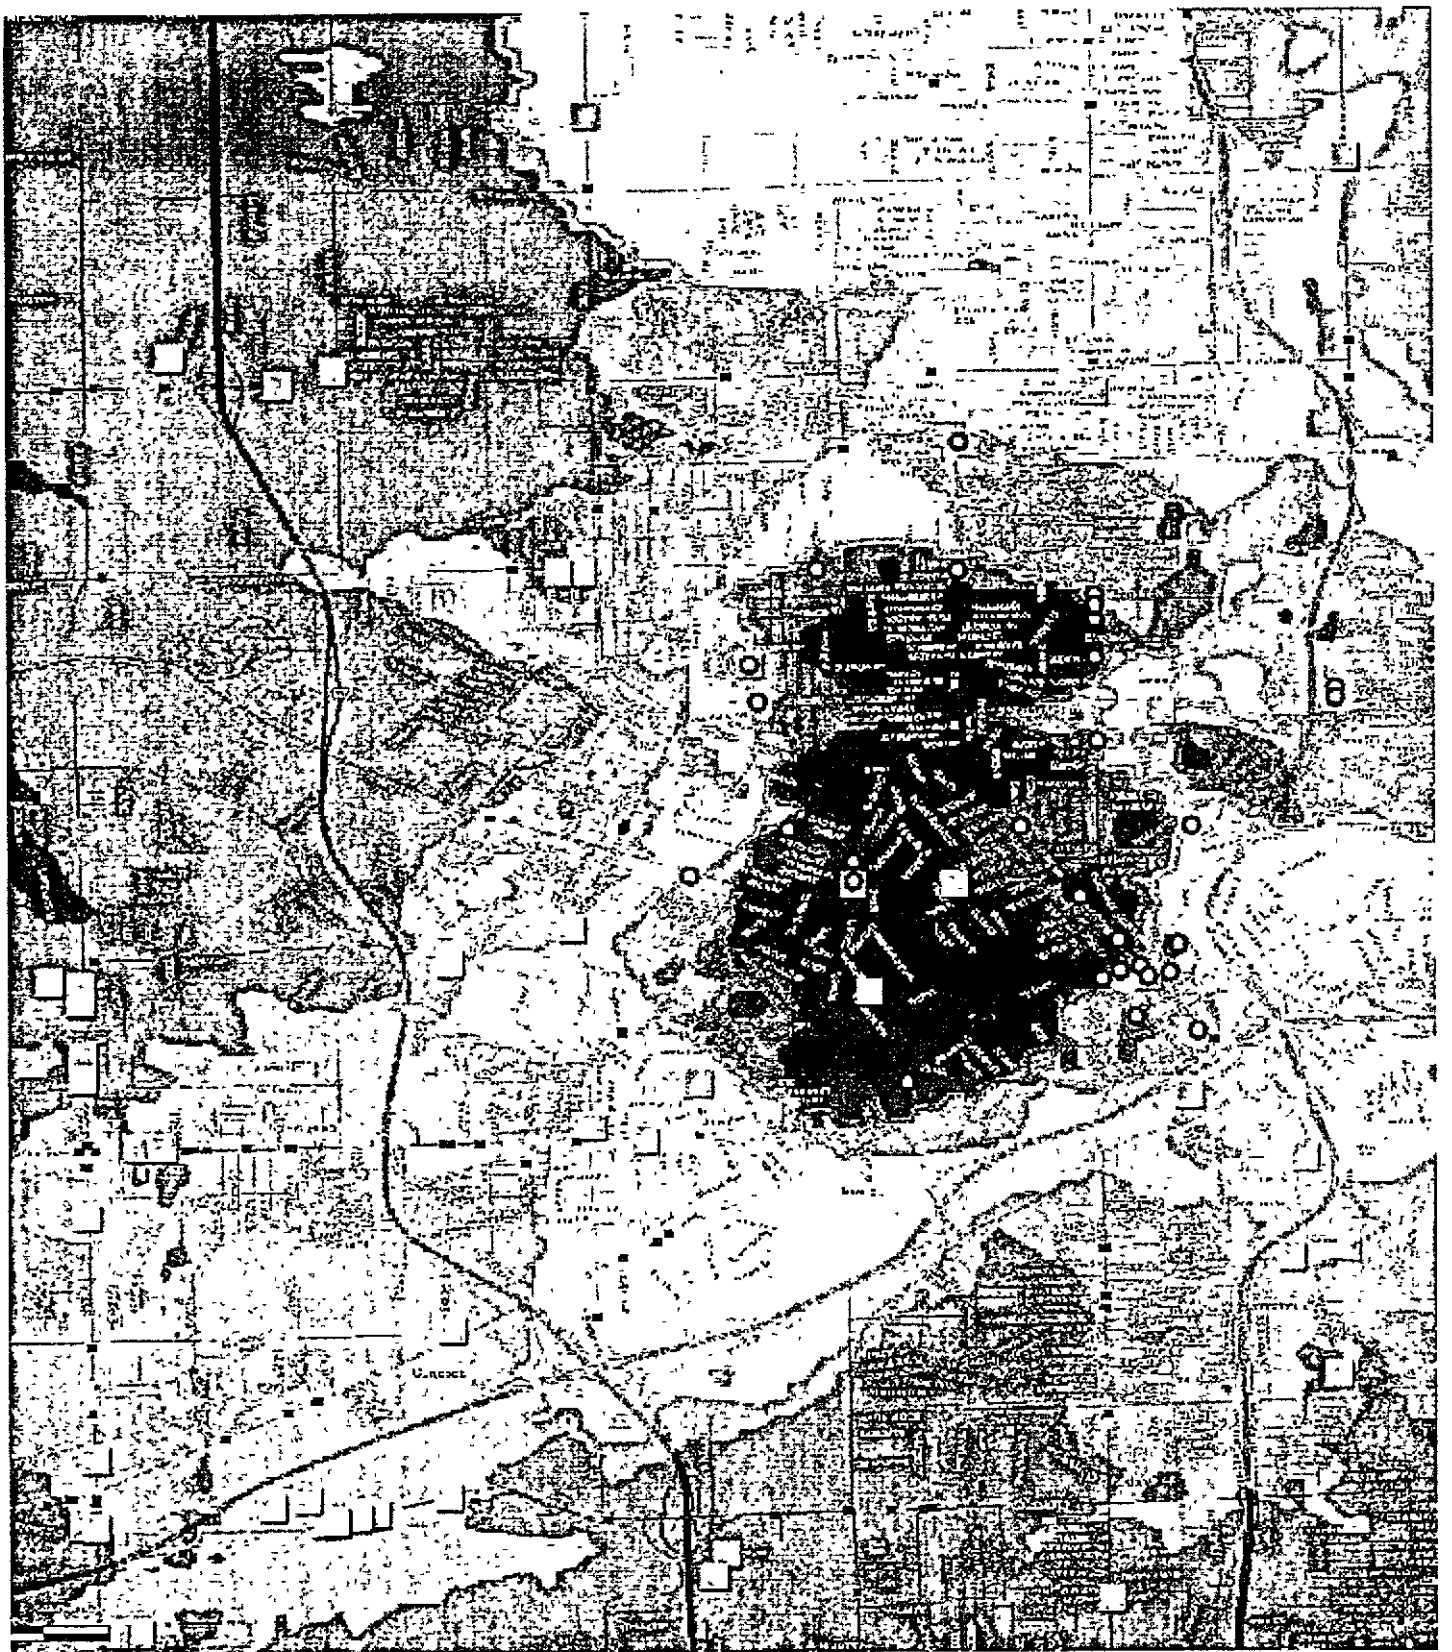
The city water used for the Purified Spring Mountain Water is treated with reverse osmosis, carbon filtration, and softening units. On 10/9/15, finished product samples were tested at the firm's on-site certified laboratory and was

found with no detectable lead present. I received a copy of these test results. Results for source water on 10/2/15 (by her lab) show this facility and surrounding facilities in the areal returned no detectable lead results. The water has a 2 year expiration date.

The firm was provided the MDARD guidance document and encouraged to contact MDARD to take a current water sample to test for lead, as all batches of water are currently tested for microbial content only (not for lead). Firm management indicated they would test the water again for the presence of lead in the near future just to make sure nothing has changed since October.

Donlan's Fish & Seafood:
Firm is 70% retail from the on-site storefront and all products (including wholesale) are distributed within Michigan only. Firm continues to use the Flint city municipal water for processing of fish at the facility. The ice machine is connected to this water, and ice water baths are prepared for washing and chilling the fresh fish when processed. The water used at the firm is not treated or filtered at all and has not been tested. Firm management was given MDARD's guidance document, and they indicated that they were not aware of any of these requirements, and expressed appreciation. Management committed to contacting MDARD that day (1/20/16) to schedule water testing, and indicated they would follow the recommendations until results were received.

Our inventory (yellow squares) in an overlay of MDARD's:



I realize it's impossible to read... but the idea is, a lot of our inventory is not located in the "hot zones". The firms that are, are not using the water, thankfully (X-ray, dental supply, mammography clinic).

I'll explain more on the call.
Thanks,
Lisa

I really threw a wet blanket on that discussion today, didn't I? I am confused by the materials because I did think it had to be heme-iron and the materials we are using don't say that. Oh well.

However, we received an inquiry from the MAND media spokesperson chair, Sheryl Lozicki. She asked if there were any talking points on the issue and if 'we' needed any help from the spokespeople to get the message out through their media contacts. I think this is a great idea but want to be sure the info provide to them is what everyone agreed to and maybe the direction should come from someone at the State level.

What do you think? Sheryl's email address is below if you want to talk to reach out to her directly or if you can tell me who is running the show on this, I can contact them. Otherwise, I will tell them to say 'drink milk. Lots of it." (Kind of a Jim Harbaugh quote). Seriously, we want to speak in one voice so if I can help, let me know.

Thanks, Kathi

FOR PLANNING PURPOSES: Thursday, January 21, 2016

Contact: Ken McClure, The Kroger Co. of Michigan, 248-536-1519
Sheila Burkhardt, Michigan Milk Producers Association, 248-474-6672, ext. 208

NEWS ADVISORY: Michigan Milk Producers, Kroger to deliver 12,000 gallons of milk to help Flint families

FLINT, Mich.— **Tomorrow,** Friday, January 22, the **Michigan Milk Producers Association** and **The Kroger Co. of Michigan,** in cooperation with the **Pediatric Public Health Initiative,** will deliver 12,000 gallons of milk to the **Food Bank of Eastern Michigan** for distribution to families impacted by the Flint water crisis.

Foods rich in calcium, iron, and vitamin C, including calcium-rich dairy products, can help protect children and families from the harmful effects of lead poisoning.

Please note that this media event is the delivery of milk to the Food Bank – the Food Bank will be distributing the milk in the coming days to ensure that it reaches families impacted by the Flint water crisis. The Food Bank will not be issuing milk directly to the public from their warehouse. Milk will be delivered to partner agencies in Flint and available at those locations.

WHAT: **Delivery of Michigan milk to the Food Bank of Eastern Michigan**

WHEN: **Friday, January 22, 2016**
2:00 p.m.

WHO: **Ken Nobis, Michigan Milk Producers Association**
Ken McClure, The Kroger Co. of Michigan
Bill Kerr, President, Food Bank of Eastern Michigan
Jeff Dwyer, Michigan State University Extension
Dr. Mona Hanna-Attisha, MD, MPH, Pediatric Public Health Initiative,

Hurley Children's Hospital and Michigan State University

WHERE: **Food Bank of Eastern Michigan**
2312 Lapeer Rd
Flint, MI 48503

Key message should be the following

Take same steps for pets as is being done for humans

Use filtered or bottled water for pets to drink

If pet acting abnormal work with your local veterinarian as signs and symptoms of lead poisoning similar to other diseases

> Hey Brad,
>
> I'm in the JIC and have asked a few people and looked and haven't been able to find the guidance document on the water website. Could you send me a link? Kristin is willing to help create something by tomorrow, however her information would revolve more around symptoms, diagnostics and treatment options for lead poisoning. I did see in the talking points that filtered water should be given to pets for drinking water. Just clarifying what is needed and what's already out there.

Kay – Directions about animals have been included in messaging materials since at least last October; there's an outline of a dog on the guidance document on the flintwater website with a message about water for pets. I'm not clear if they're asking for a pets specific document or asking if we think there's a need for one.

Also, when you send these it is good to put your name above the signature block.

Attachments: Water Handout 2016_Jan 13.pdf

http://www.michigan.gov/documents/deq/deq-flint-water-handout-pdf_503630_7.pdf?20160121171248
Is under: "In Your Body"
That document was updated last week – the version we're using now has January 13, 2016 at the top.

Note – we have noticed that if you click on the link to the nsf.com site from the pdf it takes you to the right place, but if you highlight, copy, and paste into a browser it seems to produce an error message on the www.nsf.com site. However, if you're on the site and search for "Flint" in the search option, the guidance on filters comes right up.

Subject: RE: SEOC Update - Filters for restaurants

Kay – For the time being if a report is necessary tomorrow morning, you can relay tomorrow that it is not feasible to provide a filter to food businesses during our inspection because there are many, many types of filters that vary considerably based on the differing types of equipment. In our site visit assessments we are looking at the plumbing system and talking with the businesses about water flow. The types of filters used by businesses, especially inside of pop or ice machines, are not going to be like what is being provided to homeowners for residential use. Some of the businesses we are visiting already have filters in place. Tom – could you please ask some of our inspectors what they're hearing from the businesses we've been to about this?

On the handout: you are not correct about the link in the document. It just worked for me; if you click on the link of the pdf document. The domain name is www.nsf.com and is correct. Unfortunately, if you cut the address out of the document and paste into a browser window there is an error message. I get the same error message if I cut and paste directly from their website into a new browser window, so that appears to be on their end.
From www.nsf.com if you search for "Flint" the page we reference will come up.

Subject: SEOC Update - Filters for restaurants

Sorry if I've left someone off this list. Please forward as needed.

Today at 4:00 briefing Captain K. asked about providing filters to restaurants – so that it doesn't get shut down if it's not in compliance, and that we help it immediately by providing filters.

So, don't know how you want to address this concern – please get together and decide on an action. I will need to report on this tomorrow at 9:30 AM, or at least tell him we're working on it.

I did read the Jan 13 "Requirements" doc that we sent out with the letter from Kevin and the web address in the middle of the sheet is not quite correct. The "nsf.com" part doesn't work – at least not on my laptop today. If I substitute www.nsf.org for that part then it does work.

I will be out here at the SEOC tomorrow so let me know what you think/want to do about this.

Thanks!

Kay.

Subject: Op MDARD Summary

Kay,

As of today, 55 food establishments have been visited by the Food & Dairy Division field staff for initial assessments against the "Requirements for Licensed Food Establishments Using City of Flint Water". 21 firms were identified as being on the high-risk list, 34 are not.
21 establishments were found in violation of Food Code 5-101.11 (A) "Water obtained from an approved source...."
19 do not have an approved water filter in place
12 Are not flushing water lines as required
7 Are not using bagged ice in drinking water
5 are not using cold water as required
36 found in compliance
13 water samples have been collected
18 will require enforcement follow-up visits within 10 days

No report available on calls for scheduling water sampling appointments.

Subject: *Staging location*

To Whom it may concern,
I would like to request a location change to our staging area. The Genesee County EOC was initially selected as MDARDs staging location, unfortunately they don't have a means to secure our supplies. I would like to request the Flint Water plant as our staging location. It's located at 4500 N Dort Hwy, 48505 (810) 787-6538. Since this is already designated as our water sample drop off site this location would be the best location.

Thanks,

Subject: Lab Resources
Importance: High

Kirby,

I would like to ensure that we do not fall behind with respect to samples due to resource needs. As we discussed we will likely need at least 4 people to assist at the DEQ Lab to make sure we make good on our commitment to process 400 samples a day 7 days a week.

In looking at the Lab backlog and the number of samples that need data coding I can see that things are ramping up. I would like you to contact Ronald Ray at LARA and Craig Van Buren at MDARD and ask for 2 people from each lab. I would like for these resources to be deployed today if possible and no later than tomorrow. I see a very significant rise

in samples coming in the very near term and we need to respond proactively. I would like to see the necessary training occur before we are in crisis mode.

Thank you!
George

Good Morning Everyone!

Attached is the long awaited spreadsheet that contains all the LHD and FDD establishments that are in the "HIGH" and "MEDIUM" Risk zones.

There are multiple tabs across the bottom of the document.

- *High Risk*
  - *Combined list of all LHD and FDD Establishments in the "HIGH RISK" zone.*
- *Medium Risk*
  - *Combined list of all LHD and FDD Establishments in the "MEDIUM RISK" zone.*
- *All MDARD Flint Establishments*
  - *Complete list of ALL the FDD locations in Genesee County.*
- *ALL LHD Flint Establishments*
  - *Complete list of ALL the LHD location in Genesee County.*
- *ESRI Map of Locations*
  - *GIS Map of all the locations. There are no zones marked out in this map, but the different risks are color coded, and the FDD vs LHD establishments are color coded. See the key if you need help reading this map.*
  - *If the map opens, DO NOT EXIT the map, it will delete the map from the spreadsheet. All you have to do is minimize it.*
    - *If it does not open, you don't need to worry about it.*

I've also updated the SharePoint site with this information, and have updated the Interactive map that goes along with it.
That interactive map is here: Interactive FDD & LHD High/Medium Risk Establishments
The FDD Flint Water SharePoint site is here: Flint Water MDARD Response SharePoint Site

Please let me know if there is anything else I can get you in regards to mapping, SharePoint, or technology wise. ☺

Subject: RE: Flint City List.xlsx

Good Morning Everyone!

Attached is the long awaited spreadsheet that contains all the LHD and FDD establishments that are in the "HIGH" and "MEDIUM" Risk zones.

There are multiple tabs across the bottom of the document.

- *High Risk*
  - *Combined list of all LHD and FDD Establishments in the "HIGH RISK" zone.*
- *Medium Risk*
  - *Combined list of all LHD and FDD Establishments in the "MEDIUM RISK" zone.*
- *All MDARD Flint Establishments*
  - *Complete list of ALL the FDD locations in Genesee County.*
- *ALL LHD Flint Establishments*
  - *Complete list of ALL the LHD location in Genesee County.*
- *ESRI Map of Locations*
  - *GIS Map of all the locations. There are no zones marked out in this map, but the different risks are color coded, and the FDD vs LHD establishments are color coded. See the key if you need help reading this map.*
  - *If the map opens, DO NOT EXIT the map, it will delete the map from the spreadsheet. All you have to do is minimize it.*
    - *If it does not open, you don't need to worry about it.*

I've also updated the SharePoint site with this information, and have updated the Interactive map that goes along with it.
That interactive map is here: Interactive FDD & LHD High/Medium Risk Establishments
The FDD Flint Water SharePoint site is here: Flint Water MDARD Response SharePoint Site

Please let me know if there is anything else I can get you in regards to mapping, SharePoint, or technology wise. ☺

Thank you,

AID Flint Water Update
January 20, 2016

Dr. Schalow is updating the veterinary spreadsheet to include all (as many as we can find) veterinary clinics in Genesee County. She will call additional clinics to update them on AID activities and provide basic information about the Flint water situation and resources for filters and water testing. So far, we have determined only one veterinary clinic on Flint water (Eascor Animal Hospital).

Dr. Schalow contacted Genesee County Animal Control Officer Paul Wallace for an update. Per Dr. Schalow, "Director Wallace states that, to the best of his knowledge there are no doggy daycares, dog parks, pet shops, kennel licensees, animal shelters, or animal rescues in the City of Flint (that would be on Flint water) so he is not conducting any activities at this time."

Livestock – to date we have found no livestock in Flint.

Nancy

Subject: Update on Todays SEOC activities

Good Afternoon all,

This is what I reported at the update call and in the situation report at the SEOC today:
Tuesday Jan 19, updated and planned for MDARD FDD ICS sampling team and environmental assessment of the food and food service establishments in the Flint water distribution zone. Including location of training for the team and staging area for the sampling supplies and return of collected samples collocated at the Genesee Co. EOC. MDARD FDD ICS sampling team will be starting to do evaluations Wednesday afternoon. Additionally, we may start collecting water samples Thursday morning depending upon requests for samples from Food and Food Service establishments.

Resolved question about one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, the firm was visited and found to inactive with no animals on site.

Additionally worked with Lisa Joseph at the FDA DDO on some of the FDA questions regarding mapping and inspections of facilities with joint FDA/MDARD jurisdiction.

Continued coordination with the FDA Detroit District office for food establishments with joint jurisdiction in the Flint water distribution area.

Also shared information on bottled water regulations and testing related to questions about total dissolved solids and source water approval with Jen Holton and the DEQ/DHHS SEOC staff.

Debra Merrill will be covering the SEOC Wednesday January 20.

Subject: RE: Businesses and water access

Eden –
First off, this only applies to food related businesses – we have not had any activities with other types of businesses. In October, we sent a jointly developed (MDARD, MDHHS, MDEQ, and Genesee Co. LHD) to all food businesses under both state and county jurisdiction alerting them to the issue and suggesting they take action. Up through last week that was on the Michigan.gov/flintwater page. In October,

MDARD contacted the food processors and checked on the status of their water supply and water use; the FDA also checked on some of the facilities under their jurisdiction.
Last week, our jointly developed guidance was updated and is now a requirements document. It was approved through the JIC and the SEOC and was mailed on Thursday of last week. Per conversations with the Genesee Co. Health Dept., due to their staffing levels they have asked us to assist in outreach to restaurants/food service. The notices contain new guidance and direct businesses to contact us and we'll schedule an appointment to test their water (attached). I've heard that we started getting those calls today.
Wed morning we are training 14 of our Food & Dairy Division staff on water sampling and the process for getting testing kits and dropping them off, etc., and Wed. afternoon they will get out to the 11 businesses in the most impacted area – overlaying our maps on the published "hot zone" map – that's where we'll start first to do an initial assessment of the building and schedule a time to collect a sample. From there we'll keep working on the total list, prioritizing those businesses that call for an appointment as well as those that are more likely to serve at risk populations. Additionally, MDARD's Motor Fuels Quality & Weights & Measures staff will hand deliver the notice to every one of the 90+ gas stations with a Flint address. Some are likely not on Flint water, but we've found sometimes that the addresses we have for them are business offices, so by the end of the week, they'll all get a personal visit.
MDARD has set up an internal Incident Management Team, with Sandra Walker as our Incident Commander.
The LHD total list also included schools; since Dept. of Education has already been working on that we are not working with them.

Hope that helps. I'm sure as we have more interactions with businesses we'll have more to report.

Subject: Businesses and water access

Hi Brad,

We met with Representatives today about the Flint issue, and there were a few questions about business access to clean water and filters. Can you summarize what activities are going on (since Oct 2015) to address the needs of businesses in Flint, particularly restaurants, etc.? Are there still need to be met, and if so, what are they?

Subject: Re: REVIEW AND ADVISE

Mel,

Once you guys learn where to take the product, please have someone put this on the JIC (news release) header and ask that they route it through JICManager email to SEOCPIO for approval by State Director this morning.

When we get sign off, please share with Tom Page at 211 and ask him to give us an update by 4 pm on whether this appears to be a continuing issue based on call volume. If it is, we will add to our nightly news release.

Please also ensure the hotline operators in the JIC are aware of the statement.

Copying Ron so he can help route, etc.

Thanks for leading this!!!

Subject: RE: please review -

Thanks Jen. This reads better, but it still does not tell people what to do if they have concerns about their water. Should they be taking it somewhere; can we replace it? Also, I'm wondering if we should be providing 211 with the label names or product numbers so they can determine what water is the water being tested/in question.

Subject: RE: please review -

It's my understanding the local health department determines what is considered an approved source. They, along with DEQ, test at the source. MDARD inspects the facilities bottling in Michigan, but does not routinely test the final bottled product. If we do take a sample, we don't test for lead. We're looking for bacteria and pathogens. I don't know about those companies bottling water outside the state of Michigan.

Also, I am not clear on the issue with a specific product/manufacturer.

The statement reads a little bureaucratic to me. Suggestions below.

As a few residents have raised concerns about lead possibly being in bottled or canned water, we are expeditiously testing the bottled and canned water to ensure it is lead free. Additionally, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. We will also, out an abundance of caution, we will be testing batches of all new bottled water coming in to the distribution sites and working in partnership with the manufacturer to assure product integrity.

Jen

Jen, and all,

I can confirm that the DEQ stated that they would be testing the bottled water identified out of an abundance of caution.

From conversations here it appears that the testing device that is used by the public does not detect lead directly but looks for total dissolved solids (TDS). TDS is acceptable in Drinking water as it gives water taste versus the flat taste of distilled water.

MDARD does sample bottled water during our inspection of the bottlers during our normal operations. Let me know if you have any additional questions and I will try to answer the questions as best I can.

Tim,
I believe so but someone should double check with LARA or MDE. I also noticed that the Department of Education is on our NEW list, it should be removed, right? We are about half way through checking the list to verify if the firms are on Flint water. I had to remove 45 establishments from the list because they are NOT on Flint water.

Subject: Questions from SEOC

Hi Tom,

Byron is in the SEOC today and has received some questions about our enforcement activities. I relayed the message that no firms have been shut down to date, but there have been some activities like water/equipment seizure, etc.

Would you have time this afternoon for a quick call with Byron to address a few questions? Sometime after 2?

-Justin

Hi Tom,

I think you should include the water fountain that was addressed as well. I believe it was in a church.

Thanks.

Kay - can you find out how many homes have gotten test results above 150ppb? And whether there is contact information for them, and if so who has that list?

> > After reading the flyers, I would suggest that it be reworded to take out the 'filtered water' reference. There are numerous sites where the Pb level exceeds the filters'

capabilities to remove lead. If guidance suggest that filtered water is safe, the issuing agency can (and will) be held responsible in those instances where pets are exposed to Pb due to levels surpassing filter capability. The current guidance is that filtered water should be used for bathing and such things and not consumed until an acceptable lead limit has been established via (official) testing.

If you need a map of the houses exceeding the 150ppb threshold, SEOC GIS should be able to provide it.

Subject: daily sit rep

Kay,

I've just talked with Justin and Lisa. They will continue to send their sit rep in the morning for the previous day's activities. Please report only the daily totals for assessments completed, follow-up assessments, and the number of water samples picked up for the previous day.

On Mondays we will total to date figures and compliance percentage to date.

Thanks.

Deb Merrill

MSP-EOC-MDARD

From: Hainstock, Lisa (MDARD)
Sent: Friday, February 12, 2016 11:25 AM
To: MSP-EOC-MDARD; Towne, Karen (LARA)
Cc: Walker, Sandra (MDARD); Henderson, Justin (MDARD); Clemens, Denise (MDARD)
Subject: FW: Question from SEOC-LARA

This one got done before we had the meeting with MDE, LARA and DEQ last week to establish who would do the visits. Just as an FYI, MDARD is not visiting schools at all any longer. What we need from LARA is a contact to refer any schools to who contact us to ask for water sampling. Some schools are calling us to schedule sampling and they aren't even on Flint City water.

Perhaps LARA should be the one to get all these calls and do the triaging?

Subject: RE: Question from SEOC-LARA

Sandra,
That was one of the facilities that was on our original list. It wasn't until we had already visited the firm that Operations was told that we would NOT do schools. This visit was a follow up visit.

Thanks,

Tom Tederington

Subject: Question from SEOC-LARA

LARA says that they went to a school, St. Paul's Lutheran School, yesterday to do mapping/sequencing of the plumbing. They were refused entry because "MDARD was there doing water testing."

Is that true? Because LARA thought MDARD is not testing water in schools.

Please advise.

Subject: RE: Meeting : Urgent - questions from Governor's office

Sandra,

Looks like MDARD may be able to provide information on questions 3 (number of samples being collected) and 20 (pets). *Questions 16 & 17 relate to human nutrition and are best addressed by MDHHS.*

Could you edit the response to question 3 below and forward to the SEOC before 10 AM?

3. Why does EPA take 20 samples from different areas of a house and the State takes only one or a few?

I believe you mentioned that MDARD's surveillance strategy of collecting one "First draw" water sample as part of initial assessments of licensed food establishments on the City of Flint Water Supply that were thought to have increased risk of elevated water lead levels was based on input received from MDEQ and that took under consideration the number of food establishments needing to be rapidly assessed. Additional "in use" samples are being collected if lead is detected in the initial sample.

20. What about my pets? Will the state animal response team get involved?

Jim Bowes provided the following

Lead toxicity in animals is reportable to MDARD. MDARD is taking calls from veterinarians who have patients that are suspect for lead toxicity. MDARD is paying for the blood test for these animals (only dogs so far). We have allocated $5,000 for this effort. Michigan State University College of Veterinary Medicine is developing a project for testing 300 dogs in Flint. The project will look at a number of parameters related to lead exposure and lead toxicosis in dogs. MDARD is coordinating conversations with other organizations to help determine if others will be doing testing. MDARD and MSU CVM have developed educational material for the public and for veterinarians. These document were approved by the SEOC/JIC yesterday. A potential request to the SEOC from Genesee County for a project to test dogs in high risk homes is pending.

And from Nancy Frank

From AID, conversations and planning for testing pets is ongoing. There may be a request to the SEOC today from Genesee County to test dogs in high risk homes. I have a stakeholder meeting with MSU CVM tomorrow to talk about progress on their testing project.

Hi all,

We will most likely be asked for input on the questions below. Please review for those that pertain to us and respond as quickly as possible on Thursday with a single response. I will then coordinate with any agencies here that we have been working with on specific issues. Thanks for your quick response.

Subject: FW: Meeting : Urgent - questions from Governor's office
Importance: High

Fyi...you may be tasked with some of the questions listed below. There is a meeting tomorrow morning with the Governor's office so if you want to get a head start, feel free to start drafting your answers to some of these questions.

At this time there is no need for you to attend the meeting referenced below.

Subject: Meeting : Urgent
Importance: High

Hi Team,

I realize this is last minute- is there any way you/ representative from your team can be available tomorrow morning at 10:00 am to assist in answering the below questions for Mission Flint?

They need the final answers by tomorrow so if we could initially meet at 9:00 am that would be great. We can meet in person and/or I can provide a con call.

Goals for initial call:

1) Answer what we already know
2) Assign questions we do not know amongst ourselves
3) Assign a time to have all answers to the Governors office tomorrow.

Please let me know if 9:00 am will work for you.

Thank you,

Laura Stoken
Manager, Constituent Relations
Executive Office of the Governor, Rick Snyder
517.335.7858

Questions asked during the Meeting

1. The filters say 99% effective on the box. What about the 1% and how can I be sure?
2. Why are we not being given whole house filters? Filtering the water as it comes into the house would solve lots of problems.
3. Why does EPA take 20 samples from different areas of a house and the State takes only one or a few?
4. Is lead the only thing scientists are testing for?
5. I am concerned about BPA (leaching of plastic from bottled water). Who is ensuring that the bottled water is safe?
6. Could we get Shower Head Filters distributed given the problems experienced with rashes and skin irritation?
7. When will we know if the improperly treated river water contributed to the spike in legionella?
8. Should we use bottled water (vs. tap or filtered) in our humidifiers?
9. How soon can we get nurses into schools? We only have one nurse in the entire public school system.
10. Who is focused on landlord obligations to make things safe for their tenants? If water bill credits are being offered to landlords, shouldn't the tenant who has been paying the water bill included with their rent receive the benefit?
11. We have been told not to run hot water through the filters which means even washing dishes is a chore requiring heating up water.
12. In the past boil alerts were due to under or over chlorination. Is the water properly chlorinated now and how do we know?
13. Is canned water bad for us?
14. Are all the faucets being changed out in schools? When will that be finished and when will we be told whether that fixed the problem?
15. The city's contractor for recycling (Republic) makes it too difficult for residents to sign up and get their bins/bags. Can you fix that?
16. MSU appears to be the only entity working on nutrition outreach and getting fresh produce to convenience stores. We need to ramp up our efforts in this regard and take charge. Sen. Ananich's office is doing something with John Roberts' knowledge but we need to craft a plan and execute immediately.
17. You said nutrition doesn't remove lead from the body but iron, calcium and Vitamin C can reduce/halt the absorption of new lead. Are there vitamins I should be taking?
18. What parts of the body does lead poisoning impact. I have heard that it goes to the bones, the brain, and gastrointestinal but is removed by kidneys and excreted in urine. Is this right?
19. Abandoned buildings are set on fire and lead paint in walls can become smoke with lead that gets breathed in. Are our kids at risk when there is a fire in the neighborhood?
20. What about my pets? Will the state animal response team get involved?

21. We have scammers in our neighborhood offering to do testing in order to gain access and steal. Or offer fake services. What is being done about the scammers?
22. There is not enough information translated in Spanish, Arabic or Chinese. When will this change?
23. What are you doing about people who have left Flint but were exposed to potential lead poisoning? Are you contacting them or giving them a way to contact you?

Subject: RE: Non-Detect "First Draw" Samples

The statement "The companies listed have demonstrated they are taking precautions to reduce the risk of foodborne illness from water that may be contaminated, as outlined in the Michigan Food Law and Michigan Modified Food Code" makes it sound like all of the firms listed were following the precautions, even if they weren't but had "Not Detects". It may need rewording or removal from the document.

Cc: Hausler, Jeanne (MDARD) <hauslerj@michigan.gov>
Subject: RE: Non-Detect "First Draw" Samples

Attached are the suggested changes to the compliance list. This change will require an update to the SOP to include firms that have non-detect results in the "first draw" water samples. These firms should be marked with an asterisk on the list to indicate that they are on the list strictly due to test results.

Feedback on the verbiage used to explain this is much appreciated.

Thanks.

Subject: Non-Detect "First Draw" Samples

Hello All,

Below is a follow-up to our discussion today about the compliant list. I made some modifications based on discussions that took place after the meeting. Of course, I now believe more discussion is needed for a few details. I'm copying Jeanne on this discussion as I think we need her feedback on communicating this information.

- Continue communicating the list of firms found to be compliant during the compliance checks.
- Communicate list of firms with "first draw" water samples that were non-detectable for lead.
    - There should be some separation between the compliant list and the list of non-detectable samples where the firm is not compliant with the mitigation steps.
        - Talk to Jeanne to see if we can add a second category to the list called "Non-detectable lead in water samples" (or something similar).
        - Non-detect in the "first draw" sample indicates the source water does not have elevated lead levels
        - If multiple faucets are used within the firm, some level of risk could exist with older faucets that were not part of the "first draw" sample.
- Firms that were not compliant during the assessment, but have "first draw" water samples that are non-detectable for lead must still receive an additional visit.
        - This visit will serve to determine if there are additional faucets at high risk of contamination and that no changes/problems with the water have occurred since the "first draw" sample was taken.
            - If additional concerns are observed (criteria needs further discussion), "in-use" samples should be taken of those areas.

- If no additional concerns or changes/problems with the water are found, the visit should be documented through survey monkey as compliant due to non-detectable lead levels in the "first draw" sample.

- Firms that were non-compliant during the assessment, but had "in-use" samples that were non-detectable for lead, should not be added to either list. These firms must continue to show that proper mitigation steps are being followed in order to be listed on the "compliant list".

Question for Thursday meeting:

- How to address firms that were compliant during the assessment, but have low levels of detectable lead in "in-use" samples?

Thanks.

Ma'am,

We have received a FOIA request for "the name of the company and testing results for the testing done in Flint by an outside company (according to Governor Snyder an outside agency was used)." Can you please tell me if you or any other Department member have responsive documents? I will need a response by 2/12/16.

Thanks,

Please post a list of Restaurants not in compliance with the lead content per billion. A ten day period for a restaurant to correct their problem is unacceptable period of time for patrons to be drinking poison water. The restaurant should be closed immediately to protect the public. Restaurants should be under a higher standard of review. The public needs to feel safe beyond a normal standard. We need to feel our government is protecting our interests. The paper listed 3 acceptable standards restaurants could comply with to serve water to the public,1) Bottles; 2) filters (no filter guidelines);3) let faucets run water for 6 minutes prior to serving. Those standards are unacceptable to safely protect the consumer. Lt Governor Calley is asking our community to patronize Flint restaurants due the lack of business flint is experiencing. The State is again taking on additional fiduciary responsibility and recommending the public drink the safe water at these Flint restaurants. Help us trust the State and the information it provides for our safety

All interested producers should sign-up through the NRCS Flint Field office. Joe Woodruff is the local NRCS District Conservationist joe.woodruff@mi.usda.gov Regarding tracking, I would expect that to be done all at the County or Area (NRCS term for multi-county region) level. Joe would be able to answer that.
According to the flyer, the majority of funding goes to local growers and a portion to local partners for promotion and training.

Subject: Correction for "State Encourages Food Establishments to take Advantage of Free Water Safety Inspections"

Last Friday's food establishment press release on Flint Water page says "February 5, 2015" at the top and should be changed to 2016. http://www.michigan.gov/flintwater/0,6092,7-345--375868--,00.html

FYI - MDARD has had a couple of questions, including one from DEQ's executive office, about how to find the list of food businesses that are in compliance mentioned in the press release. The list is at http://www.michigan.gov/flintwater/0,6092,7-345-75251_75382---,00.html . It seems like most don't realize to look under the "Resident, Community Information and Reports" bar.

Correct, but we'd like to see the facility names, addresses, and corresponding test results.

As it is now, we're only seeing a summary of what is in each zone, for instance, Zone 1 has x number of facilities, etc.

Thank you,

Dan Metiva III

Thanks Mark -
We've been working with a wide range of entities on the animals issue - a lot of pieces to this. As we're trying to bring things together with a public message for anyone with concerns about their pet, please let us know immediately if you're running into someone with a service animal that has concerns, especially if they do not have a veterinarian. MDARD is paying for the blood tests for lead.
We're working on some messages for the general public, but until that's ready we will be responsive to the needs of anyone with a service animal.

These are perfect.

Is there a way to pull which food establishments are in which city section, and what the results were?

That way we can tie a specific city section to a list of establishments and corresponding results?

Thank you,

Subject: RE: Animal Lead Exposure

Below is the information the JIC has on pets.

Jen-- Can you determine if anywhere is offering free services to Flint residents?

- Whatever you are doing in your own home for water, you should do for your pets (e.g., filtered, bottled water).

- If you have any concerns about your animal's health, you should always work with a licensed veterinarian.

- There are a variety of diseases and issues that could mimic signs/symptoms of a lead-related issue, which is why it's critical to work with your vet to properly diagnose your pet.

- If a licensed vet suspects a possible lead-related issue, they contact MDARD and the department will work with them to have a sample tested. MDARD is covering the sample testing costs coming through veterinary offices.

To MDARD:

I think the BIGGEST concern is the service or companion animals. Those might tend to be more with functional needs population, who may also be unable to afford blood testing of pets. The question is, I think, what can we put out publically that may be an offer of assistance if needed for those concerned. #1 would be to see their family veterinarian, but for those who are unable, is there a place that will do it for no charge? If so, that information could be provided to 211 who could then assist in getting them the appropriate and available help.

I am copying PIO, JIC Manager, and DHHS for awareness and Gov's office as follow up. Please include them in response. Thanks!

BJ, to the question about water testing, certainly that can be done...will you assist in accomplishing that?

Subject: RE: Animal Lead Exposure

Chris – I'm not sure where you're getting your information, but there was no tabletop exercise, and MDARD has not been passive in our activities. We did organize a call and included all the organizations we knew of who are interested in the animal component of this – which included Genesee County Animal Control and Genesee County Humane Society, as well as MSU-College of Veterinary Medicine, MSU-DCPAH, Michigan DHHS, MVMA, MAACO, ASPCA, HSUS, USDA, and Red Rover. If you have time to be on these kinds of calls in the future, you are certainly welcome to be.
The direction and messaging on pets has been consistent and in place since last October – water for pets should be the same as water for people, and if pet owners are concerned about lead toxicity they should contact their veterinarian.
On the call with the wide range of partners, strategies for outreach, testing, and treatment were discussed and that's what we and all these other groups are working on. As I'm sure you understand, the complexities in implementing these kinds of field activities are enormous and require resources beyond what any one agency or group or institution can accomplish alone. As the planning for this continues, if the Genesee County Animal Control is not the correct local lead, we will include whatever entity should be involved.
If there is a specific request from the City of Flint for something related to pets, please identify exactly what the request is, and the SEOC will try to coordinate that.

Subject: Animal Lead Exposure
Importance: High

Dear MSP-OPS,

It has come to my attention that MDARD, GC Animal Control, and other 'animal' groups has held a tabletop in my AO without my inclusion and/or knowledge. This tabletop is reported to have been on companion animals and lead exposure through the current City of Flint emergency. It has also been reported that MDARD is taking a passive role in this emergency, dealing only with symptomatic animals and ignoring any animal not exhibiting symptoms (which is largely the only reason an animal would be tested).

IF humans are being proactively engaged, why are animals not being included in this approach. This would seem to contradict the spirit of the PETS Act, which was originally implemented to ensure animals were an active consideration during disasters/emergencies. It is my intention to ensure that a more proactive companion animal piece is brought to the table despite any 'political' ramifications that are being conveyed to myself as "valid" reasons not to engage that population.

As Michigan has both the Michigan State Animal Response Team and the Michigan Veterinary Medical Reserve Corps, I do not understand why MDARD has not offered these resources to ascertain the level of lead poisoning in companion animals within the City of Flint.

Subject: FW: Needs water test kit

Brian,

As we just discussed, DEQ is requesting EPA to meet with these folks and discuss their concerns regarding the chlorine levels and other concerns they may have with their drinking water. We appreciate your help and look forward to working with you with these individual home inspections.

Mitch

EPA has been doing some sampling which includes other parameters. I will try to contact then tomorrow and see if they can sample for them.

Subject: FW: Needs water test kit

Hey there- this is an odd one.....

Would you mind having someone look at this one for us OR would someone be able to provide her a water test kit?

When they first turn on water has a strong odor of chlorine
Four large breed dogs displaying unexplainable symptoms
Vet's name is Farm & Pet Vet Care, Whittemore MI Ph. 989-756-5111
They have been refused water test kit because they live in the township
In their subdivision some people are on township water and some on city
She would really like her water tested

Please advise

Hi, Julie.

Thank you very much for sharing this document with us. This will be a great edition to what we are already working on. We would appreciate being able to make edits to this draft to add some points especially relevant to the current situation. Michigan Department of Agriculture and Rural Development (MDARD) and Michigan State University, College of Veterinary Medicine (MSU CVM) are collaborating to address this situation with education and outreach as well as testing programs. Lead toxicity in animals in Michigan is reportable to MDARD. MSU CVM has an interest in aiding the response by conducting a voluntary surveillance project in dogs. Our plans are not yet finalized but are moving ahead as rapidly as possible. I meet with the core MSU group on Monday morning. Is it okay with you if I share your draft Q&A with the group? The materials we are already working on, because of the emergency declaration status of the situation, need to go through our SEOC before I can send them to you. We have a handout for the public and a hand out for veterinarians. Neither is in a Q&A format which is why I think your document can add value.

Thanks again for contacting us and I look forward to additional discussion.

Here is the FAQ that CDC developed along with my edits. Do you all have a fact sheet that you have been working on? If this is duplicative, we can fold it in to whatever you are working on or drop it. Just let me know.

I do know that as EPA and the county HD have been going door to door they have been getting questions about pets and would appreciate something that they could use to answer questions.

Happy to discuss,

To: MSP-SEOCOPSC
Subject: Animal Lead Exposure
Importance: High

Dear MSP-OPS,

It has come to my attention that MDARD, GC Animal Control, and other 'animal' groups has held a tabletop in my AO without my inclusion and/or knowledge. This tabletop is reported to have been on companion animals and lead exposure through the current City of Flint emergency. It has also been reported that MDARD is taking a passive role in this emergency, dealing only with symptomatic animals and ignoring any animal not exhibiting symptoms (which is largely the only reason an animal would be tested).

IF humans are being proactively engaged, why are animals not being included in this approach. This would seem to contradict the spirit of the PETS Act, which was originally implemented to ensure animals were an active consideration during disasters/emergencies. It is my intention to ensure that a more proactive companion animal piece is brought to the table despite any 'political' ramifications that are being conveyed to myself as "valid" reasons not to engage that population.

As Michigan has both the Michigan State Animal Response Team and the Michigan Veterinary Medical Reserve Corps, I do not understand why MDARD has not offered these resources to ascertain the level of lead poisoning in companion animals within the City of Flint.

Subject: Summary of today's school testing meeting - action steps

Thanks to everyone for taking the time for this meeting to coordinate sampling/assessments at schools on Flint Water. The following is a list of actions that have been agreed upon at this time, along with responsible parties/agencies

1. MDE will conduct search for any schools not currently identified on LARA's list for sampling and plumbing fixture follow up
2. MDE will provide this list to Karen Towne of LARA, and will cc Lisa Hainstock at MDARD.
3. MDARD will consult with LHD to check and see if they know of any other school that is not on any list and will provide to LARA
4. LARA will consult with their leadership to see if any newly identified schools will be added to their list for followup, and will add them to their list to contact and coordinate follow up with DEQ on sampling and fixture replacement
5. If LARA determines that the newly identified schools will *not* be added to their list, they will notify DEQ and MDARD immediately
6. MDARD and DEQ will discuss coordination of next steps - who will contact the schools and do the follow up sampling/assessments?

If anyone disagrees with these actions steps or has any changes or addition, please cc everyone on this email. If you agree with the action item summary, please send an email response to this message to all.

Thanks again, everyone, for the good work and willingness to get together!!

Subject: Flint water in schools - proposed teleconference for 3pm on Friday

Hello

I am trying to schedule a teleconference between MDARD, the Genesee County Health Department, MDE, and someone from LARA who is working with DEQ (NEED DEQ/LARA NAMES AND CONTACT INFO ASAP FROM SOMEONE) on water investigation at Flint schools for tomorrow at 3pm to discuss the following:

1) Which agency is responsible for water sampling at which Flint school (I understand that LARA is working with DEQ on conducting water sampling at the schools in the attached spreadsheet – MDARD needs to verify so we can drop them from our list, if needed;

2) Getting a list of private/parochial/charter schools NOT being sampled by LARA/DEQ, so MDARD can conduct sampling. (the attached list is confusing, because it appears that there are some parochial, non-public schools, ie St. Paul Lutheran, St. John Vianney School are ON this list being done by LARA.)

3) MDARD is NOT conducting sampling like DEQ/LARA sampling (we only pull one sample from the food service area). Should ALL schools be sampled by DEQ/LARA because it is more comprehensive?

I need to hear back from everyone right away so I can send out the appointment and get us coordinating this issue before it gets more complicated.

Sample numbers LG07364 and LG07383 are samples for MDARD, not residential. That is why they did not appear on the spreadsheet. Do you need notification of these as well? The reports were sent to MDARD.

Hi Julia

I need to double check something. Is there a chance that two sample results > 100ppb were reported on 2/3/2016 that you didn't have a chance to copy us on? We have two notes from you today with sample results > 100 ppb. Only one of those results, Sample # LG07032, is > 150. The other two results > 100 we got copied on are sample #'s: LG07601 & LG07654.

When we got the spreadsheet with results through today, two other samples for which we don't have the note from you have concentrations > 100: i.e. sample #'s LG07383 & LG07364.

No big deal if you couldn't get us that note with the latter 2 sample results before you left today, we're just wanting to make sure that the numbers that we report to the Governor are solid. Thanks!

Mitch

Subject: Water Purifier Co. Inquiry

April,

I was contacted by Ms. Lin Gul of Blue Water Co., Kansas City 913-593-3115. According to Ms. Gul, their company donated water purifiers to:

Catholic Charities of Shiawassee & Genesee Co.
901 Chippewa
Flint 48503

And

Shelter of Flint
605 North Saginaw St.
Flint 48502

They are alleging the inspector is sampling improperly and that the water should be testing at acceptable levels for lead.

We do not have these operations on our 'to do' list. Any assistance would be appreciated.

Subject: Re: School assessment/water testing question

If the school is already being tested and followed up on by DEQ/LARA (ie Flint community schools listed on the deq website there is no real reason for mdard to do these because they are already being told to flush and taps being scheduled for replacement. Some are in our list but they are already being addressed by others.

Other schools not part of Flint Community Schools, ie parochial/private/charter schools, we will do these i believe. Some have already been done

I was asked by MDE if any schools were on MDARD's initial assessments list and if we've taken any water samples were at schools. Some of the reasoning from MDE was that a school would be a licensed food establishment – likely LHD jurisdiction – but since MDARD is covering LHD establishments, schools also might be on our list to assess/test.

Subject: RE: Question for MDARD

April,

Let me clarify, there are two ways a firm can document that they have achieve compliance with requirements to reduce lead levels in source water to safe levels;

1. Have a water test result from a DEQ recognized laboratory with a non-detect result, or

2. MDARD has verified they are implementing the risk reduction requirements identified on the MDARD sheet "Requirements for Licensed Food Establishments Using City of Flint Water, January 13, 2016
    - One of the following;
        - *Use of appropriate filter* (NSF Standard 53 certified), or
        - Flush lines for 5 minutes each day before using or serving water and after 6 hours of no water use.
    - And utilize the other three required water handling/use practices identified on the sheet.

Phase 1 of MDARD's response - Initial assessments with "First Draw" sample collection - ended last week.

Phase 2: Follow Up assessments with "in-use" verification sample collection - started this week and is scheduled to continue through the month of February. Follow up assessments are done where:

- firms were found to be not fully non-compliant with requirements during the initial assessment , or

- lead was detected in "First draw" samples.

I hope this helps clarify what we are doing.

John

Subject: RE: Question for MDARD

Hi Jennifer,

MDARD is not clearing firms, but using a risk based approach to identify compliant / non-compliant food establishment firms. A compliant firm is one that has a 0 lead level from the water test and using the risk reduction factors in the attached handout.

1. MDARD notified all licensed food establishments of the requirements (attached) around January 13.

2. Using a risk based approach based on geographic location and infrastructure, MDARD identified 175 firms that were high or medium risk and are conducting initial assessments at those firms.
3. Initial assessment at high and medium risk firms. During the initial assessment, MDARD is documenting whether firms in the medium and high zones that are in compliance with risk reduction practices. MDARD takes a first draw water sample at all high risk establishments and when requested for medium risk or other firms. A compliant firm is one that has a 0 lead level from the water test and is using the risk reduction factors.
4. Follow up / Verification testing. MDARD is taking in use samples on firms that are non-compliant (not following the risk reduction requirements or had detectable levels in its first draw sample).

MDARD is in the first round of verification visits this week and the next. We have not yet reached the scenario of the firm that was non-compliant after the initial assessment and was again non-compliant after the follow up sample or assessment.

Please let me know if you need any additional information.

Apparently MSU Vet Clinic is doing a lead study for Flint resident and will test pets for free. The owner can take the pet to their vet for a blood draw and send the sample to MSU. Callers may be directed to MSU's vet clinic for more info (we've had 2 calls that I know of).

Subject: water samples at medium risk firms - Flint Farmers Market

Hello,

April here at the SEOC. I see from the summary staff are scheduled to assess the 37 med risk firms at the Flint Farmers Market.

DNR's question: Will staff be taking water samples during those assessments today?

I know water samples were taken at all high risk, but what is the plan for sampling at med risk? This e-mail or my SOM e-mail are the best ways to reach me.

Thanks,
April Hunt

Subject: Re: Flint Water Summary

The additional question I have is what type of establishments fall in the "other" category?

Could we add definitions on page 2 of the sit rep to delineate that out?

I'm also looping in the MDARD SEOC desk to ensure that as people rotate in/out, that person is up to speed on activities.

Thanks, all!
Jen

MSP-EOC-MDARD

From: Holton, Jennifer (MDARD)
Sent: Monday, February 01, 2016 5:03 PM
To: Banner, Shanon (MSP); JICManager
Cc: MSP-EOC-MDARD; Clover Adams, Jamie (MDARD); Averill, James (MDARD)
Subject: media calls today

1. Bob Allen – Free Press
   He had Qs on water, lead and animals. Left him a VM.

2. Martha Thierry – Detroit Free Press
   She is an artist, not a reporter. Was assigned to do some sort of informational graphic. Dr. James Averill, state vet, spoke with her.

3. Andrew Heller, WNEM-TV 5
   He had Qs on water, lead and pets. Dr. James Averill, state vet, spoke with him.

4. Joe Gephardt, WLNS-TV6
   He had Qs on the five point plan. Referred him to the JIC.

Below are the key points:

1. In the last 5 years, there have been two cases of lead toxiosis reported in Genesee County.
2. Whatever you are doing in your own home for water, you should do for your pets (e.g., filtered, bottled water).
3. If you have any concerns about your animal's health, you should always work with a licensed veterinarian.
4. There are a variety of diseases and issues that could mimic signs/symptoms of a lead-related issue, it's why it's critical to work with your vet to properly diagnose your pet.
5. If a licensed vet suspects a possible lead-related issue, they contact MDARD and the department will work with them to have a sample tested. MDARD is covering the sample testing costs coming through veterinary offices.

Subject: typo on website

Hi, Deb,

Jen has tried to get this typo corrected but it is still incorrect. I thought maybe you would have more success from the EOC chair.

The link is located under the In Your Body tab on the FlintWater website. 'Recommendations' should be 'Requirements' on the link to the food licensee handout. This has led to some confusion.

Thanks!

Hi there,

The requirements document that we sent out in our mailing to flint area food establishments a few weeks ago is linked at http://www.michigan.gov/flintwater#BODY as "*Recommendations* to Food Establishments . . . "

I'm not sure who updates this site . . . but I'd think we'd like them to change the document name link from recommendation to requirements, right away??

Michigan.gov

Subject: RE: SEOC question

Attached is a first draft for comment. My suggestion would to make this look prettier and share it with MIFMA and farmers market managers in the Flint area for sharing with their cottage food vendors. We don't really have any way to reach cottage food vendors directly. Also, we can probably get this posted to the Flint Water website once it has been approved through the JIC.

Feedback, please.

Subject: RE: SEOC question

I would suggest working with Jen and Jeanne Hausler through the Michigan Farm Market Association/Market Masters but how do you distinguish between Flint water area and the geographic label of Flint, so that we are not tarring all operations with the same brush. Still thinking on that one.

Subject: SEOC question

This question is from Civil Rights (a CR Commission member asked this): How is MDARD protecting the public from cottage food operators, either with or without a license, from foods being produced with Flint water? Concern is that these operators could theoretically be "exporting" the problem by selling in Grand Rapids or other places at Farmer's Markets.

I know our folks in the SEOC have been working on a few things related to gardening and urban ag. Looping them in, but I think the article is good.

Apologies for the delay. Was at a funeral/visitation.

MSP-EOC-MDARD

From: Merrill, Debra (MDARD)
Sent: Friday, January 29, 2016 9:45 AM
To: MSP-EOC-MDARD
Subject: Questing regarding test results

Good morning Brad,

Lisa Hainstock has a question about how the test results are being communicated back to the businesses. MDEQ is sending the test results to us in scanned, PDF files. The test results themselves are being sent to Mike Glasgow, 4500 N. Dort Hwy, Flint, MI 48505 but MDARD doesn't know if the results are being shared with the businesses.

She asked Jen B. and she didn't know, but said this had been discussed. Byron doesn't know either. Sandra is out sick.

Do you know? Call me after the briefing and I can connect you with Lisa and Tim (who is IC now.)

Thanks.

All -

First, thank you. Your willingness to help in the Joint Information Center has been nothing short of awesome. I have been told what an amazing asset each of you have been.

Below is the JIC schedule for the next two weeks:

Jennifer Holton
February 4
February 9

Heather Throne
February 2

Cheri Cavanaugh
February 2
February 10

Megan Sprague
February 3
February 8

Jeanne Hausler
February 5
February 11

I don't know assignments yet, but will pass it along when I do.

Thanks again!
Jen

Hi Carol

I just spoke with LARA here in the SEOC, regarding the staff they're supplying to the lab and the coding they should use in DCDS. DLARA, MDARD, and future resources that fill in to help for this incident, can't charge DEQ Index, PCA, project and phase numbers. They'll use their own and their time will get accounted for otherwise.

Anastasia, if you disagree, let us all know ASAP. Thanks everyone.

Good morning,

We have been really busy with the media contacting the district this week.
Flint Schools has used jug/bottle water for food prep.

Is there a water filter that will filter out lead that the district could purchase?

To: Deacon, Brad (MDARD)
Subject: SBA loans

I spoke with Brenda Ballew at SBA, Eastern District, and she said that Michigan does not have a "declaration" in place (this is separate from the FEMA declaration). She said the governor must ask for it and it goes through MSP/SEOC. That being said, even with a declaration in place, it will only be for economic hardship (I think was the word) and not for physical damage. In order to get a loan for physical damage, they would have to come in and do an assessment to would have to say that 25% of the homes/business had more than 40% of physical damage which would probably be impossible since it's not roofs, windows, etc., just pipes.

She did say there was a "certification" in process, but that would not cover pipes either. Capt. said something this morning at the 8:30 meeting and I will circle back with Gabe or someone to see if there was more about that. I know he said that SBA was working with the local chamber of commerce, and I think that is related to the economic hardship issue. If that's not the case, I will let you know.

She said she thought she had heard something about HUD offering something, but wasn't sure if that included just homes or businesses too. Loans weren't mentioned in this release http://www.hhs.gov/blog/2016/01/19/ground-week-hhs-lead-federal-response-flint.html so not sure that is the case.

So, I think this might be a dead end.

Subject: MDARD - assistance with testing home canned products for lead

Circling back on this – I have talked with MDARD's Director, Kevin B., Sandra W., and Craig VB – if a homeowner is concerned about home canned foods and lead, we can arrange to get a representative sample tested. The homeowner would need to call us: 800-292-3939. That will be relayed to our Food & Dairy Division, who will arrange with the caller on how and when to pick up the sample. MDARD's Food & Dairy staff will arrange to get the sample to the MDARD Lab in East Lansing. Though our Lab doesn't do the test, they'll arrange sending it out to an available lab and they'll track it. We will be able to use the FDA RRT grant funds to cover the costs of shipping and testing the sample, unless/until we get inundated with this request – then we'll have to look at other sources.
As someone here pointed out, home canned foods are a major part of some families' nutrition.

Subject: MDARD lab testing for lead?

Kay,

We got a question from an individual who canned vegetable with tap water last summer in Flint. I'm going to call him back and check on his water source, but I wanted to check if the MDARD lab would check for lead in food.

Thanks for any info,
Jennifer

Hello Deb, attached is the contact for the SBA for the Region, which includes Michigan. I suggest contacting her and getting assistance with exactly what Michigan needs to do to request an expedited disaster declaration from SBA. Hopefully the Regional Office (attached) already has some kind of visibility on this through their involvement with HSS, but I don't know.

Please let me know if you need any further assistance.

Good morning Linda,

Per our conversation this morning, we are interested in information that we can pass along to business regarding low interest loans. Our Food Inspection staff are in the process of assessing all of our licensees in Flint. There are some businesses that will most likely need to repair/replace piping, etc. \

Thanks very much for your help.

To: Schalow, Michele (MDARD)
Subject: RE: Fact Sheet

Those numbers are not available to me here. All the "numbers" are being released by the Governor's office or the Joint Information Center. The numbers of homes visited are being posted on the Michigan.gov/flintwater site, however I don't think they posted testing numbers yet. Also, numbers of homes visited does not equal number of tests. The residents have to take the sample and return it for testing.

Why do you need this information?

Subject: Food establishment compliance list for daily posting.

Good morning. As you know, MDARD food inspectors have been conducting compliance checks of food establishments in Flint to make sure they are following requirements under the Food Law/Food Code to assure the water they are using is safe.

We would like to begin posting on a daily basis to the Flint Water site a PDF of the updated results of these compliance checks. Below (in italics) is a proposed statement to post with the PDF. A document that outlines the requirements for food businesses should already be posted on the Flint Water site, but I can't find it. I have attached it as an FYI so you know what I'm talking about. This needs to be linked from the underlined word in the proposed statement below.

The most recent compliance tracker PDF is also attached. This is the document that will be updated each day. MDARD's plan is to forward the updated compliance document each day by noon to the JICManager (or to a designee) for posting each week day.

I am seeking approval of the wording and instructions for how best to share this information with the JIC each day for posting. Please call if you have questions! Sorry this is so convoluted. Hopefully the actual posting will be simple!

Proposed statement:

The following Flint food establishments have received compliance checks and have been found to be following the ***requirements*** *for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.*

Thanks,

Jeanne

Subject: Food establishment compliance list for daily posting.

Good morning. As you know, MDARD food inspectors have been conducting compliance checks of food establishments in Flint to make sure they are following requirements under the Food Law/Food Code to assure the water they are using is safe.

We would like to begin posting on a daily basis to the Flint Water site a PDF of the updated results of these compliance checks. Below (in italics) is a proposed statement to post with the PDF. A document that outlines the requirements for food businesses should already be posted on the Flint Water site, but I can't find it. I have attached it as an FYI so you know what I'm talking about. This needs to be linked from the underlined word in the proposed statement below.

The most recent compliance tracker PDF is also attached. This is the document that will be updated each day. MDARD's plan is to forward the updated compliance document each day by noon to the JICManager (or to a designee) for posting each week day.

I am seeking approval of the wording and instructions for how best to share this information with the JIC each day for posting. Please call if you have questions! Sorry this is so convoluted. Hopefully the actual posting will be simple!

Proposed statement:

*The following Flint food establishments have received compliance checks and have been found to be following the **requirements** for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.*

Thanks,

Jeanne

Kay,

Can you take a look at the below email and consider adding the requested information into your PSA for pets?

"ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link."

Genesee County Animal Control has a basic outline already created if needed.

Thanks,
Gabe

Michelle:

Thanks for getting into this so quickly – funny thing is, this document/link is something I've never seen before, can you tell me where/how it's published, so I and my staff can direct people to it? I think it looks great and the fact that it's out there gives us some traction right out of the gate.

ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link. I don't know if that's something that you're capable of; in what venue or in what form, or if you're even interested at this point.

I have a basic outline from our Shelter vet if you want it. Please advise....and thanks again!

Paul,

Please see the fact sheet below

http://www.gchd.us/docs/Popular_Pages/Lead/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

This appears to be the extent of the messaging on animal safety. There is a little section in this PDF. This same information is also being included in a new flyer from the state.

Do you find this an appropriate first step in message? What additionally would these special interest groups like to see as far as messaging is concerned?

Hi Lisa,

Here's draft forms for the IAP. Jennifer has the 204, which is still waiting for Tom's approval. You might check in with her on that status.

On the 202, I'll add the weather to situational awareness box when I PDF them, so don't worry about that.

Here's how I would proceed:

- Check over each one and make whatever edits you see fit
- Run them by Sandra (print or digital is fine)
- After her approval, get them to me – email, S:, sharepoint, whatever.
- I will PDF them into a final form
- Print one hard copy out, for Sandra so sign and us to keep on file.
- The rest can be ready for distribution by Monday

Subject: Food establishment compliance list for daily posting.

Good morning. As you know, MDARD food inspectors have been conducting compliance checks of food establishments in Flint to make sure they are following requirements under the Food Law/Food Code to assure the water they are using is safe.

We would like to begin posting on a daily basis to the Flint Water site a PDF of the updated results of these compliance checks. Below (in italics) is a proposed statement to post with the PDF. A document that outlines the requirements for food businesses should already be posted on the Flint Water site, but I can't find it. I have attached it as

an FYI so you know what I'm talking about. This needs to be linked from the underlined word in the proposed statement below.

The most recent compliance tracker PDF is also attached. This is the document that will be updated each day. MDARD's plan is to forward the updated compliance document each day by noon to the JICManager (or to a designee) for posting each week day.

I am seeking approval of the wording and instructions for how best to share this information with the JIC each day for posting. Please call if you have questions! Sorry this is so convoluted. Hopefully the actual posting will be simple!

Proposed statement:

The following Flint food establishments have received compliance checks and have been found to be following the ***requirements*** *for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.*

Thanks,

Jeanne

How does something like this sound? Once a statement is approved, I will add it to the compliance list PDF.

Inclusion of businesses on this list does not represent endorsement of the businesses by the Michigan Department of Agriculture and Rural Development, nor does it guarantee food safety at these facilities. The companies listed have demonstrated they are taking precautions to reduce the risk of foodborne illness from water that may be contaminated, as outlined in the Michigan Food Law and Michigan Modified Food Code.

Subject: Re: Food establishment compliance list for daily posting.

Have looped in the SEOC Ag desk.

Should there be something in the statement, like a disclaimer that we are not certifying that the establishment is lead free? Or whatever words we need to use. I'm concerned that people will assume, seeing the names on the list, that we are certifying they are "safe".

Good morning. As you know, MDARD food inspectors have been conducting compliance checks of food establishments in Flint to make sure they are following requirements under the Food Law/Food Code to assure the water they are using is safe.

We would like to begin posting on a daily basis to the Flint Water site a PDF of the updated results of these compliance checks. Below (in italics) is a proposed statement to post with the PDF. A document that outlines the requirements for food businesses should already be posted on the Flint Water site, but I can't find it. I have attached it as an FYI so you know what I'm talking about. This needs to be linked from the underlined word in the proposed statement below.

The most recent compliance tracker PDF is also attached. This is the document that will be updated each day. MDARD's plan is to forward the updated compliance document each day by noon to the JICManager (or to a designee) for posting each week day.

I am seeking approval of the wording and instructions for how best to share this information with the JIC each day for posting. Please call if you have questions! Sorry this is so convoluted. Hopefully the actual posting will be simple!

Proposed statement:

*The following Flint food establishments have received compliance checks and have been found to be following the **requirements** for use of Flint City water as directed by the Genesee County Health Department and the Michigan Department of Agriculture and Rural Development.*

Thanks,

Jeanne

Done.

No "memo" has been issued, however, MDARD has been contacting vets, animal shelters, etc. to see whether or not they are using Flint water and proving them the same guidance that is on the flint water website (eg., use filtered water to water your pets.)

I suggest our response is, yes we would like to work with Genesee County Animal Control. Follow up should be through Drs. James Averill, Nancy Frank, or Michele Schalow. Dr. Averill or I could contact Paul Wallace today.

As additional information, we are already working on crafting more comprehensive messaging. Lead toxicity is a reportable condition to the State Veterinarian's office. We have already contacted nearly all veterinary clinics in Genesee County with information about lead toxicity and the state's already established reportable disease program. The most important thing people can do for all their pets is to assure they follow the same drinking water guidelines as for people.

We have not talked about a PSA and I am not clear as to what is meant by "admonishment" so I cannot comment on those particular factors at this time.

Kay,

Can you take a look at the below email and consider adding the requested information into your PSA for pets?

"ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link."

Genesee County Animal Control has a basic outline already created if needed.

Thanks,
Gabe

Subject: RE: Information for pets

Michelle:
Thanks for getting into this so quickly – funny thing is, this document/link is something I've never seen before, can you tell me where/how it's published, so I and my staff can direct people to it? I think it looks great and the fact that it's out there gives us some traction right out of the gate.

ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link. I don't know if that's something that you're capable of; in what venue or in what form, or if you're even interested at this point.

I have a basic outline from our Shelter vet if you want it. Please advise....and thanks again!

Paul,

Please see the fact sheet below

http://www.gchd.us/docs/Popular_Pages/Lead/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

This appears to be the extent of the messaging on animal safety. There is a little section in this PDF. This same information is also being included in a new flyer from the state.

Do you find this an appropriate first step in message? What additionally would these special interest groups like to see as far as messaging is concerned?

Jen,

We do not have this information immediately available. Dr. Buchweitz has gone home and we expect he will be back in the office on Monday. We can research this over the weekend or try to reach Dr. Buchweitz at home if needed. How soon do you need a response? To the best of my knowledge, this sort of information would be based on research projects, not so much on the study of any real-life situations. We need to make some calls and get assistance with researching sources.

Related to this, I heard on the news that there was a similar lead-in-water population exposure in Washington DC awhile back. Would you happen to have any contact source related to this situation. We are interested in finding out if any animal studies were done during this incident.

Kay,

Can you take a look at the below email and consider adding the requested information into your PSA for pets?

"ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link."

Genesee County Animal Control has a basic outline already created if needed.

Thanks,
Gabe

Please work with agriculture on the issues identified below. Can we develop some sort of PSA that addresses these concerns?

If we don't assist I believe they will move forward without our messaging...

Subject: RE: Information for pets

Michelle:
Thanks for getting into this so quickly – funny thing is, this document/link is something I've never seen before, can you tell me where/how it's published, so I and my staff can direct people to it? I think it looks great and the fact that it's out there gives us some traction right out of the gate.

ASPCA (and others) want a PSA that lists signs/symptoms of lead poisoning in a companion animal, directs people to a veterinarian, and contains the admonishment that's already published in your link. I don't know if that's something that you're capable of; in what venue or in what form, or if you're even interested at this point.

I have a basic outline from our Shelter vet if you want it. Please advise....and thanks again!

Paul,

Please see the fact sheet below

http://www.gchd.us/docs/Popular_Pages/Lead/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

This appears to be the extent of the messaging on animal safety. There is a little section in this PDF. This same information is also being included in a new flyer from the state.

Do you find this an appropriate first step in message? What additionally would these special interest groups like to see as far as messaging is concerned?

Subject: RE: guidance to daycare facilities/schools?

Talked to the Education rep here at the SEOC. While initial contacts have been made to schools, their flyer is in the approval process and hasn't yet been distributed. I've copied the contact info and web addresses on it that has content on the web for people to see:

For more information on childhood lead poisoning prevention:
Printed with Vegetable Oil-Based Inks, Recycled Paper (Minimum 50% Post-consumer) Process Chlorine Free

Simple Steps You Can Take

to Protect Your Family from Lead Hazards
Visit
• Michigan Department of Health & Human Services
http://www.michigan.gov/mdhhs
• Michigan Childhood Lead Poisoning Prevention
www.michigan.gov/lead
• Flint Water Information
http://www.michigan.gov/flintwater
Call
• 2-1-1
• Genessee County Health Department Lead Program
(810) 257-3833
• WIC
(810) 237-4537
• Michigan Childhood Lead Poisoning Prevention
(888) 322-4453
• Michigan Department of Health & Human Services
(517) 373-3740

I'm looking for the stuff that DHHS sent out, no luck yet. Will keep looking. Talked to LARA (who licenses day care center) and they have not sent anything out directly, but are referring people to the Flint Water Website. They are currently calling all their licensees in the affected area to make sure they are aware of the issue (who isn't?) and that they know of the Flint water website. I believe once the flyer is done, all agencies will be using it. We'll make sure you get a copy once it's finalized.

I really threw a wet blanket on that discussion today, didn't I? I am confused by the materials because I did think it had to be heme-iron and the materials we are using don't say that. Oh well.

However, we received an inquiry from the MAND media spokesperson chair, Sheryl Lozicki. She asked if there were any talking points on the issue and if 'we' needed any help from the spokespeople to get the message out through their media contacts. I think this is a great idea but want to be sure the info provide to them is what everyone agreed to and maybe the direction should come from someone at the State level.

What do you think? Sheryl's email address is below if you want to talk to reach out to her directly or if you can tell me who is running the show on this, I can contact them. Otherwise, I will tell them to say 'drink milk. Lots of it." (Kind of a Jim Harbaugh quote). Seriously, we want to speak in one voice so if I can help, let me know.

Thanks, Kathi

Subject: RE: SEOC Resource Request/Task Assignment

Kay – Directions about animals have been included in messaging materials since at least last October; there's an outline of a dog on the guidance document on the flintwater website with a message about water for pets. I'm not clear if they're asking for a pets specific document or asking if we think there's a need for one.

Also, when you send these it is good to put your name above the signature block.

I just spoke to Shanon since I'm sitting in the JIC today. She said the SEOC must need something so to go ahead and pursue it. She said whatever we came up should be sent to the jic manager email to go through the routing process.

I'll contact Kristen.

All -

This should be drafted and ran through the JIC.

This request should be sent to the JIC. Check with Shanon before people start doing stuff.

We need to follow the process.

MSP-EOC-MDARD

From: Tederington, Thomas (MDARD)
Sent: Wednesday, January 20, 2016 1:12 PM
To: MSP-EOC-MDARD
Cc: Bizoukas, Patricia (MDARD); Walker, Sandra (MDARD)
Subject: Staging location

To Whom it may concern,
I would like to request a location change to our staging area. The Genesee County EOC was initially selected as MDARDs staging location, unfortunately they don't have a means to secure our supplies. I would like to request the Flint Water plant as our staging location. It's located at 4500 N Dort Hwy, 48505 (810) 787-6538. Since this is already designated as our water sample drop off site this location would be the best location.

Thanks,

Tom Tederington

Subject: Update on Todays SEOC activities

Good Afternoon all,

This is what I reported at the update call and in the situation report at the SEOC today:
Tuesday Jan 19, updated and planned for MDARD FDD ICS sampling team and environmental assessment of the food and food service establishments in the Flint water distribution zone. Including location of training for the team and staging area for the sampling supplies and return of collected samples collocated at the Genesee Co. EOC. MDARD FDD ICS sampling team will be starting to do evaluations Wednesday afternoon. Additionally, we may start collecting water samples Thursday morning depending upon requests for samples from Food and Food Service establishments.

Resolved question about one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, the firm was visited and found to inactive with no animals on site.

Additionally worked with Lisa Joseph at the FDA DDO on some of the FDA questions regarding mapping and inspections of facilities with joint FDA/MDARD jurisdiction.

Continued coordination with the FDA Detroit District office for food establishments with joint jurisdiction in the Flint water distribution area.

Also shared information on bottled water regulations and testing related to questions about total dissolved solids and source water approval with Jen Holton and the DEQ/DHHS SEOC staff.

Debra Merrill will be covering the SEOC Wednesday January 20.

Subject: RE: Businesses and water access

Eden –
First off, this only applies to food related businesses – we have not had any activities with other types of businesses. In October, we sent a jointly developed (MDARD, MDHHS, MDEQ, and Genesee Co. LHD) to all food businesses under both state and county jurisdiction alerting them to the issue and suggesting they take action. Up through last week that was on the Michigan.gov/flintwater page. In October, MDARD contacted the food processors and checked on the status of their water supply and water use; the FDA also checked on some of the facilities under their jurisdiction.
Last week, our jointly developed guidance was updated and is now a requirements document. It was approved through the JIC and the SEOC and was mailed on Thursday of last week. Per conversations with the Genesee Co. Health Dept., due to their staffing levels they have asked us to assist in outreach to restaurants/food service. The notices contain new guidance and direct businesses to contact us and we'll schedule an appointment to test their water (attached). I've heard that we started getting those calls today.
Wed morning we are training 14 of our Food & Dairy Division staff on water sampling and the process for getting testing kits and dropping them off, etc., and Wed. afternoon they will get out to the 11 businesses in the most impacted area – overlaying our maps on the published "hot zone" map – that's where we'll start first to do an initial assessment of the building and schedule a time to collect a sample. From there we'll keep working on the total list, prioritizing those businesses that call for an appointment as well as those that are more likely to serve at risk populations. Additionally,

MDARD's Motor Fuels Quality & Weights & Measures staff will hand deliver the notice to every one of the 90+ gas stations with a Flint address. Some are likely not on Flint water, but we've found sometimes that the addresses we have for them are business offices, so by the end of the week, they'll all get a personal visit.
MDARD has set up an internal Incident Management Team, with Sandra Walker as our Incident Commander.
The LHD total list also included schools; since Dept. of Education has already been working on that we are not working with them.

Hope that helps. I'm sure as we have more interactions with businesses we'll have more to report.

Subject: Businesses and water access

Hi Brad,

We met with Representatives today about the Flint issue, and there were a few questions about business access to clean water and filters. Can you summarize what activities are going on (since Oct 2015) to address the needs of businesses in Flint, particularly restaurants, etc.? Are there still need to be met, and if so, what are they?

Subject: On Flint Water?

Brad,

Dr. Averill advised I email you regarding a situation that has come up. In following up with the various veterinary practices in the greater Flint area regarding the Flint water situation, I spoke with Dr. Susan Shanks with Reese Veterinary Clinic in Burton, MI today. Dr. Shanks states that she is unsure if she is on City of Flint water. Dr. Shanks states that (she believes) she is not paying for City water, but states that coverage maps for Burton show her practice as being on City water. Dr. Shanks states that their practice has been taking precautions with their patients for some time (giving bottled water), but would really like to know for sure if she is or is not on City water. Is there any way we can for sure determine this for her? (FYI, I did discuss with her the availability of free testing and filters, as well as gave her the website (www.michigan.gov/flintwater) for more information).

Thanks Jen. This reads better, but it still does not tell people what to do if they have concerns about their water. Should they be taking it somewhere; can we replace it? Also, I'm wondering if we should be providing 211 with the label names or product numbers so they can determine what water is the water being tested/in question.

Subject: RE: please review -

It's my understanding the local health department determines what is considered an approved source. They, along with DEQ, test at the source. MDARD inspects the facilities bottling in Michigan, but does not routinely test the final bottled product. If we do take a sample, we don't test for lead. We're looking for bacteria and pathogens. I don't know about those companies bottling water outside the state of Michigan.

Also, I am not clear on the issue with a specific product/manufacturer.

The statement reads a little bureaucratic to me. Suggestions below.

As a few residents have raised concerns about lead possibly being in bottled or canned water, we are expeditiously testing the bottled and canned water to ensure it is lead free. Additionally, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. We will also, out an abundance of caution, we will be testing batches of all new bottled water coming in to the distribution sites and working in partnership with the manufacturer to assure product integrity.

Jen, and all,

I can confirm that the DEQ stated that they would be testing the bottled water identified out of an abundance of caution.

From conversations here it appears that the testing device that is used by the public does not detect lead directly but looks for total dissolved solids (TDS). TDS is acceptable in Drinking water as it gives water taste versus the flat taste of distilled water.

MDARD does sample bottled water during our inspection of the bottlers during our normal operations. Let me know if you have any additional questions and I will try to answer the questions as best I can.

In short, we need to vet the below message to provide to 2-1-1 operators who get inquiries from residents...
Food and drink being an MDARD issue, I took the liberty of drafting for you – but am now turning this statement over to you for your MDARD magic.
Upon approval by MDARD, Shannon can send to MSP Command for final vet and go for dissemination to 2-1-1.

Call me with any questions
Thanks
Mel.

AID - I've heard back from the GIS staff at the State Emergency Operations Center about the five premises in our livestock database with Flint addresses. They indicate that only one is in the Flint water service zone, the one on our list as "inactive" -
(Neither Dr. Smith nor Dr. Vanderklok were able to reach anyone at that number).
Could AID put this into an assignment for a field staff visit to check conditions on the ground?
thanks - please let me / whoever is in the SEOC know what happens.

Hi, Brad.

We are working diligently on Indiana HPAI related activities this afternoon. We are sending out communications to AID staff, MAPI,
MSU-E, and all Michigan veterinarians. This could generate calls over the weekend so we wanted to give you a heads up. We will send you copies of the messages we send to MSU-E and veterinarians.

We have nothing additional to report on the Flint water situation. Has anyone at the SEOC had a chance to determine whether or not any of the potential livestock facilities are on city water?

Subject: follow up - additional water sampling in Flint

Following up – on yesterday's 4pm call DEQ said they'd be forming teams to test water in day care facilities and similar locations for this and future weekends, and that they would need assistance from other agencies. Just checked with DEQ here in the SEOC and they confirmed that Acting Director Creagh put the word out within DEQ and their staff are filling the need. If they need help down the road they will let us and other agencies know, but for now, we don't need to ask staff to assist with that effort, and we'll focus on reaching food establishments.
Thanks to all of you for your willingness to pitch in (as always)!

Yes, a picture really is not any help to us. If we could get it in the .pdf format, that would help a bit, but the best would be a listing of addresses rather than a plotted map. That way we can populate our own maps for inspectors, etc.

Brad,

Attached is a JPEG version of a map of the hotspots in Flint with an overlay of active LHD license establishments. The map is zoomed in to the hotspot area. A PDF version of this map is currently being generated. I will send it to you once it is finished. Please let me know if you would like any changes made to this map.

Also, I am working on the Flint Premises map and should be getting that to you shortly.

Subject: RE: Flint Water Crisis Restaurants map

Yes, a picture really is not any help to us. If we could get it in the .pdf format, that would help a bit, but the best would be a listing of addresses rather than a plotted map. That way we can populate our own maps for inspectors, etc.

Thank you,

Subject: Lead testing for businesses in Flint

Please clarify if businesses in Flint, such as restaurants, are also eligible for lead testing under the current program at no cost. We have received a call indicating a business has not been able to obtain a sampling kit at the fire station since they were not private homeowners. Is there an alternate location businesses should be using to obtain sample bottles? Thanks for any clarification you can provide.

Gloria – I'm in the SEOC next to Kathy and I wanted to make the virtual introduction with two of our MDARD leads – Lori Yelton is our Nutritionist in our Food & Dairy Division, and Nancy Nyquist oversees some of our grant programs from our Agriculture Development Division. We've provided funds in the last few years to support both the Flint Farmer's Market / Food Hub and the Food Bank of Eastern Michigan and we'd be happy to be part of the multi-agency recovery discussions.

Subject: Re: SEOC update

From the Pios -

A JIC is being formed.

Will be - at some point- moved to Flint.

City of Flint/Genesee County will become part of the JIC

Talking points/social media posts being crafted

Media advisory being drafted

Unless instructed otherwise, I don't see a continued role for MDARD Comms. Some of that could depend on how long a JIC stays open/operational if PIOs have to rotate.

Subject: FW: Processing establishment Flint

Brad,
Here you go.

These are the questions that were asked.
Tracy and Michelle,
I got a little better direction from Kevin Besey regarding calling your food processor. I know that not having talking points can be a concern. At this time MDARD doesn't have any talking points from the DEQ.

- #1. The first thing you should ask your firms is: Do you have any concerns or questions regarding your processing and using the municipal water?
  - You can let your firms know that the Food and Dairy division are in talks with the DEQ regarding the water in flint. As I'm sure you know the DEQ has jurisdiction over drinking water, not Food and Dairy.
  - If your firms have concerns MDARD can bring them up with the DEQ to see if we can get your firms the answers they are looking for
  - There are meetings scheduled for today.
- #2. As a fact finding mission ask your firms if they are you using municipal water for their processing. Yes or no Currently the water is still considered an approved source.
  - If yes
    - What are they using the water for?
    - Did they install a filter?
  - If no what are they doing?
    - Using bottle water
    - Stopped processing

These are the basic questions you will need to ask. The key to this is the Food and Dairy division is there to assist and we are working with the DEQ to try to get them the answers they may be looking for. I hope this provides a little more direction.

Thanks,

Tom Tederington

Subject: Processing establishment Flint

Kevin,
Our records show that MDARD licenses 13 processing establishments that are located in Flint using Flint's municipal water. Of these 13 processing establishments one is a USDA inspected plant. The inspectors that inspect these facilities were asked to call and find out if they are using Flint's municipal water in their processing. Attached is a spreadsheet that notes the establishment name and their responses to our question.

Thanks,

Tom

Subject: JIC staffing schedule

Fellow PIOs,

Thank you so much for your response to our call for assistance in the JIC. Attached is a staffing schedule through next week. You'll notice there are still several holes in the schedule where we still need assistance. If you or any of your staff can fill a spot, please send an email to JICManager@michigan.gov. Also, please keep in mind, the JIC will be operational for the foreseeable future, so we will likely be looking for future staffing needs as well.

PIOs scheduled to report tomorrow at 8 a.m. include:
Laura Biehl
Shanon Banner
Jen Eisner
Bob Wheaton
Bill Humes
Mel Brown
Tiffany Brown
Ron Leix
Sierra Medrano
Heather Throne
Kerry Wieber
Jason Moon
Caleb Buhs
Dave Kaiser

Please review the full schedule (attached) for staffing for the rest of the days. The logistical information for PIOs traveling to Flint for the JIC is as follows:

JIC Location:

State of Michigan Office Building
125 E. Union Street
Flint, MI 48502
https://goo.gl/maps/ZpiVMNys3u52

Free parking is available in the parking structure directly across the street from the main entrance to the State of Michigan Office Building.

You will need to bring your state ID to show to the security guard at the entrance. Take the elevator to the 5th floor. The entrance to the work area is directly left of the elevator on the 5th floor. You will also need your state ID to access the work area.

If you cannot access the building, please contact the JIC Hotline at 888-363-8632. (Keep in mind that staff will not be available at the JIC before 8 a.m. daily.)

JIC Hours:

Please try to be at the JIC by 8 a.m. as some briefings start as early at 8:30 a.m. The media hotline opens at 9 a.m.

Hotel Information:

PIOs who wish to stay in Flint (at no charge to them), can reserve a room by calling the Holiday Inn, using the below information:

Holiday Inn - Flint
5353 Gateway Centre Dr.
Flint
Phone: 810-232-5300

Please use the following account code in order to ensure the room is charged to State Police: MSP12

If you reserve a room, we need to you to report it to JICManager@michigan.gov so it can be shared with Finance. If you have any problems or find the hotel to be booked, please email JICManager@michigan.gov.

Misc.

There are laptops here in the JIC; however, most PIOs have found working on their own laptops seems to work better. If you have a laptop, the recommendation is to bring it.

Lunch will be provided, as well as dinner for anyone staying beyond 6 p.m.

Thank you,
Shanon Banner

Subject: Wednesday Jan. 13 update from the Flint Water Response Team
Reply-To: <governorsoffice@govsubscriptions.michigan.gov>

FLINT WATER RESPONSE TEAM

UPDATE | WEDNESDAY, JANUARY 13, 2016

This daily update is being issued in order to provide the latest information regarding actions and available resources.

Governor Snyder has requested support from the Federal Emergency Management Agency (FEMA) to coordinate with other federal agencies to provide resources to Flint as we work on short-term and long-term solutions for residents. This request will identify federal agencies that have programs, authorities, and/or technical expertise that could help in the ongoing response and recovery efforts in Flint. Such federal agencies may include the Department of Health and Human Services, the Environmental Protection Agency, the Department of Housing and Urban Development, and the Army Corps of Engineers.

In addition to requesting support from FEMA, the Governor has activated the Michigan National Guard to help our local volunteers distribute supplies at the five water resource sites. If you need free bottles of water, water filters, replacement cartridges, or water testing kits, please visit one of these sites. **CLICK HERE TO FIND A LIST OF THE WATER RESOURCE SITES.**

A Public Service Announcement was also released in a priority effort to continue providing free water resources to all Flint residents. **Please share this PSA on social media to help us spread the word.**

Today, Governor Snyder was joined by Director Nick Lyon from the Michigan Department of Health and Human Services, Department of Licensing and Regulatory Affairs Director Mike Zimmer, and

Michigan Chief Medical Executive Dr. Eden Wells at a press conference in Detroit.

During the press conference, in an abundance of caution and full transparency, officials released information regarding a spike in cases of Legionella in Genesee County. The documented increase occurred in 2014 and 2015.

Dr. Wells noted that proper authorities, including the Environmental Protection Agency and Centers for Disease Control and Prevention, are working together to further investigate the spike and will issue full reporting in the near future.

While the cause of the increase in Legionella is being reviewed, Dr. Eden Wells does not advise any change in current procedures being recommended by the Department of Health and Human Services. Residents should continue using clean water resources.

Reminders:

- **Flint Water Assistance:** Dial 211 or visit www.mi.gov/FlintWater
- Residents should install filters to their taps to ensure they have immediate, ongoing access to safe water.

WATER RESOURCE LOCATIONS
These sites are open seven days a week from 9 a.m. to 9 p.m. with the following resources:

- Bottled water
- Water filters
- Replacement cartridges
- Water testing kits

Fire Station #1 310 East 5th St. Flint, MI 48502

Fire Station #3 1525 Martin Luther King Ave. Flint, MI 48503

Fire Station #5 3402 Western Rd. Flint, MI 48506

Fire Station #6 716 West Pierson Rd. Flint, MI 48505

Fire Station #8 202 East Atherton Rd. Flint, MI 48507

WATER FILTER PICK-UP SITES
Residents should install filters to their taps to ensure they have immediate, ongoing access to safe water. In addition to the water resource sites, water filters and replacement cartridges continue to be available Monday through Friday, between 9 a.m. and 4 p.m.

- Michigan Department of Health and Human Services office 125 E. Union St. Flint, MI 48502
- Michigan Department of Health and Human Services office 4809 Clio Road Flint, MI 48504
- Genesee County Community Action Resource Department office 2727 Lippincott Flint, MI 48507
- Genesee County Community Action Resource Department office 601 N. Saginaw Flint, MI 48502
- Flint City Hall 1101 S. Saginaw St. Flint, MI 48502

If you require transportation or any other assistance, please call 211.

We will continue to work to improve the water situation in Flint. Community members and local officials are working together to make sure we hear and respond to concerns. Governor Snyder will

continue to keep you updated on the latest news and information. If you don't find the resources you need by dialing 211 please call the Governor's office directly at 517-335-7858.

Attachments: DW Flint Sampling.pdf

That is correct, no cost to businesses or any entity in the affected area. This is the form they should be receiving with the kits. The kits are currently at GCCARD 2727 Lippencott Blvd, Flint. I need to find out what the process has been recently established for picking up of supplies there. I believe there is a warehouse manager there tracking everything coming in and going out.

Sent: Wednesday, January 13, 2016 11:03 AM
To: Wolf, Jennifer (DNR); Deacon, Brad (MDARD)
Subject: RE: Businesses

Yes – guidance was ok'd by the JIC for food related businesses and we're hoping to get it out in the mail today to restaurants, grocery & convenience stores, etc. yet today. They can contact us and we'll schedule a visit for us to collect samples that will go to the Lab. We expect the proactive businesses will keep us busy for a while, but we'll also be looking at maps and stopping by facilities to make sure they're aware and answer questions. Our understanding is that there was not a cost to the businesses if we're collecting the samples.

What's the address for the location where the test kits are?

Are your EOC sites also doing samples for businesses? Some will ask for many bottles FYI.

My last instructions from Mike was to have businesses contact the DEQ directly and they would have to pay for the test. Please advise if local EOCs are to supply and receive sample bottles for businesses.

Thanks.

Subject: Food License Question

Question came as to whether the warehouse (3086 E. Cort Street in Flint) being used for temporary storage and distribution of bottled water needs an MDARD food license. After discussion with MDARD Food & Dairy Division Director Kevin Besey, under the circumstances and due to the nature of this facility no license is needed. If DTMB / Operations has any questions about sanitation, MDARD can have a food inspector available for any questions.

Subject:	JIC staffing - next week

Megan, CC and Jeanne -

Attached is the staffing schedule for next week for the JIC.

Cheri Cavanaugh, social media: Jan. 15, Jan. 20, Jan. 22
Jeanne Hausler, hotline: Jan. 19
Megan Sprague, hotline: Jan. 20, Jan. 21

The JIC is operating from a state office building in Flint. At a minimum, JIC working hours are 8 a.m. – 6 p.m., although several PIOs are routinely working until 9 p.m. to complete all necessary tasks (more staff will help alleviate some of this). Lunch is provided, and overnight accommodations can also be arranged at no-cost to the PIO.

I do not expect any of you to stay that late. If you need to go, then you need to go. If you think you want to stay overnight, please let me know asap.

Laptops are available at the JIC, however, PIOs encouraged to bring their own laptops to help avoid firewall issues. Office supplies, phones, etc., are set-up in the JIC.

Attire is business casual and lunch will be provided.

The JIC is located at:

State of Michigan Office Building
125 E. Union St.
Flint, MI 48502
https://goo.gl/maps/HuiQQc31JkB2

When you arrive at the State of Michigan Office Building, please park in the visitor parking garage across the street from the main entrance. Parking is free. When you enter the building, show your state ID to the security guard and take the elevator to the fifth floor. Your State of Michigan ID should get you access into the work area. (Use the door to the left of the elevator to enter the work area.)

Working on getting a contact number should you have any issues.

Thank you for your help. This is a good opportunity for you to work in a JIC environment and learn the processes. Please advise by 10 am tomorrow if any of the dates no longer work for you.

Jen

Subject: New Tactic

In our tactics meeting this afternoon, a new tactic was added in relation to the nutritional planning that we have been discussing already. If/when it is approved by command, we will need to coordinate on a strategy for our "plan" regarding nutrition. Currently, this consists of providing the updated nutritional information that we are waiting for from the JIC to post. Other thoughts, ideas, tactics that you all have in mind? The CHECC is also working to gather information on food and nutrition programs through MDHHS, to ensure consistent messaging.

Jen W. – cc'ing you as FYI

Thank you,
Jennifer

Subject: MDARD Update - Flint Water

This is what we've put into the Situation Report for today:

Jan 12th - 1/12/16 - MDARD Activities: Food Safety: The updated guidance document for water in retail food and restaurants/food service is done and awaiting final ok in the JIC/SEOC; could go out in US Mail as early as Wed. MDARD Food staff will start scheduling water sampling and inspections for next week. MDARD has requested a map overlaying food facilities with the known areas most impacted to help prioritize follow up.
Animal health update: notifications to potentially impacted facilities are nearly complete. After further coordination with Genesee County Animal Control, the three animal shelters in the Flint area are not on City water. The Michigan Veterinary Medical Association notified all veterinarians in the region last week; MDARD will be individually following up with the two clinics. There are no kennels or pet grooming facilities in the City. Genesee Animal Control will be contacting pet stores and the known households that serve as animal rescue operations and does not need MDARD assistance.
MDARD is also looking at opportunities for assistance/guidance related to nutrition, including possible support through donations management.

In addition

- I have been communicating with Craig VanBuren and MFQ/W&M will be looking at hand delivering our notice to gas stations in Flint.
- AID called the farms with Flint addresses in their database; only one was home and is not on City water; others did not have answering machines and AID will keep trying.
- I am working on a few sentences for MSP on potential broader impact and on potential federal resources (thanks Lori for your help on that)
- Still need to put together the history document of funding for Flint farmers' market and research potential needs / projects.

Subject: MFQ & W&M Assistance - Flint

Craig, Rob, and Tim –
Thanks for your willingness to help. Here's the request / plan:
FDD has finalized revisions to the guidance on use of water in Food Establishments; it is going through the approval process of the State's Joint Information Center. We're expecting that to be completed by the end of today, and then copies will be mailed to Food Service and Food Retail Establishments, and it will be posted on the clearinghouse website (www.michigan.gov/flintwater), replacing the current version. The change is that we're going from a recommendation to a requirement for firms to take steps to ensure the water they're using (primarily pop and ice machines) is safe.
We will get you a copy of the letter / notice and are asking that your field staff hand deliver that to the person in charge within the station as they do their routine inspections. The station should get the letter and may at some point get a visit from a Food Inspector, but we are okay with some overlap. If your field staff could let someone know which ones they've done with date and address, we'll get that information from you every so often. At this point, MFQ/W&M would only be providing the flier which has FDD's number on it if the firm wants to get their water tested.
Hope that helps – let me know if there are questions.

FOR IMMEDIATE RELEASE
Tuesday, January 12, 2016

Public service announcement released today provides information on water resources

LANSING, MI - A Public Service Announcement was released today by Gov. Rick Snyder's office in a priority effort to continue providing free water resources to all Flint residents.

The PSA, featuring Capt. Chris Kelenske from the Michigan State Police, provides information about the resources currently available for free to all Flint residents, including water filters, replacement filters, bottled water, water testing kits, and blood testing.

Click here or below to view the PSA:

Visit **www.michigan.gov/flintwater** or call 211 for more information. Residents who need transportation or any other assistance can call 211.

For more information, contact the Governor's office at 517-335-6397.

Subject: Tuesday Jan. 12 update from the Flint Water Response Team

FLINT WATER RESPONSE TEAM

UPDATE | TUESDAY, JANUARY 12, 2016

This daily update is being issued in order to provide the latest information regarding actions and available resources.

On Monday, I signed an Executive Order to create the Flint Water Interagency Coordinating Committee (FWIACC) to bring together a wide range of experts to work on long-term solutions to the Flint water situation. In the short-term, our priority is to ensure every Flint resident has access to free bottled water, water filters, water testing kits, and replacement cartridges.
CLICK HERE TO FIND THE WATER RESOURCE CENTER NEAR YOU.

Today, water resource teams will begin to canvass Flint neighborhoods to deliver bottled water, water filters, replacement cartridges and water testing kits. These efforts will continue until Flint residents have the resources they need in their homes to ensure their drinking water is safe.

Bottled water continues to be distributed to the five water resource sites at Flint fire stations. Residents should install filters to their taps to ensure they have immediate, ongoing access to safe water. Free filters and replacement cartridges are available at the water resource sites.

Reminders:
FLINT WATER ASSISTANCE: Dial 211 or visit: www.mi.gov/flintwater

WATER RESOURCE LOCATIONS
These sites are open seven days a week from 9 a.m. to 9 p.m. with the following resources:

- Bottled water

- Water filters
- Replacement cartridges
- Water testing kits

Fire Station #1 310 East 5th St. Flint, MI 48502

Fire Station #3 1525 Martin Luther King Ave. Flint, MI 48503

Fire Station #5 3402 Western Rd. Flint, MI 48506

Fire Station #6 716 West Pierson Rd. Flint, MI 48505

Fire Station #8 202 East Atherton Rd. Flint, MI 48507

WATER FILTER PICK-UP SITES

Residents should install filters to their taps to ensure they have immediate, ongoing access to safe water. In addition to the water resource sites, water filters and replacement cartridges continue to be available Monday through Friday, between 9 a.m. and 4 p.m

- Michigan Department of Health and Human Services office 125 E. Union St. Flint, MI 48502
- Michigan Department of Health and Human Services office 4809 Clio Road Flint, MI 48504
- Genesee County Community Action Resource Department office 2727 Lippincott Flint, MI 48507
- Genesee County Community Action Resource Department office 601 N. Saginaw Flint, MI 48502
- Flint City Hall 1101 S. Saginaw St. Flint, MI 48502

If you require transportation or any other assistance, please call 211.

We will continue to work to improve the water situation in Flint. Community members and local officials are working together to make sure we hear and respond to concerns. I will continue to keep you updated on the latest news and information. If you don't find the resources you need by dialing 211 please call my office directly at 517-335-7858.

Sincerely,

Rick Snyder

Governor

All~

Next week, I have the following folks who can help in the JIC on the following days:

Jeanne Hausler, Food & Dairy Communications Specialist
Available: Tues., Jan. 19 and Thurs., Jan. 21

Megan Sprague, Animal Industry Communications Rep. (she's fairly new to the department, but eager and wants to learn. Also great photographer.)
Available: Wed., Jan. 20 and Thurs., Jan. 21

Cheri Cavanaugh, graphic design and social media coordinator (traditional/social media monitoring)
Available: Wed., Jan. 20 and Fri., Jan. 22

Please let know by 10 am on Friday morning if you think you will need any of these folks, so I can coordinate with their supervisors.

Subject: Milk Tank Truck Question
Importance: High

Kay,
T tried calling the number but I received a message that said it was disconnected.
A bulk milk tank truck can be used to haul and transfer water. This was done for years at the Ag Expo held every summer at Michigan State University to supply fresh cold drinking water to the visitors. This could be done again to supply water to Flint residents. There are a couple of things to think about.

1) Milk tank trucks delivering into dairy plants and returning home could carry potable water back but they would need to be re-washed and re-sanitized at an approved wash station prior to picking up milk.
2) Milk tank trucks delivering into dairy plants like the Michigan Milk Producers Association's plant at Ovid are backed up and having a difficult time returning back to get milk picked up at the farm before the farm bulk tanks run over, the next milking is due to begin, or the last tanker is filled at direct load farms.

The most likely scenario to have this work would be to have "spare" bulk milk tank trucks that are not being used on a day to day basis filled with potable water that can be delivered to Flint. There would still be technical issues with getting the water from the tanker into some type of storage vessel or container since the rear outlet valve is set up to make a connection to a 2 or 3 inch diameter hose. The tanker that was used at Ag Expo had spickets fabricated to allow several people to fill glasses with water at the same time by gravity feed if I remember correctly. The barrel of the tanker itself is insulated and can hold a constant temperature for at least 48 hours.

Gov. Rick Snyder: Flint Water Interagency Coordinating Committee will support long-term needs in Flint

Committee to address health, other issues into the future

LANSING, Mich. - Gov. Rick Snyder today signed an executive order creating the Flint Water

Interagency Coordinating Committee, which will bring together a wide range of experts to work on long-term solutions to the Flint water situation and ongoing public health concerns affecting residents.

"We need to focus on improving Flint for the longer term," Snyder said. "This committee, made up of experts from government and the Flint community, will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires."

The Governor declared an emergency on Jan. 5 to put in place distribution of water, water filters and water tests for residents. The declaration launched the State Emergency Operations Center, made up of state emergency response personnel and non-governmental organizations such as the Red Cross.

The emergency declaration has led to a response from multiple state agencies, and is focused on assistance for immediate needs, such as filter and water distribution. Information can be found on Michigan.gov/flintwater, where individuals can also subscribe to email updates.

FWIACC's membership will include experts from the state, Genesee County, the city of Flint and subject matter experts. The group will analyze any long-term effects of high lead levels in Flint residents and recommend action.

In addition, an independent Flint Water Task Force is continuing a full review of all local, state and federal actions that led to the current situation in Flint.

The Coordinating Committee will be composed of the following 17 members, who shall serve an initial term expiring on Dec. 31, 2018:

- The director of Office of Urban Initiatives within the Executive Office of the Governor;
- The deputy state director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The director of the Department of Environmental Quality, or his or her designee;
- The director of the Department of Health and Human Services, or his or her designee;
- The director of the Department or Licensing and Regulatory Affairs, or his or her designee;
- The state treasurer, or his or her designee;
- The superintendent of public instruction, or his or her designee;
- The elected mayor of the City of Flint, who shall be appointed to the Coordinating Committee by the Governor;
- Three additional representatives of the City of Flint who shall be submitted by the Flint mayor and appointed to the Coordinating Committee by the Governor;
- Three representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the coordinating Committee by the Governor;
- Three subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the FWIACC will serve three-year terms. The council will be asked to create an incident action plan, review recommendations made by the independent Flint Water Task Force, establish routine protocols for communications at the local, executive and legislative levels, make recommendations regarding the health impacts of the affected population, and assess the status of infrastructure and determine feasible actions for upgrading Flint's water

system.

A full list of responsibilities of the council can be found in the Executive Order.

Subject: RE: Genesee Animal Holding/Gather Facilities: Water

Here's today's update:

Shelter Director Paul Wallace has obtained some documents to help ascertain what entities (that are not tracked via licensing and registration) that would be housing animals:

- All the City of Flint street (physical) addresses that are on City of Flint water
- All the "Out-County" (physical) addresses that are on City of Flint water
- He received those today. There are too large to email. I will be getting a copy of them late Monday/early Tuesday next week.

He is currently pulling the possible animal holding/gathering facilities in reference to that listing. Those lists may come yet today, over the weekend, or Monday/Tuesday.
This should provide the rest of the contacts.

Other shelters are not on City of Flint water.

Let me know if there's anything else you might need yet today. I will have my cell phone on this weekend.

Subject: Genesee Animal Holding/Gather Facilities: Water

All.

My first cut at information for Genesee regarding animal holding/boarding/gathering places.

We have 3 registered shelters in the county:

- Genesee Animal Control in Flint
- Humane Society of Genesee County in Burton
- Adopt-A-Pet in Fenton

I spoke with Paul Wallace, Genesee Animal Control Director this afternoon.
Although a Flint address, the Animal Control Shelter gets their water from Flint Township not the City of Flint, which never had an interruption in their water source from the City of Detroit. They did not receive the suspect water according to Mr. Wallace.
Mr. Wallace indicated that it might not be as clear cut as city versus township addresses to identify water source. Lists will err on the side of inclusiveness to start.

He is going to pull lists of their licensed kennels, a listing of veterinary clinics, doggy-daycare (might also be kennels), see if they have a listing of rescues (staff that might have prepared lists will be back in tomorrow) and we discuss tomorrow what he has found to date.

I will contact the other 2 shelters (animal protection shelters) so that all in Genesee County are contacted.

I will update you again tomorrow. Contact me with any questions.

Make sure children eat healthy foods and snacks such as lean meat, chicken, turkey and fish, milk, low-fat cheese, yogurt, broccoli, collard and turnip greens, oranges or grapefruits, orange or grapefruit juice, potatoes, tomatoes and peppers. Low-fat milk and foods are best for children over the age of two.

With links to CDC:
From CDC
http://www.cdc.gov/nceh/lead/tools/5things.pdf

Give your child healthy foods.

Feed your child healthy foods with calcium, iron, and vitamin C. These foods may help keep lead out of the body.

- Calcium is in milk, yogurt, cheese, and green leafy vegetables like spinach.
- Iron is in lean red meats, beans, peanut butter, and cereals.
- Vitamin C is in oranges, green and red peppers, and juice.

Make sure children eat healthy foods and snacks such as lean meat, chicken, turkey and fish, milk, low-fat cheese, yogurt, broccoli, collard and turnip greens, oranges or grapefruits, orange or grapefruit juice, potatoes, tomatoes and peppers. Low-fat milk and foods are best for children over the age of two.

With links to CDC:
From CDC
http://www.cdc.gov/nceh/lead/tools/5things.pdf

Give your child healthy foods.

Feed your child healthy foods with calcium, iron, and vitamin C. These foods may help keep lead out of the body.

- Calcium is in milk, yogurt, cheese, and green leafy vegetables like spinach.
- Iron is in lean red meats, beans, peanut butter, and cereals.
- Vitamin C is in oranges, green and red peppers, and juice.

State Emergency Management Coordinator:

As discussed in this morning's briefing, your agency has been identified to research potential assistance programs (private, state, federal, etc.) that may be available to address the short- and long-term recovery needs in response to the Flint water incident. Earl Zuelke, FEMA Long-Term Recovery, has made contact with some federal agencies to assist with this research. Feel free to touch base with him in the SEOC.

Attached is a copy of the Non-Stafford Act Recovery Guide. Appendix 2 (pg. 24-26) provides a list of some potential federal programs. This list is **not** all-encompassing; however, it will provide a starting point if any of these programs may apply to the response and recovery for this incident.

Provide the following information, *at a minimum*, on potential assistance programs for individuals and/or government support in response to this incident:

- Program Name
- Agency Responsible for program
- Point of Contact
- Type of Support (Individual or Government)
- Eligibility Guidelines
- Benefits Available
- Application Process

This information shall be submitted to Brianna Briggs, the Recovery Branch Chief, at briggsb3@michigan.gov by **COB Friday, January 15.**

Let Brianna (cell phone below) know if you have any questions on this request.

Thank you,

Brianna Briggs
Recovery Branch Director

Subject: Joint Information Center Info

Fellow PIOs:

This week, the governor activated the State Emergency Operation Center to address the health and safety issues related to Flint drinking water. The Joint Information Center has been established to support the SEOC by centralizing communications and streamlining public education efforts.

All media inquiries regarding Flint water and health concerns must be directed to the JIC – the media line is: 888-363-8632. Additionally, all communications materials related to Flint must be routed through

the JIC to ensure consistent and accurate messaging. If you have draft social media, FAQs, or any materials you plan to share, send them to Ron Leix at leixr@michigan.gov for approval.

The JIC has created approved social media content for your use, as well as Facebook and Twitter graphics. Messaging and graphics are attached.

Some of you may be called on to staff the JIC. Currently, the governor's office and lead agencies – MDHHS and DEQ – are working side by side with MSP on location. Through close of business today, Friday, January 8, the JIC will be located at 4000 Collins Road, Lansing, MI 48910 in the SEOC. As of Monday morning at 9 a.m., the JIC will be moved to Flint, at 125 E. Union Street, 48502.

Thank you,
Dave

Subject: Information needed for Flint water regulatory assistance

Good morning Kay,

We previously discussed GIS mapping assistance for food service and food establishments within the City of Flint to assist our efforts. Could you contact the appropriate staff to provide this assistance? I'm attaching the list of establishments identified as licensed in the area. We would appreciate GIS mapping by:

- Establishment type (State License) such as 'FLP', 'FRE', Local health department license such as 'FSE'
- Address/Location
- Other pertinent information

Also, in the news it was reported that a requirement to install filters may be imposed. Could you determine for us if this means it applies to all food establishments, what specific location in the water system within the facility, what type of filter is appropriate for lead and do we know who's funding this.

Thank you Kay!

SUBJECT: SEOC Media Roundtable and Tour

Good morning:

Today at 1 p.m. the State Emergency Operations Center (SEOC) will hold a media roundtable to discuss the emergency declaration process and the next steps in responding to the drinking water health and safety issues in Flint. SEOC Director Capt. Chris Kelenske will be joined by MDHHS Chief Medical Executive Eden Wells to explain the role of the state in emergency response efforts. Immediately following the discussion, MSP personnel will lead media on a tour of the SEOC facility.

Location:

State Emergency Operations Center

4000 Collins Road

Lansing, MI 48910

If you are interested in participating in the media roundtable, but are unable to attend in person, a media conference line will be available.

Thank you,

Subject: Re: SEOC update

I have a note into Ron for approval on the MVMA/DCPAH request.

An icon will be going on all state agency website homepage so people can click on it and it will take them to the Flint Water web page.

The Flint water page has been moved off of DEQ and put under the mi Gov portal.

Release was being routed. All media calls/communications on Flint water need to be run through the SEOC/JIC for approval prior to distribution.

A JIC is being formed.

Will be - at some point- moved to Flint.

City of Flint/Genesee County will become part of the JIC

Talking points/social media posts being crafted

Media advisory being drafted

Unless instructed otherwise, I don't see a continued role for MDARD Comms. Some of that could depend on how long a JIC stays open/operational if PIOs have to rotate.

Brad, here is a brief update on the dog case we worked on. Let Dr. Schalow and me know if you need more detail.

MDARD worked with MDHHS on a case of a lead poisoned dog in Flint. The dog was treated for lead toxicity by a local veterinary practitioner. An environmental assessment of the owner's property was performed. We believe the dog was exposed to lead through drinking contaminated water from an outdoor faucet. The owner has other animals that may also have been exposed to lead. The other animals have not been tested though MDARD offered to pay for the tests but not for other veterinary fees.

Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration.

EMHSD will activate the SEOC tomorrow at 0800 and will conduct a briefing at 0900 on the event. All state agencies are to send a representative to the 0900 briefing. MDHHS and MDEQ have been directed to brief on the situation. Following initial SEOC briefings, each state agency, in consultation with the State Director, must determine if they need to play a role in ongoing SEOC operations to contribute to addressing the problem. At minimum, MDEQ, MDHHS, Education, DTED, DTMB, and MDARD should maintain a presence in the SEOC. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;
- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

If you require anything in the interim, please contact me by email or c

Subject: 2-1-1 Update Flint Water Response for Monday, February 15, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Monday, February 15, 2016

NOTE: Attached to today's summary is a copy of the PDF reference document 2-1-1 partners use for Flint Water calls. This document is updated daily, sometimes several times a day. 2-1-1 agents access this through a shared DropBox file that ensures all 2-1-1 staff have immediate access to the most current information about the response.

GENERAL INFORMATION:

- **There will be an informational meeting one of the class action lawsuits** on Tuesday, February 16, 2016 from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.
- **United Way Worldwide announces details of Beyoncé's Formation World Tour benefitting Flint** with proceeds to support United Way of Genesee County's work to help the people of Flint dealing with the Flint Water Crisis. Fans will have an opportunity to donate to the Flint Water Fund after purchasing their tickets. Every $10 donated is an entry for an upgrade to the best house seats at each concert. US Tour tickets go on sale February 22nd.

CALL VOLUME:

Central Michigan 2-1- 1was closed today for the Presidents' Day holiday. SW Michigan 2-1-1 partner, which regularly handles after hours and weekend calls for Central Michigan, reported a few waves of calls that pushed wait times to approximately 10 minutes for short periods.

Call summary for the week of February 8-14

- 777 callers used the Flint Water prompt to reach a 2-1-1 agent.
- 1009 referrals were provided (1.3/caller) and there were 30 unmet needs recorded.
    - The majority of calls came from zip codes 48504 and 48505
    - The most common requests were for Drinking (Bottled) Water, Water Filters, and Tap Water Testing.
    - 17 calls were to donate or volunteer.

SPECIAL NEEDS/REQUESTS

- **American Sign Language interpretation may be available for Flint-area events** through a professor at Mott Community College. Email Tom Page at Michigan 2-1-1 for contact information: tpage@uwmich.org.

☐ **Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

RUMOR/SCAM CONTROL

- A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community

locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.

☐ Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

- https://www.facebook.com/IamShiftingParadigms/posts/821354508011097

- https://pages.giveforward.com/emergency/page-42jxcw4/
- http://www.plumfund.com/charity-fundraising/help-flint-mi-residents-relocate

UNRESOLVED

☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

2/10/16 UPDATE: Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water** on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☐ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.

Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

☐ **From 2/12/16:** 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

Subject: testing food, poultry, etc. re lead in water?

Dear Michigan Department of Agriculture,

Are food chain items such as poultry, eggs, milk, vegetables watered with Flint's leaded water being tested (or have been tested) for their lead levels before or since Flint's water lead emergency? Where are the results being made public? I didn't see test results on the website, but I realize I could have missed them.

Thank you,

Alice Edgell

Cc: Deacon, Brad (MDARD)
Subject: RE: ACTION REQUEST: Accounting Codes and Forms

The below response to resource request from Friday February 12, 2016 is being amended and should read as follows:

The Michigan Department of Agriculture and Rural Development is able to fulfill this resource request. MDARD is willing to cover the cost of lead and copper testing of dogs from high risks homes in city of Flint. This testing is to be conducted at Michigan State University Diagnostic Center for Population and Animal Health.

The LEOC has been notified of this change in response. Also, the LEOC has been in contact with Dr. Michael Chaddock at MSU College of Veterinary Medicine and are making plans to partner with them on a potential research project. The plan is for MDARD to pay for the lead testing and MSU to pay for the copper test. If for some reason the dog owner does not want to participate in the MSU research project then MDARD will pay for the copper testing too.

If MDARD is paying for lead and copper the DCPAH submittal form needs to be completed and following account number (72228) written on the form in order for MDARD to be direct billed.

Thanks,
James Averill

Subject: RE: ACTION REQUEST: Accounting Codes and Forms

The Michigan Department of Agriculture and Rural Development is only able to partially fulfill this resource request. MDARD is willing to cover the cost of lead testing dogs from high risks homes in city of Flint. This test can be conducted at Michigan State University Diagnostic Center for Population and Animal Health. Attached is the form to use and please use the following account number (72228), this will allow MDARD to be direct billed. We are not able to cover the cost of copper testing as circulating blood levels of copper is not an appropriate specimen to diagnosis copper toxicity. However, would like to suggest LEOC partnering with Michigan State University College of Veterinary Medicine as there may be an opportunity to work with them to test for copper. The point of contact is Dr. Michael Chaddock and he can be reached at 517-884-7438.

To: MSP-EOC-MDARD; Averill, James (MDARD); Bowes, James (MDARD)
Cc: Deacon, Brad (MDARD); Merrill, Debra (MDARD)
Subject: RE: Request from GC re animal testing

Byron,

I spoke with Chris DeVriendt yesterday. The current status of the request is:

- MDARD will pay for blood lead testing of dogs tested per this request (up to 93 dogs)
- LEOC is partnering with Michigan State University, College of Veterinary Medicine to enroll dogs tested per this request in an MSU study. Dogs enrolled in the study will have copper testing performed by MSU as part of the study. MDARD will still pay for lead testing for dogs enrolled in the MSU study.
- For dogs tested per the SEOC request that are not enrolled in the MSU study, MDARD will also pay for copper testing.
- MDARD will coordinate with LEOC and with MSU to track which dogs are enrolled in the MSU study and which dogs have both lead and copper testing paid for by MDARD.

Dr. Averill will be providing the official response to the SEOC to specifically update the Resource Request. My update is to provide you with some background on this request.

Byron, if they're ready for the agencies to print then go ahead and follow MSP's directions.

Subject: 2-1-1 Update Flint Water Response for Tuesday, February 16, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Tuesday, February 16, 2016

GENERAL INFORMATION:

- **Invitation to visit the Central Michigan 2-1-1 Center: Jennie Pollak, Manager of Central Michigan 2-1-1 at LifeWays Community Mental Health in Jackson, is extending an invitation for Flint Water Response partners to visit the center and have a first-hand experience observing 2-1-1 in action. If you are interested, please email Tom Page at tpage@uwmich.org.**

- **US Surgeon General Vice Admiral Vivek Murthy is in Flint this week to meet with officials and community members. MLIVE reports there will be a meeting tonight (2/16) at 6 pm at Mount Carmel Baptist Church, 1619 W. Pierson Road at to talk to residents. The session will include education on the effects of lead on the body and there will be an opportunity for residents to ask questions.**
  Full news story at:

http://www.mlive.com/news/flint/index.ssf/2016/02/us_surgeon_general_talks_flint.html#incart_river_index

- **There is an informational meeting on one of the class action lawsuits tonight, Tuesday, February 16, from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.**

CALL VOLUME:

Central Michigan 2-1-1 was able to handle entire volume of Flint calls today with support from management and supervisory staff during the few peaks of high call volume.

SPECIAL NEEDS/REQUESTS

☐ **A private donor organized the distribution of 200 FlowTec shower filters at Berston Field House. Demand was extremely high and all filters were taken within 15 minutes. The distribution spurred a large number of calls to 2-1-1 and affirmed the unmet demand for shower filters. At least one from a homebound resident asking to have a**

shower filter delivered. Callers are expressing tremendous frustration about not feeling safe to bathe, one caller said, *"You can't boil enough bottled water to take a hot bath."* As noted in past updates, Good360 has identified a corporate donor that is willing to provide shower filters below cost if there is interest in addressing this demand.

RUMOR/SCAM CONTROL

☐ Michigan 2-1-1 received a report that DHHS is looking at rehousing options for residents in housing that 'environmental investigators' HAVE deemed hazardous for human habitation. CAN A CONTACT AT DHHS INVESTIGATE AND REPORT BACK TO MICHIGAN 2-1-1 ON THE VERACITY OF THIS RUMOR?

☐ The Attorney General's Office is contacting organizations that are soliciting support for Flint, according to one community partner, to verify their legitimacy and prevent scams or misuse of funds. Is there a contact at the AG's office who can provide a list of vetted organizations to answer questions about the legitimacy of suspect organizations?

☑ A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.
UPDATE: 2-1-1 has clarified that, while lead testing for children is free, clinics may ask for insurance information in order to bill the insurer for testing, but there should be no cost to the patient.

UNRESOLVED

☐ From 1/18/16: One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ From 1/26/26: There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. Are shower filter donations a request that can be coordinated through Good360 or another supplier?
1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.
2/10/16 UPDATE: Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

☐ From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☑ From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information. Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.
Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that 2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.

☐ From 2/12/16: 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?

☐ From 2/15/16: Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. *Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.*

☐ From 12/15/16: Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?

> > Dear Dr. Frank,

After reading the flyers, I would suggest that it be reworded to take out the 'filtered water' reference. There are numerous sites where the Pb level exceeds the filters' capabilities to remove lead. If guidance suggest that filtered water is safe, the issuing agency can (and will) be held responsible in those instances where pets are exposed to Pb due to levels surpassing filter capability. The current guidance is that filtered water should be used for bathing and such things and not consumed until an acceptable lead limit has been established via (official) testing.

If you need a map of the houses exceeding the 150ppb threshold, SEOC GIS should be able to provide it.

Subject: RE: DEQ water test results for Sat Feb 13th - 13 results

Tom, Lisa and Justin,

The 923 E. Kearsley St. Board of Education facility is being addressed by LARA as part of their response to the school system (w/w plumbers on faucet replacement and sampling).

The other location is not on their list as it is not a school building or supplying food which is what Lisa H. confirmed.

If it's not a school, I would not expect them to check it. The Dept. of Ed isn't doing the testing. They just provided the list of schools to LARA. If their location is not an actual school, I wouldn't expect it to be on that list.

Tim,
I believe so but someone should double check with LARA or MDE. I also noticed that the Department of Education is on our NEW list, it should be removed, right? We are about half way through checking the list to verify if the firms are on Flint water. I had to remove 45 establishments from the list because they are NOT on Flint water.

MSP-EOC-MDARD

From: MSP-EOC-MDARD
Sent: Tuesday, February 16, 2016 3:33 PM
To: Baker, Zachary (MSP)
Cc: MSP-EOC-MDARD
Subject: Question regarding: *Business in Flint Temporarily Closed*

Zach,

As we discussed now a simple question, but here goes.

No business has been closed temporarily by MDARD/GCHD as a result of Pb in H_2O

However we have taken some enforcement action against a limited number of facilities that were found to be not in compliance during our assessment and or sampling,

Two facilities have had water seized, due to out of compliance samples – this did not effect/affect the businesses as they were using bottled water to manufacture food/food products.

One facility (parochial school) had a water fountain removed from use due to excess Pb in H_2O – did not affect school operations.

MDARD has worked with several firms to remove ice machines from production of ice, as they are unable to or do not have a filter in place and they can not be flushed . MDARD anticipates that we will see more activity in this arena as we continue to complete initial and follow-up assessments moving forward due to the nature of ice machine installation practices.

Let me know if you have any additional questions or if this sufficient.

Thanks

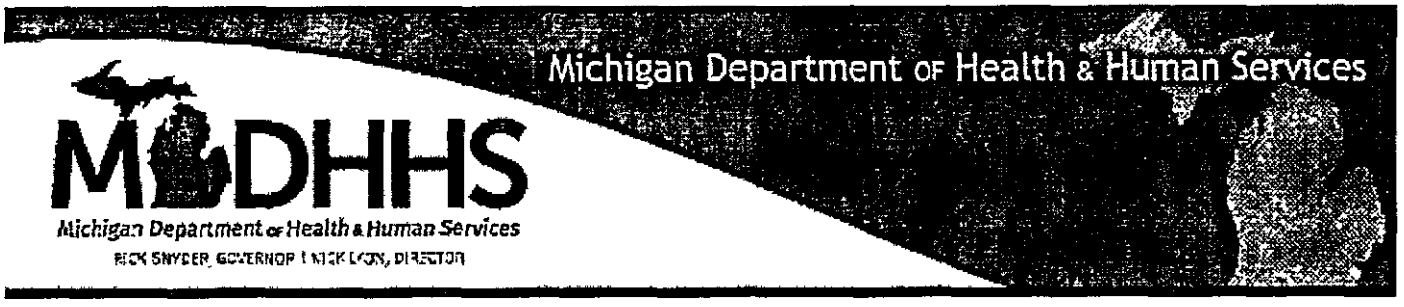
Subject: MDHHS Leadership Announcement



MDHHS Employees:

Over the weekend, Director Nick Lyon had an accident at Boyne Mountain while spending time with his family, and is currently in the hospital awaiting shoulder surgery later this week. He is doing well and we expect him back within the coming weeks once he has had time to heal and recover. Director Lyon had driven to Boyne Friday evening to meet his family and was injured on Saturday.

Until that time, Chief Deputy Director Tim Becker will be leading the department, including the budget presentations this week. Beginning today, MDHHS leadership will be presenting our budget proposals to the legislature. Today's presentation is attached here for your review. Chief Deputy Director Becker has been actively involved in all department priorities, particularly our department efforts in Flint, so there will be continuity in all focus areas.

Please join us in wishing Director Lyon a quick and healthy recovery.

Thank you.

From: Tom Page [mailto:tpage@uwmich.org]
Sent: Monday, February 15, 2016 6:27 PM
Subject: 2-1-1 Update Flint Water Response for Monday, February 15, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Monday, February 15, 2016

NOTE: Attached to today's summary is a copy of the PDF reference document 2-1-1 partners use for Flint Water calls. This document is updated daily, sometimes several times a day. 2-1-1 agents access this through a shared DropBox file that ensures all 2-1-1 staff have immediate access to the most current information about the response.

GENERAL INFORMATION:

- **There will be an informational meeting one of the class action lawsuits** on Tuesday, February 16, 2016 from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. *The web site is operated by one of the law firms filing a suit.*
- **United Way Worldwide announces details of Beyoncé's Formation World Tour benefitting Flint** with proceeds to support United Way of Genesee County's work to help the people of Flint

dealing with the Flint Water Crisis. Fans will have an opportunity to donate to the Flint Water Fund after purchasing their tickets. Every $10 donated is an entry for an upgrade to the best house seats at each concert. US Tour tickets go on sale February 22nd.

CALL VOLUME:

Central Michigan 2-1- 1was closed today for the Presidents' Day holiday. SW Michigan 2-1-1 partner, which regularly handles after hours and weekend calls for Central Michigan, reported a few waves of calls that pushed wait times to approximately 10 minutes for short periods.

Call summary for the week of February 8-14

- 777 callers used the Flint Water prompt to reach a 2-1-1 agent.
- 1009 referrals were provided (1.3/caller) and there were 30 unmet needs recorded.
  - The majority of calls came from zip codes 48504 and 48505
  - The most common requests were for Drinking (Bottled) Water, Water Filters, and Tap Water Testing.
  - 17 calls were to donate or volunteer.

SPECIAL NEEDS/REQUESTS

- ***American Sign Language interpretation may be available for Flint-area events*** through a professor at Mott Community College. Email Tom Page at Michigan 2-1-1 for contact information: tpage@uwmich.org.

☐ **Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

RUMOR/SCAM CONTROL

- A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.

☐ Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

- https://www.facebook.com/IamShiftingParadigms/posts/821354508011097
- https://pages.giveforward.com/emergency/page-42jxcw4/
- http://www.plumfund.com/charity-fundraising/help-flint-mi-residents-relocate

UNRESOLVED

☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for

purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

2/10/16 UPDATE: *Per DHHS, currently there are no direct efforts* by the state to begin coordinating *shower filters as the current guidance continues to indicate that it is safe to bathe and shower in* unfiltered water.

☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water** on the long term dental health of Flint children. Michigan Association of United Ways *reported hearing this issue at a meeting with pediatricians* and dentists. One suggestion to address this was providing the school-based fluoride treatments.

☐ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 *is tracking and reporting their needs and personal information to government agencies.*

Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

☐ **From 2/12/16:** 2-1-1 has received several *calls from residents seeking information* about the safety of *produce they canned at home using unfiltered city water prior to the emergency* declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

SEOC FOIA Print Plan
Tips for Printing

Print Plan – Thru Friday, February 19

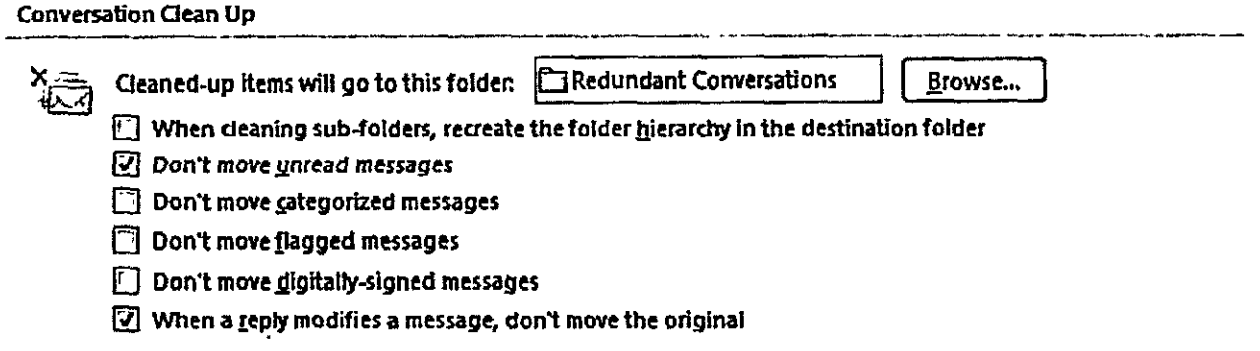
- When printing emails/documents, make sure to **change your default printer** to the following printer:
  - EOC_F1COMM_RI3054 on EOC084M10APF502 (located in the Communications Room)
  - Additional helpful hints for each document type below
- SEOC IT staff will set up to "Print to Hold" for each PC in the SEOC.
- Be sure to print/copy all documents **Single Sided.**
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else's print job.** The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be contacted only if both of them are unavailable.

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- Click Mail.
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are identical to the below:



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- Send a CC to the following email address when sending items from the SEOC:
    - MSP-FOIAProject@michigan.gov
    - For State Agency SEOC personnel, **only** CC emails from your SEOC email address
- Send all documents created to the same email address

Flint Water Response Situation Report - As Of: February 12, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 22 (8-GCHD, 11-FDD), **Medium-Risk-** 153 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 15-February 19, 2016

- Ensure responder and public safety
- Continue scheduling and performing water sample collection for testing as requests arrive to Division staff.
- Follow prioritization scheme developed for initial assessments, follow-up assessments and water sampling.
- Inform firms of water test results – phone calls and mailings with results to all firms (ASAP to firms with detectable lead)
- Enhance data management systems and procedures to support field operations and reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.
- Plan and begin execution of IMT staffing changes and Operations staff changes. Including:
  - Revising and delivering Just In Time Training to operations staff.
  - Implementing Branch Tactical Planning – Ops section more directly responsible for tactical planning.

Table 1: Activity Report for the Operational Period: February 12, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal

Flint Water Response Team Plan
Monday, 02.16.16 FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Christina Curtis	989-701-0771	christina.curtis@redcross.org

Plan

Agency	Team Types	Mission
ARC	5 Type V	500 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 5 (5 ERV + 5 Trucks)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	5	5		2/15/16	8:00 pm
ARC ERV	5	5		2/15/16	8:00 pm
ARC ERV Driver	5	5		2/15/16	8:00 pm
Team Member	15-20	15-20		2/15/16	8:00 pm
Team Transport Vehicle for 2-4 Team Members	5	5		2/15/16	8:00 pm
Team Transport Vehicle Driver	5	5		2/15/16	8:00 pm
iPads	5	5		2/15/16	8:00 pm
Hand Warmers	50	50		2/15/16	8:00 pm
Distribution Kit	500	500		2/15/16	8:00 pm

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Water Distribution and other supplies as needed/requested.
Team Priority – Water Distribution – routes TBD by ARC.

Sample Script for Team Members:
We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC. It is possible the iPads will not be used due to cold temperatures.

This is the daily 2-1-1 summary on the Flint Water Response for Tuesday, February 16, 2016

GENERAL INFORMATION:

- **Invitation to visit the Central Michigan 2-1-1 Center:** Jennie Pollak, Manager of Central Michigan 2-1-1 at LifeWays Community Mental Health in Jackson, is extending an invitation for Flint Water Response partners to visit the center and have a first-hand experience observing 2-1-1 in action. If you are interested, please email Tom Page at tpage@uwmich.org.
- **US Surgeon General Vice Admiral Vivek Murthy is in Flint this week** to meet with officials and community members. MLIVE reports there will be a meeting tonight (2/16) at 6 pm at Mount Carmel Baptist Church, 1619 W. Pierson Road at to talk to residents. The session will include education on the effects of lead on the body and there will be an opportunity for residents to ask questions.

  Full news story at:
  http://www.mlive.com/news/flint/index.ssf/2016/02/us_surgeon_general_talks_flint.html#incart_river_index
- **There is an informational meeting on one of the class action lawsuits** tonight, Tuesday, February 16, from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus. More information at www.flintwaterclassaction.com. The web site is operated by one of the law firms filing a suit.

CALL VOLUME:

Central Michigan 2-1-1 was able to handle entire volume of Flint calls today with support from management and supervisory staff during the few peaks of high call volume.

SPECIAL NEEDS/REQUESTS

☐ **A private donor organized the distribution of 200 FlowTec shower filters** at Berston Field House. Demand was extremely high and all filters were taken within 15 minutes. The distribution spurred a large number of calls to 2-1-1 and affirmed the unmet demand for shower filters. At least one from a homebound resident asking to have a shower filter delivered. Callers are expressing tremendous frustration about not feeling safe to bathe, one caller said, ***"You can't boil enough bottled water to take a hot bath."*** As noted in past updates, Good360 has identified a corporate donor that is willing to provide shower filters below cost if there is interest in addressing this demand.

RUMOR/SCAM CONTROL

☐ **Michigan 2-1-1 received a report that DHHS is looking at rehousing options** for residents in housing that 'environmental investigators' HAVE deemed hazardous for human habitation. **CAN A CONTACT AT DHHS INVESTIGATE AND REPORT BACK TO MICHIGAN 2-1-1 ON THE VERACITY OF THIS RUMOR?**

☐ **The Attorney General's Office is contacting organizations that are soliciting support for Flint,** according to one community partner, to verify their legitimacy and prevent scams or misuse of funds. **Is there a contact at the AG's office who can provide a list of vetted organizations to answer questions about the legitimacy of suspect organizations?**

☑ A community agency in Flint notified Michigan 2-1-1 that a client said they received a referral from 2-1-1 to a clinic asking for payment to do a child lead screening test. Central Michigan 2-1-1 verified there are no children's lead testing clinics in the database that charge a fee. The only locations in the 2-1-1 database are coordinated by the Health Department, either onsite or at various community

locations. As of this time adults are charged a fee for lead testing. 2-1-1 has asked the community agency to seek additional information to assist with 2-1-1's investigation.
UPDATE: 2-1-1 has clarified that, while lead testing for children is free, clinics may ask for insurance information in order to bill the insurer for testing, but there should be no cost to the patient.

UNRESOLVED

- ☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

- ☐ **From 1/26/26:** There is high demand for shower filters due to reports of rashes and potential lead risk to children from using water to bathe. 2-1-1 is telling callers that shower filters are available for purchase through home improvement stores, based on a google search. **Are shower filter donations a request that can be coordinated through Good360 or another supplier?**

  1/28/16 UPDATE: The Michigan 2-1-1 office passed on the demand for shower filters to Good360, which is looking into options to meet this need.

- ☐ **2/10/16 UPDATE:** Per DHHS, currently there are no direct efforts by the state to begin coordinating shower filters as the current guidance continues to indicate that it is safe to bathe and shower in unfiltered water.

- ☐ **From 2/11/16: Dentists concerned about impact of drinking unfluoridated bottled water** on the long term dental health of Flint children. Michigan Association of United Ways reported hearing this issue at a meeting with pediatricians and dentists. One suggestion to address this was providing the school-based fluoride treatments.

- ☑ **From 2/11/16: Community partners report Flint residents concerned about 2-1-1 sharing their personal information.** Service agencies in Flint report some residents are afraid to call 2-1-1 or choose the Flint Water prompt due to concerns that 2-1-1 is tracking and reporting their needs and personal information to government agencies.
  Update 2/12/16: 2-1-1 is reviewing the language of the phone prompts and hold messages to determine the best way to reassure callers that **2-1-1 calls are confidential and 2-1-1 will *never* release information without first receiving permission from the caller.**

- ☐ **From 2/12/16:** 2-1-1 has received several calls from residents seeking information about the safety of produce they canned at home using unfiltered city water prior to the emergency declaration. Losing this food could affect household food security. **CAN SEOC or MDHHS provide guidance about whether this food is safe to consume?**

- ☐ **From 2/15/16: Good360, a 501(c)(3) nonprofit that coordinates bulk donations from corporate partners, has identified a potential source of high-capacity water filters** for restaurants, churches, shelters and other businesses that are not currently eligible for free water filters. These are filtering systems, not faucet filters. ***Good360 is working to verify these filters meet NSF standards for lead and copper, but is asking for feedback if there is a need by local businesses and agencies for this kind of filtering option.***

- ☐ **From 12/15/16:** Callers continue to ask about relocation assistance. 2-1-1 is informing residents that there is no government relocation assistance available at this time. We have identified several private initiatives to assist with relocation, but have been unable to verify the legitimacy of any of these efforts. **Can the Attorney General's office or another agency help investigate if any of these efforts are legal and legitimate?**

Subject: RE: follow up - pets and Flint

Hi, Julie.

Thank you very much for sharing this document with us. This will be a great edition to what we are already working on. We would appreciate being able to make edits to this draft to add some points especially relevant to the current situation. Michigan Department of Agriculture and Rural Development (MDARD) and Michigan State University, College of Veterinary Medicine (MSU CVM) are collaborating to address this situation with education and outreach as well as testing programs. Lead toxicity in animals in Michigan is reportable to MDARD. MSU CVM has an interest in aiding the response by conducting a voluntary surveillance project in dogs. Our plans are not yet finalized but are moving ahead as rapidly as possible. I meet with the core MSU group on Monday morning. Is it okay with you if I share your draft Q&A with the group? The materials we are already working on, because of the emergency declaration status of the situation, need to go through our SEOC before I can send them to you. We have a handout for the public and a hand out for veterinarians. Neither is in a Q&A format which is why I think your document can add value.

Thanks again for contacting us and I look forward to additional discussion.

Nancy

Here is the FAQ that CDC developed along with my edits. Do you all have a fact sheet that you have been working on? If this is duplicative, we can fold it in to whatever you are working on or drop it. Just let me know.

I do know that as EPA and the county HD have been going door to door they have been getting questions about pets and would appreciate something that they could use to answer questions.

Happy to discuss,

Renée Funk

Subject: RE: follow up - pets and Flint

I like Renee Funk's document though it needs some edits. Assuming she approves, I will share this with MSU on Monday. Having CDC as a resource could be a good thing.

Here is the FAQ that CDC developed along with my edits. Do you all have a fact sheet that you have been working on? If this is duplicative, we can fold it in to whatever you are working on or drop it. Just let me know.

I do know that as EPA and the county HD have been going door to door they have been getting questions about pets and would appreciate something that they could use to answer questions.

Happy to discuss,

Renée Funk

Subject: Request/Status Updates
Attachments: 6Feb16_FINAL_MASTER_UNIFED REQUEST LIST_Flint MI_UCG.pdf

Good Afternoon,

During our status update meeting the following questions were asked and I need additional clarification from state agencies:

#12- Clarification on Establish quality assurance system to verify safe water sources at impacted homes, schools and businesses. What is the metric? All homes, all businesses, a percentage of these facilities tested?

#37 – Infographics in clear format to demonstrate water testing results – Is the EPA map with test results enough for this?

#43 – Does Barbara Reynolds need to train state officials in the Governor's office and MDEQ? What is the timeline/schedule for the governor's staff?

Please call Lt. Russo tomorrow with any follow up questions.

Michelle Kuzera

Hello MSP GIS colleagues!

It was great meeting with you (Walter and Melissa) earlier today. Attached please find a list of the establishments we've been targeting for assessment of proper water use and for sampling, as requested. It contains both MDARD-regulated and local health department (LHD-regulated) facilities. We're glad to talk to talk further if you need any explanations of the data. It looks like our ArcGIS online account is up and running, so that's good!

I'll be putting in a MI CIMS resource request for some of the visual/tabular data of city sections and water test results.

Thanks for all your help, we'll be in touch.

Subject: Staffing for Feb. 8 to Feb 12

Fellow PIOs,

I've attached the latest Flint Joint Information Center staffing sheet that covers from Feb. 8 to Feb. 14.

For those coming to the Flint JIC, the key information you need to know is listed below. Please let me know if you have any questions.

Thanks,

Ron

==========

JIC Location:

State of Michigan Office Building
125 E. Union Street
5th Floor (Next to the East Lobby)
Flint, MI 48502
https://goo.gl/maps/ZpiVMNys3u52

Free parking is available in the parking structure directly across the street from the main entrance to the State of Michigan Office Building.

Use the parking garage entrance on Harrison Street. You may park in spots designated as "Flint Water Team" on Level 4 (Yellow Cones) or anywhere on the roof (Level 5). There will be a security guard at the gate on Level 3 to let you into the State of Michigan parking area.

JIC Hours:

Please try to be at the JIC by 8 a.m. as some briefings start as early at 8:30 a.m. The media hotline opens at 9 a.m. We are always in need of staff who can stay until 8 p.m.

Hotel Information:

PIOs who need to stay in Flint (at no charge to them), can reserve a room by calling the Holiday Inn, using the below information:

Holiday Inn - Flint
5353 Gateway Centre Dr.
Flint
Phone: 810-232-5300

Please use the following account code in order to ensure the room is charged to State Police: MSP12

If you reserve a room, we need to you to report it to JICManager@michigan.gov so it can be shared with Finance. If you have any problems or find the hotel to be booked, please email JICManager@michigan.gov.

Misc.

There are laptops here in the JIC; however, most PIOs have found working on their own laptops seems to work better. If you have a laptop, the recommendation is to bring it.

Cc: Dunleavy, Sean (MDARD)
Subject: Summary of today's school testing meeting - action steps

Thanks to everyone for taking the time for this meeting to coordinate sampling/assessments at schools on Flint Water. The following is a list of actions that have been agreed upon at this time, along with responsible parties/agencies

1. MDE will conduct search for any schools not currently identified on LARA's list for sampling and plumbing fixture follow up
2. MDE will provide this list to Karen Towne of LARA, and will cc Lisa Hainstock at MDARD.
3. MDARD will consult with LHD to check and see if they know of any other school that is not on any list and will provide to LARA
4. LARA will consult with their leadership to see if any newly identified schools will be added to their list for followup, and will add them to their list to contact and coordinate follow up with DEQ on sampling and fixture replacement
5. If LARA determines that the newly identified schools will *not* be added to their list, they will notify DEQ and MDARD immediately
6. MDARD and DEQ will discuss coordination of next steps - who will contact the schools and do the follow up sampling/assessments?

If anyone disagrees with these actions steps or has any changes or addition, please cc everyone on this email. If you agree with the action item summary, please send an email response to this message to all.

Thanks again, everyone, for the good work and willingness to get together!!

MSP-EOC-MDARD

From: Holton, Jennifer (MDARD)
Sent: Friday, February 05, 2016 3:44 PM
To: JICManager; JICNews
Cc: MSP-EOC-MDARD; Clover Adams, Jamie (MDARD)
Subject: Media calls today

Radio: WWJ- Jennifer Holton coordinated an interview with Dr. James Averill and Chrystal Knight regarding lead and pets.

Television: CNN – Jennifer Holton coordinated an interview with Dr. James Averill and Carma Hassan regarding pets and lead.

Television: WXYZ-TV 7 – Jennifer Holton coordinated an interview with Dr. James Averill and Jane Park regarding lead and pets.

Radio: Michigan Radio: Jennifer Holton coordinated an interview with Dr. James Averill regarding lead and pets.

Here are the talking points:

- Michigan has had very few cases of lead toxicity over the last five years. Attached is a table summarizing the cases since 2011 with most cases being related to cattle. For background purposes, with cattle, it's counted as one farm. Those cases almost always involve lead in batteries or some other contamination in the pasture where cattle graze.

- Under the Animal Industry Act, Public Act 466 of 1988, as amended, reportable diseases/conditions are exempt from disclosure. MDARD does provide reportable disease/condition case information down to the county level, but cannot provide the specifics of those individual cases.

- In the last 5 years, there have been two cases of lead toxicity reported in Genesee County.

- Recommendations:
  - Whatever you are doing in your own home for water, you should do for your pets (e.g., filtered, bottled water).
  - If you have any concerns about your animal's health, you should always work with a licensed veterinarian.
  - There are a variety of diseases and issues that could mimic signs/symptoms of a lead-related issue, it's why it's critical to work with your vet to properly diagnose your pet.
  - If a licensed vet suspects a possible lead-related issue, they contact MDARD and the department will work with them to have a sample tested. MDARD is covering the sample testing costs coming through veterinary offices.

Subject: Modified Staff Instructions

April,

We have modified staff instructions to reflect handling the 'in-use' sampling, test results and enforcement. Specifically, we are proposing to modify staff instructions so that once we have completed 2 follow-up visits and for continued non-compliance with our requirements sheet and/or if an in-use sample shows a detectable lead level, have staff refer to Lansing for an enforcement review prior to issuing a water system seizure.

Please forward to the JIT the attached word document (staff instructions) for review and approval.

Subject: Action: Potential Jobs Program

Importance: High

All:

We're working on a potential jobs program with MTED and the US Department of Labor to hire and/or train dislocated workers (laid off, etc.) to support humanitarian operations going forward. Is there any interest from your agency to fill roles with dislocated workers for the ongoing activities your agency is responsible for? At a minimum, we are looking at staffing needs for up to a year (potentially longer, depending on the situation). To be clear, this program is not hiring people for/from other agencies to defer the cost; it is to provide temporary jobs to support humanitarian operations.

If so, could you please provide a quick list of what those needs might be? If there are equipment needs (vehicle, supplies, etc.) to perform the job, include those as well. No need to expand on job description at this point. These are just potential ideas; nothing is set in stone.

We have already put together a list of needs to encompass 2 warehouses, 5 POD hubs, rapid response delivery teams, basic local EOC staffing, and a list of miscellaneous jobs (including translators, plumber apprenticeships, social/medical case worker training, etc.).

Please submit your potential interest to me by **2 pm Sunday, February 7.** If you have any questions, don't hesitate to ask.

Thanks,
Brianna Briggs

Hi, Abby,

I did not see anything contend-wise that needed changes. I did make some punctuation/grammar edits. They are included on the attached version. Because this is an internal document, it does not need to be routed through the JIC, but Jennifer Holton should also receive this for editing/comments.

Thanks,

Jeanne

As of now, EPA is only (maybe) doing chlorine monitoring in a few schools in coordination with the City and DEQ (George Krisztian & Liz Browne).

No other sampling is planned that I'm aware of.

Good morning John-

Are you, with Dan, Justin and whomever, planning to chat with Walter/SEOC GIS today to provide clarification of your request needs? Please let me know if/once it is arranged. Again, I apologize for the delay in getting Walters phone number to you.

I'm forwarding this email because you may be interested in the maps/list provided by the SEOC for the Red Cross effort. Somewhat for content but mostly for "style" and clarity. I think they are good but it may also be because I am familiar with Flint. Would something like this be useful?

Subject: RE: Flint water in schools - proposed teleconference for 3pm on Friday

I am currently representing MDE at SEOC. I will attempt to clarify what I know from discussions just now with the LARA, DEQ, DHHS, and MDARD.

I am trying to schedule a teleconference between MDARD, the Genesee County Health Department, MDE, and someone from LARA who is working with DEQ (NEED DEQ/LARA NAMES AND CONTACT INFO ASAP FROM SOMEONE) on water *investigation at Flint schools for tomorrow at 3pm to discuss the following:*

From an MDE standpoint, I (Kevin Walters) will be available for the conference call tomorrow (Friday) at 15:00.

1) Which agency is responsible for water sampling at which Flint school (I understand that LARA is working with DEQ on conducting water sampling at the schools in the attached spreadsheet – MDARD needs to verify so we can drop them from our list, if needed;

This does not appear to be directly related to MDE, so I will defer

2) Getting a list of private/parochial/charter schools NOT being sampled by LARA/DEQ, so MDARD can conduct sampling. (the attached list is confusing, because it appears that there are some parochial, non-public schools, ie St. Paul Lutheran, St. John Vianney School are ON this list being done by LARA.)

The listing that was provided by LARA is a listing of school entities (LEA, PSA, and Non Public) that are either within the Active Water Area or outside the Active Water Area. It appears they are utilizing a comprehensive listing to update whether testing has been completed, although that detail is outside MDE's reach and could easily be answered by LARA representatives. MDE reads it as stated

3) MDARD is NOT conducting sampling like DEQ/LARA sampling (we only pull one sample from the food service area). Should ALL schools be sampled by DEQ/LARA because it is more comprehensive?

Education just received an email from LARA at SEOC that indicates that "DEQ has stopped the testing of schools, so there will be no updates for the time being". In clarifying that statement, we have been notified that testing in schools will await installation of fixtures are complete, by school/entity. DEQ/LARA would be a more viable resource for your question "Should ALL schools be sampled....". MDE has continued to support water testing in schools.

If needed, my contact information is below:

Sent: Thursday, February 04, 2016 3:30 PM
To: MSP-EOC-MDEDUCTN
Subject: RE: Schools On/Off Flint Water

The Gold color is used by LARA internally, I believe it represents schools that we have material lists for. We are only tracking if the school has been tested and the # of faucets that have tested high and need replacement. I believe DEQ is tracking the actual test results of the water.

I'm not sure if you all might have received this too, but it looks rashes are also a concern under investigation by MDHHS.

From: Michigan Health Alert Network [mailto:70131306-0005-3000-80c0-fceb55463ffe@notify.michiganhan.org]
Sent: Wednesday, February 3, 2016 4:35 PM
To: Henderson, Justin (MDARD) <HendersonJ4@michigan.gov>
Subject: Investigation of Rashes Potentially Associated with Exposure to Flint City Water

Justin Henderson,

The Michigan Department of Health and Human Services (MDHHS) is developing a plan to better characterize rashes that are being reported by members of the public in the Flint area. In recent weeks MDHHS and the United Way 211 Information Line have received approximately a dozen calls with questions or concerns about rashes potentially associated with Flint water. While rashes are very common in the general population and there are numerous known causes, an important public health function involves being able to identify and rapidly respond to new causes of illness including rashes as they emerge.

MDHHS has been actively monitoring trends in rash illness presentations to emergency departments in Genesee County and has not seen evidence of increases compared with prior years. However, because rashes are often mild and frequently diagnosed in primary care settings, it is unknown whether reported rash concerns from the public are indicative of an actual increase in rashes in the Flint area and if there is any association with exposure to Flint water.

While MDHHS will continue to respond to rash questions or concerns reported by members of the public, MDHHS also plans to conduct targeted investigations with a subset of individuals with existing rashes and ongoing concerns about Flint water exposure. This effort will include collection of epidemiologic data through structured phone interviews, systematic review of medical records (when available), and collection and testing of home water samples by Environmental Protection Agency officials to identify concentrations of metals and other water quality parameters known to be associated with rash. These data will help improve our understanding of any potential association between reported rashes and Flint water, and inform public health response priorities in Flint.

Health care providers can aid in this effort to better characterize rashes that have a possible association with Flint water exposure. MDHHS asks that patients meeting the following rash criteria be reported:

1. Place of residence supplied by Flint city water (or other significant exposure location)

2. Current rash that is identified on physical examination

3. New onset rash or exacerbations of existing rash beginning after October 15, 2015

4. No alternative etiology

Rash is not a reportable condition in the State of Michigan, so please ask patients if they would be agreeable to follow up contact by the MDHHS. If yes, patient contact information can be reported to either:

Michigan Poison Control Center (who can also provide clinical consultation on rash cases)
1-800-222-1222
or
MDHHS MI-TOXICS and Health Hotline
1-800-MI-TOXIC (1-800-648-6942)

**ATTENTION: THE MDHHS asks that hospitals share this alert with all Genesee County health care providers in their networks.

You may respond by doing one of the following:

- Select a single response below by clicking on the desired Response text.
- Reply to this email with the corresponding number to your response on the top line within the body of the email, e.g., 1 for indicating that you wish to use response option 1.

Option# Response:

1. Message Received.

Thank you,

Subject: MDARD Water Response Update

This is the daily MDARD Flint Water Response Report. FYI, we just received 36 new water results this morning. Several are **very high:**

- First Presbyterian Church (Medium risk) at 746 S Saginaw: **1,964 ppb** (IN-USE WATER SAMPLE - collected by K Russell on 2/1)
- King's Market (High risk) at 1602 Oren : **465 ppb** (IN USE WATER SAMPLE - collected by M Kusnier on 1/29) -
- Arrowhead Veteran's Assn (High Risk) at 402 W Water St : 11 ppb (IN USE WATER SAMPLE collected by B Benson on 1/29) – Kitchen in the hall
- Arrowhead Veteran's Assn at 402 W Water St: 5 ppb (IN USE collected by B Benson on 1/29) – Kitchen at bar

Immediate action of field visits to be conducted today for compliance assessment of the affected establishments. **Note that according to the inspector's report, King's Market has previously stopped using the water for food or drink.**

Subject: Flint updates

Hi Laura-

Will you have any updates on ESD Flint related activities today. I have a verbal report out at 4:00 pm and a Situation Report due at 5:00 pm. If so, I will need it by 3:45-ish.

Let me know what, if anything, to expect .

Thanks
Abby

Cc: Deacon, Brad (MDARD); Merrill, Debra (MDARD)
Subject: SEOC notes/observations

Hi Abby,

I just wanted to update you on a few activities/issues I observed while at the SEOC Tuesday and Wednesday.

1. See Brad's attached notes for how to get here and how to fill out the sit report. Looking for the brick arch to the right of the GOB is very helpful. Construction is still underway, so feel free to ask how to get to the SEOC as not everything is marked yet.

2. MDARD is still up on the stage next to the AG (Ben ___ from Governor's office is using the desk periodically) and Corrections (Mike). Kyle Bowman, the SEOC PIO is near us too. Eventually all the state agencies will move to the back of the room.

3. When you log in to MI CIMS, use your e-mail and login and be sure to select 2015-10-01-City of Flint- Water ... I accidently had the default training and it took a few minutes to realize why I wasn't seeing the activity logs!

4. In addition to using the activity log and situation report, also check the resource request/task assignment tab. There was an e-mail MDCH had to MDARD that I responded to by e-mail on 2/2, but today I noticed that it was also in the resource request log. I used the resource request log (per GIS's request) to make a map request for Kevin Besey and FDD. Please watch for the map and forward it (I used the SEOC MDARD e-mail) to Kevin Besey and Sandra Walker. Hopefully, I got the layers described to GIS correctly...I spoke to them in person before I made the written request. GIS is located by the Michigan wall map in the corner.

5. It will take a little bit to get up to speed on MDARD's response activities. Most of MDARD's information sharing and questions during my time was by e-mail and in person conversations. DEQ, DNR, HHS (they are split by MDCH and MDHS) were my most frequent contacts. MDCH is the lead for our group during the state agency briefings. Jennifer Lixey Terrill will be back as the MDCH rep Thursday. It helps to check in with her before the 9:30 briefing and let her know if MDARD has anything to report. Jen Wolf is the DEQ rep and John Meka is DNR. DEQ and DNR overlap and cover for each other and run mainly as DEQ.

6. There is a 9:30 and 4pm briefing and the sit report is due by 5pm and we also send division directors a summary e-mail around 5pm. With the new submission time from the MDARD Water Response Report (staring 2/3 is it now 10am, was 4-5pm the previous day), you will likely have little to report in the morning and then more details for the afternoon reports regarding the previous day's inspections/samples and inquires you receive during the day.

Thanks for filling in! Feel free to call me if you have any questions. My work cell is

To: Bruce, David M. (MDARD)
Cc: Merrill, Debra (MDARD); McCarrick, Carla (MDARD); Karlik, Cinda (MDARD)
Subject: RE: Flint Emergency Purchasing Procedures

We've had a variety of people in the SEOC but I am the primary as the Emergency Management Coordinator. The State agency emergency management coordinators received the same memo this morning.
To date, we have not had any purchases that I'm aware of – lots of hours worked on this, but some of the other agencies are buying things ranging from supplies to help manage the water distribution centers to hardware to fix water fountains in schools.
We can use my number –
Cinda has put together something for MSP already – that's just hours and related expenses. I will relay to the divisions that before buying anything, it needs to go through a process if we are hoping for reimbursement.

Brad: The attached item was received yesterday afternoon. Carla raises some good questions on it below. What are your thoughts, and can you please respond to us?

THX

From: McCarrick, Carla (MDARD)
Sent: Wednesday, February 03, 2016 6:34 AM
To: Bruce, David M. (MDARD)
Subject: FW: Flint Emergency Purchasing Procedures

I have read the attached and have a few questions:

- Is our agency State Emergency Operations Center (SEOC) representative Brad Deacon? If so I don't see where he received a copy of this in the e-mails below.
- We are responsible to supply our agency SEOC with a 24/7 phone number for agency purchasing staff support. Should we give your number, my number or both?
- It says that all Flint related purchases must first be routed through the appropriate SEOC contact. MDARD is responsible to track and report all purchasing (pcard, PO's, DV's) related to the Genesee County Water Emergency Flint-related purchases. Do we send something to the divisions to have them keep track and report it or does the SEOC? Who will collect the data, us or the SEOC?

Subject: RE: Residential samples>100 ppb lead

Hi Julia

I need to double check something. Is there a chance that two sample results > 100ppb were reported on 2/3/2016 that you didn't have a chance to copy us on? We have two notes from you today with sample results > 100 ppb. Only one of those results, Sample # LG07032, is > 150. The other two results > 100 we got copied on are sample #'s: LG07601 & LG07654.

When we got the spreadsheet with results through today, two other samples for which we don't have the note from you have concentrations > 100: i.e. sample #'s LG07383 & LG07364.

No big deal if you couldn't get us that note with the latter 2 sample results before you left today, we're just wanting to make sure that the numbers that we report to the Governor are solid. Thanks!

Mitch

Hi Julia

I need to double check something. Is there a chance that two sample results > 100ppb were reported on 2/3/2016 that you didn't have a chance to copy us on? We have two notes from you today with sample results > 100 ppb. Only one of those results, Sample # LG07032, is > 150. The other two results > 100 we got copied on are sample #'s: LG07601 & LG07654.

When we got the spreadsheet with results through today, two other samples for which we don't have the note from you have concentrations > 100: i.e. sample #'s LG07383 & LG07364.

No big deal if you couldn't get us that note with the latter 2 sample results before you left today, we're just wanting to make sure that the numbers that we report to the Governor are solid. Thanks!

Mitch

Abby,

I'd like to build on the request made by Sandra Walker and Kevin Besey yesterday (see #4 below from April's Daily Report) and have two requests highlighted in yellow below.

Could you please see if MSP GIS folks can contact our IT guy Dan Metiva (MetivaD@michigan.gov) as soon as possible and work with him to generate spreadsheets of food establishment addresses in geographic areas on the City of Flint water supply known to have had high lead water levels in the past. Specifically, we are interested in identifying how Flint Wards correlate with current Hot and medium zones. Maps, by themselves, are not as helpful as prioritized lists from an operational perspective – we need to be able to generate lists of facilities and counts for operational workload planning purposes.

FYI – I thought you might be interested in the attached article that provides a good overview of the situation and a geographic perspective on the issue.

- From "Elevated Blood Lead Levels in Children Associated With the Flint Drinking Water Crisis: A Spatial Analysis of Risk and Public Health Response" – attached (note: highlighting in the article is mine)
    - p. e2 right hand column highlighted text

      "The reference value for elevated blood lead levels (EBLL) was 5 mg/dL or greater. We identified Flint wards with high WLLs with water lead sampling maps.38 Wards 5, 6, and 7 had the highest WLLs; in each ward, more than 25% of samples had a WLL higher than 15 ppb. We theorized that children living in this combination of wards would have the highest incidence of EBLLs (referred to as "high WLL Flint"; the remainder of Flint was referred to as "lower WLL Flint")."

      Reference #38: Martin R, Tang M. Percent lead in water by Flint ward. Flint Water Study. 2015. Available at: http://i0.wp.com/flintwaterstudy.org/wp-content/uploads/2015/09/Flint-Ward-Map_252-989x1280-2.jpg. Accessed September 26, 2015.

    - I've heard that one of the co-authors, Richard Casey Sadler, PhD, works for MSU College of Human Medicine Division of Public Health in Flint and has a wealth of information and possible maps related to the current situation. Can you verify how the State of Michigan is utilizing his information and expertise to guide the current operational field activities of the various state agencies?

Subject: 2/3/16 Daily Report from SEOC

Summary of activities from MDARD at the SEOC on 2/3/16:

1. FDA Detroit District Office shared: FDA Warns Marketers of Unapproved 'Chelation' Drugs http://www.fda.gov/downloads/ForConsumers/ConsumerUpdates/UCM229436.pdf (attached) The e-mail was also sent to MDEQ, MDCH, JIC News.

2. Summary of MDARD's field activities include:
   - 16 assessments completed (11 re-assessments, 5 initial assessments)
   - 24 water samples collected (17 "in-use samples, 7 first draw)
   - 8 water sampling appointments scheduled

3. Rhythm Change. The daily MDARD Water Response Report will go out at 10am (summarizing the previous day's activities), instead of 4-5pm to allow proper time for all data from the day's activities to come in and be organized. The state agencies have briefings at 9:30 am and 4:00pm. The agency SEOC situation report is due by 5pm each day. The MDARD SEOC will adjust its rhythm accordingly and use the water response report that is submitted at 10am for its 4:00 briefing and 5pm.

4. Per Kevin Besey and Sandra Walker's request, I made a resource request for a GIS map that overlays: 1) licensed food establishments 2) residential water Sampling results and 3) high and medium risk areas (based on blood test results). It is expected to be complete 2/4. I also worked with Lisa Hainstock today with feedback based on SEOC questions on info to fine tune on the assessment and sampling activity table (add assessment total, define elevated, include % firms in compliance after initial assessment, etc).

5. MDARD is working with the Dept of Education's request this afternoon for a list for the following categories of schools:
    1. The parochial/private/charter schools already tested by MDARD and the results.
    2. The schools on MDARD's list that are being addressed by others.

    FYI: DEQ lists seven schools that have been tested. All seven received recommendations for addressing lead and/or other contaminants.

6. MDARD FDD received a complaint from a filter manufacturer about improper sampling from donated filters at charity locations. MDARD was told that all emails, inquiries, calls, and messages regarding Flint Water Recovery Donations can to be sent to this email address for coordination: flintdonations@michigan.gov

7. The media event on food establishment compliance and highlighting that restaurants are open for business in Flint is a go for Friday at 9 am. FDD and other MDARD communications staff are still working on details, but will share them as they are finalized. ESD continues to work with partners on urban garden sites and outreach activities.

Abby Eaton will be at the SEOC on Thursday and Friday.

Subject: MDARD Water Response Update

This is the daily MDARD Flint Water Response Report. FYI, we just received 36 new water results this morning. Several are very high:

- First Presbyterian Church (Medium risk) at 746 S Saginaw: **1,964 ppb** (IN-USE WATER SAMPLE - collected by K Russell on 2/1)
- King's Market (High risk) at 1602 Oren : **465 ppb** (IN USE WATER SAMPLE - collected by M Kusnier on 1/29) -
- Arrowhead Veteran's Assn (High Risk) at 402 W Water St : 11 ppb (IN USE WATER SAMPLE collected by B Benson on 1/29) – Kitchen in the hall
- Arrowhead Veteran's Assn at 402 W Water St: 5 ppb (IN USE collected by B Benson on 1/29) – Kitchen at bar

Immediate action of field visits to be conducted today for compliance assessment of the affected establishments. **Note that according to the inspector's report, King's Market has previously stopped using the water for food or drink.**

Edible Flint Works to Address Water Emergency through Urban Gardening
Urban Agriculture Organization Makes a Positive Impact in Flint Communities

FOR IMMEDIATE RELEASE
February 4, 2016
Release #: 29

Flint, Mich. – Since 2009, Edible Flint has been working with individuals and institutional partners to support Flint residents in growing and accessing healthy food in order to reconnect with the land and each other. As a part of their continuing outreach to Flint's residents, Edible Flint is gearing up to ensure a bumper crop of lead fighting vegetables and address concerns over urban gardening in Flint.

Edible Flint supports more than 300 community and individual gardens in the city through its Garden Starters program. This program provides gardening classes, technical expertise, resources and supplies. In response to the recent Flint water emergency, the organization has plans to expand their programs as they prepare for the upcoming gardening season.

Not only are they looking to support additional food gardeners through their Garden Starters program, they are currently reviewing the selection of seeds and transplants being distributed this year to ensure vegetables that fight lead exposure are included. In addition, Edible Flint, which tests approximately 50 new gardens each year, will be increasing the number soil tests (including lead screening) for Flint's food gardens. They also intend to provide hose filters for garden irrigation for program participants.

"Edible Flint is committed to supporting Flint residents by providing access to resources to grow nutritious fresh food," said Terry McLean, Michigan State University Extension (MSUE) Educator, and Edible Flint Leadership Board Member. "Through our urban gardening program we hope to provide a catalyst for recovery and community engagement."

McLean added, Edible Flint has been working with MSUE partners to reassure gardeners of the safety of eating and growing vegetables grown in Flint's community gardens.

For more information on Edible Flint, visit http://www.edibleflint.org.

Cc: Shane, Kirby (DEQ); Smith, Carol (DEQ)
Subject: RE: Residential samples>100 ppb lead

Sample numbers LG07364 and LG07383 are samples for MDARD, not residential. That is why they did not appear on the spreadsheet. Do you need notification of these as well? The reports were sent to MDARD.

Subject: RE: Residential samples>100 ppb lead

Hi Julia

I need to double check something. Is there a chance that two sample results > 100ppb were reported on 2/3/2016 that you didn't have a chance to copy us on? We have two notes from you today with sample results > 100 ppb. Only one of those results, Sample # LG07032, is > 150. The other two results > 100 we got copied on are sample #'s: LG07601 & LG07654.

When we got the spreadsheet with results through today, two other samples for which we don't have the note from you have concentrations > 100: i.e. sample #'s LG07383 & LG07364.

No big deal if you couldn't get us that note with the latter 2 sample results before you left today, we're just wanting to make sure that the numbers that we report to the Governor are solid. Thanks!

Mitch

To: MSP-EOC-MDARD
Subject: Map
Attachments: BLL_WaterSamples_FoodEstablishments.pdf; BLLabove5ugmL_WaterSamples_FoodEstablishments.pdf

In response to your request:
MDARD Food and Dairy Division Director would like a GIS data map that overlays the following data:
1. Residential Water Sampling Results - Lead (most recent data)
2. Licensed Food Establishments
3. Identified areas of high and medium risk (I believe this is from blood test result research data)

I have a map that includes all of the data, it is very busy. So if you would like me to break it up, or somehow symbolize it differently, please let me know.

I included two copies of the map, one with all blood lead levels shown, and one with only BLL above 5ug/mL. I used graduated symbols to show higher blood levels so that they stand out more, especially if there are several points nearby.

If there is anything you would like changed, please let us know. That was a lot of data on one map.

Subject: Water Purifier Co. Inquiry

April,

I was contacted by Ms. Lin Gul of Blue Water Co., Kansas City 913-593-3115. According to Ms. Gul, their company donated water purifiers to:

Catholic Charities of Shiawassee & Genesee Co.
901 Chippewa
Flint 48503

And

Shelter of Flint
605 North Saginaw St.
Flint 48502

They are alleging the inspector is sampling improperly and that the water should be testing at acceptable levels for lead.

We do not have these operations on our 'to do' list. Any assistance would be appreciated.

Subject: RE: School assessment/water testing question

Hi April,

Is there a list available for the following categories of schools?

1. The parochial/private/charter schools already tested by MDARD and the results.

2. The schools on your list that are being addressed by others.

FYI: DEQ lists seven schools that have been tested. All seven received recommendations for addressing lead and/or other contaminants.

Thanks for your help,

Neither of these locations appear on our lists, therefore any inspector visiting these firms are not likely to be from MDARD and we can't answer to allegations of improper sampling. Perhaps the inspector they are referencing are LHD or MDEQ staff? Workers in the HHS system?

Subject: Food Bank Info Flint

Sheryl,

I received a call from Senators Ananich' s office inviting me to participate in the meeting tomorrow. I wanted you to have this snap shot of what the Food Bank does in Flint and the programs and impact they have.

In the month of January we **distributed 1,384,216 pounds of water in the Flint Community.**

Current Work in the City of Flint:

- We currently have 75 active partners in the City of Flint, last year they distributed 8.9 million pounds and reported serving 67,886 people with that food, (a portion of these persons may be duplicated count) Also, 73 additional program sites outlined below – **a total of 148 places currently that we work with** in the City of Flint. All can be sites for outreach and food giveaways of any sort

- There are 7 Headstart sites in the City with 256 children, we currently make prepared meals – could do weekend, take-home nutrition boxes

- We have 14 sites currently for CACFP in the City with 707 children combined that could also use additional food with take-home nutrition bags

- We have upwards of 30 SFSP, summer food sites in the City of Flint and can implement nutrition programs and take-home nutrition boxes or bags at all of these sites.

- We have the Backpack program at 17 schools in the City with 768 number of children

- We have 5 weekly – semi-load distributions in the City of Flint that could incorporate additional food and nutrition outreach

Additionally, we have over 300 mobile food pantries per year in Genesee County, that mostly includes sites in Flint that deliver food by the semi-load right into neighborhoods across every zip code

To compare Genesee County 2015 vs 2016 the Food Bank experienced a net increase of 1,406,239 pounds of product distributed.

Jan '15 = 831,039 lbs. product distributed Genesee County

Jan '16 = 2,237,278 lbs. product distributed Genesee County

Net increase in total pounds 1,406,239

Pounds of water distributed January 1,384,216

Subject: THANK YOU: Flint JIC Staffing

Fellow PIOs,

Thank you for providing staffing for the Flint Joint Information Center. We have attached the latest two-week staffing roster.

Please note that we still need staff to help during the week of Feb. 1-5.

No prior experience is required to work in the Flint JIC. Lunch is provided. Hotels rooms are available upon request.

If you have any questions, please let me know.

Thanks,

Ron

MSP-EOC-MDARD

From: Tilden, John (MDARD)
Sent: Wednesday, February 03, 2016 10:23 AM
To: MSP-EOC-MDARD
Subject: *RE: Question for MDARD*
Attachments: Brownell_STEM_Academy_Spreadsheet_507983_7.pdf

Nope.

An effective filter will get you to non-detectable levels (unless there are extremely high levels (example: 1000 ppm) – our "First draw" samples of the raw water used in the facilities has documented that no food establishments to date have been exposed to these kinds of levels.

The ideal situation would be to remove the faucet/fixture and associated plumbing and replace it with lead free components but that may not be economically feasible. Installing the appropriate filter often requires a licensed plumber and also may not be economically feasible.

Flushing is another way of getting to non-detect or otherwise very low levels. The attached spreadsheet downloaded from the Michigan.gov Flint Water Response website is from one of the schools in the area and demonstrates the effectiveness of flushing (dramatic drops from "First Draw" to "30 second" to "2 minute" samples). Samples collected after 2 minutes of flushing had results ranging from non-detect to 3 ppb.

That is why we are pushing for clarity regarding what the appropriate standards should be for regulatory enforcement in food establishments – what is the public health risk of detectable but low (e.g., <4ppb) in food establishments that consumers visit sporadically (i.e., not on a daily basis).

So it appears that there is not a single "silver bullet" that FDD staff can require across the board to ensure appropriate public health protection. We are trying to work with firms to do what is possible right now with what currently exists – since we all share the objective of reducing levels to as low as is technically/practically possible. We will adjust our strategies as we learn more.

Does this help clarify the situation?

Thanks for everything you are doing April!

John

Subject: RE: Question for MDARD

Thanks, makes sense for medium risk and other facilities. Since MDARD took a sample for testing by DEQ during the initial assessment of high risk facilities, would a high risk facility need to meet both elements in 1 and 2 to be compliant?

From: Tilden, John (MDARD)
Sent: Tuesday, February 02, 2016 5:53 PM
To: MSP-EOC-MDARD
Cc: Hainstock, Lisa (MDARD); Walker, Sandra (MDARD); Henderson, Justin (MDARD)
Subject: RE: Question for MDARD

April,

Let me clarify, there are two ways a firm can document that they have achieve compliance with requirements to reduce lead levels in source water to safe levels;

1. Have a water test result from a DEQ recognized laboratory with a non-detect result, or

2. MDARD has verified they are implementing the risk reduction requirements identified on the MDARD sheet "Requirements for Licensed Food Establishments Using City of Flint Water, January 13, 2016
   - One of the following;
     - *Use of appropriate filter (NSF Standard 53 certified), or*
     - Flush lines for 5 minutes each day before using or serving water and after 6 hours of no water use.
   - And utilize the other three required water handling/use practices identified on the sheet.

Phase 1 of MDARD's response - Initial assessments with "First Draw" sample collection - ended last week.

Phase 2: Follow Up assessments with "in-use" verification sample collection - started this week and is scheduled to continue through the month of February. Follow up assessments are done where:

- firms were found to be not fully non-compliant with requirements during the initial assessment , or

- lead was detected in "First draw" samples.

I hope this helps clarify what we are doing.

John

Cc: Tilden, John (MDARD) <tildenj@michigan.gov>
Subject: RE: Question for MDARD

Hi Jennifer,

MDARD is not clearing firms, but using a risk based approach to identify compliant / non-compliant food establishment firms. A compliant firm is one that has a 0 lead level from the water test and using the risk reduction factors in the attached handout.

1. MDARD notified all licensed food establishments of the requirements (attached) around January 13.
2. Using a risk based approach based on geographic location and infrastructure, MDARD identified 175 firms that were high or medium risk and are conducting initial assessments at those firms.
3. Initial assessment at high and medium risk firms. During the initial assessment, MDARD is documenting whether firms in the medium and high zones that are in compliance with risk reduction practices. MDARD takes

a first draw water sample at all high risk establishments and when requested for medium risk or other firms. A compliant firm is one that has a 0 lead level from the water test and is using the risk reduction factors.

4. Follow up / Verification testing. MDARD is taking in use samples on firms that are non-compliant (not following the risk reduction requirements or had detectable levels in its first draw sample).

MDARD is in the first round of verification visits this week and the next. We have not yet reached the scenario of the firm that was non-compliant after the initial assessment and was again non-compliant after the follow up sample or assessment.

Please let me know if you need any additional information.

Hi Jeanne,

April Hunt here. I was at the SEOC yesterday and again today. Abby Eaton will be here Thursday and Friday. Are you the JIC contact?
Please call me at (work cell) or 517-284-3922 (shared phone at SEOC with Gov's Office). My cell is preferred.

My responses follow. I will also attached a FDA consumer notice FDA Detroit District wanted us to share. It's from Oct 2010, but I assume is still current since that is the link/document FDA provided. The pdf of it is also attached.

Subject: things

Hi,

Who is working today?

I have a few things for action or as information:

First, are the GIS maps being created available for the public? (Edible Flint and MSU Extension working on urban ag issues asked during a meeting yesterday.) I don't know, will ask the GIS staff here.

Second, Edible Flint is actively seeking donations and/or assistance to help address the long-term needs of urban gardeners, farmers and others with resources (hose filters for watering, soil lead testing, garden starter kits, nutrition information, food access, etc.) via its website at www.EdibleFlint.org. Thanks, I'll put that in my daily activity report right away.

MSU E also has a lead webpage at www.msue.anr.msu.edu/lead that could be used as a resource. Yes, I included that in the MDARD sit report yesterday.

I am trying to connect Edible Flint with the American Red Cross and United Way responses as both a resource and a place where people interested in donating can contribute.

Do you have contacts with these groups I can share with them? I will talk with recovery (is in direct contact w/American Red Cross) right away, I see she's in a meeting right now. I will also e-mail them and cc you.

Also, FYI, the media event on food establishment compliance and highlighting that restaurants are open for business in Flint is a go for Friday at 9 am. We are still working on details, but can share them as they are finalized. Thanks, please keep me/SEOC posted.

Thanks!

Jeanne

Subject: RE: Question for MDARD

No, it is either/or. Even if they are following all requirements, they may never be able to meet the Not Detected criteria, if they already have been shown to have lead in the water. However, our staff are working to collect follow up samples taken while the water is in use, to determine the effect on the lead concentration after flushing, etc. These results will be evaluated and compliance will be discussed at that point.

Subject: Daily MDARD Water Response Report

Attached is today's daily summary of activities for the Flint Water Response Project. Additional information is provided concerning test results and their corresponding risk levels. Please note the explanations at the end of the report regarding changes to establishment category counts.

Also, as we 'fine tune' our processes and for better accuracy to capture on-going events, after today, we will be sending out the reports in the morning to summarize all of our activities from the day before. This means that starting tomorrow morning a daily report will go out summarizing everything until COB today. Hopefully this will aid in simplifying the process. A huge thank you to all the staff that have worked tirelessly to get us to this point!!

Lisa,

I made a couple of grammatical changes and attached is the approved Situation Report for today. A huge thank you to Doc Tilden, Denise, Tom, Dan the Man, Justin and Lisa. The tables and additional information is beautiful and right on time with the needed statistics. You guys are amazing!

Subject: Sit Rep distribution from now on

Now that today's sit rep has gone out, starting tomorrow, we will send out the sit reps in the morning, summarizing all of our activities from the day before. Therefore, tomorrow morning a new sit rep will go out summarizing everything until COB today. This will simplify the process.

On another note, each day, by COB, I need to hear from SEOC what, if any, changes are coming down that might change our response

Subject: FYI - Pet Calls

Apparently MSU Vet Clinic is doing a lead study for Flint resident and will test pets for free. The owner can take the pet to their vet for a blood draw and send the sample to MSU. Callers may be directed to MSU's vet clinic for more info (we've had 2 calls that I know of).

Subject: RE: Rumor?

That is certainly interesting but definitely not from us (at least as far as I know). Ultimately, we do want to get into the community and screen dogs, but we just submitted IACUC forms today and we don't even meet with university officials until Thursday.

Thanks for checking.

Subject: Rumor?

Hi, Daniel.

I had an email come my way that says MSU Vet Clinic is now offering free lead testing to Flint residents with pets. All people have to do is take their pet to a veterinarian, have the veterinarian draw blood and send the samples to MSU. I assume this is a rumor? The email came to me through the state emergency operations center. I can get the message stopped but thought I should double check to be sure no program was in place yet.

Hello,

April here at the SEOC. I see from the summary staff are scheduled to assess the 37 med risk firms at the Flint Farmers Market.

DNR's question: Will staff be taking water samples during those assessments today?

I know water samples were taken at all high risk, but what is the plan for sampling at med risk? This e-mail or my SOM e-mail are the best ways to reach me.

Thanks,
April Hunt

Apparently MSU Vet Clinic is doing a lead study for Flint resident and will test pets for free. The owner can take the pet to their vet for a blood draw and send the sample to MSU. Callers may be directed to MSU's vet clinic for more info (we've had 2 calls that I know of).

None yet. Getting inquiries about pets. Hearing a rumor that MSU is doing free lead testing for pets. Need to confirm that.

Hi Jen,

I'm here at the SEOC today. Just wanted to check in if there were any updates on your end. Of interest here is that MDARD staff are conducting initial assessments at the Flint Farmers Market today. There are 37 firms. No samples will be taken as these are initial assessments.

> - To help put our data in perspective, results from both MDARD collected samples and DEQ tested residential samples are summarized below:
>
> Table 1: Comparison of initial test results from MDARD collected samples with residential test results

Risk Zone	Water Test Results				
	> 15 ppb	4 - 15 ppb	1 – 3.99 ppb	Not detected (< 1ppb)	Total Results Received To Date
MDARD Collected "First Draw" Samples From Targeted Food Establishments	3 (6%)	7 (15%)	20 (43%)	17 (36%)	47
Residential Samples*	307 (6%)	777 (16%)	1314 (27%)	2567 (51%)	4925

* Source: http://www.michigan.gov/flintwater In the Home - Jan 30 Report Spreadsheet – Residential

- Initial impressions – these "first draw" water lead test results suggest:
  - There is significant variability within the current High, Medium, and Other risk categories. We may want to evaluate how we can refine these categories – possibly in cooperation with other response partner agencies (see attached summary for more details by zone).
  - A substantial minority of samples tested contain lead levels in lowest but still detectable level range (1-3.99 ppb). It may be helpful to better define the potential public health risk associated with lower detectable levels of lead exposure in commercial food establishments.

Note: The "Other Establishments" grouping includes establishments thought to be on the City of Flint water supply and includes a higher proportion of gas stations, convenience stores, party stores, and general retail stores that also sell food.

I hope this helps address the questions raised.

Thank you for your patience. It is taking a bit more time than we anticipated to enter, quality control, analyze, summarize, and report the requested data.

John

This is still being worked on and developed. We're working on a variety of urban ag, hoop house and gardening type issues. Will keep you posted as things move forward. We're also with with FDA/CFSN. There are interagency/stakeholder meetings slated for these issues.

Please find below a summary of the water test results received to date and a short summary of the types of establishments currently included in the "Other establishments" category.

Overview:

- Results received to date are from the first samples MDARD staff collected from licensed food establishments meeting one of two criteria:
  - Those selected for sampling by MDARD staff using risk-based criteria, or
  - Firms that contacted MDARD requesting sampling on a voluntary basis
- Staff intentionally sought out establishments they felt might have increased potential for higher lead levels due to geographic location or infrastructure age
- To help put our data in perspective, results from both MDARD collected samples and DEQ tested residential samples are summarized below:

Table 1: Comparison of initial test results from MDARD collected samples with residential test results

Risk Zone	Water Test Results				
	> 15 ppb	4 - 15 ppb	1 – 3.99 ppb	Not detected (< 1ppb)	Total Results Received To Date
MDARD Collected "First Draw" Samples From Targeted Food Establishments	3 (6%)	7 (15%)	20 (43%)	17 (36%)	47
Residential Samples*	307 (6%)	777 (16%)	1314 (27%)	2567 (51%)	4925

* Source: http://www.michigan.gov/flintwater In the Home - Jan 30 Report Spreadsheet – Residential

- Initial impressions – these "first draw" water lead test results suggest:
  - There is significant variability within the current High, Medium, and Other risk categories. We may want to evaluate how we can refine these categories – possibly in cooperation with other response partner agencies (see attached summary for more details by zone).

- A substantial minority of samples tested contain lead levels in lowest but still detectable level range (1-3.99 ppb). It may be helpful to better define the potential public health risk associated with lower detectable levels of lead exposure in commercial food establishments.

To: Banner, Shanon (MSP); JICManager
Cc: MSP-EOC-MDARD; Clover Adams, Jamie (MDARD); Averill, James (MDARD)
Subject: media calls today

1. Bob Allen – Free Press
   He had Qs on water, lead and animals. Left him a VM.

2. Martha Thierry – Detroit Free Press
   She is an artist, not a reporter. Was assigned to do some sort of informational graphic. Dr. James Averill, state vet, spoke with her.

3. Andrew Heller, WNEM-TV 5
   He had Qs on water, lead and pets. Dr. James Averill, state vet, spoke with him.

4. Joe Gephardt, WLNS-TV6
   He had Qs on the five point plan. Referred him to the JIC.

Below are the key points:

1. In the last 5 years, there have been two cases of lead toxiosis reported in Genesee County.
2. Whatever you are doing in your own home for water, you should do for your pets (e.g., filtered, bottled water).
3. If you have any concerns about your animal's health, you should always work with a licensed veterinarian.
4. There are a variety of diseases and issues that could mimic signs/symptoms of a lead-related issue, it's why it's critical to work with your vet to properly diagnose your pet.
5. If a licensed vet suspects a possible lead-related issue, they contact MDARD and the department will work with them to have a sample tested. MDARD is covering the sample testing costs coming through veterinary offices.

Deb,

Polly let me know you needed a sit rep from the meeting on Friday. I will try to have that for you tomorrow. For now, here is a list of those on the call (see below). We met out stated goal and outcome expectations. Basically the call was to create situational awareness among partners and stakeholders interested in the pet issue related to Flint water. I also attached an agenda.

Dr. James Averill – MDARD
Dr. Nancy Frank - MDARD
Megan Sprague - MDARD
Dr. Schalow – MDARD
Polly McKillop – MDARD
Patsy Kufta - MDARD
Paul Wallace - Genesee County Animal Control
Rene Kennedy - Genesee County Animal Control
Lin Holmes - Genesee County Humane Society
Dr. Cathy Anderson - Genesee County Animal Control/MVMA
Dr. Mike Chaddock - MSU College of Vet. Medicine
Dr. John Baker - MSU College of Vet. Medicine
Dr. John Buchweitz - DCPAH
Dr. Michael Blackwell - Humane Society of the United States
Jill Fritz - Humane Society of the United States

Hi Gordon,
As requested this morning, this is a couple of paragraphs about the local groups ESD has been working with on the Flint Water issue.

Please let me know if you have questions.

Elaine

Please see the screen shot below. The highlighted verbiage needs to change from "recommendations" to "requirements," per the Department of Agriculture and Rural Development. This is causing great confusion in the field, as these previous recommendations are now officially requirements.

Thank you,
Jennifer LT

To: MSP-EOC-MDARD
Subject: *typo on website*

Hi, Deb,

Jen has tried to get this typo corrected but it is still incorrect. I thought maybe you would have more success from the EOC chair.

The link is located under the In Your Body tab on the FlintWater website. 'Recommendations' should be 'Requirements' on the link to the food licensee handout. This has led to some confusion.

Thanks!

Hi there,

The requirements document that we sent out in our mailing to flint area food establishments a few weeks ago is linked at http://www.michigan.gov/flintwater#BODY as "*Recommendations* to Food Establishments . . . "

I'm not sure who updates this site . . . but I'd think we'd like them to change the document name link from recommendation to requirements, right away??

Hey everyone,

We've been asked by the Planning Group a bullet list of important events that MDARD will be participating in this week by 4 pm today. (i.e. Meeting with community agencies to identify future POD sites or meet with federal partners to outline long term recovery).

The list is being compiled tonight for the Governor's office.

Please respond to this email no later than 4:00 p.m. and let me know whether or not you have anything. Thanks.

Cc: Holland, Meegan (GOV); Hausler, Jeanne (MDARD); MSP-EOC-MDARD; Walker, Sandra (MDARD); Throne, Heather (MDARD)
Subject: FW: Flint Water Compliance Media Event

FYI.

Meegan asked MDARD last week to spearhead trying to put together some type of restaurant event based on the assessments we are doing in partnership with the Genesee County Health Department. The tentative date is February 5. The details are very fluid as we don't know yet if this will come to fruition, but we are moving forward with planning to ensure we're ready to go.

Jeanne is slated to be in the JIC on Fri and will be running point with Heather Throne. MDARD will not be issuing/providing stickers. This was discussed with Meegan last week as well.

Attached are the **DRAFT** talking points and tentative media event outline.

I have not been able to connect with Bob Campbell at the Genesee County Chamber.

We have completed high-risk assessments and will begin conducting compliance checks this week. We have 14 inspectors working with the GCHD. As background, typically, all restaurants are inspected by local health departments, not MDARD. LHDs are accredited to conduct inspections through MDARD. Eventually, these inspections will be turned back to LHDs.

A few sticking points:

1. Some food establishments ran their own private samples. We are trying to see about identifying those locations to have a better comprehensive list.
2. We have not yet received water sample results back for restaurants. As of mid-day Saturday, we have only received 8 sample results and those were at places like gas stations since W&M staff were already on the ground.
3. DEQ is working with staff on determining levels.
4. We are developing protocols on enforcement should a sample come back requiring action.

Hi, Tom,

Attached are some general talking points. We do not have specific ones done for this event, but this is a start. Those will come as we get more details for the event.

One thing I need that I hope you can help with: Do you have a list of restaurants who got water testing done proactively themselves before we started our assessment process? Since we have not gotten very many (if any?) results back from any restaurant samples we have collected, maybe we can use one of the ones we are already cleared through their own tests as a location for the event.

If this is something that can be provided, can you get it to me asap?

Thanks!

Tim, Denise and Dan,

Here is the draft of the letter for inclusion in the mailing with the sample results to the firm. It needs to be finalized, also the cc's should be reviewed I don't think KB needs to be on it, but better ask him, same with Sean.

I also have included the Requirements doc to be enclosed also. That way we have all the info in one packet to the firm, even though they have been called, visited at least once already.

Subject: Flint Water Compliance Media Event

Hi, Tom,

Attached are some general talking points. We do not have specific ones done for this event, but this is a start. Those will *come as we get more details for the event.*

One thing I need that I hope you can help with: Do you have a list of restaurants who got water testing done proactively themselves before we started our assessment process? Since we have not gotten very many (if any?) results back from any restaurant samples we have collected, maybe we can use one of the ones we are already cleared through their own tests as a location for the event.

If this is something that can be provided, can you get it to me asap?

Thanks!

Subject: RE: SEOC contact number

Thanks, will do and I appreciate the updates and contact info. I'm glad the new space is working out so far. Since Tuesday is my first rotation for this activation, I'll stop by Kay's office this afternoon to get a better feel for how things flow and have been going lately.

I'm sorry April, I didn't realize you finally got a work cell phone. Or if I did, I forgot. I'll make sure that change gets made in the contact book. Also, I'll leave my contact book here as it's got updates phone numbers etc. in it. Kay has the SEOC book at the office. If our station gets moved, I'll ask that the book gets moved with it. It's an amazing room!

If anything of import happens today, I'll let you know via email. So far, I haven't had anything to add to the activity report (it's planning day, so not much happening.) Bring work to do if you can (and your laptop if you want to access you work email.)

FYI we currently don't have a phone number assigned at the SEOC. The phone at the temporary desk we have been assigned is 517-284-3922; however, it is shared with the Atty. Gen's rep. Best bet is contact via cell phone. The SEOC schedule this week is:

Monday: Deb Merrill,
Tuesday: April Hunt,
Wednesday: April Hunt,
Thursday: Abby Eaton,
Friday: Abby Eaton,

Email address at the SEOC is MSP-EOC-MDARD@michigan.gov

I would say the article is good to post. I think I shared it with the JIC last week. Additionally, I shared with the JIC that MSU Extension is assigning a person to Genesee County and that she would be an asset to the JIC staff.

Deanna East

Another article from MSUE that I was able to obtain permission to share on the Flint website is the MSUE/Dr. Mona nutrition guide. Sent that last week too.

http://msue.anr.msu.edu/resources/fight_lead_with_nutrition

Will keep you posted on urban ag/Cottage food issues.

State outlines initiatives to determine safe drinking levels and to provide long-term assistance to Flint children

FOR IMMEDIATE RELEASE
January 31, 2016
Release: #25

Flint, Mich. *– Strategies to determine when Flint's water is safe to drink and to ensure that the city's children have access* to comprehensive health care are key to the state's long-term solutions in the Flint water crisis.

Short-term, Gov. Rick Snyder is urging every Flint resident to get a water test kit.

"Almost 5,000 homes submitted water tests, but we want to encourage everyone to submit a water test. Please pick up a free water test kit at one of the Flint fire stations and return the sample to the same location," Snyder said. "We want to ensure that all homes are getting the proper immediate attention and the home water tests will help in that process. If you need assistance, please call United Way 2-1-1 for help."

In addition to the federal emergency declaration, which was granted on Jan. 16, Snyder has requested more federal help for Flint: "While the USDA denied my request to expand WIC nutrition support for Flint children ages 5-10, I'm asking that agency to reconsider. I'm also encouraging the federal government to grant my requests to extend Medicaid eligibility to all Flint residents ages 21 and under, provide long-term health care services for children and help with lead abatement."

On Friday, Snyder signed legislation that will allocate $28 million for more water resources and expanded health care initiatives, including more school nurses, diagnostic tests and community education through the Genesee County Health Department. He also plans to include additional long-term aid for Flint in his FY 2017 budget proposal to be unveiled early this month.

Here's what key Michigan departments are doing to help with the Flint water emergency:

Michigan Department of Environmental Quality

The Michigan Department of Environmental Quality (DEQ) has embarked on a five-part strategy to establish a baseline of data to determine when the water is safe to drink.

The strategy includes:

•*Residential water testing:* At-home water testing done by residents is key in guiding experts to areas of concern.

To date, of 4,924 total residential water samples, tests show that 93.7 percent of homes are below the actionable level of 15 parts per billion (ppb) for lead:

4,616 samples at 15 ppb or less for lead (93.7%);
4,179 samples at 5 ppb or less for lead (84.9%);
308 samples over 15 ppb for lead (6.3%);
37 samples over 150 ppb for lead (0.75%); and
26 samples over 1,300 ppb for copper (0.5%).

Water samples will only be accepted by using the official water testing kits provided at the water resource sites and by the water response teams. To process these samples as efficiently as possible, the Michigan Department DEQ lab is operating seven days per week and is capable of processing 1,000 tests per day. Residents can access these reports online at www.mi.gov/FlintWater. Results are mailed to each residence tested.

•School testing: Michigan DEQ in collaboration with the Michigan Department of Licensing and Regulatory Affairs (LARA) has tested all 13 public schools in the city and continues to test non-public schools, children's centers and senior centers. The state will retest the public schools once it has completed replacing water fixtures. Fixture replacement has begun at Freeman School, which will be retested after water flushing happens within the next week.

•Food service/restaurant provider testing: Michigan DEQ is working in collaboration with the Michigan Department of Agriculture and Rural Development (MDARD) to test establishments and ensure they are using water filters, flushing water systems properly and using the correct food and water standards.

•Blood level testing: Michigan DEQ is working in conjunction with the Michigan Department of Health and Human Services (MDHHS) to ensure that residents with high blood lead levels have their water tested for lead. Homes with high water lead levels are provided additional services by MDHHS and the Genesee County Health Department to ensure residents' exposure to lead is minimized.

•Flint water distribution system testing: Michigan DEQ and the City of Flint are working to monitor and test the quality of the water as it travels throughout the city's water distribution system. Additionally, sentinel sites are being established to set a baseline for data collection.

Michigan DEQ is working with the EPA on trend analysis and data sets that will be reviewed by the Flint Water Interagency Coordinating Committee, which includes water quality experts to help local, state and federal officials provide a consensus conclusion on water quality and safety.

Michigan Department of Health and Human Services

In response to the elevated blood lead levels found in some Flint children, the MDHHS has worked closely with partners at the state and local level to reach and educate families and providers about what they can do to help protect the health of Flint residents.

These actions include funding to Genesee County Health Department for nurses to work with families when an elevated blood lead level has been detected. During follow-up visits, nurses coordinate with environmental health investigators to meet with families in their homes to identify lead exposures, answer questions and provide water filters.

As part of the effort to test Flint residents, the following data includes all children and adults tested since Oct. 1, 2015:

•67 of 3,351 Flint residents tested showed an elevated blood lead level;
•38 of 1,505 children under the age of 6 showed an elevated blood lead level;
•Seven of 963 children between 6 and 17 years of age showed an elevated blood lead level; and
•22 of 883 adults over the age of 18 showed an elevated blood lead level.

Because lead stays in the blood for only a few weeks after exposure, these numbers do not provide a comprehensive picture of how many people may have been exposed. MDHHS continues to focus on ensuring that all children in Flint have access to additional behavioral, educational, nutritional and healthcare supports, as well as encouraging every resident to get tested for elevated blood lead levels.

Emergency Management Response

Today, water response teams comprised of city, county and state personnel, American Red Cross and volunteers continued door-to-door delivery efforts. These teams are canvassing neighborhoods providing free bottled water, filters, water replacement cartridges and water testing kits to City of Flint water system consumers not yet identified as having a

water filter. These door-to-door efforts also include the 266 homes outside of the city limits on the municipal water system.

Additionally, homebound residents who need supplies should call United Way 2-1-1 or 810-257-3600. The United Way 2-1-1 is collecting a list of individuals needing home delivery and is providing that information to the Genesee County Sheriff's Department.

Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

•234,490 cases of water
•100,593 water filters
•32,093 water testing kits

Water resource sites remain open daily from 9 a.m. to 9 p.m. and can be found at the five city fire stations. For locations, go to www.michigan.gov/flintwater.

Due to an overwhelming response from individuals who want to donate, please direct inquiries to FlintDonations@michigan.gov or 517-420-4162. You can also donate online at www.helpforflint.com.

Additional information is available at www.michigan.gov/flintwater, or by calling United Way 211.

Subject: RE: SEOC question

Attached is a first draft for comment. My suggestion would to make this look prettier and share it with MIFMA and farmers market managers in the Flint area for sharing with their cottage food vendors. We don't really have any way to reach cottage food vendors directly. Also, we can probably get this posted to the Flint Water website once it has been approved through the JIC.

Feedback, please.

Subject: SEOC question

This question is from Civil Rights (a CR Commission member asked this): How is MDARD protecting the public from cottage food operators, either with or without a license, from foods being produced with Flint water? Concern is that these operators could theoretically be "exporting" the problem by selling in Grand Rapids or other places at Farmer's Markets.

8	1/29/2016	MDHHS	Nutrition	10, 11	3, 4	Expand use of WIC/Food Assistance for Farmer's Markets/Food Banks/Mobile Food Banks.	High-1	L		X			NETF		Vista Fletcher (USDA) Sandra MacMartin (USDA)	2/5/16-(NETF/State Health Review)-The WIC Farmers Market Nutrition Program (FMNP) allocation formula is set out in regulations (base grant amount is in statute). For FY 2016, it is anticipated Michigan will get at least the amount it received in FY 2015 Once FNS allocates the money to the State, it is a State decision on where the FMNP funds are deployed throughout the State. Michigan could decide to focus more of the funding in the Flint area to expand access for WIC children. 2/2/16-(USDA SitRep)-USDA affirmed that the water contamination did not result in new disruption to food access in Flint. WIC food assistance is for children that are not in school. USDA's Food and Nutrition Service (FNS) supports school age children receive food assistance through the National School Lunch Program, and the Child and Adult Care Food Program. There are no unmet needs for food access that are a direct result of water contamination. USDA is working with state's nutrition and education task force to encourage all eligible residents to apply for existing nutrition assistance programs and ensure that the City and County are maximizing existing programs. USDA is utilizing its networks to promote nutrition guidance that promotes foods rich in Calcium, Iron, and Vitamin C to mitigate lead impacts
9	1/29/2016	MDHHS	Nutrition		3, 4	Provide technical assistance to WIC staff on lead and assess ongoing adequacy of nutrition resources; assist with obtaining additional resources as needed	High-1	L		X			NETF		Vista Fletcher (USDA) Sandra MacMartin (USDA)	2/5/16-(NETF/State Health Review)-Discussion with state nutrition task force staff identified a need for increased materials to hand out to community to promotenutrition guidance that promotes foods rich in Calcium, Iron, and Vitamin C to mitigate lead, workgroup fored (USDA-FNS engaged); pending work products 2/4/16-(NETF/State Health Review)-USDA FNS still working to enroll individuals into existing nutrition assistance programs, part of daily programatic function for USDA-FNS; State to identify if any outstanding need; awaiting next steps from MDHHS; potential closure 2/10/16 2/3/16-(USDA SitRep)-working with state's nutrition and education task force to encourage all eligible residents to apply for existing nutrition assistance programs and ensure that the City and County are maximizing existing programs USDA is utilizing its networks to promote nutrition guidance that promotes foods rich in Calcium, Iron, and Vitamin C to mitigate lead
35	1/29/2016	MDHHS	Nutrition	10, 11, 14a	3, 4	Funding for development and implementation of a wichealth.org lesson module on nutrition and lead (many WIC clients access nutrition education online through wichealth.org).	Medium-5	L		X		X	NETF		Vista Fletcher (USDA) Sandra MacMartin (USDA)	2/5/16-(NETF/State Health Review)-Michigan can use its Nutrition Services and Administration funds to develop the module Also, the regional office could use its Operational Adjustment funds to support development of the module State health LNO to determine if mission can be closed.
53	2/4/2016	MI-Department of Education	Nutrition	10, 11, 14a	3, 4	The City of Flint needs additional food supply to help provide healthy food choices for The Emergency Food Assistance Program (TEFAP) eligible families, with a focus on foods that are high in calcium, iron, and Vitamin C. Request is to use USDA disaster food package boxes.		M		X			NETF		Vista Fletcher (USDA) Sandra MacMartin (USDA)	2/5/16-(NETF) received application from MI-DOE, Application to utilize USDA Disaster Food for Disaster Household Distribution due to Flint water crisis. FNS began working with the Michigan Department of Education and the Michigan Department of Health and Human Services to coordinate visits by FNCS Deputy Under Secretary, Katie Wilson and MWRO Regional Administrator, Tim English to visit a school, a WIC clinic, and the Federal Emergency Operations Center in Flint. The visit will occur on 2/10/16 2/4/16, MDE submitted a request to FNS to utilize USDA Foods for Disaster Household Distribution. FNS staff are currently reviewing the request to determine if any additional information is needed from the State
28	1/29/2016	MDHHS	Medical Services	8a, 15a, 20	3, 4	Lead Abatement through an 1115 waiver financed by a "designated state health program " The State funded program "Healthy Homes" – currently at $1.8m General Fund (GF), but this would allow Medicaid match for all GF. Abatement includes:	High-2	L		X		X	HSTF		Diana Hadzibegovic (TF Lead) Byron Mason	2/4/16-(HSTF)-HUD has identified that existing "Healthy Home" funding can be utilized by the county to support lead abatement in homes, including in water; now the State will need grantee to apply.

34	1/29/2016	MDHHS	Nutrition	10, 11, 14a	3, 4	Lactation Support - Provide additional federal resources to the WIC program to augment WIC peer counseling and utilize existing staff in more dedicated lactation support role	High-2	L		X		X			Vista Fletcher (USDA) Sandra MacMartin (USDA)	2/5/16-(NELF/State Health Review)- believed to be complete, Request State LNO to determine if mission can be closed 1/28/16-(USDA)-"performing already" and FNS will be issuing the FY 2016 WIC Breastfeeding Peer Counseling funds by mid-March.
36	1/29/2016	MDHHS	Nutriton	10, 11	3, 4	Assistance with nutrition planning for the inclusion of private industry to address the food desert	Medium-6	L		X					Vista Fletcher (USDA) Sandra MacMartin (USDA)	2/4/16-(USDA SitRep/NETF Review)-USDA will continue in advisory role, EDA will follow for lead--Doug Lynott - POWER (Partnerships for Opportunity and Workforce and Economic Revitalization) (US EDA). Don Boyce, CAPT Gwaltney, CAPT Denis, Tony Martin (HUD-SCI) met to introduce the USG role and the UCG to the Mayor UCG trying to coordinate all partners so the Mayor's office has one POC for water response information.
	1/29/2016	MDHHS	Medical Services	8a, 15a, 20	3, 4	a The removal of lead hazards, permanent enclosure or encapsulation of lead based paint, replacement of surfaces or fixtures, removal or covering of soil lead hazards, and all post-abatement clearance testing activities		L		X						2/3/16-(HSTF)-Existing HUD Office of Lead Hazard Control and Healthy Homes grant to MI targets $325K to Healthy Homes. Per HUD, funds can be used for lead hazards in water in homes. Abatement of lead based paint also eligible for HUD funding
	1/29/2016	MDHHS	Medical Services	8a, 15a, 20	3, 4	b DSHPs are health programs funded by the state, many of which provide safety-net health care services for low income or uninsured individuals such as adult day care, outpatient substance abuse treatment or care for the mentally ill who are not eligible for Medicaid CMS has approved DSHP for use in states (e.g. OR), although not for lead abatement.		L		X						2/4/16-(HSTF)-HRSA advised that its grantee, Hamilton Community Health Network, which serves homeless individuals and families, plans to use existing funding to conduct workshops on (1) detecting behavioral health issues that may occur as a result of lead exposure, (2) healthy eating habits and educating participants about food with high levels of lead content, (3) and awareness of potential physical disabilities caused by lead exposure in children, HRSA advised that its grantee, Genesee County Health Start, which works to reduce disparities in perinatal health among African American women and children from birth to two years, is planning to hire an additional health educator to address community public health needs related to lead.
19	1/29/2016	MDHHS	Childrens's Services	14a, 15a	3, 4	Discretionary emergency funds aside from our regular flex fund sources (CP/CP, SFSC, etc.) for the following items	High-1	M		X						2/5/16-(HSTF)-• 02/05 – Met with Genesee County Community Action Resource Department (CARD), an ACF grantee, to discuss human services needs in Flint and Greater Flint; Advised GC CARD of CMS' Accountable Health Communities (AHC) Model, a new 2016 program targeted at addressing health-related social needs, including, housing instability, food insecurity, utility needs, interpersonal violence, and transportation needs beyond medical transport. HUD advised that Community Development Block Grant Funds (CDBG) cannot be used for these items/services.
	1/29/2016	MDHHS	Childrens's Services	14a, 15a	3, 4	o Gas card clients need to have access to resources and attend medical appointments for follow up specific to lead exposure		M		X						2/2/16-(HSTF)-ACF affirmed that the state can use Temporary Assistance for Needy Families (TANF) Non-Recurrent, Short Term funds to provide these services to respond to this emergency. State has been informed and can take action if desired.
	1/29/2016	MDHHS	Childrens's Services	14a, 15a	3, 4	o Food cards-clients are using BRIDGE cards for water, leaving little left for food		M		X						2/2/16-(OASH email)-ACF has shared guidance with the Michigan DHHS regarding using TANF non-recurrent, short-term benefits (45 CFR 260 31(b)(1)) to help eligible families deal with a specific crisis situation. These could include short term (i e , 4 months or less) payments or vouchers to low-income families with children for purchase of bottled water; and gas cards/bus passes for these families. Michigan has flexibility under the TANF program to offer a wider range of services or benefits in response to the situation in Flint. If Michigan does decide to offer new benefits or services not covered by its current TANF Plan, or decides to change the eligibility criteria for any benefits or services, it may do so by submitting a TANF Plan amendment.

	1/29/2016	MDHHS	Childrens's Services	14a, 15a	3, 4	○ Bus passes-same purpose/intent as above		M		X						2/3/16-(State Halth Review)- State Health LNO believes this is educational issue for residents - BRIDGE cards are not needs for water (it's free) - crossover to ESF# 15 and education
20	1/29/2016	MDHHS	Childrens's Services	14a, 18	3, 4	Increase match temporarily with Title IV-E funds to support five additional staff for Child Welfare and Cash District offices to track, monitor and follow up with clients	High-2	L		X		X				2/3/16-(State Health Review)-Funding issue- State is asking for match funds, MDDHS action for a formal request
25	1/29/2016	MDHHS	Childrens's Services	14a, 18	3, 4	Grant a limited term administrative rate increase to primary Placement Agency Foster Care (PAFC) contracts.	Low-4	L		X		X				2/3/16-(State Health Review)-Funding issue- State is asking for match funds, MDDHS action for a formal request
	Received and/or prioritization completed		MDHHS HIGHEST PRIORITY (all active / in progress)													
			MDHHS CUMULATIVE LIST (all active / in progress or being monitored)													
			COMPLETED / CLOSED													
15	1/29/2016	MDHHS	Data and Surveillance			~~Technical assistance to develop a methodology to assess past lead exposure.~~ MOVED to #18- Mtg with State and CDC/ATSDR	~~Medium-1~~								~~Brown, Mary Jean (CDC)~~	~~1/30/16-(11)~~

Flint Water Response Team Plan
Sunday, 02.07.16 Final

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher	Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		2/7/16	8:00 am
ARC ERV	10	10		2/7/16	8:00 am
ARC ERV Driver	10	10		2/7/16	8:00 am
Team Member	20-40	20-40		2/7/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		2/7/16	8:00 am
Team Transport Vehicle Driver	10	10		2/7/16	8:00 am
iPads	10	10		2/7/16	8:00 am
Hand Warmers	40	40		2/7/16	8:00 am
Distribution Kit	1000	1000		2/7/16	8:00 am

Execution:

Key Locations

ARC	ARC	
Warehouse		

Team Assignment – Target Areas
Team Priority – Continue to work on the "Zero Contact Address List" of 959 Addresses.
Secondary Priority – New List of "Follow-up Visits Contact Address List" of 1,310 Addresses.

Map Support
Maps have been provided to coordinate with the new Follow-up Visits Contact Address List.

Sample Script for Team Members:
We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC.
2. For apartment complexes, use the paper forms to record the contacts you make with residents. For reporting purposes, please report the names of the complex and the number of units per complex that the teams made contact with to the SEOC.

DRAFT: SUBJECT TO CHANGE (v. 02.05.2016)

Lead Poisoning in Pets
Frequently Asked Questions

1) **Can my pet get lead poisoning?**
   - Dogs, cats and birds are all pets known to be at risk for lead poisoning. Young animals and animals with pre-existing stomach and intestinal complications are at an increased risk for lead poisoning.

Comment [FR(1]: What about aquatic animals, pocket pets, and poultry?

2) **What are sources of lead exposure for pets?**
   - Like people, two common ways pets can be exposed to lead are from:
     - Drinking lead-contaminated water, usually caused by the wearing away of metal pipes
     - Breathing in dust created by chipped lead-based paint used in most homes built before 1978
3) **What are the symptoms of lead poisoning in pets?**
   - Signs of lead poisoning can vary by the type of animal and can appear similar to other illnesses. Know the symptoms of lead poisoning in your pets:
     - Dogs with lead poisoning can have intestinal problems including poor appetite, vomiting, diarrhea, or constipation. Other symptoms include jaw chattering, drooling, muscle spasms, convulsions or shaking, worried or stressed behavior and uncontrollable barking.
     - Cats experience similar intestinal problems to dogs, and are also more likely to have seizures.
     - Birds with lead poisoning may experience poor appetite, problems with muscle control, and wing and leg weakness.
4) **How do I prevent lead poisoning in my pet?**
   - In the event of lead ~~poisoning from~~ contaminated water, ~~only~~ use filtered or bottled water for your pets' drinking water.
     - Also, avoid bathing your pets with ~~lead contaminated~~unfiltered water to prevent pets from licking water ~~or absorbing it through their skin.~~
   - If lead paint is a concern, decrease the risk of lead poisoning by maintaining painted surfaces like walls and windowsills to prevent older lead paint from chipping and creating dust.
5) **What should I do if I suspect my pet has lead poisoning?**
   - Treatment options may be available for certain types of pets with a recent lead exposure; however, prevention of lead exposure is the best way to keep your pets safe.
   - **Contact your pet's veterinarian immediately** if your pet has consumed lead contaminated water
   - If unable to reach your veterinarian, you can also contact the **ASPCA Poison Control Center** which is available 24 hours a day, 7 days a week by dialing **(888) 426-4435**

Hand Warmers	40	40		2/6/16	8:00 am
Distribution Kit	1000	1000		2/6/16	8:00 am

Execution:

Key Locations

ARC	ARC	
Warehouse		

Team Assignment – Target Areas
Team Priority – Continue to work on the "Zero Contact Address List" of 959 Addresses.

Map Support
The Apartment List from 2/2/16 was completed today. It appears once all entries are completed, some of the apartment addresses may need to be re-visited. Additional maps showing the 959 addresses with Zero Contacts made have been provided. ARC will continue to work on these sites until completed. The maps and addresses will be included with this plan and take NOTE that the Excel Address List has been updated since being sent out last night to include Site Numbers for each address as well as the franchised addresses.

Sample Script for Team Members:
We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC.
2. For apartment complexes, use the paper forms to record the contacts you make with residents. For reporting purposes, please report the names of the complex and the number of units per complex that the teams made contact with to the SEOC.

*Included on this "Zero Visits Listing"; however, Neighborhood Canvas Tracking Sheets have data for them dated 1/23/16

MDARD Staff: Code all time (including travel) in DCDS to: **activity code 7430 (AG1)**

Enforcement Steps to be taken once establishments have received the mailing:

Assignments will be issued to specific staff for sampling. Assigned staff should conduct targeted evaluations against requirements on the sheet, when not pulling water samples. -Staff should prioritize establishment evaluations based on assessment of risk.- MDARD inspectors: write MDARD establishment evaluations and food service evaluations on a FI-101 template.- Send copies to your Direct ICS supervisor.

Establishments found not in compliance with requirements sheet:

- ***Cite 5-101.11 (A). Unapproved water source. (Priority Violation)**

Your establishment has been found not meeting the "Requirements for Licensed Food Establishments Using City of Flint Water" document dated January 13, 2016, due to the following observations:

(LIST) Examples:

- Establishment does not:
  - Have a safe water lead test.
  - Have approved water filters in required locations.
  - Flush water lines as required.
  - Use bagged ice in drinking water.
  - Use cold water as required.

The Director of the Michigan Department of Agriculture and Rural Development (MDARD) has determined, based on the public health emergency issued for the City of Flint by the Mayor of Flint and ~~the~~ Governor Snyder, that the Flint municipal water supply may cause unacceptable levels of lead to leach into the water while in contact with water service lines between the water plant and your licensed food establishment.

Your establishment is required to immediately comply with MDARD's "Requirements for Licensed Food Establishments Using City of Flint Water" dated January 13, 2016.

Following the initial citation, field staff are to:

- Conduct a follow-up evaluation within 10 days.
- ~~And c~~Collect an "In-use" sample (see details on page 2).
- If the "In-use" sample results are 1.0 ppb or higher, **and/or** still not in compliance with requirements, write a special report documenting evaluation results, sample results and establishment details and submit to Incident Commander for enforcement review. When enforcement review shows that enforcement is warranted:
  - **Cite MFL 289.5101, seize the water supply for suspected adulteration** and use of water for cooking or drinking is forbidden. Also, conduct another follow-up evaluation within 10 days. Allow seized water supply to be used for dishwashing, handwashing and toilets, but not for cooking or drinking.

Example citation language for seizure (use a seizure template and include the following language):

- *Due to suspected adulteration of the municipal water supply with lead, water is not to be used for drinking, ice, processing or cooking. -Water may be used for dishwashing, sanitizing, handwashing, toilets and general cleaning.

If the seizure is being violated, begin further enforcement/court action after written approval is issued by the Incident Commander.

For firms found to have lead detected in their initial water sample results, these are the next steps:

Recommended action is based upon lead levels detected from the initial water samples submitted to the laboratory.

Note: Any samples are actionable if reported at 1.0 ppb or higher. -Verification and resampling are the first actionable step. -The resampling of the water will be an "in-use" sample.

- "In-use" samples will be collected:
  - At the faucet in use by the firm;
  - After any actions taken by the firm to meet the requirements outlined above (installation of a filter or a water system flush); and
  - Are to be representative of the firm's ongoing activities when cooking with or drinking the water.
- If the firm has not yet used water for cooking or drinking, allow them to first conduct the actions they take to meet the requirements, then sample the water.
- On the test request/sample form:
  - In the "Sample Purpose" field – enter "in use" or "first draw" as appropriate.
  - In the "Sample Point" field - specify the fixture or equipment that the sample was collected from.

Action Requirements for water test results:

Verification testing of in-use/operational water is required for all samples with detectable levels of lead reported.

If a firm has an initial sample result that has detectable lead they must do one of the following:

1. Either have the appropriate filters in place for all required activities;
   OR
2. Are flushing their water lines according to established procedures prior to engaging in any required activities;
   OR
3. Discontinue any cooking or drinking activities (including the use of ice manufactured on site).

If a firm is attempting to comply and has instituted the one or more of the three options identified above do not charge the $60 reinspection fee for the second follow up.

If a firm is not cooperating the reinspection fee of $60 will be invoiced, and as appropriate further compliance and enforcement actions will follow.

Food establishments that are not following requirements as stated in the "Requirements for Licensed Food Establishments Using City of Flint Water" and found to have initial test results with detectable levels of lead will have the appropriate enforcement actions taken as described above, which may include seizure or further enforcement actions.

MDARD Staff: Code all time (including travel) in DCDS to: **activity code 7430 (AG1)**

Enforcement Steps to be taken once establishments have received the mailing:

Assignments will be issued to specific staff for sampling. Assigned staff should conduct targeted evaluations against requirements on the sheet, when not pulling water samples. Staff should prioritize establishment evaluations based on assessment of risk. MDARD inspectors: write MDARD establishment evaluations and food service evaluations on a FI-101 template. Send copies to your Direct ICS supervisor.

Establishments found not in compliance with requirements sheet:

- ***Cite 5-101.11 (A). Unapproved water source. (Priority Violation)**

Your establishment has been found not meeting the "Requirements for Licensed Food Establishments Using City of Flint Water" document dated January 13, 2016, due to the following observations:

(LIST) Examples:

- Establishment does not:
  - Have a safe water lead test.
  - Have approved water filters in required locations.
  - Flush water lines as required.
  - Use bagged ice in drinking water.
  - Use cold water as required.

The Director of the Michigan Department of Agriculture and Rural Development (MDARD) has determined, based on the public health emergency issued for the City of Flint by the Mayor of Flint and the Governor Snyder, that the Flint municipal water supply may cause unacceptable levels of lead to leach into the water while in contact with water service lines between the water plant and your licensed food establishment.

Your establishment is required to immediately comply with MDARD's "Requirements for Licensed Food Establishments Using City of Flint Water" dated January 13, 2016.

Following the initial citation, field staff are to:

- Conduct a follow-up evaluation within 10 days.
- And collect an "In-use" sample (see details on page 2).
- If the "In-use" sample results are 1.0 ppb or higher, **and/or** still not in compliance with requirements, write a special report documenting evaluation results, sample results and establishment details and submit to Incident Commander for enforcement review. When enforcement review shows that enforcement is warranted:
  - **Cite MFL 289.5101, seize the water supply for suspected adulteration** and use of water for cooking or drinking is forbidden. Also, conduct another follow-up evaluation within 10 days. Allow seized water supply to be used for dishwashing, handwashing and toilets, but not for cooking or drinking.

Example citation language for seizure (use a seizure template and include the following language):

- *Due to suspected adulteration of the municipal water supply with lead, water is not to be used for drinking, ice, processing or cooking. Water may be used for dishwashing, sanitizing, handwashing, toilets and general cleaning.

If the seizure is being violated, begin further enforcement/court action after written approval is issued by the Incident Commander.

For firms found to have lead detected in their initial water sample results, these are the next steps:

Recommended action is based upon lead levels detected from the initial water samples submitted to the laboratory.

Note: Any samples are actionable if reported at 1.0 ppb or higher. Verification and resampling are the first actionable step. The resampling of the water will be an "in-use" sample.

- "In-use" samples will be collected:
  - At the faucet in use by the firm,
  - After any actions taken by the firm to meet the requirements outlined above (installation of a filter or a water system flush), and
  - Are to be representative of the firm's ongoing activities when cooking with or drinking the water.
- If the firm has not yet used water for cooking or drinking, allow them to first conduct the actions they take to meet the requirements, then sample the water.
- On the test request/sample form:
  - In the "Sample Purpose" field – enter "in use" or "first draw" as appropriate.
  - In the "Sample Point" field - specify the fixture or equipment that the sample was collected from.

Action Requirements for water test results:

Verification testing of in use/operational water is required for all samples with detectable levels of lead reported.

If a firm has an initial sample result that has detectable lead they must do one of the following:

1. Either have the appropriate filters in place for all required activities,
   OR
2. Are flushing their water lines according to established procedures prior to engaging in any required activities
   OR
3. Discontinue any cooking or drinking activities (including the use of ice manufactured on site).

If a firm is attempting to comply and has instituted the one or more of the three options identified above do not charge the $60 reinspection fee for the second follow up.

If a firm is not cooperating the reinspection fee of $60 will be invoiced, and as appropriate further compliance and enforcement actions will follow.

Food establishments that are not following requirements as stated in the "Requirements for Licensed Food Establishments Using City of Flint Water" and found to have initial test results with detectable levels of lead will have the appropriate enforcement actions taken as described above, which may include seizure or further enforcement actions.

Flint Water Response Situation Report - As Of: February 4, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- *Ensure responder and public safety*
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Verbally notify firms with >Not Detect results either via telephone or site visit
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Table 1: Activity Report for the Operational Period: February 4, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Assessments Completed				
High risk	0	4	19	19
Medium	1	50	146*	153**
Other	4	22	210	
Total	5	76	375	172
Follow Up Assessments/Verification Sampling Completed (Due to non-compliance or high lead found in initial sample results)				
High risk	5	8	8	
Medium	8	19	19	
Other	5	13	13	
Total	18	40	40	
Compliance Rate from Survey Monkey 77.05% (235 FIRMS)				
Water Sampling Activity				
Scheduled	2	4	124	
Collected	29	80	154	
Test Results (DETAILED LEAD CONCENTRATIONS IN TABLE #2)				
Elevated (>Not Detect)	0	35	44	
Total Tested	1	38	88	

*A few medium risk firms are in the process of having initial assessments completed. This reflects numbers as of close of business on 2/2.

**One of the medium risk firm was deleted as it was also included in the High risk firm count. Two schools in the Flint Community School system were deleted today because they have been assessed by MDEQ/MLARA. Additional firms found to be out of business will be deleted from the total as they are identified.

TABLE 2: WATER RESULT SUMMARY TABLE

Risk Zone and Sample Type	Water Test Results				
	> 15 ppb	4 - 15 ppb	1 – 3.99 ppb	Not detected (< 1ppb)	Total Results Received To Date
Initial "First Draw" Samples					
High Risk Establishments "First Draw" Samples	1 (9.1%)	4 (36.4%)	4 (36.4%)	2 (18.2%)	11 (100%)
Medium Risk Establishments "First Draw" Samples	3 (14.4%)	1 (4.7%)	8 (39%)	9 (42.6%)	21 (100%)
Other Risk Establishments "First Draw" Samples	2 (6.2%)	4 (12.5%)	7 (21.8%)	19 (59%)	32 (100%)
First Draw Subtotals	6 (9.4%)	9 (14%)	19 (29.7%)	30 (46.9%)	64 (100%)

"What's being done to reach out to urban agriculture including cottage food makers?" Meeting

February 2, 2016
1:00 pm
Constitution Hall-4th Floor South
John McCauley Conference Room

Attendees: Laura Doud, Elaine Brown, John Tilden, Lori Yelton, Jeanne Hausler, Andrea Stay, Terry McLean, Erin Caudell, Michelle Napier-Dunnings, Angela Warren, Brian Schorr, Diane Golzynski, Albert Jones, Joe Woodruff, Samantha Brennen

Purpose: Link players and outline a plan/timeline going forward to address the question: "What's being done to reach out to urban agriculture including cottage food makers?"

Each participant described efforts to assist urban agriculture and/or cottage food makers. Since the State of Michigan does not have a list of urban Ag/gardens or cottage food makers, local partners are critical to reaching gardeners and cottage food makers with information about water and food safety for producing local food. For examples, Michigan Food and Farming Systems (MIFFS) has partnered with other Flint based organization to establish a women's farm and Ag Network as well as collaborating on grant opportunities, Food and Dairy Division is working on draft information sheet for cottage food producers that can be shared with MIFFS, Michigan Farmers Market Association MIFMA, Edible Flint and other local networks. Key local food organizations working on local food production and access include: Women in Ag program, Regional Food Systems Navigator, Edible Flint, FoodCorps service program, and Master gardeners program. The local MSU Extension team is actively involved in these activities. Albert Jones discussed USDA demonstration projects in the area and NRCS programs to promote high tunnel initiatives. There will be more federal funds headed towards this area over the next 5-10 days. A state agencies level Nutrition Team is planning based on what is being done, and what could be done in the future to address nutrition needs. It is working to address questions like: Where are the grocery stores and food access sites? Is there local access to high quality?

Edible Flint has over 300 gardens, both community and individual gardens, identified in its network and recently set 3 priorities for response to the Flint water crisis question: How best can we support Flint gardeners?

1. Lead test soil for every garden (retest)
2. Identify and obtain Hose filters for garden irrigation
3. Expand and support additional gardeners, especially households with children

Several websites were identified as sources of information for Flint residents:

www.michigan.gov/flintwater
www.helpforflint.com/
http://msue.anr.msu.edu/program/info/lead

What are next steps?

- MSU Extension is working on multiple bulletins for release in early spring.
- For soil sampling, Edible Flint is getting ready for spring sampling. In the past they only had funds available for new gardens that want to expand. They work with Univ. of Massachusetts for nutrient and metals test for $21/sample.
- Edible Flint has a proposal developed for additional future program needs.
- Existing local resources are well positioned to help Flint gardeners both in the emergency short term and transitioning to long term.
- Other partners' role is assisting local partners that have a demonstrated ability to support urban agriculture.
- Assisting Flint urban Ag/Gardens is an opportunity to tie in the concepts of Food safety when talking about Lead risks.
- Link mapping of high lead water zone areas compared to garden locations to help target local *outreach efforts.*

Action Steps

- Jeanne can help link Edible Flint up with Red Cross and 211 contacts to share the opportunity to donate and get involved.
- Partners with good stories to share about urban ag/gardening can send the story to JICmanager@michigan.gov for assistance getting the information out.
- Identify strategies to link key decision makers with partners that can do the work locally.

MSP-EOC-MDARD

Subject: FW: Flint water in schools - proposed teleconference for 3pm on Friday
Importance: High

Please read the following. Who can you recommend to participate in the suggested phone conference tomorrow?

From: Hainstock, Lisa (MDARD)
Sent: Thursday, February 04, 2016 3:53 PM
To: Golzynski, Diane (MDE); Priest, Thomas (MDE); MSP-EOC-MDARD; Yelton, Lori (MDARD); MSP-EOC-MDARD; Tederington, Thomas (MDARD)
Subject: Flint water in schools - proposed teleconference for 3pm on Friday

Hello

I am trying to schedule a teleconference between MDARD, the Genesee County Health Department, MDE, and someone from LARA who is working with DEQ (NEED DEQ/LARA NAMES AND CONTACT INFO ASAP FROM SOMEONE) on water investigation at Flint schools for tomorrow at 3pm to discuss the following:

1) Which agency is responsible for water sampling at which Flint school (I understand that LARA is working with DEQ on conducting water sampling at the schools in the attached spreadsheet – MDARD needs to verify so we can drop them from our list, if needed;

2) Getting a list of private/parochial/charter schools NOT being sampled by LARA/DEQ, so MDARD can conduct sampling. (the attached list is confusing, because it appears that there are some parochial, non-public schools, ie St. Paul Lutheran, St. John Vianney School are ON this list being done by LARA.)

3) MDARD is NOT conducting sampling like DEQ/LARA sampling (we only pull one sample from the food service area). Should ALL schools be sampled by DEQ/LARA because it is more comprehensive?

I need to hear back from everyone right away so I can send out the appointment and get us coordinating this issue before it gets more complicated.

Flint Water Response Team Plan
Friday, 02.05.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher	989-326-1853	Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	Type: Type V Quantity: 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		2/5/16	8:00 am
ARC ERV	10	10		2/5/16	8:00 am
ARC ERV Driver	10	10		2/5/16	8:00 am
Team Member	20-40	20-40		2/5/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		2/5/16	8:00 am
Team Transport Vehicle Driver	10	10		2/5/16	8:00 am
iPads	10	10		2/5/16	8:00 am
Hand Warmers	40	40		2/5/16	8:00 am
Distribution Kit	1000	1000		2/5/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas
Team Priority – Apartment List from 2/2/16 and the List of Addresses with Zero Contacts

Map Support

The Apartment List from 2/2/16 remains the priority until completed. Additional maps showing the addresses with Zero Contacts will be provided with this Plan.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC.
2. For apartment complexes, use the paper forms to record the contacts you make with residents. For reporting purposes, please report the names of the complex and the number of units per complex that the teams made contact with to the SEOC.

BRIEFING

February 4, 2016

TO: Lt. Governor Brian Calley
Jamie Clover Adams, director, Michigan Department of Agriculture and Rural Development
George Wilkinson, Flint & Genesee Chamber of Commerce
Mark Valacak, Health Officer, Genesee County Health Department
Anthony Pavone, Environmental Health Supervisor, Genesee County Health Department
Tom Tederington, MDARD East Region Food Supervisor

FROM: Jennifer Holton, Communications Director, MDARD

RE: **Flint Food Establishment Compliance – Flint Water Response Media Event, 9 am, Friday, February 5, 2016, Blackstone's Pub and Grill, Flint**

Background
The purpose of this event is to demonstrate what inspectors look for during these assessments, to highlight the partnership among county and state food regulators and Flint's restaurants, food processors and others to provide safe food for Flint residents, and to provide support for area food businesses who may be feeling financial effects due to the Flint water emergency.

Governor Snyder declared a state of emergency in Flint on January 5, 2016. With that declaration, MDARD determined Flint municipal water is not considered an approved source for food establishments at this time, unless certain precautions are taken to reduce the risk of food safety issues. Under the Michigan Food Law and Michigan Modified Food Code, food service facilities, food processors and retail food establishments are required to use water from an approved source. Until the water is deemed safe, all food licensees in Flint affected by the Flint water emergency must take required precautions to reduce the risk of food safety issues. These precautions include having the water tested by an accredited laboratory to prove it is safe to use; installing approved water filters, as needed; flushing unfiltered faucets and hard-plumbed equipment on a daily basis; or using commercially bottled water for all cooking, cleaning/washing and drinking.

MDARD has initiated assessments of all food establishments in Flint to make sure they understand the new mandatory requirements and are taking the required precautions to reduce risk of food safety issues. Inspectors are conducting risk-based compliance/enforcement assessments and verifing adherence to current MDARD water source requirements. MDARD is assisting the Genesee County Health Department with water sampling and inspections, to allow the health department to focus its efforts on checking other priority facilities in its jurisdiction, including childcare facilities.

Media Event Details:

Date: **Friday, February 5, 2016**

Time: **9:00 a.m. (participants should plan to arrive no later than 8:45 am)**

Location: **Blackstone's Pub and Grill, 531 S. Saginaw St., Flint, MI 48502**
810-234-9011
Parking is available at the Flint Farmers Market located a few blocks behind Blackstone's. There is an entrance to the restaurant at the rear of the building nearest the farmers market.

Setting:
The press conference will take place in the "DJ" space at the back of the facility near the big "Genesee Towers Public Parking" sign. Speakers should wear business attire. We will not have a podium or sound system. The restaurant will provide coffee and pastries. All speakers and a representative from Blackstone's should stand to the front facing guests and media during the press conference.

Blackstone's has recently updated its water filtration system to an NSF 53 system that filters lead. The filters are connected by hoses to their entire systems for water, soda, ice and the bar, and an alarm sounds when the filter needs to be changed. Filtered water is used for all cooking and drinking water.

Following the brief press conference and a brief period for questions from the media, media members will be invited to tour the kitchen with Tom Tederington, Anthony Pavone and restaurant staff for a visual explanation of what inspectors look for to verify compliance with current water requirements.

Those not participating in the kitchen tour may be asked for one-on-one interviews.

Agenda:

Welcome and Introductions	Jamie Clover Adams, director, MDARD (2 min) Jamie will serve as emcee. She will welcome media, speakers and guests and thank Blackstone's for hosting and for providing refreshments. Jamie will then introduce Lt. Governor Calley for remarks.
Remarks	Lt. Governor Calley will talk briefly about the importance of supporting Flint businesses during the Flint Water Response and what MDARD, in partnership with Genesee County Health Department is doing to help food businesses and reduce food safety risk due to water concerns. (5 minutes) Jamie will thank the Lt. Governor and introduce Mark Valacak, Health Officer, Genesee County Health Department.
Remarks	Mark will talk about the role the local health department plays year-round to assure food safety and the partnership with MDARD and local food establishments to address the current water use issues and meet requirements of state and federal food regulations. (3 minutes) Jamie will thank Mark and introduce George Wilkinson, Group Vice President, Flint & Genesee Chamber of Commerce George will talk about the importance of the food businesses to the economic and sense of community of the city and urge people to come to Flint to support the businesses.(3 minutes)

Thank yous, Q & A	Jamie will thank everyone for attending and facilitate questions from the media. (10 minutes)
Kitchen Tour	Following the Q & A, Jamie will introduce Tom Tederington, East Region Food Supervisor, MDARD Food and Dairy Division, for a brief explanation of the current water use requirements, the inspection process, current results and a tour of the kitchen facilities with Anthony Pavone, Environmental Health Supervisor, Genesee County Health Department, and restaurant staff, to demonstrate what inspectors look for during the water assessments.

MSP-EOC-MDARD

From: Deacon, Brad (MDARD)
Sent: Friday, January 29, 2016 12:29 PM
To: Merrill, Debra (MDARD); Fritz, Kay (MDARD); Henderson, Justin (MDARD); Beerbower, Byron (MDARD); Eaton, Abigail (MDARD); Hunt, April (MDARD)
Subject: State EOC coverage next week

Thank you all for getting back on scheduling for the State Emergency Operations Center. It sounds like we need to plan on having a presence here indefinitely.
I'm here today and tomorrow. Kay will be here on Sunday.
We'll plan on Deb being here Monday;
April if you can still do Tu & Wed;
Abby if you can still do Th & Friday;
and we'll figure out next weekend during the week.

Location: Secondary complex - for now go to the far right end of the General Office Bldg - there's a brick archway - the entrance is just beyond that but each day more of the construction work will be done and things will change. There are people to direct, and it sound like by Monday more portions of the building will be complete. For now, the MDARD desk is in the front row, facing back out over the room. If you're in the back of the room looking toward the enormous bank of TVs, it is on the right side, second from the middle (next to the Attorney General's Office desk). At some point (probably this week) all the state agencies will move to where we're going to be; not sure where that is.
When you get here be sure to sign in on the paper forms. In MI-CIMS, sign in as the SEOC rep, and the event is from Oct 2015 - Flint Water.
Each day is a new Activity Log entry, starting with your arrival and ending with departure. In between it's good to keep a high level record of what issues / topics came up. The outlook email should be up; for your own email there's a convoluted way to get to web access; might be easier to bring a laptop/tablet if you have one.
The daily situation report is due by 5pm, that's in the SEOC Daily Situation Report Agency List. When you open that, click edit, and then save yesterday's to archive. Then you'll have to hit edit again to change what's in the red box. That should be high level information only; that gets sent up to the Captain and ultimately the Governor - so please make sure that what's in there is accurate and grammar is correct. We have not had much to report over the weekends but during the week between 4-5 FDD has been providing an update on their sampling. We have not included every piece of that - but new updated numbers of what's sampled, numbers of test results back, numbers of assessments.
(Kay, you will have to do this on Sunday)

The Director likes to know what was said; copy and paste that into an email and send to:
Clover Adams
Wenk
McFarlane
Holton
Blakely
Deacon
Besey
Walker (or whoever is FDD's IC - Slawinski today)
Averill

Frank
Johnson
Elaine Brown
Doud
and I'd include Deb, April and Abby, or anyone else who is going to be out here.

Cold in here today; dress in layers. They're still providing lunch.
Time here - 8-5; there are briefings at 9am and 4pm.

I will be driving to Louisville on Monday, speaking Monday afternoon, then in a conference Tuesday morning and driving back Tuesday afternoon - so there will be hours where email won't get answered but I may be reachable by phone.

Thank you all again

Brad

For immediate release: February 4, 2016

ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632) or JICNews@michigan.gov

Media advisory

Flint & Genesee County Chamber, Genesee County Health Department, and State of Michigan to Host Tour of Restaurant Water Assessment Process

When: 9 a.m., Friday, February 5, 2016

Where: Blackstone's Pub and Grill, 531 S. Saginaw St., Flint, MI 48502

Who: Lt. Governor Brian Calley
Jamie Clover Adams, director, MI Department of Agriculture & Rural Development
George Wilkinson, Group Vice President, Flint & Genesee County Chamber of Commerce
Anthony Pavone, Food Program Manager, Genesee County Health Department
David Lurvey, General Manager, Blackstone's Pub and Grill

What: Media event to highlight food safety measures being taken at Flint area food establishments. Following a short program, media will be given a behind-the-scenes look at how the Michigan Department of Agriculture and Rural Development and the Genesee County Health Department are conducting water assessments at Flint area food establishments.

###

For more information, visit www.mi.gov/flintwater, www.helpforflint.com, or call the United Way at 2-1-1.

Flint Water Response Situation Report - As Of: February 3, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk**- 19 (8-GCHD, 11-FDD), **Medium-Risk**- 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Verbally notify firms with >Not Detect results either via telephone or site visit
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Table 1: Activity Report for the Operational Period: February 3, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Assessments Completed				
High risk	0	4	19	19
Medium	4	49	145*	153**
Other	10	18	206	
Total	14	71	370	172
Follow Up Assessments/Verification Sampling Completed (Due to non-compliance or high lead found in initial sample results)				
High risk	0	3	3	
Medium	3	11	11	
Other	0	8	8	
Total	3	22	22	
Compliance Rate from Survey Monkey 75.61% (217)				
Water Sampling Activity				
Scheduled	0	2	122	
Collected	25	51	125	
Test Results (DETAILED LEAD CONCENTRATIONS IN TABLE #2)				
Elevated (>Not Detect)	14	35	44	
Total Tested	36	37	87	

*A few medium risk firms are in the process of having initial assessments completed. This reflects numbers as of close of business on 2/2.

**One of the medium risk firm was deleted as it was also included in the High risk firm count. Two schools in the Flint Community School system were deleted today because they have been assessed by MDEQ/MLARA. Additional firms found to be out of business will be deleted from the total as they are identified.

TABLE 2: WATER RESULT SUMMARY TABLE

Risk Zone and Sample Type	Water Test Results				
	> 15 ppb	4 - 15 ppb	1 – 3.99 ppb	Not detected (< 1ppb)	Total Results Received To Date
Initial "First Draw" Samples					
High Risk Establishments "First Draw" Samples	1 (9.1%)	4 (36.4%)	4 (36.4%)	2 (18.2%)	11 (100%)
Medium Risk Establishments "First Draw" Samples	3 (14.4%)	1 (4.7%)	8 (39%)	9 (42.6%)	21 (100%)
Other Risk Establishments "First Draw" Samples	2 (6.5%)	4 (12.9%)	7 (22.6%)	18 (58%)	31 (100%)
First Draw Subtotals	4 6.8(%)	7 (11.9%)	19 (32.2%)	29 (49.1%)	59 (100%)
Follow-up "In-Use" Samples					
High Risk Establishments "In-Use" Follow-up Samples	0 (0%)	0 (0%)	0 (0%)	0 (0%)	0 (0%)
Medium Risk Establishments "In-Use" Follow-up Samples	0	0 (0%)	2 (33%)	4 (66%)	6 (100%)
Other Risk Establishments "In-Use" Follow-up Samples	0	0	0	6 (100%)	6 (100%)
In-Use Subtotals	0	0	2 (12.5%)	14 (87.5%)	16 (100%)
Overall Totals	4	7	23	53	87

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority – Apartment List from 2/2/16.

Map Support

No additional maps will be provided today. The Apartment List from 2/2/16 remains the priority.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail, unless specifically directed otherwise by the SEOC.
2. For apartment complexes, use the paper forms to record the contacts you make with residents. For reporting purposes, please report the names of the complex and the number of units per complex that the teams made contact with to the SEOC.

Flint Water Response Situation Report - As Of: February 2, 2016 (Updated 2/3 1100 hours)

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: *See Attached*

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk**- 19 (8-GCHD, 11-FDD), **Medium-Risk**- 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Verbally notify firms with >Not Detect results either via telephone or site visit
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Table 1: Activity Report for the Operational Period: February 2, 2016 (UPDATED 2/3)
RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Assessments Completed				
High risk	4	4	22	19
Medium	39	45	145*	153**
Other	3	8	188	
Follow Up Assessments/Verification Sampling Completed (Due to non-compliance or high lead found in initial sample results)				
High risk	3	3	3	
Medium	2	8	8	
Other	3	8	8	
Water Sampling Activity				
Scheduled	0	2	122	
Collected	25	51	125	
Test Results (DETAILED LEAD CONCENTRATIONS IN TABLE #2)				
Elevated	0	21	30	
Total Tested	0	37	61	

*A few medium risk firms are in the process of having initial assessments completed. This reflects numbers as of close of business on 2/2.

**One of the medium risk firm was deleted as it was also included in the High risk firm count. Two schools in the Flint Community School system were deleted today because they have been assessed by MDEQ/MLARA. Additional firms found to be out of business will be deleted from the total as they are identified.

TABLE 2: WATER RESULT SUMMARY TABLE

Risk Zone and Sample Type	Water Test Results				
	> 15 ppb	**4 - 15 ppb**	**1 – 3.99 ppb**	**Not detected (< 1ppb)**	**Total Results Received To Date**
Initial "First Draw" Samples					
High Risk Establishments "First Draw" Samples	0 (0%)	2 (25%)	4 (50%)	2 (25%)	8 (100%)
Medium Risk Establishments "First Draw" Samples	2 (10%)	1 (5%)	8 (40%)	9 (45%)	20 (100%)
Other Risk Establishments "First Draw" Samples	2 (6.5%)	4 (12.9%)	7 (22.6%)	18 (58.1%)	31 (100%)
First Draw Subtotals	4 (6.8%)	7 (11.9%)	19 (32.2%)	29 (49.1%)	59 (100%)
Follow-up "In-Use" Samples (all results from in-use samples still pending)					
High Risk Establishments "In-Use" Follow-up Samples					
Medium Risk Establishments "In-Use" Follow-up Samples					
Other Risk Establishments "In-Use" Follow-up Samples					
In-Use Subtotals					
Overall Totals	4 (6.8%)	7 (11.9%)	19 (32.2%)	29 (49.1%)	59 (100%)

Flint Water Response Team Plan
Tuesday, 02.03.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher	Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		2/2/16	6:00 pm
ARC ERV	10	10		2/2/16	6:00 pm
ARC ERV Driver	10	10		2/2/16	6:00 pm
Team Member	20-40	20-40		2/2/16	6:00 pm
Team Transport Vehicle for 2-4 Team Members	10	10		2/2/16	6:00 pm
Team Transport Vehicle Driver	10	10		2/2/16	6:00 pm
iPads	10	10		2/2/16	6:00 pm
Hand Warmers	40	40		2/2/16	6:00 pm
Distribution Kit	1000	1000		2/2/16	6:00 pm

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority – Apartment Complexes with 60 Units or less – list attached

Map Support

Map has been provided to provide detailed information on complex locations. Teams will target specific complexes to assure that each door has been knocked on and contact attempt made.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

Flint Water Response Situation Report - As Of: February 2, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

Timeline (Week of)							
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	*Assessments*	*Assessments*				
	Lab Testing	Laboratory *Testing*	Laboratory *Testing*	Laboratory *Testing*	Laboratory *Testing?*		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Activity Report for the Operational Period: February 2, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Facilities Contacted/Informed				
By Weights & Measures Staff	Task Completed		74	74
By FDD Staff	60	71	275	175 (Hi & Med)
Assessments Completed				
High risk	3	3	21	19
Medium	21	27	127**	156***
Other	36	41	221	
Follow Up Assessments/Verification sampling completed (Due to non-compliance or high lead found in initial sample results)				
High risk	2	2	2	
Medium	2	8	8	
Other	0	5	5	
Water Sampling Activity				
Scheduled	0	2	122	
Collected	25	51	125	
Test Results				
Elevated	0	21	30	
Total Tested	0	37	61	

Type of Firm	*Total*	*Total Water Results*	*Results - Not*	*0.01 -*	*>15.00(pp*

	Firms	Rcvd	Detected	14.99(ppb)	b)
MDARD High Risk	11	7	2	5	
LHD High Risk	8	1		1	
MDARD Medium Risk	74	11	4	5	
LHD Medium Risk	81	8	5	3	
MDARD Other Firms	271	20	8	11	
LHD Other Firms	183	14	11	2	
Totals	628	61	30	27	4
Percentages		9.71%	4.78%	4.30%	0.64%

***** All numbers are accurate as of 4:00p on February 2, 2016*****

*One remaining firm will be removed from the high risk list. The firm was visited, but was closed and apparently has limited hours. The firm will be visited during operating hours to confirm the kitchen is still not is use.

**This number is lower than originally reported on 1/29, as a number of the assessments completed were re-classified as "other" after closer analysis. 37 medium risk firms are all part of the Flint Farmers Market and are scheduled to be assessed on 2/2/2016. That leaves 12 additional medium risk firms to visit.

***One of the medium risk firms was also included in the High risk firm count, so total is actually 155.

Flint Water Response Situation Report - As Of: February 2, 2016

Response Strategies:

1. *Notify food establishments of current requirements*
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Activity Report for the Operational Period: February 2, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Facilities Contacted/Informed				
By Weights & Measures Staff	Task Completed		74	74
By FDD Staff	60	71	275	175 (Hi & Med)
Assessments Completed				
High risk	3	3	21	19
Medium	21	27	127**	156***
Other	36	41	221	
Follow Up Assessments/Verification sampling completed (Due to non-compliance or high lead found in initial sample results)				
High risk	2	2	2	
Medium	2	8	8	
Other	0	5	5	
Water Sampling Activity				
Scheduled	0	2	122	
Collected	25	51	125	
Test Results				
Elevated	0	21	30	
Total Tested	0	37	61	

Type of Firm	*Total*	*Total Water Results*	*Results Not*	*0.01*	*>15.00(pp*

	Firms	*Rcvd*	*Detected*	*14.99(ppb)*	*b)*
MDARD High Risk	11	7	2	5	
LHD High Risk	8	1		1	
MDARD Medium Risk	74	11	4	5	
LHD Medium Risk	81	8	5	3	
MDARD Other Firms	271	20	8	11	
LHD Other Firms	183	14	11	2	
Totals	628	61	30	27	4
	Percentages	**9.71%**	**4.78%**	**4.30%**	**0.64%**

***** All numbers are accurate as of 4:00p on February 2, 2016*****

*One remaining firm will be removed from the high risk list. The firm was visited, but was closed and apparently has limited hours. The firm will be visited during operating hours to confirm the kitchen is still not is use.

**This number is lower than originally reported on 1/29, as a number of the assessments completed were re-classified as "other" after closer analysis. 37 medium risk firms are all part of the Flint Farmers Market and are scheduled to be assessed on 2/2/2016. That leaves 12 additional medium risk firms to visit.

***One of the medium risk firms was also included in the High risk firm count, so total is actually 155.

Flint Water Response Situation Report - As Of: February 2, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

Timeline (Week of)							
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

- Identified grocery stores in Flint to work with food access. Spread sheet sent to MDHHS
- Notified food establishments of current requirements
- Offering free water testing to food establishments (LHD and MDARD regulated) on Flint City Water
- Conducting assessment visits to determine compliance with current requirements on a risk basis
- Will conduct enforcement as needed to protect public health
- Assessed risk areas by mapping based on BLL risk areas. Assessing all high and medium risk and some (20%) low risk
- Identifying urban agriculture to be proactive in FAQ's and safety of agriculture
- MDARD Staff working with partners on urban ag/gardening questions. MSU has produces three articles related to irrigation water and garden soils in January 2016. Staff is working to collect data regarding garden locations to compare spatially with water test results and the zones with greatest concern for led in water
- Meeting being set up with commodity foods to assess way industry can help with nutrition efforts. MASS (Michigan Agriculture Surplus Systems) and DUFB (Double up Food Bucks) also include in efforts.

Flint Water Response Team Plan
Tuesday, 02.02.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher		Kristy.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	Type: Type V Quantity: 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		2/2/16	8:00 am
ARC ERV	10	10		2/2/16	8:00 am
ARC ERV Driver	10	10		2/2/16	8:00 am
Team Member	20-40	20-40		2/2/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		2/2/16	8:00 am
Team Transport Vehicle Driver	10	10		2/2/16	8:00 am
iPads	10	10		2/2/16	8:00 am
Hand Warmers	40	40		2/2/16	8:00 am
Distribution Kit	1000	1000		2/2/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority – MSHDA Housing/Apartment List
Priority – City Sections 5, 12, 27, 29, 30
Secondary – City Sections 15, 18, 31

Map Support

Maps will be provided daily to provide detailed information on city sections. Teams will target specific homes not originally reached during the first two rounds of canvassing.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

Summary Date: As of 6 PM February 1, 2016

MDARD Collected "First Draw"

Overview:

- Results received to date are from the first samples MDARD staff collected from licensed food establishments meeting one of two criteria:
    - Those selected for sampling by MDARD staff using risk-based criteria, or
    - Firms that contacted MDARD requesting sampling on a voluntary basis
- Staff intentionally sought out establishments they felt might have increased potential for higher lead levels due to geographic location or infrastructure age
- To help put our data in perspective, results from both MDARD collected samples and DEQ tested residential samples are summarized below:

Table 1: Comparison of initial test results from MDARD collected samples with residential test results

Risk Zone	Water Test Results				
	> 15 ppb	4 - 15 ppb	1 – 3.99 ppb	Not detected (< 1ppb)	Total Results Received To Date
MDARD Collected "First Draw" Samples From Targeted Food Establishments	3 (6%)	7 (15%)	20 (43%)	17 (36%)	47
Residential Samples*	307 (6%)	777 (16%)	1314 (27%)	2567 (51%)	4925

* Source: http://www.michigan.gov/flintwater In the Home - Jan 30 Report Spreadsheet – Residential

- Initial impressions - these "first draw" water lead test results suggest:
    - There is significant variability within the current High, Medium, and Other risk categories. We may want to evaluate how we can refine these categories – possibly in cooperation with other response partner agencies (see attached summary for more details by zone).
    - A substantial minority of samples tested contain lead levels in lowest but still detectable level range (1-3.99 ppb). It may be helpful to better define the potential public health risk associated with lower detectable levels of lead exposure in commercial food establishments.

Summary Date: As of 6 PM February 1, 2016

I. Water Testing Results for Targeted Food Establishments by Zone

a. Designated High Risk Zone - 8 sample results received with 2 non-detects (25% of results for this zone)

All Samples in This Zone		Samples Where Lead Was Detected

Flint Water Response Situation Report - As Of: February 1, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Activity Report for the Operational Period: February 1, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal

3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. *Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling*

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	*Laboratory Testing*	*Laboratory Testing*	*Laboratory Testing*	*Laboratory Testing?*		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- *Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.*
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Activity Report for the Operational Period: February 1, 2016
RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Facilities Contacted/Informed				
By Weights & Measures Staff	Task Completed	0	74	74

By FDD Staff	11	11	205	175 (hi &med risk)
Assessment In-Compliance Rate 70.1% (136 firms)				
Initial Assessments Completed				
High risk	0	0	18	19
Medium	6	6	105**	156***
Other	5	5	80	
Follow up assessments/Verification sampling completed (due to non-compliance or high lead found in initial sample results)				
High Risk				
Medium Risk	6	6	8	
Other	5	5	0	
Water Sampling Activity				
Scheduled			120	
Collected	10	10	84	
Test Results				
Elevated (>Not Detect)	21	21	30	
Total tested	37	37	61	

*One remaining firm will be removed from the high risk list. The firm was visited, but was closed and apparently has limited hours. The firm will be visited during operating hours to confirm the kitchen is still not is use.

**This number is lower than originally reported on 1/29, as a number of the assessments completed were re-classified as "other" after closer analysis. 37 medium risk firms are all part of the Flint Farmers Market and are scheduled to be assessed 2/2/2016. That leaves 12 additional medium risk firms to visit.

***One of the medium risk firms was also included in the High risk firm count, so total actually 155

Conference Call with Partners Regarding Response to Flint Water Issue

Dial and enter pass code:

January 29, 2016
3:00 PM

AGENDA

1. Welcome and introductions – Dr. James Averill
2. Call purpose, format and agenda review - Dr. Nancy Frank
3. MDARD overview of activities in Flint related to animals – Dr. Nancy Frank
   a. Lead toxicity is a reportable disease
   b. Emergency has been declared - One Health issue
   c. Livestock
   d. Contacting veterinarians in Genesee County
   e. Work with Genesee County Animal Control to identify animal facilities, kennels, licensed dogs
   f. Current messaging
   g. Based on lead toxicity being a reportable disease, plans to respond to suspect and reported cases
4. Comments from Genesee County Animal Control – Paul Wallace
5. Comments from Michigan State University College of Veterinary Medicine – Dr. Mike Chaddock
6. Comments from MSU Diagnostic Center for Population and Animal Health – Dr. John Buchweitz
7. Comments from State Public Health Veterinarian – Dr. Mary Grace Stobierski
8. Comments from Dr. Cathy Anderson – shelter veterinarian and member, Michigan Veterinary Medical Association
9. Comments from Humane Society of the United States – Jill Fritz
10. Comments from ASPCA – Dick Green
11. Comments from Humane Society of Genesee County – Lin Holmes
12. Wrap up

ESD Staff has been working with several local entities regarding urban ag/gardening questions related to the Flint Water issue. These groups include Genesee County MSU Extension, Edible Flint (a network with over 250 community and private gardens and hoop houses), Michigan Food and Farming Systems (MIFFS) with Women in Ag project in Flint, a U of M Flint researcher doing urban dessert research, and Genesee Conservation District. Each has a role in the Flint community from gardening assistance and resources to hoop houses to understanding the food dessert and seeking innovative ways to address Flint Residents' access to healthy Food.

ESD staff has scheduled a meeting/conference call Feb. 2nd with these groups and other agency staff to better understand how we can coordinate efforts. For example MSU Extension has produced three (3) articles related to irrigation water and garden soils in January 2016. Staff is working to collect accurate data regarding the garden locations to compare spatially with water test results and the zones of greatest concern for lead in the water maps.

On letterhead

Date

Name of Firm
Address of firm
City State Zip

License #

Dear Madam or Sir,

The Michigan Department of Agriculture and Rural Development Food and Dairy Division (MDARD FDD) staff recently collected a water sample from your firm. Please find enclosed the results of the analysis of that sample.

If your sample results are reported as "Not Detectable", you may use your water as appropriate for your facility.

If you sample results have lead reported you will have been contacted by MDARD FDD via phone to discuss the results. Additionally a MDARD FDD staff will visit your facility to complete an assessment of your water handling procedures which may include additional sampling and related activities. **Please continue to follow the requirements outlined in the enclosure**.

For additional questions please call 1-800-292-3939, leaving your name and number and as soon as possible you will be contacted by a MDARD FDD representative.

Sincerely

Sandra Walker
Food Section Manager

PDF Requirements for Food Establishments using Flint Water

DRAFT 1/28/16
Flint Water Response at Food Establishments

Background

- Governor Snyder declared a state of emergency in Flint on ####. With that declaration, MDARD determined Flint municipal water is not considered an approved source for food establishments at this time, unless certain precautions are taken to reduce the risk of food safety issues.

- The Michigan Department of Agriculture and Rural Development's top priority is to assure a safe food supply in our state.

- MDARD licenses and inspects food processing facilities and retail food establishments (grocery stores, convenience stores, etc.) in our state. Inspection of food service establishments like restaurants, school and hospital cafeterias, daycare facilities, etc., is the responsibility of local health departments, with oversight from MDARD.

- Under the Michigan Food Law and Michigan Modified Food Code, food service facilities, food processors and retail food establishments are required to use water from an approved source.

Talking Points

- In October, 2015, MDARD Food and Dairy Division sent a letter to all food establishments in Flint recommending they take certain precautions to assure the safety of the water supply being used in their businesses. The letter included recommendations for having their water tested, installing filtration systems and flushing water systems before use.

- With the Governor's declaration of a state emergency in ###, these recommendations became mandatory. On January 14, 2016, MDARD sent a letter to all food licensees in Flint affected by the Flint water emergency to inform them of the current water source requirements and encouraging them to schedule an appointment with MDARD to have water samples collected for testing.

- The department also initiated inspections of all food establishments in Flint to make sure they understood the new mandatory requirements and were taking the required precautions to reduce risk of food safety issues.

- These precautions include having the water tested by an accredited laboratory to prove it is safe to use; installing approved water filters, as needed; flushing unfiltered faucets and hard-plumbed equipment on a daily basis; or using commercially bottled water for all cooking, cleaning/washing and drinking.

- MDARD has mobilized 14 food inspectors from the East Region and Southeast Region, working full-time to conduct risk-based compliance/enforcement assessments and verify adherence to current MDARD water source requirements at all licensed food establishments on the City of Flint water supply.

- MDARD inspectors are assisting the Genesee County Health Department in conducting sampling and inspections, which has allowed the health department to focus its efforts on checking other priority facilities in its jurisdiction, including childcare facilities.

- MDARD has ranked all Flint food establishments based on risk, using a City of Flint map showing where higher levels of lead have been found. The initial assessments have focused on visiting all high-risk facilities and those facilities who have contacted MDARD to request water sample collection and testing.

- As of January 27, 120 facilities out of the 598 licensed facilities in the Flint area have been determined to be in compliance with the current water use requirements for food businesses. MDARD expects to have initial assessments of all 19 high-risk and 156 medium-risk facilities done by January 29. Some of these facilities may not be using City of Flint water; this is being determined during inspector visits.

- Food businesses can schedule appointments with MDARD inspectors for water tests through the department's call center at 800-292-3939 during normal business hours, Monday through Friday.

- Water samples for lead must be collected from the first draw of water after the water has not been used for 6 hours. To accommodate businesses who start operation early in the morning, MDARD inspectors are available for appointments between 5 am and 4 pm each day.

- The State of Michigan is covering the cost of water sample testing for Flint food establishments on the City of Flint water supply free of charge. Standard household filters are available free of charge to food businesses through distribution centers located throughout the city.

- Food establishments often have specific pieces of equipment with their own sets of requirements, so standard household filters or water system flushing may not be sufficient to meet the current water use requirements. Businesses requiring specialized filters or other equipment to come into compliance will need to purchase and install the equipment at their own cost.

- A list of food establishments who have received compliance checks and have been found to be following the requirements for use of City of Flint water, as

directed by the Genesee County Health Department and the Michigan and Rural Development, is posted online at www.michigan.gov/flintwater.

- This list is updated each week day, as additional assessments are completed. Inclusion of businesses on this list does not represent endorsement of the businesses by the Michigan Department of Agriculture and Rural Development, nor does it guarantee food safety at these facilities. The companies listed have demonstrated they are taking precautions to reduce the risk of foodborne illness from water that may be contaminated, as outlined in the Michigan Food Law and Michigan Modified Food Code.

- As of January 27, 2016, no Flint food establishment water test results are available for samples collected by MDARD inspectors. While MDARD awaits test results, inspectors will continue to do initial evaluations until all Flint food establishments have been visited, and will begin follow-up inspections for those who needed to make adjustments to come into compliance with food regulations (e.g., filter installations, water flushing protocols).

- If any test results show elevated levels of lead, MDARD will work with each individual food business to help them come into compliance with food regulations and to reduce the risk of food safety issues.

Requirements for Licensed Food Establishments Using City of Flint Water

January 13, 2016

Attention: This applies to licensed restaurants, grocery stores, convenience stores, food processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test." Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 a.m. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. Then flush other equipment such as pop machines for at least 1-2 minutes.
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

DRAFT – NOT FOR DISTRIBUTION (1/29/16 JMH)

Flint Food Establishment Compliance – Flint Water Response Media Event

Background

Governor Snyder declared a state of emergency in Flint on January 5, 2016. With that declaration, MDARD determined Flint municipal water is not considered an approved source for food establishments at this time, unless certain precautions are taken to reduce the risk of food safety issues. Under the Michigan Food Law and Michigan Modified Food Code, food service facilities, food processors and retail food establishments are required to use water from an approved source. Until the water is deemed safe, all food licensees in Flint affected by the Flint water emergency must take required precautions to reduce the risk of food safety issues. These precautions include having the water tested by an accredited laboratory to prove it is safe to use; installing approved water filters, as needed; flushing unfiltered faucets and hard-plumbed equipment on a daily basis; or using commercially bottled water for all cooking, cleaning/washing and drinking.

MDARD has initiated inspections of all food establishments in Flint to make sure they understand the new mandatory requirements and to are taking the required precautions to reduce risk of food safety issues. Inspectors are conducting risk-based compliance/enforcement assessments and verify adherence to current MDARD water source requirements. MDARD is assisting the Genesee County Health Department with water sampling and inspections, to allow the health department to focus its efforts on checking other priority facilities in its jurisdiction, including childcare facilities.

The purpose of this event is to demonstrate what inspectors look for during these inspections and to highlight the partnership among county and state food regulators and Flint's restaurants, food processors and grocery retailers to provide safe food for Flint residents.

Media Event Details:

Date: Friday, February 5, 2016 (tentative)
Time: TBD (will need to be between breakfast and lunch or lunch and dinner to cause the least disruption to the restaurant business)

Participants

Tom Tederington, East Region Food Supervisor, Michigan Department of Agriculture and Rural Development
Representative from the Flint Chamber of Commerce (Bob Campbell – contact. Jen will contact)
Food Supervisor, Genesee County Health Department (via Sean Dunleavy)
Representative from MI Restaurant Association (via Amanda Smith) (invited but not speaking?)

Representative from the restaurant/restaurant manager (participate on tour but not speaking during presentations?)

Location: A Flint restaurant, exact location TBD

Jeanne Hausler will work with Sean Dunleavy, Tom Tederington, the Chamber and Genesee County to find a suitable location.

Criteria:

- the restaurant must have been inspected by MDARD and found to be in compliance with current water requirements and food regulations, and must have a good compliance record with Genesee County Health Department.
- the restaurant must have a favorable water test result.
- A restaurant that only serves lunch and dinner would be ideal so we could tour the kitchen during a time when they aren't attempting to serve customers.
- The restaurant needs to be large enough to accommodate a large number of media.
- The restaurant should be visually appealing.
- The restaurant must be in the city of Flint and must be serviced by Flint municipal water.

Setting (may change after site check):

The media event will begin in the dining area of the restaurant. Visuals (GIS maps of food establishments, etc.) will be on display on easels. A podium and microphone with stand will be positioned with the restaurant dining area as a backdrop.

After brief presentations, the media will be invited to tour the kitchen with Tom Tederington and restaurant staff for a visual explanation of what inspectors look for to verify compliance with current water requirements.

Tentative Agenda:

Welcome and Introductions	(who will be the lead? MDARD, Gov's Office?) (2 min)
Presentation from MDARD	Brief explanation of the current water use requirements and the inspection process, current results (Tom T?) (5 min)
Presentation from Genesee County	Partnership among state and local regulatory agencies and local business owners to assure food safety during the emergency and beyond. (3 min)
Presentation from Chamber	Importance of local businesses to the economic success of Flint. "Flint is open for business." (3 min)

Tour of the kitchen facilities, led by Tom Tederington and the restaurant manager. Walk through an assessment, what inspectors look for, how water samples are taken, what it means when the samples come back and what food establishments can/should be doing to protect their customers/businesses.

Equipment Needs:
Podium
Microphone
Sound equipment
Easels
Visuals/posters
Flint Water logo for podium

Flint Water Response Situation Report - As Of: January 29, 2016

Response Strategies:

1. Notify food establishments of current requirements
2. Offer free water testing to food establishments (LHD and MDARD regulated) on City of Flint Water supply
3. Conduct assessment visits to determine compliance with current requirements on a risk-basis.
4. Conduct enforcement as needed to protect public health
5. Conduct follow up visits/sampling at facilities in non-compliance with high lead levels identified in initial water sampling

Response Phases and Timelines:

	Timeline (Week of)						
Jan 20		Jan 25	Feb 1	Feb 8	Feb 15	Feb 22	Feb 29
	Initial Rapid Assessments	Assessments	Assessments				
	Lab Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing	Laboratory Testing?		
	Initial Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance	Compliance Assistance

Response Org Chart: See Attached

Total Number of Establishments for Assessments: 175 (FDD-84, GCHD-91) **High-Risk-** 19 (8-GCHD, 11-FDD), **Medium-Risk-** 156 (83-GCHD, 73-FDD)

Upcoming Operational Period Objectives: February 1-February 5, 2016

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirements during initial assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.

Activity Report for the Operational Period: January 29, 2016

RISK CATEGORIES HAVE BEEN REASSESSED ACCORDING TO MAPPING BASED ON BLL RISK AREAS

Activity	Completed Today	Completed This Operational Period	Completed to Date	Goal
Facilities Contacted/Informed				
By Weights & Measures staff	Task completed	[redacted]	[redacted]	[redacted]

By FDD Staff	5	96	193	175
Assessment In-Compliance Rate 70.1% (136 firms)				
Assessments Completed				
High risk	1	2	18	19
Medium	1	46	135**	156
Other	3	41	58	
Follow up assessments/Verification sampling completed (due to non-compliance or high lead found in initial sample results)				
High Risk				
Medium Risk	1	1		
Other				
Water Sampling Activity				
Scheduled	8	62	120	
Collected	11, two of these were in use samples. One was from a high risk firm.	56	74	
Test Results				
Elevated	5	9	9	
Total tested	16	24	24	

*One remaining firm will be removed from the high risk list. The firm was visited, but was closed and apparently has limited hours. After the fir is visited during operating hours to confirm the kitchen is still not is use.

**A number of the medium risk firms are all part of the Flint Farmers Market and so will be done in one assessment. However, each licensee was counted in the goal of 156 medium risk firms goal. This explains the discrepancy in the number completed and the goal

INCIDENT ORGANIZATION CHART (ICS 207)

Flint Water Response Team Plan
Monday, 02.01.16 - FINAL

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
HH	Household
LEOC	Local Emergency Operations Center

Key Leaders

ARC OIC	Kristy Gallagher	[redacted]	isty.gallagher@redcross.org

Plan

Agency	Team Types	Mission
ARC	10 Type V	1000 HH

Resource Status

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 10 (10 ERV)				
Resource	**Required**	**Confirmed**	**Notes**	**Date**	**Time**
Team Leader	10	10		2/1/16	8:00 am
ARC ERV	10	10		2/1/16	8:00 am
ARC ERV Driver	10	10		2/1/16	8:00 am
Team Member	20-40	20-40		2/1/16	8:00 am
Team Transport Vehicle for 2-4 Team Members	10	10		2/1/16	8:00 am
Team Transport Vehicle Driver	10	10		2/1/16	8:00 am
iPads	10	10		2/1/16	8:00 am
Hand Warmers	40	40		2/1/16	8:00 am
Distribution Kit	1000	1000		2/1/16	8:00 am

Execution:

Key Locations

ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Team Assignment – Target Areas

Team Priority: Franchise Customers
Priority – City Sections 22, 33, 4, 7, 1, 32, 13
Secondary – City Sections 12, 15, 37

Map Support

Maps will be provided daily to provide detailed information on city sections. Teams will target specific homes not originally reached during the first two rounds of canvassing.

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix.

Lunch

Lunch will be provided by the ARC.

Reporting:

Tactics:

1. *All WRTs will utilize iPads as the primary reporting method and the WRT Distribution* Tracking Tool as a secondary method if iPads fail.

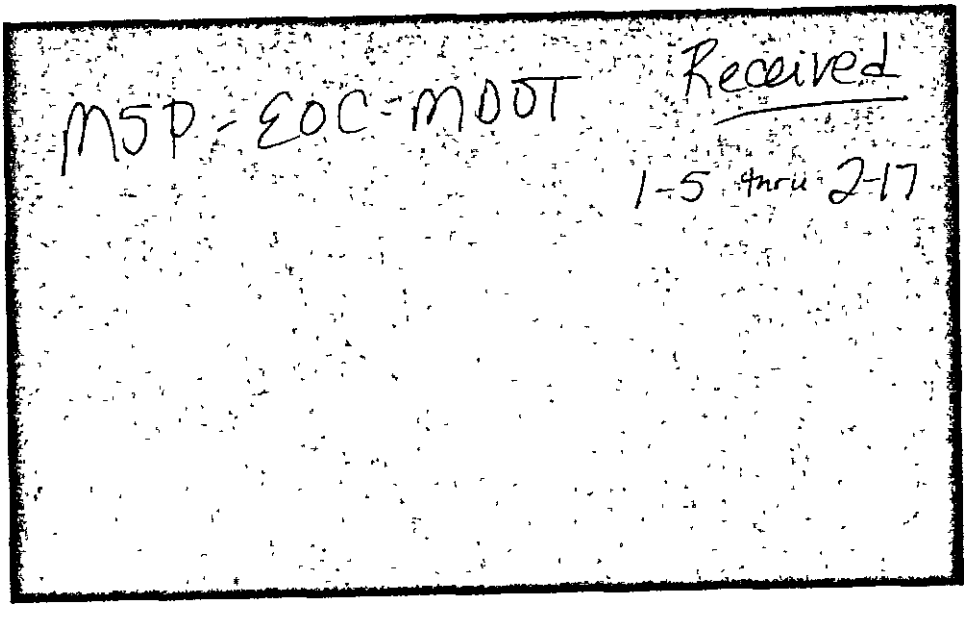
Subject: FW: FOIA Plan Update
Attachments: SEOC FOIA Plan FINAL.docx

Please review the attached plan for FOIA printing. The instructions are for when in the SEOC, however, there is helpful information that can be used for any location.

From: MSP-SEOC10
Sent: Wednesday, February 17, 2016 8:22 AM
To: MSP-SEOCOPSC
Subject: FOIA Plan Update



SEOC FOIA Print Plan
Tips for Printing

Print Plan – Thru Friday, February 19

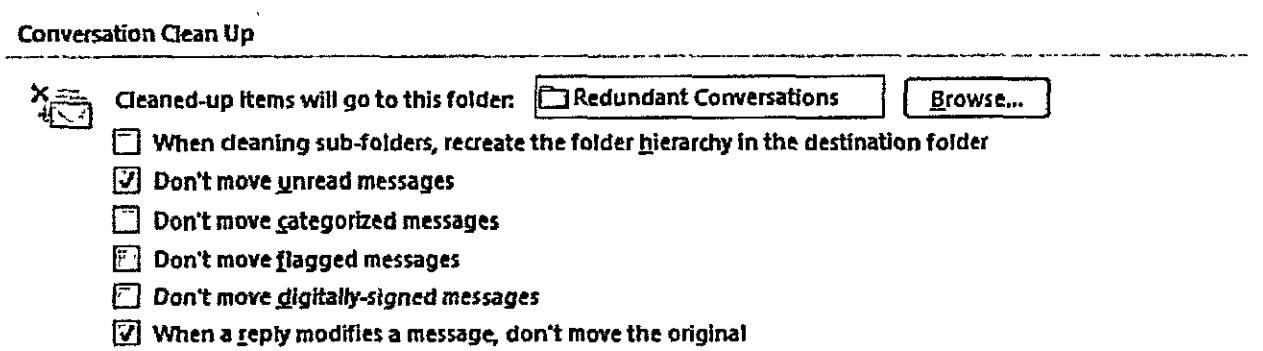
- *When printing emails/documents, make sure to* **change your default printer** to the following printer:
  - EOC_F1COMM_RI3054 on EOC084M1OAPF502 (located in the Communications Room)
  - Additional helpful hints for each document type below
- *SEOC IT staff will set up to "Print to Hold" for each PC in the SEOC.*
- Be sure to print/copy all documents **Single Sided.**
- Advise the SEOC Operations Section Chief prior to printing. **Do not interrupt someone else's print job.** The SEOC Operations Section Chief will ensure coordinated printing efforts.
- When at the printer, select Print > Select your agency name > Select All > Print.
- Test printing a couple of emails before printing out a large quantity.
- Once all items have been printed/copied, give all to Oralya Garza or Jodie Frese (daily staff) located just outside Governor's Conference Room A in the SEOC. **Do not go direct to FOIA Unit staff working in the conference room.** They will reach out if they have any questions.
- Make sure to clip or rubber band your information to keep separate from others information being turned in.
- Sources: Emails, Documents, S drive, Desktop, Cell phone/text messages, Copies of handwritten notes, DCDS, Invoices, Photos
- SEOC IT Staff will be responsible for printing all documentation from MI CIMS.
- For any IT issues, contact IT Staff in the SEOC. This is usually Jaclyn Barcroft or Rich Law. GIS staff should be *contacted only if both of them are unavailable.*

How to Recover Deleted Emails

- In Outlook, select the Folder Tab.
- On the top, select Recover Deleted Items.
- Recover any items pertinent to the Flint Water response.
- You may need to select various folders on the left side in order to recover everything possible.

How to Clean up Redundant Email Conversations

- In Outlook, click on the File tab.
- Click Options.
- *Click Mail.*
- Under the Conversation Clean Up section, change the location where conversations will go. Select Browse. Click on "Cabinet" in the list. Select "New Folder" and name it "Redundant Conversations." Ensure the options are *identical to the below:*



- In Outlook, on the Home tab, in the Delete group, click Clean Up.
- Select Clean Up Folder. Click Clean Up Folder.

SEOC FOIA Print Plan
Tips for Printing

Tips for Printing Emails

- For State Agency SEOC personnel, **only** print emails from your SEOC email address.
- Print emails by selecting **up to 100 at a time** (select one, hold shift, click on the last one).
    - Select the File Tab > Print > Click Print Options button > Select Memo Style and Check Box for "Print Attached Files" (bottom left corner of pop up) > Select Print
- Attachments will not show up in the preview, but will print out with the emails

Tips for Printing Documents from Desktop, S Drive, My Documents (wherever files are saved)

- Make sure documents are formatted correctly for printing prior to moving to the next steps (Excel files tend to be the most troublesome).
- Sort documents in folders by "Type".
- Highlight "like" file types (Adobe Acrobat Document, Microsoft Excel Worksheet, etc.).
- Right click, select Print.

Tips for Printing Text Messages

- Android
- iPhone

Email – After All Your Files are Printed

- *Send a CC to the following email address when sending items from the SEOC:*
    - MSP-FOIAProject@michigan.gov

Subject: MDHHS Leadership Announcement

MDHHS Employees:

Over the weekend, Director Nick Lyon had an accident at Boyne Mountain while spending time with his family, and is currently in the hospital awaiting shoulder surgery later this week. He is doing well and we expect him back within the coming weeks once he has had time to heal and recover. Director Lyon had driven to Boyne Friday evening to meet his family and was injured on Saturday.

Until that time, Chief Deputy Director Tim Becker will be leading the department, including the budget presentations this week. Beginning today, MDHHS leadership will be presenting our budget proposals to the legislature. Today's presentation is attached here for your review. Chief Deputy Director Becker has been actively involved in all department priorities, particularly our department efforts in Flint, so there will be continuity in all focus areas.

Please join us in wishing Director Lyon a quick and healthy recovery.

Thank you.

From: Zarotney, Greg (MSP)
Sent: Thursday, February 11, 2016 5:01 PM
Subject: URGENT - Records Request
Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years.** Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Thanks for the calls. While many state employees are volunteering using community leave, MI Dept. of Corrections (MDOC) workers assigned through the State Emergency Operations Center (SEOC) are being assigned as part of their regular work. Some staff are daily, others are longer term. This includes overtime and travel.

The MDOC Human Resources contact is Kyle Davenport 57-335-7221.

MDOT has activated our emergency job number to cover and capture all of the related costs.

Subject: Re: staffing request warehouse #2

I spoke with OSE and they need more detail as to the work these assignments will be doing. MDOC has used volunteers, community participation leave, etc for this but I can't find where someone has done the duties as their regular job. Could you please outline how exactly what we are being asked and is it as a job assignment? What if people refuse? Etc.

See the informal request below. Please let me know if we should move forward.

Also, MDOT provided 2 light towers (with small generators). These were likely ones we purchased with Homeland security grant funds.

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

EXECUTIVE ORDER
No. 2016 – 02

ACTIVATION OF THE NATIONAL GUARD TO ASSIST IN RESPONDING TO THE EMERGENCY RELATING TO THE CITY OF FLINT'S WATER SYSTEM

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the State of Michigan in the Governor; and

WHEREAS, Under Section 12 of Article V of the Michigan Constitution of 1963 the Governor is the Commander-in-Chief of the state armed forces and may call them out to execute the laws; and

WHEREAS, Section 151 of the Michigan Military Act, MCL 32.551, authorizes the Governor to order any members of the organized militia to active state service in the aid of the civil authority in times of public danger, disaster, crisis, catastrophe, or other public emergency within the State; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint changed its water source from the Detroit water system to its own treatment plant drawing from the Flint River; and

WHEREAS, by Executive Proclamation issued on January 5, 2016, the Governor declared a State of Emergency in the City of Flint and Genesee County; and

WHEREAS, lead can be introduced to humans through water, and elevated lead levels can result in significant health impacts, particularly for children, pregnant women, and the elderly; and

WHEREAS, the State's first priority in addressing this emergency is to limit potential exposure to lead in drinking and cooking water by limiting potential exposure to lead in the City's water system; and

WHEREAS, other priorities include: (1) directly informing as many Flint residents as possible that filters, bottled water, information on lead, water testing kits, and other resources are available; and (2) directly providing resources to Flint residents and following up with those residents to ensure that they have access to safe water, are fully informed, and have their water supply tested. These tasks will require that personnel go door-to-door in large areas of the City of Flint; and

WHEREAS, due to the significant level of human and other resources required for these tasks, additional assistance is needed to supplement existing personnel and equipment; and

WHEREAS, by the Executive Proclamation of Emergency issued on January 5, 2016, the Governor directed that the Emergency Management and Homeland Security Division of the Department of State Police, coordinate and maximize all state efforts, and call upon all state departments and agencies to utilize available resources to assist the City of Flint and Genesee County pursuant to the Michigan Emergency Management Plan;

NOW, THEREFORE, In consequence of the above, I, Richard D. Snyder, Governor of the State of Michigan, pursuant to the Michigan Constitution of 1963, the Michigan Military Act, 1967 PA 150, MCL 32.501 et seq., and the Emergency Management Act, 1976 PA 390, MCL 30.401 et seq., order the following:

1. The Adjutant General of the Michigan National Guard is directed to order to active state service units and individuals of the Michigan National Guard that, in his discretion, he deems appropriate to meet general mission assignments as determined by the Director of the Department of State Police, or her designee.

2. The Director of the Department of State Police, or her designee, shall coordinate and maximize all state efforts, including such units and individuals of the Michigan National Guard that may be activated to state service to assist the City of Flint and Genesee County in accordance with the Michigan Emergency Management Plan.

3. The Michigan National Guard is activated until such time as determined by the Adjutant General, after consultation with the Director of Department of State Police, or her designee.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 12th day of January, in the year of our Lord, Two Thousand Sixteen

RICHARD D. SNYDER
GOVERNOR

BY THE GOVERNOR:

SECRETARY OF STATE

Subject: Action: Potential Jobs Program
Importance: High

All:

We're working on a potential jobs program with MTED and the US Department of Labor to hire and/or train dislocated workers (laid off, etc.) to support humanitarian operations going forward. Is there any interest from your agency to fill roles with dislocated workers for the ongoing activities your agency is responsible for? At a minimum, we are looking at staffing needs for up to a year (potentially longer, depending on the situation). To be clear, this program is not hiring people for/from other agencies to defer the cost; it is to provide temporary jobs to support humanitarian operations.

If so, could you please provide a quick list of what those needs might be? If there are equipment needs (vehicle, supplies, etc.) to perform the job, include those as well. No need to expand on job description at this point. These are just potential ideas; nothing is set in stone.

We have already put together a list of needs to encompass 2 warehouses, 5 POD hubs, rapid response delivery teams, basic local EOC staffing, and a list of miscellaneous jobs (including translators, plumber apprenticeships, social/medical case worker training, etc.).

Please submit your potential interest to me by **2 pm Sunday, February 7.** If you have any questions, don't hesitate to ask.

Thanks,
Brianna Briggs

MDOT portable changeable message boards on both EB & WB Pierson are out of service and being replaced.

MDOT recommends replacement of these signs on EB & WB Pierson and EB & WB Martin Luther King Ave. with standard street signs. The signs will be yellow with black letters and deliver the same message: Water pick up ahead Slow down. Message visibility will not be compromised

These are fabricated in our region facility. The materials are available and staff are prepared to move forward. These can be in place in less than a week.

Let me know ASAP so our staff can begin preparing the signs and the sites.

Thanks,
Connie Vallier

STATE OF MICHIGAN

RICK SNYDER
GOVERNOR

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 2, 2016

TO: State of Michigan Procurement Leadership

FROM: DTMB Procurement

SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must **first** be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:
Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Questions, concerns, or comments should be directed to:

Subject: Information Distribution Concerns

Hi Mel,

I believe you may be aware, but I am now serving as the PIO for the DNR Incident Management Team operating out of the ECC in Con Hall. We received the attached email that was sent to some DEQ staff by a MDOT employee that has been volunteering for the past few weeks distributing water in Flint. The DEQ staff then sent the email on to us. She expressed concerns about accurate information not being distributed/reaching some of the impacted citizens in Flint.

It is possible that some of this has been handled by the JIC since I worked there a few weeks ago, but some suggestions that may help to ensure that citizens that don't have the ability or means to access the internet receive information could include automated phone calls and the establishment of a "trap line". The "trap line" is something that we frequently use on fire incidents. It involves posting relevant information for citizens at high volume locations such as community centers, restaurants, stores, etc. Local contacts could help identify the most appropriate locations. Then as information is updated, a PIO from the JIC could go out and post the updated information.

These are just some potential suggestions. We wanted to ensure that you were aware of these observations by the MDOT volunteer.

Please let me know if you have any questions.

Thanks!
Kerry

Subject: URGENT - Records Request
Importance: High

The department has been directed to provide copies of all records in our possession related to the Flint water matter to the Governor's office. You are receiving this email because you have been identified as an individual who may have records that must be produced. If there are any department members who you think may be in possession of records related to Flint water, please forward this message to those members.

Records include memos, handwritten notes, emails and attachments, and text messages in your possession, regardless of who produced the record. Be sure when you search your email messages that you look in your inbox, sent box, and trash. In preparation for the production, you must estimate the number of records you have in your possession and provide that estimate to Ms. Lori Hinkley no later than **2:00 PM on Friday, February 12, 2016.**

You must then provide a copy of each record in your possession to the Legislative and Legal Resources Section no later than close of business on **Thursday, February 18, 2016.**

Members who work at Headquarters must provide paper copies to F/Lt. Chris Hawkins in the Office of the Director. Members who work at the State Secondary Complex must provide a paper copies Ms. Lori Hinkley. Ms. Hinkley is located on the second floor of the new Headquarters building. Department members who work outside of these worksites may send copies of records in their possession via e-mail to MSP-FOIAProject@michigan.gov.

In addition to this initial production of records, the department is required to provide copies of newly created records on an ongoing basis. Until further notice, copies of all newly created records shall be forwarded to MSP-FOIAProject@michigan.gov.

REMINDER: Public records can only be disposed of consistent with an approved retention schedule. As it applies to emails and text messages related to the Flint water matter, please use the retention schedule in place for general correspondence which is **two years**. Please save all emails and text messages for at least two years. Prior to expiration of the two year period you will have an opportunity to re-evaluate the content of the messages to determine if an additional retention period is necessary. If you have issues with accommodating emails based on your mailbox size, please archive them. Do not print and file them as the metadata must be retained as well.

If you have any questions with these instructions, please contact Ms. Lori Hinkley.

Subject: staffing request warehouse #2

Eileen,

MDOC has been verbally requested MDOT to assist with staffing for the 2nd warehouse that is being stood up to load/unload water (shipping and receiving). This will require physical labor.

Positions: 2
Duration: daily (inc. wkends) Mon. 2/8 through Mon. 2/22 (recommend multiple staff to rotate days)
Hours: 11 AM – 7 PM
Location: 2629 W Pierson Rd, Flint (closed Kroger just up the street from Fire Station #6)

If we can staff it, they will move forward with a formal Resource Request.

Subject: Action: Potential Jobs Program
Importance: High

All:

We're working on a potential jobs program with MTED and the US Department of Labor to hire and/or train dislocated workers (laid off, etc.) to support humanitarian operations going forward. Is there any interest from your agency to fill roles with dislocated workers for the ongoing activities your agency is responsible for? At a minimum, we are looking at staffing needs for up to a year (potentially longer, depending on the situation). To be clear, this program is not hiring people for/from other agencies to defer the cost; it is to provide temporary jobs to support humanitarian operations.

If so, could you please provide a quick list of what those needs might be? If there are equipment needs (vehicle, supplies, etc.) to perform the job, include those as well. No need to expand on job description at this point. These are just potential ideas; nothing is set in stone.

We have already put together a list of needs to encompass 2 warehouses, 5 POD hubs, rapid response delivery teams, basic local EOC staffing, and a list of miscellaneous jobs (including translators, plumber apprenticeships, social/medical case worker training, etc.).

Please submit your potential interest to me by **2 pm Sunday, February 7.** If you have any questions, don't hesitate to ask.

Thanks,
Brianna Briggs

Coordination Meeting Agenda

1. Roll Call

LEOC Operations	LEOC Log	LEOC MSP	LEOC OGCS	LEOC NG
LEOC DEQ	LEOC Other	SEOC Operations	SEOC Recovery	SEOC Human Services
SEOC DEQ	SEOC LOG	SEOC Warehouse	SEOC Planning	SEOC MSP
SEOC NG	SEOC DOC	FEMA	Red Cross	Other

2. *Today's Priorities*
    a. PODS – no complaints of being out
    b. ARC sent out 10 teams...progress? Status?
    c. Have radios been delivered to all drivers for Rapid Response deliveries
    d. Blue Pallets – have established correct recipient – save them! They belong to CHEP
    e. *Water delivery – 8 trucks today, 8 trucks tomorrow*
    f. Alternate warehouse location – Kroger site – temporary hopefully until Target
    g. Inventory – tomorrow we will go to inventorying liters as opposed to pallets.
3. Tomorrow's Priorities
    a. PODS
    b. ARC teams – 10 more tomorrow
4. Any issues, concerns, coordination needed?
    a. Location of the Penske trucks – have they been returned?

Subject: RE: Genessee County/City of Flint water contamination Governor's Declaration

State and local agencies have been working together and there is a website that consolidates information on this issue: www.Michigan.gov/flintwater.
SEOC activation allows for greater focus and agency coordination.

MDOT's immediate role is expected to be minimal. We will be looking into possible impacts of maintenance and construction directly on public infrastructure and within the right-of-way, as it applies.

Subject: Genessee County/City of Flint water contamination Governor's Declaration

The Governor has issued a Declaration of Emergency on Tues 1/5 as requested by Genessee County on Mon 1/4 to address the on-going water contamination in the City of Flint.

The State Emergency Operations Center (SEOC) has been activated and Eileen Phifer & Connie Vallier are participating in the initial briefing this morning.

Wes,

URGENT REQUEST

Please have your staff complete an DCH-0016 request (attached) for the agreement with ETC PO #391N6600661 Vendor ID to add $90,000 for the Flint Water Crisis. (See attached FLNT16-06)

We need to issue the funds appropriated under P.A. 3 of 2016 Sec 501 (c)
http://www.legislature.mi.gov/documents/2015-2016/billenrolled/House/pdf/2016-HNB-5220.pdf is the link to the Public Act.

Michigan Department of Health and Human Services
Public Act 3 of 2016
FY16 Flint Supplemental #2 (January 2016)

	Appropriation	Contractual FTEs	GF	State Restricted	Federal	Gross	Detailed Description
FLNT16-01	Food Inspections		$ 200,000			$ 200,000	
							- These funds would be used to support Genesee County's Food Safety Division which has delegated authority from MDARD for inspection and response activities at licensed food service establishments (i e. restaurants, schools, hospitals, etc)
							- These funds will go to support an additional field inspector and the backfill of the Environmental Health Manager
							- The additional inspector is needed to assist with the implementation of the new restaurant and food service facilities water sampling requirement which will require initial and compliance review inspections Inspection rate intervals will also likely increase because County Health Officials will need to perform additional compliance reviews given the latest emergency declaration.
							- The Environmental Health Manager is necessary to coordinate inspection and compliance review schedules, coordinate with other county resources for data collection and reporting at the state and county levels, and coordinate other IT issues related to system monitoring.
							- These staff will be limited term staff Currently the approp for local health department food safety is part of the public health budget and DHHS has always funded the state portion of this function
							- These funds have not been increased in years.
FLNT16-02	Other Medical and Behavioral Health Concerns		$ 275,000			$ 275,000	
	- Med Team						-These funds will finance a team of experts to assess any potential linkages from the increase in Legionaire's disease with the changeover from the Detroit to Flint water systems
FLNT16-03	Water Resources		$ 4,612,800			$ 4,612,800	
							-To reflect the ramping up of distribution efforts to local health entities and other community partners, an increase in supply is required for purchases related to water filters, faucet mounts, replacement cartridges and bottles
FLNT16-04	Cost for epidemiologists to conduct detailed analysis of EBL reports	2	$ -	$ -	$ 145,000	$ 145,000	
							- Supports two contract epidemiologists (MPHI) to analyze blood levels in City of Flint to conduct more specific detailed analysis not currently conducted.
							- Positions support the review and analysis of the EBL reports for all 13 high risk communities to analyze specifically by zip code, at a more granular level as opposed to county level.
							- Positions support the analysis of patterns and trends to determine the appropriate next steps and will coordinate with health department.
							- Previous supplemental did not include epidemiologists with a more detailed focus on blood lead analysis
							- Epidemiologists will take data that shows where investigations have occurred, where purchases have been made, to determine whether the high risk areas have been addressed.
							- Overlay zip code data with those addresses that have received filters to determine how many homes are in the highest need have received filters and where we need to focus our energy in getting out filters
							- Use available Maternal and Child Health Block Grant funding

	Appropriation	Contractual FTEs	GF	State Restricted	Federal	Gross	Detailed Description
FLNT16-05	Lead abatement - Field Contractual	3 5		$ 1,510,000		$ 1,510,000	
							- Costs reflect contractual and service costs to abate lead from 100 additional homes in the City of Flint. October supplemental funded the abatement of 250 homes
							- Contractual funds will support 3.5 FTEs, 2 5 field consultants to conduct abatement and one to assist with client application and form processing
							- Abatement activities include the replacement of plumbing components, faucets, aerators and fixtures,
							-We have contractual and state staff that currently do this to identify the plan and cost. They will use ETC reports to identify which homes need abatement.
							-These funds do not pay for ETC. These funds pay for contractors to pay for the physical changes to the home, including window, wall or floor replacements.
							-Use Healthy Michigan Fund available lapse funding
FLNT16-06	Additional lead investigations	0		$ 90,000		$ 90,000	
	- ETC						- Will support ongoing ETC Inc contract activities that are determining the sources of lead exposure and develops a plan via a report to the family's nurse case manager to reduce and or mitigate lead exposure
							-ETC determines all the environmental samples in the home including paint, soil and dust.
							-Samples are all sent to their labs to determine what the highest readings of lead are and a plan to remediate
							-Reports are generated after lead analysis and shared with nurse case manager to determine a follow up health plan for the family
FLNT16-07	Nurse Case Mgt and NFP	1	500000	$ 25,000	$ 45,000	$ 570,000	
	-Nurse Family Partnership $500,000						-Funds support the increased testing and follow up necessary with the new homes being investigated
	-One FTE / contract nurse case manager $70,000						-Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations through ETC.
							-We expect with the increased testing that the additional nurse / case management will focus on those kids that have already been found to have elevated levels, will manage the health care of those children, will work with the parents to ensure they have everything they need
							- The additional nurse case manager will be necessary as part of the recent ramp up to address intensified EBL investigations and was not accounted for in the previous supplemental
							- This individual will provide referrals to relevant benefits/services such as WIC, SNAP benefits, etc.
							- GCHD have noted that nutrition counseling is a big problem and they're looking at this position being the coordinated link between nutrition education and other medical needs
							- Will inform families that if children eat iron rich diets, then their bodies won't absorb lead as opposed to those who are malnourished
FLNT16-08	GCHD and Food Bank	2	$ 1,037,200		$ 120,000	$ 1,157,200	
	- GCHD Contract $120,000						-Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan
	-Food bank - $1,037,200						-The FTEs will direct people on where to get healthy food, faucets, and where they can get follow up care
							- $1 million to expand food bank partnerships in the City of Flint
							- Their work will be part of the promotion of all the healthy behaviors that helps to treat these problems
							- Flint is already one of the high risk communities for lead exposure in paint, soil and other environmental areas GCHD has noted that there is big demand on educating the community.
							- This educational component was not part of the previous supplemental.
							- Funds will help with media promotions and will send community groups and community educations out to various individuals working on the lead issue

	Appropriation	Contractual FTEs	GF	State Restricted	Federal	Gross	Detailed Description
FLNT16-09	Ed & Access- CAHC, PtoP, CHAP		$ 1,570,000			$ 1,570,000	
	- CAHCs $550,000						- This proposal will provide funds to support the programs operated by the two existing Child and Adolescent health centers
	- P to P expansion $720,000 & 6.0 FTEs						- Programs will provide medical and other related support services in every school in Flint.
	- CHAP $200,000						- Funding will also go to support the Children's Healthcare Access Program to assist clients to establish a primary care medical home or to obtain the timely and essential services as recommended by their primary care provider.
							- These funds are intended to reduce emergency room usage and promote the best evidence based care for the children and provide support for Medicaid children related to transportation, case management, mental health services, and nutrition education access.
							- Proposal also includes funding to expand the Pathways to Potential model to provide support to City of Flint residents connecting them to the proper benefits and getting them the services they need
							- CAHC are onsite medical clinics in the schools to provide health education and if parents sign consent forms they treat the children for minor issues.
							- They have a general practicitioner.
							- Flint currently has Adolescent Health Centers in high schools (some upper middle schools) - (not child health centers) currently
FLNT16-10	Nutrition – WIC		$ 30,000	$ 927,000		$ 957,000	
	- Co-locate WIC staff $872,000						- This proposal will finance the cost of WIC staff that will be co-located within schools and other health centers to increase WIC enrollment and increase the access and availability of WIC benefits
	- Lactation consultant $ 85,000						- Currently, children up to the age of 5 receive services through WIC, this funding would enable children ages 5-10 to receive nutrition education and counseling as well as screening and referral to other social services. ($55,000 Federal & $30,000 GF)
							- DHHS would need to negotiate this proposal with the federal government to receive federal funding
							- This funding request also dedicates one lactation consultant to the Genesee County Health Department to promote and support breastfeeding education, provide services to protect children from lead exposure, and promote cognitive development.
							- Research shows that children who are breastfed are healthier and have better immunity against diseases
							- Assume Medicaid funding for the lactation consultant.
							- Have two existing clinics (not necessarily at capacity)
FLNT16-11	Behavioral Health and MC3		$ 1,335,000		$ 2,535,000	$ 3,870,000	
	- Money to CMHs $3,670,000						- Directly appropriated to CMH to fund crisis services and additional behavioral health and developmental services ($2 535,000 Federal & $1 135,000 GF)
	- MC3 expansion $200,000 GF						- Funds care coordination between key involved entities such as schools, county and local agencies, mental health providers, health providers as well as case management for children and families
							- Funds an expansion of the Michigan Child Care Collaborative (MC3) program into Genesee County to provide support to PCP and pediatric offices and clinical services to children and families
							- MC3 is a new program that is only parts of the state and expansion is strongly supported
							- Funding supports treatment of children with blood lead levels equal to or higher than 10 and also treatment of lead-associated Attention-deficit/hyperactivity Disorder (AD/HD)
							- Treatment includes diagnostic testing, nurse visits, environmental health assessment of home
							- Assume Medicaid funding
FLNT16-12	CMH Crisis Counseling		$ 500,000			$ 500,000	
							- Crisis support and counseling through Community Mental Health organizations
	Total FY16 Supplemental Funding Request	6.6	$ 10,060,000	$ 2,552,000	$ 2,845,000	$ 15,457,000

Ma'am,

We have received a FOIA request for "the name of the company and testing results for the testing done in Flint by an outside company (according to Governor Snyder an outside agency was used)." Can you please tell me if you or any other Department member have responsive documents? I will need a response by 2/12/16.

Thanks,

Subject: Daily Summary

Capt. Kelenske,

Below is summary event for the today. F/Lt. Covey asked me to pass this email along early for your 7:30 meeting. The Sit Rep is currently being finalized to send to Peter Manning. I will pass it along once has been published to MI CIMS.

Update 2/14/16 – 41th Day (40th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Maps: Residential Water Sampling Results for lead and copper. Updated to include 2/13/2016 data.

Key items for tomorrow to note are:

- 5 American Red Cross Teams scheduled for Monday, February 15, 2016. Team Priority Scheduled tomorrow is to continue water distribution and rapid response.
- It was announced at the 6:30 pm distribution process meeting that the NCCC will continued their volunteer mission through 2/22/2016. ARC will return their iPads to the local EOC for the Southern Baptists teams to use for data collection. Southern Baptists will be at the local EOC to train on the iPads tomorrow, and will begin their mission on Tuesday.

Items to Note

- There is a decrease in number of total residential parcels and total residential active water subscribers. Seven parcels were originally classified as residential parcels and were found to be right-of-way or easements. The data has been updated to remove those seven properties.
- National Guard mission has been extended through 3/16/2016.
- SEOC Logistics is working with Flint Schools to identify alternative locations to store water. Additionally, Logistics is continuing to fulfill resource requests for Warehouse #2, based on the Memorandum of Agreement with the Seventh Day Adventist. Recovery Branch is working to outline the transition between National Civilian Community Corp (NCCC) and Southern Baptists for the Flint Water Response Teams.
- 5 American Red Cross Teams were deployed today. The teams visited the 83 addresses of City of Flint Residents where there was no valid record of having been contacted. Continued with Rapid Response.
- JIC requested that information about recycling and scams be included in daily Flint Water Response email sent by the Governor's Office; both items were included in the message that went out at 11 a.m. today.

Unified Coordination Group (UCG):

- One sequential testing team is set up to do outreach at 40 residences, along with eight filter grabs.
- Health and Medical Task Force will be meeting with the US Behavioral Health for a team meeting, to integrate with the Flint Recovery Group. They will also begin setting up for the incoming team with nurse case managers who are arriving today.
- UGC Public and External Affairs: Surgeon General will be arriving tomorrow for a two day visit.
- American Red Cross had a 3:00 pm meeting to review the ARC Recovery Framework, and to identify the federal representatives who will be on the recovery groups.
- The UCG advised they will work on getting infographics to make the website less confusing.

Local EOC:

- Sentinel outreach campaign statistics:
  - 402 homes were initially contacted for the program.
  - 241 households have agreed to be sentinel monitoring points for long-term water testing.
  - Identified 10 lead service lines.
  - 17 households declined to participate.
- Developed SitRep #34.
- Fulfilled special site visit requests from Governor's Office through Elevated Lead and Copper Initial Assessment Task Force.
- Coordinating scheduling of blood lead level testing clinics in support of goal to test all children under the age of six by April 1.

Subject: Daily Summary

Capt. Kelenske,

Below is summary event for the today. F/Lt. Covey asked me to pass this email along early for your 7:30 meeting. The Sit Rep is currently being finalized to send to Peter Manning. I will pass it along once has been published to MI CIMS.

Update 2/14/16 – 41th Day (40th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Maps: Residential Water Sampling Results for lead and copper. Updated to include 2/13/2016 data.

Key items for tomorrow to note are:

- 5 American Red Cross Teams scheduled for Monday, February 15, 2016. Team Priority Scheduled tomorrow is to continue water distribution and rapid response.
- It was announced at the 6:30 pm distribution process meeting that the NCCC will continued their volunteer mission through 2/22/2016. ARC will return their iPads to the local EOC for the Southern Baptists teams to use for data collection. Southern Baptists will be at the local EOC to train on the iPads tomorrow, and will begin their mission on Tuesday.

Items to Note

- There is a decrease in number of total residential parcels and total residential active water subscribers. Seven parcels were originally classified as residential parcels and were found to be right-of-way or easements. The data has been updated to remove those seven properties.
- National Guard mission has been extended through 3/16/2016.
- SEOC Logistics is working with Flint Schools to identify alternative locations to store water. Additionally, Logistics is continuing to fulfill resource requests for Warehouse #2, based on the Memorandum of Agreement with the Seventh Day Adventist. Recovery Branch is working to outline the transition between National Civilian Community Corp (NCCC) and Southern Baptists for the Flint Water Response Teams.
- 5 American Red Cross Teams were deployed today. The teams visited the 83 addresses of City of Flint Residents where there was no valid record of having been contacted. Continued with Rapid Response.
- JIC requested that information about recycling and scams be included in daily Flint Water Response email sent by the Governor's Office; both items were included in the message that went out at 11 a.m. today.

Unified Coordination Group (UCG):

- One sequential testing team is set up to do outreach at 40 residences, along with eight filter grabs.
- Health and Medical Task Force will be meeting with the US Behavioral Health for a team meeting, to integrate with the Flint Recovery Group. They will also begin setting up for the incoming team with nurse case managers who are arriving today.
- UGC Public and External Affairs: Surgeon General will be arriving tomorrow for a two day visit.
- American Red Cross had a 3:00 pm meeting to review the ARC Recovery Framework, and to identify the federal representatives who will be on the recovery groups.
- The UCG advised they will work on getting infographics to make the website less confusing.

Local EOC:

- Sentinel outreach campaign statistics:
  - 402 homes were initially contacted for the program.
  - 241 households have agreed to be sentinel monitoring points for long-term water testing.
  - Identified 10 lead service lines.
  - 17 households declined to participate.
- Developed SitRep #34.
- Fulfilled special site visit requests from Governor's Office through Elevated Lead and Copper Initial Assessment Task Force.
- Coordinating scheduling of blood lead level testing clinics in support of goal to test all children under the age of six by April 1.

Capt. Kelenske,

Below is a summary of events for today. The Sit Rep has been reviewed by Peter Manning.

Update 2/12/16 – 39th Day (38th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Ensure adequate quantities of supplies to support operations.
- Continue door to door/Flint Water Response Teams (FWRTs), ARC only.
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration.
- Shift Water Response Teams operations to a targeted effort to provide filters into homes where data shows filters have not been provided.
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs.

Status on Governor's request letter to the President:

- Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
- Denial of Individual Household Program and Category B under the Emergency Declaration received January 22, 2016. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Attached:

1. Sit Rep #38.
2. Maps: Residential Water Sampling Results – Lead and Copper

Key items for tomorrow to note are:

- Although the boil water advisory has been lifted in the city of Flint, the SEOC is continuing to monitor supplies at the PODs closely in anticipation of burn rates increasing over the holiday weekend.
- 8 American Red Cross teams scheduled for Saturday, February 13 – extra vehicles on hand for surge in event based volunteers.

Items to Note

- Elevated Lead and Copper Initial Assessment Task Force is beginning identification of companion animals in visited homes for start of dog blood level testing.
- The JIC issued news release this afternoon upon lifting of boil water advisory. They also held media availability at the Genesee County Emergency Operations Center to give the news media access to a sentinel team briefing prior to disbursing throughout Flint.
- Per MDEQ, all of the results from the samples collected in response to the water main break were non-detect for coliform bacteria.
- SEOC staff is working to estimate record numbers to comply with FOIA request.
- The CHECC remains active at a Level 2, and continues to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD.
- 80 volunteers were active across the operation today (56 event based, 15 ARC, 9 NCCC).

Unified Coordination Group (UCG):

- WQTF: Has a new team listed in the ICS-204 community involvement teams.
- Transitioned to using vulnerable populations as standard language instead of special populations.

Local EOC:

- 10 Sentinel Site Monitoring Teams and Elevated Lead and Copper Initial Assessment Task Force out in the field.
- Sentinel teams inspected approximately 170 homes since 02/10/2016, Initial Assessment Task force inspected approximately 65 homes with elevated lead levels and 30 days with elevated copper levels since 02/04/2016.
- Planning for staffing and transition from state agency support personnel to local personnel at Genesee County EOC.
- Liaison Officer and Incident Commander visited UCG and made contact with the Federal Health Coordinating Officer.
- Boil Water Advisory issued by City of Flint in response to water transmission line break was lifted at approximately 1700.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	02/09/2016 08 00 00
Operational Period End:	02/16/2016 08.00 00
Situation Report No.	38
SEOC Status:	Full
SEOC Hours of Operation Begin:	02/12/2016 08 00 00
SEOC Hours of Operation End:	02/12/2016 20.00:00

Executive Summary

SEOC Update·
Accomplished today (February 12, 2016).

The SEOC continues to provide·
- Situational awareness.
- Common operating picture/objectives.
- Coordination with city/county.
- Potential coordination with federal agencies.
- Incident prioritization.
- Coordination of life/health safety measures
- Resources.
- Public information control.

Logistics
- Fielded resource requests.
- Fielded Rapid Response requests.
- Fielded Governor's office request.
- Facilitated distribution team calls
- Still working on getting the supplies and equipment needed for the second warehouse.

JIC.
- MDHHS Chief Medical Executive Dr Eden Wells joined Senator Stabenow, Mayor Weaver, Dr. Hanna-Attisha to join the Children's Health Fund to deliver a mobile medical clinic that will provide medical care to children in Flint.
- Key state agency PIOs staffed the Flint Water Interagency Coordinating Committee for media. Two media outlets attempted to attend the meeting, but were advised about the Live Streaming service available at www.michigan gov/snyderlive.
- Issued a news release about a National Guard soldier saving a Flint resident's life. National Guard Spec. Charles Colwell was made available for media interviews at Flint Fire Station No. 1. Interviews were conducted with WEYI-TV 25, WNEM-TV5 and WJRT-TV 12.
- Continued routing public information materials for approval, including fact sheets on breast feeding and lead poisoning, lead and children fact sheet by the Michigan Alliance for Families, Frequently Asked Questions fact sheet, and supporting children and family's fact sheet.
- Drafted a news release about the boil water advisory being lifted. The JIC issued news release this afternoon upon lifting of boil water advisory.
- Held media availability at the Genesee County Emergency Operations Center to give the news media access to a sentinel team briefing prior to disbursing throughout Flint. More than 10 news media outlets attended, including local and regional members.

Recovery Branch:
- Attended Local Brief, SEOC State Agency Briefing Meetings, Distribution Process Meetings
- Team priorities today water distribution and rapid response
- Team priority tomorrow· water distribution and rapid response
- 8 American Red Cross teams scheduled for Saturday, February 13 – extra vehicles on hand for surge in event based volunteers.

- Data is for 2/12/16 as of 5.00 pm·
o Total homes visited:
□ 21,230 (round 3 total).
□ 1,173 (today)
o Water cases (liters calculated by multiplying # of cases x 12)·
□ 147,648 liters or 12,304 cases (round 3 total).
□ 6,840 liters or 570 cases (today)
o Replacement cartridges·
□ 4,860 (round 3 total).
□ 340 (today).
o Faucet filters:
□ 7,475 (round 3 total).
□ 48 (today).

Planning Section:
- Published Site Rep #38.
- Submitted daily Governor's report.
- Updated Flint Water Timeline
- Updated PSC position procedures.
- Participated in daily calls and meetings with UCG, state agencies and distribution process.
- Developed estimates for each position to comply with FOIA request.

Operations Section

• Facilitated 09:30 and 16:00 SEOC briefing and attended the 08:30 UCG meeting
• Preparation for FOIA requests
• 80 volunteers were active across the operation today (56 event based, 15 ARC, 9 NCCC)

• Warehouse Numbers as of 1800:
□ Water (liters).
• 866,976 liters or 72,248 cases.
□ Filters (faucet)
• 47,492
□ Replacement cartridges
• 376,394.
□ Test Kits (prepped)
• 28,919

• PODs (Number as of 1700 2/12)
□ Water (cases)
• 53,676 liters or 4,473 cases.
□ Filters (faucet).
• 138.
□ Replacement Cartridges
• 544.
□ Test kits.
• 117

Finance Section.
• Reviewed Pierson Rd. Warehouse Memorandum of Agreement.
• Reviewed Agency Expenditures for inclusion as Category B eligible costs.
• Updated the Resource Request Form.

GIS Branch Updates:
• Refine data sent from MDEQ for mapping of water test location.
• Preparations for GIS to meet FOIA requests.
• Generated a list of number of visits by parcel
• Produced maps of parcels that needed to be revisited.
• Produced map of visits by parcel.

DTMB.
• Addressing parking issues at the Flint State Office Building parking ramp.
• Procuring first aid kits for warehouses.

DHHS-CH (weekly):
• The CHECC remains active at a Level 2, and continues to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to work with federal partners in the UCG on prioritized requests for assistance.
• MDHHS continues planning efforts in support of lead blood level testing for children age 6 and under.

DEQ:
• Coordinated calls from EAC to PEAS line on-calls from 17:00 2/12/16 to 2/16/16 at 08:00 due to the holiday weekend.
• Worked with MDARD to provide canine test kits for dogs in Flint. These kits will test for elevated lead and copper levels.
• Continued Sentinel water sampling collection crews and continued data collection and monitoring
• Worked on Governor's office request for review of agency documents.
• Continued assembling data for EPA Emergency Administrative Order and second EPA request
• Tracked progress of data collection for Sentinel water testing sites.
• Reviewed incident objectives to reflect activities for the upcoming week.
• Conducted an After Action Review focused on Sentinel sampling effort.

State Voluntary Agency Liaison (VAL):
• Draft water distribution courses of action under review by city and Captain
• Connected Good360 with Food Bank
• Relayed info on Woodside Church for Spanish materials
• Relayed info from MCSC to Logs re warehousing for school/WalMart water.
• Worked with TIA on Displaced Worker Grant.
• Passed along info from Kidney Foundation for filter/cartridge need for homebound dialysis patients.

Unified Coordination Group (UCG):
• WQTF Has a new team listed in the ICS-204 community involvement teams
• Attended tactics meeting.
• Transitioned to using vulnerable populations as standard language instead of special populations

Local EOC:
• 10 Sentinel Site Monitoring Teams and Elevated Lead and Copper Initial Assessment Task Force out in the field.
• Sentinel teams inspected approximately 170 homes since 02/10/2016, Initial Assessment Task force inspected approximately 65 homes with elevated lead levels and 30 days with elevated copper levels since 02/04/2016
• Planning for staffing and transition from state agency support personnel to local personnel at Genesee County EOC.
• Liaison Officer and Incident Commander visited UCG and made contact with the Federal Health Coordinating Officer.
• Boil Water Advisory issued by City of Flint in response to water transmission line break was lifted at approximately 1700

Incident Response/Recovery Priorities/Objectives

(Objectives are in order of priority with original objective number attached)

11. Ensure accurate tracking and accounting of all donations.
5. Continue to maintain adequate staffing to support operational requirements.

10. Collaborate with local and volunteer agency partners to solidify the Flint Water Operations Plan.
9. Enhance situational awareness and common operating picture of all activities.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT, FWICC, and the US Department of Health and Human Services Unified Coordination Group (UGC)
3 Improve and maintain the public information strategy and process.
6. Develop an overview of possible assistance programs.
4. Develop a long term public health and services plan.
7 Gather, analyze, and disseminate GIS data to develop products for future planning.
1. Ensure all households within impacted community have required resources and are included in DEQ water sampling plan.
2 Ensure accurate tracking and accounting of all commodities

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a m. to 8 p m. on Feb. 12. The JIC was operational until 9 30 p m. on Feb. 11.

State agencies at the JIC included the Michigan State Police, Michigan National Guard, and Departments of Environmental Quality, Health and Human Services and Treasury. The Genesee County Sheriff's Office and American Red Cross were also present.

Tasks accomplished:
- Media hotline staff answered more than 10 emails and phone calls, ranging from the news media asking to embed with sentinel teams to inquiries about the status of the water pipes in Flint.
- MDHHS Chief Medical Executive Dr. Eden Wells joined Senator Stabenow, Mayor Weaver, Dr. Hanna-Attisha to join the Children's Health Fund to deliver a mobile medical clinic that will provide medical care to children in Flint.
- Created a media monitoring report and looked for misinformation
- Updated a Daily JIC Activities log to catalog actions completed for the day and planned for the week to keep all key agency PIOs aware of actions.
- Key state agency PIOs staffed the Flint Water Interagency Coordinating Committee for media. Two media outlets attempted to attend the meeting, but were advised about the LiveStreaming service available at www.michigan gov/snyderlive. The news media was unhappy about not being able to attend in person.
- Issued a news release about a National Guard soldier saving a Flint resident's life. National Guard Spec. Charles Colwell was made available for media interviews at Flint Fire Station No. 1 Interviews were conducted with WEYI-TV 25, WNEM-TV5 and WJRT-TV 12.
- Continued routing public information materials for approval, including fact sheets on breast feeding and lead poisoning, lead and children fact sheet by the Michigan Alliance for Families, Frequently Asked Questions fact sheet, and supporting children and families fact sheet
- Drafted a news release about the boil water advisory being lifted. The JIC intends to issue the news release upon approvals and official notification from partners.
- Held a media availability at the Genesee County Emergency Operations Center to give the news media access to a sentinel team briefing prior to disbursing throughout Flint. More 10 news media outlets attended, including local and regional members
- Completed staffing for the next two weeks.

Agriculture and Rural Development (MDARD)

MDARD's field activities for 2/11/2016 included the following:
- 6 food establishment assessments conducted
- 9 follow-up food establishment assessments conducted
- 5 water samples collected

Responsibility for water testing and follow-ups for schools was clarified with MDLARA and MDEQ. Contact names and phone numbers for these agencies were given to the Food and Dairy Division's Incident Management Team for their own information and also for the people answering the MDARD phones

American Red Cross (ARC)

The American Red Cross deployed 8 Water Response Teams on Friday, 2/12/16.

The Volunteer Reception Center is operating from 9-5 on Friday. The VRC will operate on the same schedule tomorrow.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC entities Maintaining media awareness regarding situation and community activities. Advised senior leadership of forthcoming FOIA process request. Engaged in constituent outreach regarding request for informational documents.

Community Health (MDCH)

The CHECC remains active at a Level 2, and continues to staff the hotline Monday through Friday to answer any lead health-related questions referred by 2-1-1 in support of the GCHD. The CHECC continues to work with federal partners in the UCG on prioritized requests for assistance.

MDHHS continues planning efforts in support of lead blood level testing for children age 6 and under

Corrections (MDOC)

MDOC continues to keep trucks dedicated to delivering to individual POD's and covering Rapid Responses for PODs that get to a

critical level. PODs remained well supplied throughout day and will continue to be well supplied moving forward.

We are continuing to work with Finance and MDOC assets to capture total employee payroll information and expenditures. MDOC continue to staff the SEOC from 0800-2000, 7 days/week. Mike Farmer and Bridget Spencer are managing the Recovery Branch of the SEOC

Warehouse inventory has been modified to adjust for different sized containers and is now housing additional resources to assist LARA with their mission

606 Test kits were delivered from Flint to Lansing today 593 were DEQ and 13 were MDARD.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:

Coordinated calls from EAC to PEAS line on-calls from 1700 hrs 2/12/16 to 2/16/16 at 0800 hrs due to the holiday weekend.

Worked with MDARD to provide canine test kits for dogs in Flint. These kits will test for elevated lead and copper levels

Continued Sentinel water sampling collection crews and continued data collection and monitoring.

Worked on Governor's office request for review of agency documents.

Continued assembling data for EPA Emergency Administrative Order and second EPA request

Tracked progress of data collection for Sentinel water testing sites.

Reviewed incident objectives to reflect activities for the upcoming week

Conducted an After Action Review focused on Sentinel sampling effort.

Human Services (MDHS)

Participated in Human Services Executive call.

Licensing and Regulatory Affairs (LARA)

Participated in briefings and updated the LARA Executive Team

LARA continues to monitor DEQ's test results for Health Care, Child Care, Adult Foster Care, HHS and MDE facilities and Schools.

LARA continuing efforts to plan and schedule faucet replacements for Flint schools. LARA is working with MDOC to track and store incoming material at the warehouse.

Translation services for various documents continue to be provided as needed.

Ongoing discussion regarding coverage of state regulated facilities and elimination of duplication of effort.

Military and Veterans Affairs (DMVA)

Commanders Situation Report (SITREP)

1. DTG 1213002016

2. UNIT: Points of Distribution (PODs), TF FLINT (1-125 IN)

3 POC Ssg Gazzeny, Darryl L Cell: (517) 582-4816 Email: armyinfantry31@yahoo com

4. PRESENT LOCATION: Genesee County Local EOC, 1101 Beach St , Flint, MI, 48502

5. SITUATION OVERVIEW: 1-125 IN has 65 Soldiers deployed to the Flint Water Crisis in support of Distribution Operations at the Points of Distributions (PODs). Daily operations consist of receiving, tracking, and issuing out water, filters, replacement filters, and water test kits.

Subject: Flint Water Tracking and Reporting

Hello, Everyone.

I am following up to the email that Penny Burger, State Emergency Operations Center sent informing you that the Office of Internal Audit would be contacting you to discuss your department's expenditures related to the City of Flint Water Emergency. We have reviewed the worksheets that you submitted to Penny which summarizes the total expenditures to date. We will use these worksheets as a starting point for reviewing the Flint Water expenditures recorded in MAIN. We be contacting each of you to make arrangements for us to meet and obtain a description of purchases or services you incurred and the MAIN coding used to record the expenditures.

Our objective is to ensure that all agencies are consistent in tracking, monitoring and maintaining sufficient documentation for the Flint Water expenditures.

Carol O'Callaghan, Audit Specialist or myself, will be contacting you this week or early next week. If you have any questions or concerns you may email us or please feel free to contact me at (517) 285-8041 or Carol at (810) 348-4591.

Thank you,

Daphne Hobson
Audit Manager

Subject: RE: Update for FSB - City of Flint

Penny,

Good afternoon. Sorry for the delay, I was out sick the last couple of days. Payroll did post thru January 30, 2016, so I have those updated numbers for you. Of course they aren't 100% accurate, as I have 169 regular 60 hours of regular time charged to your PCA 28670. Overall though, I'm going to go with MSP having spent $139,814.14.

Please let me know if you have any questions...that would all be OT and retirement (1,843.3 OT hours).

Thanks,
Dave

Sherri and Penny,

Great meeting today – thanks for the insights and the state agency cost summary.

Bryan and Lora (and possibly Sherri) will be meeting tomorrow – and Carol and Daphne will start on-site next week.

Thanks again for the great work.

Best regards

Jeff

Subject: RE: GeoFedia - Flint Water

We do not have a budget line item for this. Is this something the MIOC can already monitor? Our appropriation does not have room for this so this will not be able to come from that budget...or do you have a budget for this and this is just for tracking purposes?

TO: State of Michigan Procurement Leadership

FROM: DTMB Procurement

SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must first be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:
Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Subject: Activity Code for Flint Water

Dear Doug,

Just a reminder Activity Codes are set up to track time, in its original use there is no money associated with activity codes. An employee must go to the Activity tab to find activity, there is not a drop down on the time tab for activity.

I did speak with you and you stated you have set up project and multifunction coding, this actually would have funds attached to it.

If you want I can delete the activity code but since you do not have any activity code set up for Flint Water maybe at this time we could leave it.

But that is up to your decision.

Thank you

Subject: City of Flint tracking

Captain Kelenske asked that I reach out to you today concerning the cost tracking for the City of Flint water emergency. We appreciate your concern with ensuring the State of Michigan has collectively documented and reported related costs.

I have discussed many of the concerns that have been brought to Captain with Ms. Sherri Irwin, Director of Departmental Services Division with MSP. She has organized a meeting for her and I to sit down with representatives of the State Budget Office and DTMB to make sure we are in alignment to reach the same goals. I am confident that all concerns will be met.

Thank you.

Penny Burger

Subject: Just a quick question - Flint Water Expense tracking

Good Morning Julie and Randy,

It's been a very long time but I need your help to understand if there is a "multipurpose" field in BO. I don't even know who the appropriate contact would be but I know you will know the answer ☺. I no longer have access to BO and I understand it is currently down. We use a "Project Number" to track expenses that are funded with multiple funding sources but I have not heard of the "multipurpose" field. This is all related to having to track the Flint Water expenses. Can either of you please give me a quick call and let me know if this field is in the Expenditure detail or Summary tables?

Thanks so much – Hope you are both doing well! I miss the days when I could run and develop scripts.

MEMORANDUM

TO: Chief Financial Officers and Human Resource Directors
All State Agencies

FROM: Michael J. Moody, Director
Office of Financial Management

SUBJECT: Flint Water Expenditure and Activity Tracking

In order to facilitate the tracking and monitoring of expenditures and activity related to the Flint water emergency, the Office of Financial Management (OFM) has established the following coding and processes. The coding and processes described in this memo will be used to track expenditures in MAIN and state employee activity in DCDS. Separate instructions regarding the tracking of outputs related to the Flint water emergency will be forthcoming.

Expenditure of Funds Appropriated in Public Act 3 of 2016

OFM has established a line item appropriation number (88500) that will be used for all appropriations included in Public Act 3 of 2016 (HB 5520). Each affected agency is responsible for submitting Electronic Budget Adjustment (EBA) documents using the appropriation number established by OFM and providing the necessary D23 coding for the funding source(s) identified in the appropriation act.

In addition to the submitting EBA documents, affected agencies must establish and use Program Cost Account (PCA) coding in MAIN to specify which of the activities identified in the appropriation act boilerplate are supported by expenditures. Each of the established PCA codes must include multipurpose code FNT-WTR. OFM will contact affected agencies within the next week to discuss establishment and use of the needed PCA codes in more detail.

Please note that these instructions apply only to funds appropriated in Public Act 3 of 2016. Additional instructions will be issued when future appropriations related to the Flint water emergency are enacted.

Expenditure of Other Funds

OFM has established MAIN multipurpose code FNT-WTR to be used by agencies to track expenditures of funds not appropriated in Public Act 3 of 2016 that are related to the Flint water emergency. FNT-WTR is a statewide multipurpose code that is available for use with any PCA code.

If your agency already uses multipurpose code in a manner that conflicts with using it as described above, please contact OFM as soon as possible to discuss alternative methods for tracking.

Tracking Time and Activity in DCDS

OFM has established a DCDS activity code (FDWP) that affected state employees should use to record the amount of time spent on activities related to the Flint water emergency. The activity code will be used to track employee hours devoted to activities related to the Flint water emergency. It is separate from and will have no impact on the expenditure tracking that will occur in MAIN. If employees are not familiar with the DCDS activity reporting process, the reporting is done biweekly on the "Activity" tab of the DCDS timesheet.

If you have questions regarding this memo, please contact Lora Mikula at 373-0447 or MikulaL@michigan.gov.

Subject:	Assistance to the City of Flint
Importance:	High

Good afternoon all,

PCA 28670 has been established to track the OT worked assisting with the City of Flint with the water contamination. Please continue to use Project # FLTWAT and Phase 16 to track non-OT hours to that are spent assisting with this issue, as this will help us when asked the overall impact of assisting the City of Flint.

If for some reason you run into an issue where meals, lodging, supplies, etc. are necessary for this assistance, please contact me so that I can make a decision on how to handle that cost.

Please let me know if you have any questions.

Thanks,
Dave

Subject: City of Flint Costs - January 26th

Good Evening:

I have attached the current cost information related to the SEOC response for the City of Flint Water Emergency. You will find two tabs in this workbook. The first tab reflects current actual and estimated costs incurred by state agencies except Corrections who did not get their information turned in this week. The second tab contains detailed information obtained from DHHS purchasing as far as the water resources procured from Home Depot. These numbers are carried over onto the cost spreadsheet; this is just included to show you more of the detail.

The cost report details the current expenditures or estimated costs incurred. I have done this so you are able to see what types of items are being requested for this response. There are various lines within the supplemental appropriation included in this report, such as DMVA and DHHS. Costs so far are approximately $10.2 M with $8.7 M being spent on water resources since the Governor declared a state of emergency.

If I can answer any questions for you, please let me know.

Thanks and have a good evening.

Good afternoon all,

Just want to make sure we are on the same page here. So, the Payroll PCA 28670, should only be used for the OT worked on the Flint Assistance (not for regular wages helping SEOC or EOC), correct? Also, I don't anticipate much non-payroll for the City of Flint assistance, but travel, meals, lodging, and/or supplies purchased to assist with Flint should be using PCA 28671?

I told understand Penny, I can get with FSB's folks and make sure we start getting our OT corrected and tracked. I did setup Project # FLTWAT and phase 16, so hopefully that was used and will make it easier for me to make those adjustments.

Thanks,
Dave

I was just wondering whether a Flint-specific PCA or project would help them (and us, by extension) make sure everything is accounted for and avoid surprises. (For example if we were to run an expense report in BusObj for Flint-related expenses would we get to the same numbers?) I assume that they would have established a specific coding or comfortable enough with their practices to be able to track things, but with this apparent heightened scrutiny from the SBO on us to track this, we can't be too careful.

EMHSD has a payroll and non-payroll PCA set up specifically for Flint. I have not confirmed with the other agencies how they are tracking costs. I would assume their finance people have a project set up. Do I need to confirm with them?

Subject: Flint Disaster $$ Tracking

Ryan,

Currently our finance staff at EMHSD is tracking everything the departments are doing – at least, everything we're being told - in support of the Flint response effort, with the exception of regular staff time, as that is not reimbursable under federal or state disaster assistance. Items tracked include:

- Overtime (and related benefits) for MSP and other state agencies.
  - This specifically includes DTMB truck drivers, National Guard troops, DHHS specialists (toxicologists, epidemiologists, health educators)
  - They haven't gotten figures yet from DOC, who have recently come on board with the water distribution efforts.
- Water resources purchases (bottled water, testing kits, filters/cartridges, etc). Where purchases are to be reimbursed, such as water purchased from Wal-Mart and reimbursed by the Wal-Mart foundation, they track those as well.
- They're working with FEMA on tracking donations.
- Travel costs (meals, lodging, vehicles/fuel)
- Water distribution costs (warehouse rental and security, rental trucks, dumpster, etc)
- A range of miscellaneous items (mostly DTMB): reflective vests and poncos for volunteers, I-pads etc, box cutters and shrink wrap.
- Outside responders (GenCo Health Dept and blood level testing investigators).

Departments are working through their emergency management coordinators (in the SEOC) to provide EMHSD with a single point of contact for financial matters. They're working to establish a weekly update schedule (on Monday afternoons) to keep EMHSD apprised of the costs.

Let me know if you need anything else,

Subject: RE: SBO Question on Flint $$

Hi Mark:

Even though the legislature divided the supplemental for Flint up to various state agencies, I am still working with each state agency to gather their costs related to the Flint water emergency. The state agency Emergency Management Coordinators have provided me with a financial point of contact for their agency.

The only item that really isn't being tracked at this time is staff regular time, and that is because regular time isn't eligible for reimbursement under federal or state disaster assistance so I don't track it. But anything else is being tracked – overtime with related benefits, water resource purchases, travel costs for field staff, fuel and vehicle costs, blood lead level testing over the baseline – anything that is directly related to this emergency by any state agency. I am trying to get the state agencies on a weekly schedule for sending in updated information with a target of Monday by 4:00 pm for them to submit a report. As you know, we can only get actual payroll costs bi-weekly and non-payroll costs once they have made their way through MAIN. So I get a lot of estimated amounts that I replace with actuals once they are available.

So I am still getting all related costs because Captain Kelenske and the Governor's office want that information at all times, and it is our role. Hope this answers your questions.

Thanks,
Penny

Subject: SBO Question on Flint $$

Hi Penny,

We received a question from the State Budget Office on tracking expenditures related to the Flint emergency.

They're working with the Legislature to develop some sort of regular report tracking what's been expended across all state departments.

Their specific questions are what are we currently tracking, from which departments, and why? (What do we track for match purposes?) What aren't you tracking?

I indicated to him that normally much of the activities would have gone through EMHSD (water distribution supplies, etc) with us providing reimbursement. But with the supplemental, expenditures are going to be much more diffuse.

Thanks,

"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY"

Estimate of State Agency Costs
City of Flint Water Contamination/Shortage Emergency
as of January 25, 2016

Estimated Staffing Costs:			
Actual EMHSD Overtime PPE 1/16/16 (incl. benefits)	$ 110,042		
Estimated EMHSD Overtime - week of 1/22/16	$ 55,000		
Meals	$ 18,500		
Lodging (MSP Staff)	$ 15,500		
State Agency Staff Lodging	$ 6,500		
DHHS Toxicologist	$ 10,104		
DHHS Epidemiologist	$ 20,611		
DHHS Health Educator	$ 4,481		
ETC Training Services Group (Note 1 below)	$ 275,000		
Genesee County Health Department (Note 2 below)	$ 141,664		
DTMB Staff Overtime - non-drivers	$ 516		
DTMB Drivers Overtime/Benefits (Mail & Delivery)	$ 19,958		
DTMB Truck Usage	$ 4,800		
National Guard lodging (4 nights)	$ 44,200		
National Guard Meal per-diem (est.)	$ 36,828		
National Guard - 279 boots on ground - 5 days	$ 465,000		
		$	1,228,703
Procured Items:			
Faucet Filters	$ 3,431,398		
Replacement Cartridges	$ 4,638,289		
Pitchers and Filters	$ 113,912		
Bottled Water	$ 375,762		
Water Testing Kits	$ 79,961		
Warehouse staff supplies	$ 167		
DTMB Printing Charges	$ 35,084		
IPads, cases and stylis	$ 78,876		
Volunteer Credentialing Badges	$ 1,281		
DTMB Truck Fuel	$ 1,500		
500 Rain Ponchos	$ 895		
Wireless Printer and Router for FEMA	$ 894		
765 Handwarmers	$ 1,000		
TV for JIC	$ 747		
Power Strips	$ 62		
13 rolls of shrink wrap & 10 box cutters	$ 305		
Reflective Vests (volunteers)	$ 2,400		
2 IPhones with cases and chargers	$ 122		
Water Filters-Walmart Foundation to reimburse purchase	$ 17,920		
		$	8,780,575
Rental Items:			
Republic Services - Dumpster Rental at warehouse	$ 600		
Survey Monkey	$ 26		
Arwood Waste - Rental fee	$ 255		
Est. Warehouse Rent (1st month)	$ 45,000		
U-Haul Rentals - 3 trucks	$ 351		
DTMB Vehicle Usage	$ 2,835		
Armed security guard with vehicle overnight at Clio Road warehouse 1/17	$ 9,308		
Additional security guard rover	$ 254		
Additional guard at Flint State Office Building 1/13 25.38 per day	$ 1,256		
5 - 15 foot trucks 1/17 - 1/25/16 $.79 per mile+$32 per day per truck	$ 1,440		
Porta Potty Rental $85 month (2)	$ 170		
Additional Guards January 22 - February 12	$ 6,472		
		$	67,967
		$	10,077,246

NOTES:

1) Environmental blood lead investigators to conduct home investigations and testing to determine sources of lead exposure and to develop a plan to reduce/mitigate lead exposure.

2) Nurse Case Management of children who have elevated blood levels.

I'm trying to get an idea of the reimbursement process for DTMB as it relates to the Flint disaster. We are incurring and tracking costs for vehicles, fuel, purchase of iPads, delivery services, warehousing, etc. Will this be reimbursed through MSP or need to be provided at some point for a piece of a supplemental? I'm not concerned about a reimbursement at this point (as we are pooling the costs on the non-appropriated side) but wanted to be able to provide information to

senior management and to provide direction for the various programs providing the support. No big rush just want to make sure I'm doing things properly. Thanks.

To: Irwin, Sherri (MSP); Wolf, Mark (MSP)
Subject: Flint Supplemental Appropriations

Sensitivity: Personal

I just received the draft supplemental and am hoping you can answer a few questions that I'll have. First, is the department currently using (and planning on continuing to use) the automatic boilerplate appropriations from the disaster contingency fund for state emergency operations center expenditures; how much is expected to be used?

Respectfully,
Kent P. Dell, M.P.P.

The supplemental has been updated slightly since last night's version. Wording changes in the DEQ and DHHS portions. John asked that I send you the latest draft for your information. As soon as the formal supplemental is transmitted (still planned for this a.m.) we will send you the final version.

Thank.

Nancy

Team-

Attached is the current draft of the Flint supplemental and summary spreadsheet. The plan is to transmit the supplemental at 10:00am tomorrow(following the Leadership mtg). We may have a couple of minor wording edits in the morning but I do not expect the numbers to change.

Please do not forward until we have the final version. Let me know if you have any questions.

Thanks,

John

Irwin, Sherri (MSP)

From: DeCamp, Greg (DTMB)
Sent: Tuesday, January 19, 2016 7:24 AM
To: Irwin, Sherri (MSP)
Cc: Jeffery, Phillip (DTMB)
Subject: RE: Flint Water Emergency

Sherri – I heard you timed that cruise really well. I talked to Rob and actually Nancy Duncan was involved a little. The issue was the request that DTMB cut a PO for $4.2 million of water filters, water, etc. I didn't really have a line that I could pull that from without blowing up payroll. It ended with Nancy Duncan determining that DHHS should cut the PO in order to keep the supplemental down to a few agencies. We are tracking all cost so will have that for reimbursement at some point (including approx. 90 iPads). Thanks for getting back and hope you had a great time. May the force be with you.

Sorry Greg, I was on the Star Wars Disney Cruise 😀. Sounds like a lot happened regarding the disaster while I was gone.

Can you give me a call Tuesday unless you already spoke with someone. The expectation is that you would get reimbursed provided funding was allocated to MSP. As you know we have the disaster contingency fund so it's reasonable that you would be reimbursed. Call me Tuesday and I can give you and update.

On Jan 12, 2016, at 8:59 AM, DeCamp, Greg (DTMB) <DeCampG1@michigan.gov> wrote:

> Sherri – As in the past, DTMB is being required to spend its own appropriation to support the emergency management declaration in Flint. We have previously discussed that it does not make sense and that this should be MSP/EMD directly funding this. DTMB does not have these types of costs built into any appropriation line within the department and would like some form of assurance that the expenditures incurred will be reimbursed. Thanks.

We plan to send our FY16 supplemental request to the legislature Tuesday morning with a request for legislative action on Wednesday in the House.

Can we share this spreadsheet with the fiscal agencies tomorrow (Monday)?

My answer would have been - it would be our intent provided the funding is available. Was DTMB at any of the meetings or have their expected costs been included? I'll have to look again but I think he sent the email on Tuesday. My international plan did not work so I was not able to check any emails or call anyone. It was very frustrating!!

Thanks to all who worked on this budget document.

Let's continue to work together on this crisis. I continue to be impressed with how MSP responds and the internal talent we possess.

Shawn,

Good morning. I spoke with Lt. Colonel Sands and FSB's Budget is going to be based on 2 Lieutenants, a Sergeant and 5 Troopers. FSB personnel will be working 6 days a week on 12 hour overtime shifts. The budget will also include an amount for mileage reimbursement. No meals were included as the meals are currently being provided by the Red Cross.

FSB's request is for $2,294,110.

Thanks,
Dave

Can you take those projections and extend them out for the rest of this fiscal year, including what FSB has spent to now? Meeting with SBO is at 1:20 today.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 4, 2016

****NOTE: Contains potentially identifiable information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Martha Stanbury for Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators Hospitalized/Discharged-1/1, Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- 12 EBL investigations completed.
- 10 Water sampling completed.
- 5 EBL Reports Received.
  - 4 homes with lead dust hazards
  - 3 homes with lead in soil hazards
  - 5 homes with lead-based paint hazards
  - 2 homes with lead detected in tap water
- 6 investigations scheduled.
- 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- HHS staff will accompany contractors on investigations to confirm compliance with protocols Scheduled for 1/6/16

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 12/18/15:
  - # of contacts attempted 181 (0-5 year olds) and 11 (6-17 year olds)
  - # offered CM. 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started. 24 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint. 24 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 13 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition. 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Dr. Hanna-Attisha submitted a revised application with suggested changes to the MDHHS IRB.**
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 12/31/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,415	3,585
Water Pitchers	720	235	485
Replacement Cartridges - Brita	9,000	1,475	7,525
Replacement Cartridges – PUR*	5,706	4	5,632
Replacement Cartridges - Zero	375	5	370

***The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.**

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Relayed information regarding high lead levels in tap water at a residential child care facility (see DEQ information below) to GCHD who will follow up with the facility.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Awaiting Communications Office approval on Phosphate Fact Sheet (MB)
- Pending. Filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)
- Pending Lead and Nutrition fact sheet and Flint Parent Letter revisions.

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Reviewing copper drinking water action level

WIC

- No updates.

Healthcare/Providers

- Medical Services Administration. Letter L 15-73, dated December 30, 2015, Blood Lead Guidelines to Address the City of Flint Residents' Potential Exposure to Lead, was sent to Practitioners, Clinics, Laboratories and Maternal Infant Health Program (MIHP) Providers in the City of Flint.

DEQ Information - Linda Dykema as Liaison

- **The DEQ reported lead water levels of 213 and 2,516 ppb in a residential Flint child care facility. DEQ contacted the facility on 12/30/15 and instructed them not to use those taps for drinking water consumption.**

Summary

In April 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as a temporary water source. Untreated corrosive river water in the city's water infrastructure caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels, and as a result elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the infrastructure in the City of Flint, the city switched back to water from DWSD on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15th, 2015 and activated their Emergency Operations Center. On January 5thGenesee County declared a state of Emergency and requested a declaration from the Governor. On January 6, 2016, Governor Snyder declared a State of Emergency for Genesee County. On January 6, 2016 the State Emergency Operations Center was activated to coordinate the response.

Objectives and Tactics

1. **Activate the State Recovery Task Force.**
   - Identify and obtain approval for assignment of Task Force Leader,
   - Task Force leader will provide recommendations and obtain approval for Task Force membership.
   - State Recovery Task Force shall determine mission and establish means to provide support as needed.

2. **Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.** FEMA
   - Request and establish LNO in the SEOC to support liaison with other federal agencies.
   - Establish Recovery ~~Unit~~ within Operations Sec.
   - Maintain daily SEOC Briefing with state agencies.
   - Establish and maintain routine calls with local emergency manager and EMHSD District Coordinator

3. **Obtain and maintain situational awareness and common operating picture of all activities.**
   - Conduct daily briefings with state agency emergency managers
   - Monitor MICIMS , and pitcher and cartridges and dates and replacements
   - Produce "water filter distribution" map to include affected area, infrastructure and outside data. names locations how was distribution conducted.
   - Complete and produce daily situation reports.

Establish SEOC operational period and hours of operations.
   - Operation Period has been established as well as SEOC operational hours
   - Review weekly for alteration of same

Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
   - Identify agencies to research potential assistance programs
   - Named agencies will research programs and determine eligibility guidelines, benefits, application process, contacts, etc.
   - Provide report to Operations Section (Recovery Unit) as to program availability.

Develop a comprehensive GIS strategy.
   - *Identify critical needs for maps and overlays*

Summary

In April 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as a temporary water source. Untreated corrosive river water in the city's water infrastructure caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels, and as a result elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the infrastructure in the City of Flint, the city switched back to water from DWSD on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15th, 2015 and activated their Emergency Operations Center. On January 5thGenesee County declared a state of Emergency and requested a declaration from the Governor. On January 6, 2016, Governor Snyder declared a State of Emergency for Genesee County. On January 6, 2016 the State Emergency Operations Center was activated to coordinate the response.

Objectives and Tactics

Activate the State Recovery Task Force.

- Identify and obtain approval for assignment of Task Force Leader
- Task Force leader will provide recommendations and obtain approval for Task Force membership
- State Recovery Task Force shall determine mission and establish means to provide support as needed

Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.

- Request and establish LNO in the SEOC to support liaison with other federal agencies
- Establish Recovery Unit
- Maintain daily SEOC Briefing with state agencies
- Establish and maintain routine calls with local emergency manager and EMHSD District Coordinator

Obtain and maintain situational awareness and common operating picture of all activities.

- Conduct daily briefings with state agency emergency managers
- Monitor MICIMS
- Produce "water filter distribution" map to include affected area, infrastructure and outside data
- Complete and produce daily situation reports

Establish SEOC operational period and hours of operations.

- Operation Period has been established as well as SEOC operational hours
- Review weekly for alteration of same

Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.

- Identify agencies to research potential assistance programs
- Named agencies will research programs and determine eligibility guidelines, benefits, application process, contacts, etc.
- Provide report to Operations Section (Recovery Unit) as to program availability.

Develop a comprehensive GIS strategy.

- Identify critical needs for maps and overlays

- Identify current and potential resources for data collection
- Contact and coordinate with identified agencies to obtain and centrally locate all data
- Provide spatial analytics in support of SEOC

Identify critical resources for acquisition and allocation.

- Develop and forward email to all state agencies to identify available resources for deployment

Coordinate response and recovery activities with MIVOAD and identify potential mission areas.

- Establish Recovery Unit
- Gather and compile available resources
- Gather and compile available assistance programs
- Determine resources already provided to affected area in response to emergency

Establish and coordinate routine communication between SME's. and coordinate technical assistance among state agencies and to local agencies.

- Facilitate Identify subject matter experts (Dr. Wells, Dr. Mona Hatta-Attisha, George Krisztian)
- Establish and coordinate routine communication between SME's.

Provide technical assistance to the local Damage Assessment process.

- Establish Recovery Unit
- Provide templates and information as to requirements of damage assessment reports
- Conduct daily conference calls with local emergency manager and EMHSD District Coordinator to assess progress and obtain updates
- Coordinate daily communication with DC, Recovery Unit Lead, GIS Unit Lead to monitor progress and document data

Establish a Joint Information Center and develop a public information strategy.

- State agency PIO's meet to determine needs and strategy for public information dissemination
- Determine technical needs for on-site JIC
- Coordinate with local (County/City) JIC
- Determine need to co-locate state and local JIC
- If need identified to relocate JIC, establish location and logistical needs

Monitor MI CIMS for resource requests and address as appropriate.

- Logistics Section Chief will monitor and assist with input of resource requests
- Review requests and review with command to receive approval to assign and fill requests
- Track resources provided to date and those provided throughout the course of this event.

Establish and disseminate cost center information for the incident.

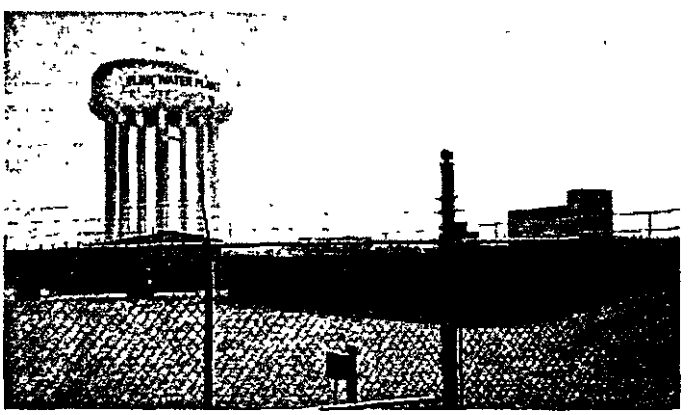
- Establish Index/PCA
- Distribute information to state agencies
- Track costs related to this emergency

1. Incident Name: 2015-10-01 Flint Water	2. Operational Period to be covered by IAP (Date / Time): From: 01/06/2016 08:26:20 To: 01/06/2016 08:26:20	IAP Cover Sheet

3. Approved by:

FOSC:	
SOSC:	
RPIC:	

Incident Action Plan



4. Prepared by: Tom Weber Date / Time: 01/06/2016 16:08:48

Incident

1. Incident name: 2015-10-01 Flint Water

2. Operational Period from: 01/06/2016 08:26:20to: 01/06/2016 08:26:20

3. Objective(s)

13. Establish and disseminate cost center information for the incident
12 Monitor MI CIMS for resource requests and address as appropriate
11. Establish a Joint Information Center and identify a public information strategy.
10 Provide technical assistance and facilitate the local Damage Assessment
9. Facilitate and coordinate technical assistance among state agencies and to local agencies.
8. Coordinate response and recovery activities and identify mission areas with MIVOAD.
7. Identify critical resources for acquisition and allocation.
6. Develop a comprehensive GIS strategy
5. Investigate and identify available programs for assistance with direct or related impacts
4. Establish operational period and hours of operations.
1. Activate the State Recovery Task Force
2. Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts
3. Obtain and maintain situational awareness and common operating picture of all activities.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2. Identify life safety issues.
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

In April 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as a temporary water source. Untreated corrosive river water in the city's water infrastructure caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels, and as a result elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the infrastructure in the City of Flint, the city switched back to water from DWSD on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15th, 2015 and activated their Emergency Operations Center. On January 5th Genesee County declared a state of Emergency and requested a declaration from the Governor. On January 6, 2016, Governor Snyder declared a State of Emergency for Genesee County. On January 6, 2016 the State Emergency Operations Center was activated to coordinate the response.

Objectives obsolete

Activate the State Recovery Task Force
Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish operational period and hours of operations.
Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
Develop a comprehensive GIS strategy
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance to the local Damage Assessment process.
Establish a Joint Information Center and develop a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

Command Emphasis

Provide regular local and technical briefings.
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Seek technical guidance from relevant federal agencies.
Provide regular legislative/congressional briefings.

Draft objectives, please edit as needed and respond by 12:30

I've compiled them all here. Feel free to address/edit any, but of course you only need to be concerned about those specific to your area of responsibility.

Objectives ~~What is the~~ What is/are the issue(s)?

Activate the State Recovery Task Force
Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish operational period and hours of operations.
Investigate and identify available programs, including the federal Lead Pipe Replacement Program. Based on what?
Develop a comprehensive GIS strategy
Identify critical resources for acquisition and allocation. ~~What are~~ Based on what?
Coordinate response and recovery activities and identify mission areas with MIVOAD.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance and facilitate the local Damage Assessment.
Establish a Joint Information Center and identify a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

Command Emphasis
What about local briefings?
Provide regular technical briefings
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Coordinate with FEMA. Why just FEMA? Why not other relevant Fed Agencies?
Provide regular legislative/congressional briefings.

Thanks in advance!!

January 4, 2016

Honorable Rick Snyder
Governor
Office of Governor
State of Michigan
P.O. Box 30013
Lansing, MI 48909

SUBJECT: REQUEST FOR GOVERNOR'S EMERGENCY/DISASTER DECLARATION

Dear Governor Snyder:

On January 4, 2016 pursuant to Section 10 of Act 390, P.A. 1976, as amended, I declared that a "State of Emergency" exists in Genesee County due to the introduction of lead into the public water system and subsequently elevated blood lead levels exceeding governmental standards. The response and recovery aspects of the Genesee County emergency operations plan have been activated, and local resources are being utilized to the fullest extent practicable. Despite these efforts, local resources are not sufficient to cope with the situation.

Therefore, in accordan ce with Section 12 of Act 390, P.A. 1976, as amended, I deem this incident to be beyond the control of Genesee County, and I respectfully request, for and on behalf of the citizens of Genesee County that the Governor declare a "State of Emergency/Disaster" exists therein and that consideration be given, if conditions warrant, to petitioning the President of the United States for assistance provided by Public Law 93-288, as amended. In support of this request, we will submit specific damage assessment data through official channels and in accordance with the guidance in EMD PUB-901 (*Damage Assessment Handbook)* within three (3) days of this disaster, unless circumstances dictate an earlier submittal as requested by the Emergency Management Division, Department of State Police. Furthermore, I understand that this request will not be acted upon without sufficient damage assessment data to substantiate the need for assistance.

Specifically, I request the following assistance:

ESF #3 / Infrastructure Systems Recovery Support Function support to include but not limited to:

- Post-incident assessments of public works and infrastructure
- Executing emergency contract support for life-sustaining services

- Providing technical assistance to include engineering expertise, construction management, contracting, and real estate services
- Providing emergency repair of damaged public infrastructure and critical infrastructure

ESF #8 support to include but not limited to:

- Assessment of public health/medical needs
- Health surveillance
- Medical care personnel
- Patient care
- Behavioral health care
- Public health and medical information
- Potable water

ESF #11 support to include but not limited to:

- Provision of nutritional assistance
-

Accordingly, be advised that Christopher DeVriendt, Interim Genesee County Emergency Management Manager will provide liaison and coordination with State and Federal authorities for assistance related to this disaster, and in accordance with Section 14 of Act 390, P.A. 1976, as amended, he is directed to transmit this request to the appropriate State Police Emergency Management Division (EMD) District Coordinator by the most expeditious means.

2:45 / 8:30a
local agy brief

Initial UC Meeting 4 pm Tuesday

- Discussed Incident Objectives
- Set goals for SEOC activation
- Identified staff positions for SEOC activation

Objectives Meeting 10 am (Command Staff, Held by IC)

- Discuss initial objectives for the incident
- Develop response objectives
- Identify response emphasis
- Agree on operating policy, procedures, and guidelines

Command and General Staff Meeting 11:30a (Command and General Staff, Incident Command)

- Meet and brief Command and General Staff on IC/UC Direction, objectives, & priorities
- Assign work tasks

Tactics Meeting (Safety Officer, Log Sec Chief, Resource Unit leader to attend, Ops Sec Chief to lead) 1pm

- Develop strategy and tactics

Planning Meeting (All Command and General Staff, Planning Section Chief to hold) 2 pm

- Review planned actions and finalize information for IAP
- Get approval from IC/UC

IAP Approval (Incident Commander to approve, Planning Section to distribute) 3pm

- Get approval from IC/UC
- Distribute IAP

Operations Briefing (Operations Section Personnel, Operations Section Chief to lead) 3:30p

- Brief operations section personnel
- Ensure support operations in place
- Deploy next operating period resources

Execute Plan

ID Agency resources and how they can assist

wellse3

Objectives

1. Activate the State Recovery Task Force
2. ~~Ensure~~ coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.
4. Establish operational period and hours of operations.
5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
6. Develop a comprehensive GIS strategy.
7. Identify critical resources for acquisition and allocation.
8. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
9. Facilitate and coordinate technical assistance among state agencies and local agencies.
10. ~~Provide~~ technical assistance to the local Damage Assessment process.
11. Establish a Joint Information Center and develop a public information strategy.
12. ~~Monitor MI CIMS for resource requests and address as appropriate.~~
13. Establish and disseminate cost center information for the incident.

Command Emphasis

Provide regular local and technical briefings.
Identify life safety issues.
Identify priorities.
Provide policy direction by observance of SEOC SOPs.
Seek technical guidance from relevant federal agencies.
Provide regular legislative/congressional briefings.

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels that exceeded past seasonal levels were observed in ~~a significant sampling of young children in the~~ City of Flint children, and these were subsequently confirmed by the ~~State Chief Medical Officer~~Michigan Department of Health and Human Services (MDHHS) epidemiologists.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the ~~Michigan Department of Health and Human Services~~MDHHS ~~(MDHHS)~~ in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, is addressinge water issues in the environmental investigations facilitated to identify lead sources in the environment of affected children, and providinge health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. ~~While the source water has been switched back to the DWSD drops in lead levels have been observed since reconnecting to the DWSD system~~, water in the City of Flint is still not safe to drink unless specifically filtered.

6. Provide regular legislative/congressional briefings.

General Situational Awareness:

In April 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as a temporary water source. Untreated corrosive river water in the city's water infrastructure caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels, and as a result elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer. potential

To mitigate the ~~negative~~ effects of corrosive river water on the infrastructure in the City of Flint, the city switched back to water from DWSD on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15th, 2015 and activated their Emergency Operations Center. On January 5th Genesee County declared a state of Emergency and requested a declaration from the Governor. On January 6, 2016, Governor Snyder declared a State of Emergency for Genesee County. On January 9, 2016 the State Emergency Operations Center was activated to coordinate the response.

INCIDENT BRIEFING (ICS 201)

1. Incident Name: 2015-10-01-City of Flint-Water Contamination/Shortage	2. Incident Number:	3. Date/Time Initiated: Date: 01/06/2016 Time: 15:16:34

4. Map/Sketch (include sketch, showing the total area of operations, the incident site/area, impacted and threatened areas, overflight results, trajectories, impacted shorelines, or other graphics depicting situational status and resource assignment):

5. Situation Summary and Health and Safety Briefing (for briefings or transfer of command): Recognize potential incident Health and Safety Hazards and develop necessary measures (remove hazard, provide personal protective equipment, warn people of the hazard) to protect responders from those hazards.

In Apnl 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as a temporary water source. Untreated corrosive river water in the city's water infrastructure caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels, and as a result elevated blood lead levels in young children were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the infrastructure in the City of Flint, the city switched back to water from DWSD on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15th, 2015 and activated their Emergency Operations Center. On January 5th Genesee County declared a state of Emergency and requested a declaration from the Governor. On January 6, 2016, Governor Snyder declared a State of Emergency for Genesee County On January 6, 2016 the State Emergency Operations Center was activated to coordinate the response

6. Prepared by:	Name.Zach Baker/Amanda Bresler	Position/Title·Documentation Unit	Date/Time:01/06/2016 15.16:34

7. Current and Planned Objectives:

Activate the State Recovery Task Force.
Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish SEOC operational period and hours of operations.
Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.
Develop a comprehensive GIS strategy .
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities with MIVOAD and identify potential mission areas.
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance to the local Damage Assessment process.
Establish a Joint Information Center and develop a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

8. Current and Planned Actions, Strategies, and Tactics:

Time:	Actions:
	Identify and obtain approval for assignment of Task Force Leader
	Task Force leader will provide recommendations and obtain approval for Task Force membership
	State Recovery Task Force shall determine mission and establish means to provide support as needed
	Request and establish LNO in the SEOC to support liaison with other federal agencies
	Establish Recovery Unit
	Maintain daily SEOC Briefing with state agencies
	Establish and maintain routine calls with local emergency manager and EMHSD District Coordinator
	Conduct daily briefings with state agency emergency managers
	Monitor MICIMS
	Produce "water filter distribution" map to include affected area, infrastructure and outside data
	Complete and produce daily situation reports
	Operation Period has been established as well as SEOC operational hours
	Review weekly for alteration of same
	Identify agencies to research potential assistance programs
	Named agencies will research programs and determine eligibility guidelines, benefits, application process, contacts, etc.
	Provide report to Operations Section (Recovery Unit) as to program availability.
	Identify critical needs for maps and overlays
	Identify current and potential resources for data collection
	Contact and coordinate with identified agencies to obtain and centrally locate all data

	Provide spatial analytics in support of SEOC
	Develop and forward email to all state agencies to identify available resources for deployment
	Establish Recovery Unit

9. Current Organization (fill in additional organization as appropriate)

10. Resource Summary:

Resource	Resource Identifier	Date/Time Ordered	ETA	Arrived	Notes (location/assignment/status)

2015-10-01-City of Flint-Water Contamination / Shortage

INCIDENT BRIEFING (ICS 201)

1. Incident Name: 2015-10-01-City of Flint-Water Contamination/Shortage	2. Incident Number:	3. Date/Time Initiated: Date: 01/06/2016 Time: 15:16:34

4. Map/Sketch (include sketch, showing the total area of operations, the incident site/area, in areas, overflight results, trajectories, impacted shorelines, or other graphics depicting situatio assignment):

5. Situation Summary and Health and Safety Briefing (for briefings or transfer of comman incident Health and Safety Hazards and develop necessary measures (remove hazard, provi equipment, warn people of the hazard) to protect responders from those hazards.

In April 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DW as a temporary water source. Untreated corrosive river water in the city's water infrastructure lead from lead pipes into the water supply. Increased exposure to lead can cause immediate However, the main health concerns are long-term effects in children such as developmental a and behavioral disorders. Increased water lead levels, and as a result elevated blood lead lev were observed in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the infrastructure in the City of Flir to water from DWSD on October 16, 2015. Funding to reconnect to DWSD was provided fron Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplem addition to rebuild the protective layer in the distribution system and reduce the leaching of le supply.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emerg elevated blood lead levels in citizens. In response to this the City of Flint declared a local Stat December 15th, 2015 and activated their Emergency Operations Center. On January 5th Ger a state of Emergency and requested a declaration from the Governor. On January 6, 2016, G declared a State of Emergency for Genesee County. On January 6, 2016 the State Emergen was activated to coordinate the response.

6. Prepared by:	Name:Zach Baker/Amanda Bresler	Position/Title:Documentation Unit	Da 15

7. Current and Planned Objectives:

Activate the State Recovery Task Force.
Establish and maintain coordination between the City of Flint, Genesee County, state and fec appropriate medical experts.
Obtain and maintain situational awareness and common operating picture of all activities.
Establish SEOC operational period and hours of operations.
Investigate and identify all available programs for assistance with direct or related impacts, in

Pipe Replacement Program.
Develop a comprehensive GIS strategy .
Identify critical resources for acquisition and allocation.
Coordinate response and recovery activities with MIVOAD and identify potential mission area
Facilitate and coordinate technical assistance among state agencies and to local agencies.
Provide technical assistance to the local Damage Assessment process.
Establish a Joint Information Center and develop a public information strategy.
Monitor MI CIMS for resource requests and address as appropriate.
Establish and disseminate cost center information for the incident.

8. Current and Planned Actions, Strategies, and Tactics:

Time:	Actions:
	Identify and obtain approval for assignment of Task Force Leader
	Task Force leader will provide recommendations and obtain approval for Task Fc
	State Recovery Task Force shall determine mission and establish means to provi
	Request and establish LNO in the SEOC to support liaison with other federal age
	Establish Recovery Unit
	Maintain daily SEOC Briefing with state agencies
	Establish and maintain routine calls with local emergency manager and EMHSD I
	Conduct daily briefings with state agency emergency managers
	Monitor MICIMS
	Produce "water filter distribution" map to include affected area, infrastructure and
	Complete and produce daily situation reports
	Operation Period has been established as well as SEOC operational hours
	Review weekly for alteration of same
	Identify agencies to research potential assistance programs
	Named agencies will research programs and determine eligibility guidelines, ben process, contacts, etc.
	Provide report to Operations Section (Recovery Unit) as to program availability.
	Identify critical needs for maps and overlays
	Identify current and potential resources for data collection
	Contact and coordinate with identified agencies to obtain and centrally locate all (
	Provide spatial analytics in support of SEOC
	Develop and forward email to all state agencies to identify available resources fo
	Establish Recovery Unit

OGCS/MSP WRT Volunteer Assembly Information V2.0_011816

1. Volunteer check in at 8:30am at 1101 Beach Street, Flint, MI 48502 (Genesee County Administration Building).
2. Volunteers are able to park at the overflow lot of First Trinity Missionary Baptist Church located at 1226 Beach Street Flint, MI 48502. This lot is located directly to the east of the church. The parking structure to the east of 1101 Beach Street can also be used for parking. Parking tickets will be validated. Access to the parking structure can be gained on Eighth Street just east of Beach Street. Access to the building can be gained from the southeast and southwest doors on each side of the building. Upon entering the building proceed to the basement for sign in.
3. Assignments and briefing will follow between 8:30am and 9:15am. Efforts will be made to keep groups together if requested. Volunteers should inform their team leaders of any medical, security or other needs.
4. Teams will deploy to assigned areas. Volunteers should be able to walk long distances with difficult terrain. Transportation will be provided to and from the assignment location.
5. Teams will return to 1101 Beach Street for lunch from 12:30pm-1:00pm. Lunch will be provided.
6. Teams will redeploy to the field with afternoon assignments.
7. Shifts will end between 4:30pm and 5:00pm with a return to 1101 Beach Street. All items assigned to volunteers must be returned to their team leader at the end of the day. This includes high visibility vest, tablets/IPADS, stylus, lanyards, carrying bags and paperwork.
8. Appropriate clothing should be worn for the projected weather of the day. Boots, hats and gloves are strongly encouraged.

Good Morning,

Attached is the updated plan for today. I've highlighted changes in red.

As requested, I've updated the OGCS/MSP Volunteer Assembly Instructions and included a map with summary of the distribution data.

Thank you for your patience while we finish refining the truck loads.

Please let me know if there are any questions.

Thank you
Lauren

Team Transport Vehicle Driver	10	10		1/17/16	2000
Patrol Car		[illegible]		1/17/16	2000
iPads	10-20	10		1/17/16	2000
Hand Warmers	60	382	Delivery Monday prior to start	1/17/16	1752
Distribution Kit	1200	1200		1/17/16	2000

Execution:

Key Locations

Team	**Assembly Area**	**Hours of Operation**
OGCS/MSP	LEOC Genesee County Administration Building 1101 Beach St, Flint	0830-1600
ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600

Warehouse	4315 North Clio Road, Flint	0700-1900

Critical Task: Assemble, coordinate, and monitor WRTs

OGCS/MSP Process:

1. Assign team leaders, team members, and routes to teams
2. Team Member check in
3. Conduct pre-deployment briefing to include team mission assignments, concept of operations, deployment locations, replenishment process, reporting process, and safety briefings (refer to OGCS_MSP WRT Volunteer Assembly Information V2.0_011816 for detailed information on volunteer processing at LEOC)
5. Provide training to new team members
6. Issue vest and badge to team members
7. Execute morning distribution assignment
8. Lunch served between 1230-1330
9. WRT OIC and Team Leaders midday brief
10. Execute afternoon distribution assignment
11. Conduct post-deployment debrief with team leaders and members
12. Collect vest and badge from team members

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
GCSO/MSP	100 Distribution Kits Remaining	Distribution Route: exact location determined by Team Leader	1. Contact warehouse to request replenishment truck 2. Coordinate replenishment location with warehouse 3. Exchange replenishment truck with empty truck
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix

Lunch

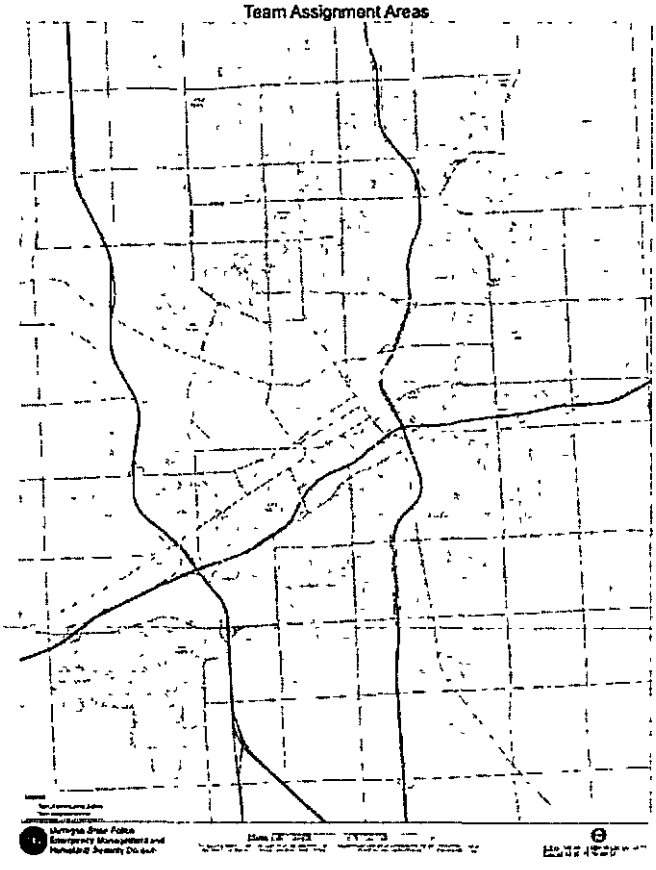
OGCS/MSP WRTs lunches will be provided by the ARC and coordinated by LEOC Logistics.

Reporting:

Tactics:

1. All WRTs will utilize ipads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if ipads fail.

Priority Distribution Areas

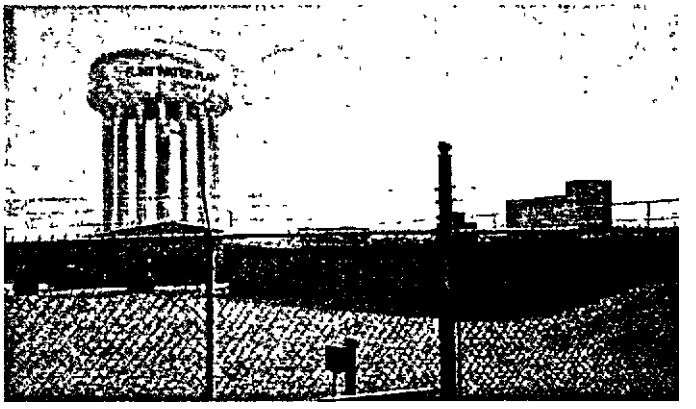


1. Incident Name: 2015-10-01 City of Flint-Water Contamination/Shortage	2. Operational Period to be covered by IAP (Date / Time): From: 01/19/2016 08 00.00 To 01/26/2016 08 00.00	IAP Cover Sheet

3. Approved by:

FOSC:	
SOSC:	F/Lt. Gabe Covey
RPIC:	
State SEOC Director	Capt. Chris Kelenske

Incident Action Plan



4. Prepared by: Amanda Bresler Date / Time: 01/18/2016 17:21:00

Incident

1. Incident name: 2015-10-01 City of Flint-Water Contamination/Shortage
2. Operational Period from: 01/19/2016 08:00:00to: 01/26/2016 08:00:00

3. Objective(s)

5 Ensure adequate staffing to support operational requirements.
10. Develop a comprehensive Recovery Plan
9 Enhance situational awareness and common operating picture of all activities.
8 Maintain coordination between partner agencies and organizations to include FEMA IMAT.
7. Maintain GIS strategy.
6. Identify possible assistance programs
4 Develop a long term public health and services plan
3. Improve and maintain public information strategy and process.
1. Ensure all households within impacted community have required resources
2. Ensure accurate tracking and accounting of all commodities.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2 Identify life safety issues.
3 Identify priorities
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer.

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens. In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics.
Before December 16, 2015, $9 35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

5. Site Safety Plan Required?

Yes ☐ No ☑

Approved Site Safety Plan(s) Located at:

6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

☑ ICS 202	☑ ICS 206
☑ ICS 203	☑ ICS 207
☑ ICS 204	☑ ICS 208
☑ ICS 205	☑ Map/Chart
☑ ICS 205A	☐ Weather Forecast/Tides/Currents

7. Prepared by Documentation/Situation Unit

Name: Zachary Baker

8. Approved by (Incident Commander)

Subject: For Action: Water Response Team Plan, Monday 011816_FINAL
Attachments: OGCS_MSP WRT Volunteer Assembly Information V2.0_011816.pdf; Flint Water Response Team Plan for Monday 01 18 16_V2.0_FINAL.PDF; DailyPlanningMap_Due7pm_20160117_1937.pdf

Good Morning,

Attached is the updated plan for today. I've highlighted changes in red.

Please let me know if there are any questions.

Thank you
Lauren

Incident

1. Incident name: 2015-10-01 City of Flint-Water Contamination/Shortage
2. Operational Period from: 01/19/2016 08:00:00to: 01/26/2016 08:00:00

3. Objective(s)

1 Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3 Improve and maintain public information strategy and process.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7 Maintain GIS strategy.
8 Maintain coordination between partner agencies and organizations to include FEMA IMAT.
9 Enhance situational awareness and common operating picture of all activities
10. Develop a comprehensive Recovery Plan.

4. Operational Period Command Emphasis:

1. Provide regular local and technical briefings
2 Identify life safety issues
3. Identify priorities.
4. Provide policy direction by observance of SEOC SOPs.
5. Seek technical guidance from relevant federal agencies.
6. Provide regular legislative/congressional briefings.

General Situational Awareness:

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer

On October 1, 2015 the Genesee County Health Department declared a Public Health Emergency due to the elevated blood lead levels in citizens In response to this the City of Flint declared a local State of Emergency on December 15, 2015 and activated their Emergency Operations Center.

To mitigate the effects of the new source of water on the infrastructure in the City of Flint, the city switched back to DWSD water on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is now treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone.

MDHHS has increased surveillance of blood lead levels in children and is addressing water issues in environmental investigations to identify lead sources in the environment of affected children and provide health education and information to residents, health care providers, and daycare/educational institutions.

Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff by consolidating data from local sources into comprehensive databases and providing mapping services to support incident analysis and forecasting. Data and maps regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, and predictive blood lead levels for affected areas will be made available with demographics
Before December 16, 2015, $9 35 million was provided by the State of Michigan and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

5. Site Safety Plan Required?

SEOC Hours of Operation End:	01/19/2016 20:00:00

Executive Summary

SEOC Update
Accomplished today (January 19):

The SEOC continues to provide:
- Situational awareness
- Common operating picture/objectives.
- Coordination with city/county.
- *Potential coordination with federal agencies.*
- Incident prioritization
- Coordination of life/health safety measures.
- Resources.
- Public Information Control.

- Logistics
o Secured email and phone booster for warehouse
o Worked with FEMA to order water and filter cartridges
o Worked with DHHS to order filter pitchers for distribution
o Coordinated resources and needs with donations management.
o Working with Red Cross to provide relief teams for warehouse manager
o Continuing inventory monitoring and hot shots tracking.
o Projecting future orders of water resources and commodities

- JIC
o Shared water activity map with Media last night and this evening
o Issued news release concerning donations.
o Worked with FEMA external affairs to schedule Legislative and Congressional call for tomorrow.
o Comcast has put filter installation video on the On Demand section

- Recovery Branch
o Continued coordination with Red Cross on volunteers and the Michigan National Guard for Wednesday and Thursday.
o Confirmed team typing for Flint Water Resource Teams.
o Sent out 5 type 3 and 10 types 5 teams to canvass today.

o Data is for 1/19/16 as of 5.00 pm:
o Total homes visited.
□ 22,129 (total).
□ 2,715 (today).
o Door Hangers.
□ 9,851 (total)
□ 1,163 (today).
o Water Cases.
□ 6,103 (total).
□ 789 (today).
o Replacement Cartridges.
□ 3,795 (total).
□ 322 (today).
o Faucet Filters.
□ 7,394 (total).
□ 730 (today).

- Planning Section.
o Published Sit Rep #14.
o Incorporated outstanding data from Red Cross, warehouse, and hotshots into daily total.
o Updated staff assignments for the Planning group.
o Identified staff to assist with data entry of daily Red Cross field team worksheets.
o Worked with FEMA to clarify data reporting method and schedule.
o Participated in daily SEOC briefings and distribution process conference calls.

- Operations Section
o Facilitated daily SEOC briefing calls.
o Held logistics meeting with FEMA in reference to resources available and need for ordering
o Held logistics meeting in reference to National Guard deployment.
o 71 American Red Cross Volunteer active across incident today.

o Warehouse Numbers.
□ Whole warehouse being inventoried, numbers will be available at 0800 tomorrow morning.
o Point of Distribution (as of 6 pm)
□ Contacts
• 1822.
□ Water (cases)
• 9559.
□ Filters (faucet)
• 1409.
□ Replacement Cartridges
• 534.
□ Filters (pitcher)
• 89.
□ Test kits
• 1127.

• Finance Section.
o Continue to revamp spending plan and cost tracking.
o Work with FEMA to determine costs for possible reimbursement for Flint emergency.
o Meet with FEMA IMAT about Public Assistance

• GIS Branch Updates.
• Revamped daily planning maps for Field Teams to refine operational areas and begin preparations for phase II team deployments.
• Released updated JIC map at 1800 displaying updated field team activity and integrating historic paper records that have been entered into the tracking system for field team activity.
• Configured an interface with AGOL to allow MDARD to live update food and water establishment statuses as it relates to the incident.
• Coordinated with Flint City GIS to gather total counts for buildings and units per parcel.
• Built a data entry tool and deployed to the documentation unit for paper forms from field teams.
• Met with FEMA GIS Coordinator, Scott Bailey. He will be granted access to the GIS viewers to prepare maps for federal partners.
• Built plan to revamp dashboards used in SEOC to accommodate large volumes of traffic and ensure stability.
• Received tasker for updating app for Phase II of team deployments.
• Fixed accounts for iPad's that were failing in the field and brought them back online
• Coordination continued with U of M Flint.

DTMB:
• Drivers have been extended through Saturday to support the canvassing efforts
• Working on securing space in the flint office building for FEMA staff.
• Additional vehicles being delivered to support the canvassing effort.

DHHS-CH
• Press release went out this afternoon to announce that the US Department of Health and Human Services will lead the federal response in Flint.
• Discussed with SAMSA to talk about grants available and the DBH hotline
• Ordered EPA pamphlets concerning nutrition plan for distribution.

DEQ
• 7,200 sample bottles delivered today and 7,200 more coming in tomorrow
• 14,000 sample bottles will be delivered tomorrow.

Local EOC Update:
• Attended public health group meeting with GCHD, City of Flint Water Department and MDEQ to discuss water test information being returned to residents, to allow residents a greater understanding of results.
• Attended recycling/trash management group meeting with DEQ, Republic Services, Keep Genesee County Beautiful and Genesee County Planning Commission. Provided projections on current and anticipated bottle distributions.
• Coordinated deliveries of supplies to faith-based organizations, apartment complexes and homebound residents
• Developed SitRep #9.
• Coordinated with Comcast to set up locations for distribution of filters (distributed 60 filters on 01/19/2016).

Incident Response/Recovery Priorities/Objectives

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy and process.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Maintain GIS strategy.
8. Maintain coordination between partner agencies and organizations to include FEMA IMAT.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a.m. to 8 p.m. on Jan. 19.

State agencies at the JIC today included the Michigan State Police, and Departments of Licensing and Regulatory Affairs, Insurance and Financial Services, Agriculture and Rural Development, Michigan Economic Development Corporation, and Michigan Community Service Commission. The Genesee County Sheriff's Office was also present.

Tasks accomplished:
- Pushed the 1/18 water activity map on social media.
- Issued news release #09 regarding donations.

• Posted social media content regarding donations.
• Worked with FEMA External Affairs to organize a congressional/legislative conference call for tomorrow at 2:30 p m.
• Updated daily internal talking points and general talking points.
• Confirmed the water filter video is now on available on Comcast On-Demand. The public service announcement began running Monday, Jan. 18., although it may take a couple of days for all cable boxes to receive the updated content.
• Monitored news media and social media for trends and misinformation. No corrections to news stories were required.
o Topics being covered included:
□ Democratic debate mention by Hillary Clinton
□ Flint as Governor Snyder's Hurricane Katrina
□ Class-action lawsuits filed today against the state
□ State of the State speculation – Flint water plan
□ President Obama possibly meeting with Flint Mayor in D.C. today

• Drafted a news release with the nightly water activity numbers – however, a decision was made in consultation with the Governor's Communications Office that this release will be held until 8:30 a m. tomorrow (1/20) so as not to conflict with the numbers the Governor gives during his 7 p.m. State of the State address tonight.

Agriculture and Rural Development (MDARD)

Tuesday Jan 19, updated and planned for MDARD FDD ICS sampling team and environmental assessment of the food and food service establishments in the Flint water distribution zone. Including location of training for the team and staging area for the sampling supplies and return of collected samples collocated at the Genesee Co. EOC. MDARD FDD ICS sampling team will be starting to do evaluations Wednesday afternoon Additionally, we may start collecting water samples Thursday morning depending upon requests for samples from Food and Food Service establishments.

Resolved question about one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, the firm was visited and found to inactive with no animals on site.

Continued coordination with the FDA Detroit District office for food establishments with joint jurisdiction in the Flint water distribution area.

American Red Cross (ARC)

The American Red Cross resumed assembly of water test kits today at ARC headquarters.
We deployed and supported 11 teams for neighborhood canvassing (Water Response).
We supplied lunches for all of the Water Response Teams today, and will feed all of the teams again tomorrow.
The volunteer reception center (VRC) was in full operation Tuesday. 31 volunteers were processed today. The VRC will be in operation on Wednesday.
We continued warehouse and inventory management efforts.
A total of 71 Red Cross volunteers were active on this operation today.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC entities. Also monitoring media and coverage of rallies and events.

Community Health (MDCH)

White House press release identified the Department of Health and Human Services (DHHS) as the lead for the federal government response to the public health crisis in Flint. This means that HHS will, in collaboration with FEMA, will identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), and the Departments of Housing and Urban Development (HUD), Education and Agriculture (USDA) – that are already working to help residents in Flint.

The goal of the federal response will be to help state and local leaders identify the size and scope of the problem, and work with them to make and execute a plan for mitigation of the short- and long-term health effects of lead exposure. HHS will have a team on the ground in Flint this week. The team will be led by Dr. Nicole Lurie, HHS Assistant Secretary for Preparedness and Response (ASPR). Dr. Lurie will begin engaging with state and local officials today and will travel to Flint tomorrow (1/20/16).

In order to fully leverage the Department's strengths, the HHS team will include HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, whose office manages the President's Task Force on Environmental Health and Safety Risks to Children, and who will be the primary interface with state and local public health officials. Two U S. Public Health Service Commissioned Corps officers will also help with the day-to-day responsibilities in Flint.

Confirmed with MDHHS PIO and Tom Page (Executive Director for 2-1-1) that two new websites (helpforflint.com and Flintkids.org) will be announced during the State of the State Address this evening, instructing individuals interested in volunteering or making a donation to go to those links to do so Also, confirmed that the Governor's Office and 2-1-1 are prepared to accept an influx of calls as a result of the Governor's State of the State Address.

Updated resource request for EPA pamphlets, to include an order for an additional 3,000 in Spanish. Communicated this with logistics. Shipment locations and POC were confirmed with SEOC logistics. EPA confirmed that the shipment would be sent ASAP.

Commander Seligman, from SAMHSA, contacted MDHHS and confirmed the establishment of a Disaster Distress Helpline, which has been approved by the JIC. SAMHSA will issue the press release. This was communicated to the JIC and MDHHS PIOs. A conference call was held this afternoon with SAMHSA, CHECC DBH SMEs, and MDHHS EMCs to discuss getting the Disaster Distress Hotline up and running. Another call will be scheduled before the end of the week to discuss additional details before going "live." Genesee County Community Mental Health will also participate in this call.

The CHECC provided statistics depicting that the WebMD Medscape communication sent last week reached +64,000 healthcare providers in addition to +16,000 medical doctors, for a total of +80,000 recipients. This information was also provided to the

MDHHS PIO.

Followed-up with LHD EPC regarding an inquiry received from the LEOC indicating that a family had been evicted from their home due to the children having high blood lead levels. The GCHD EPC was instructed to reach-out to the family in order to ensure, first and foremost, that if the children do have high blood lead levels that they receive the care and case management that is required. Secondly, to work with the local Health and Human Services office for housing assistance The EPC was asked to contact the MDHHS EMC if this approach is unsuccessful, in order to close the loop.

CHECC provided a message on the MI-Volunteer Registry website that encourages registrants to volunteer to support Flint Water Response efforts taking place this week and into the weekend

Corrections (MDOC)

Brent Travelbee, Mike Farmer and Todd Bechler on duty at the SEOC today

OPERATIONAL PERIOD UPDATE: The new operational period is extended through Tuesday, January 26, 2016 at 0800 hours.

All previous requests for vehicles, personnel and warehouse equipment have been filled and continue to be on site to assist with water distribution. Director Washington is providing full support to our assistance efforts.

We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner. All MDOC resources have reported today, Tuesday, January 19, 2016 as requested

We are building up additional resources for Wednesday, January, 20, 2016. Additional vans will be needed for Water Resource Teams. We are working with DTMB to secure additional Fleet vehicles as well as reach out to facilities and parole/probation offices.

MDOC RESOURCES DEPLOYED: Tuesday, January 19, 2016

Vehicles with Drivers

(2) – 18' Box Trucks
(4) – 20' Box Trucks
(1) - 24' Box Trucks

Box Trucks have power lift gates

(1) – F250 Pick Up Quad Cab with Cap

(1) – 5 Passenger Handicapped Capable Van

(1) – 15 Passenger Van with 10' Enclosed Trailer

(1) – Pick-up Truck

(6) – 10/15 Passenger Vans

(1) – 20 Person Shuttle Bus (Sent to Red Cross Volunteer Sight)

(1) - 53' Refrigerated Semi-Trailer

(3) - Electric Pallet Jacks (This includes one that is broken and will be returning to Ionia tomorrow night for repair)

(7) – Hand Pallet Jacks

(6) 6-10 Passenger Vans

All vehicles drivers have 800 MHz Radio Operability

Staffing

There will be 22 staff members on site 21 drivers and an assistant for the Red Cross Transportation Van (w/trailer).

Education (MDE)

MDE is monitoring the situation and coordinating as necessary with other state agencies

English Language Learners report from Flint Public School District (Flint Community Schools) Results show 338 total with 83% Spanish speakers; 6% Arabic; all others report less than 1%.

Environmental Quality (MDEQ)

The Department of Environmental Quality (DEQ) completed the following activities today:
• Facilitated logistics for Michigan Department of Agriculture and Rural Development food establishment inspectors to meet at the local Emergency Operations Center and provide for water test kits for their use.
• Facilitated logistics for bottle delivery and water test kit assembly.
• Coordination with ZeroWater, the Joint Information Center, State Emergency Operations Center staff and Michigan 2-1-1 for clarification for on Total Dissolved Solids meters.
• Coordinated sampling plan with local Emergency Operations Center and DEQ Drinking Water Laboratory for donated drinking water testing.
• Provided write up for definition of NSF/ANSI 53 certification and process to Operations Section Chief and Planning Section.

Human Services (MDHS)

Assist Logistics on obtaining model numbers and additional information regarding the Zero brand 23 cup and 8 cup water pitchers.
Zero 23 cup pitcher– Model #ZD-018
Zero 8 cup pitcher– Model #ZD-013D

Completed the delivery of two cell phones for MCSC to assist with their donation management processes

Identified 2 conference rooms at Flint Stat Office Building for FEMA to use if they wish.

CHECC continues to maintain a Level 2 Activation

Licensing and Regulatory Affairs (LARA)

Updated the LARA Executive Team.

The final two bubblers arrived at a Flint area Home Depot. They were picked up by LARA staff and successfully installed at the Freeman School today (1/19/16). LARA will now coordinate with DEQ to conduct water re-testing at Freeman Elementary.

LARA is continuing to work with DEQ to establish a schedule, for the next several weekends, to complete school water testing.

LARA / MIOSHA communicating with DEQ on possible use of MIOSHA lab and staffing.

Military and Veterans Affairs (DMVA)

Last 24 hours:
Distributed water, water filters, water test kits and collected water samples for analysis at five points of distribution. Coordinated efforts with Genesee County EOC and Joint Information Center. In-Processed Soldiers to augment distribution operations at 1800 S. outer Dirve, Saginaw, MI on 17 January 2016 at 1300. Conducted lodging and operations orientation following in-processing. Total of Soldiers on State Active Duty on 17 January 2016. All PODS received pallet jacks for off-loading water pallets. Coordination between FEMA and Selfridge Air Base (SANGB) taking place. Exact terms of agreement of FEMA using SANGB for staging operations have not been identified at this time.

Total of Soldiers on State Active Duty:

Next 48 hours:
Distribute water, water filters, and water test kits and collect water samples for analysis at five points of distribution Coordinate efforts with Genesee County EOC and Joint Information Center. Relieve Red Cross at PODS, assuming their role of distributing filters. Total of Soldiers on State Active Duty on 17 January 2016. Additional Soldiers will conduct first full day of distribution operation on 18 January 2016. Continue coordination between FEMA and SANGB, a 0800 meeting will be conducted on 18JAN16.

Micheal Shook
CPT, IN, USA
989-763-4256

National Weather Service (NWS)

Jim Maczko from NWS Grand Rapids will participate in SEOC morning briefings via phone call and will coordinate support with local forecast office that serves Flint - NWS Detroit/Pontiac. Participation in afternoon SEOC briefings is planned only if significant changes in the forecast occur.

Hand off to NWS Detroit for morning conference call weather forecast in progress. Estimated date when NWS Detroit will begin morning SEOC briefings and MICIMS posts is Tuesday, January 26.

Natural Resources (MDNR)

MDNR LED continues to support its QOL partners with staffing at the SEOC.

Department POC's include.
Chief Gary Hagler, F/Lt. Jennifer Wolf, F/Lt. Steven B. Burton.

Services to the Aging (OSA)

Valley Area Agency on Aging (VAAA) continues to take calls from seniors and caregivers needing access to water and filters. VAAA is providing this information to the local EOC each afternoon for follow-up.

As of Friday, January 15th, VAAA and MDHHS-Adult Protective Services (APS) has provided AASA with over 2,000 addresses of homebound, frail, or otherwise at-risk seniors living in Flint. AASA has in turn forward these addresses to MSP-GIS to overlay their heat map and for local follow-up.

VAAA's local Nursing Home Ombudsman continues to monitor Flint area Nursing Homes to ensure residents have access to safe water.

Contact info for VAAA Executive Director is:
Kathryn C Boles
President, CE
Valley Area Agency on Aging
225 E. Fifth Street, Suite 200
Flint, MI 48502
(810) 239-7671
(810) 239-8869 fax

Prior to the State Declaration of Emergency, Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the GCARD, Genesee County Health Department and MDHHS, participated in the local ad-hoc response by helping organize local meetings and distributed water and water filters to VAAA Home Delivered Meal recipients. VAAA was also an I&A access point for receiving calls from homebound seniors who are not able to pick up water filters or needed assistance installing water filters. VAAA referred seniors needing filters to GCARD for follow-up. Because VAAA is a known and trusted local resource for older adults in Genesee County, they continues to receive calls from seniors needing access to water and filters.

State Police (MSP)

We had 5 police agency teams that were deployed today with 11 Red Cross teams. 2770 homes have been visited today.

National Guard members will be at the Warehouse at 0830 on 1/20/16. Contact was made with Lt. Dehner with the request to have with troopers or deputies report to the Warehouse at 4315 N. Clio Road, Flint, at 0830 on 1/26/16.

Lt. Dehner has been advised that the SEOC is considering changing the hours of operation for the Water Resource Teams to 1000-1800 beginning on 1/21/16. Working with the recovery branch to coordinate logistics for this adjustment.

**MSP-SEOC-MDSP has submitted a MiCIMS resource request to GIS for this. The resource request number is SEOC – 8951057
Resource request is for the following:
Please prepare a GIS Map for Water Response Team use with the following layers:
Ward/Precinct
"Homes Visited" Resource delivered
Homes Visited, but "No Answer"

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

DTMB Mail Services has drivers with trucks assisting in transporting supplies to support point of distribution centers and Flint Water Resource Teams. Five (5) drivers on are available on Wednesday, January 20, six (6) drivers on Thursday, January 21 & Friday, January 22 and three (3) drivers on Saturday, January 23.

DTMB assisted in procuring 72 truck loads of water, 8 trucks per day until Wednesday, January 20.
91 tablets have been provided to the Flint Water Response Teams to record supplies being delivered in the field.
Provided 650 credentialing badges for volunteers and 4 temporary fuel cards for the MSP officers driving rented U-Haul trucks
Warehouse space was procured for 80,000 square feet to hold water, water filters, cartridges and water test kits.
Procured 500 rain ponchos for volunteers and a 40 yard dumpster for use at the warehouse.
Providing printing needs for agencies for volunteers to distribute to city residents.

Providing server monitoring of MiCIMS servers.
Provided wireless router and printer for FEMA staff at SEOC.
Acquired a Verizon Wireless booster for the Clio Road warehouse
Procured hand warmers for Water Response Teams.
Provided 2 cell phones to DHHS Michigan Community Service Commission to your for donation management
Contacted Penske Truck Rental and acquired 23 donated trucks for use through Friday for water response teams.
Provided 2 portable bathrooms for use at the Clio warehouse.
Coordinated installation of DirecTV in the Flint State Office Building for the Joint Information Center
Met with FEMA Logistics Chief to identify office space in Flint State Office Building Waiting on confirmation from FEMA.

Provided 13 passenger vans for transporting Water Response Teams.

Transportation (MDOT)

MDOT continues to maintain situational awareness and respond to issues regarding equipment and road conditions.

MDOT deployed 12 drivers to assist with door-to-door distribution for Tuesday, 1/19.

SEOC Hours of Operation End:	01/19/2016 20 00 00

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels were observed in a significant sampling of young children in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplement phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff, consolidate data from local sources into comprehensive databases, and providing mapping services that support incident analysis and forecasting. Data and maps will be made available regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, predictive blood lead levels for affected areas, demographics, etc.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnection to the DWSD system, water in the City of Flint is still not safe to drink, unless specifically filtered.

Incident Response/Recovery Priorities/Objectives

Damage Assessment Summary

Agency Summaries

Joint Information Center / Public Information Officer

The Joint Information Center (JIC) was expected to be operational in Flint from 8 a m. to 8 p.m. on Jan. 19.

State agencies at the JIC today included the Michigan State Police, and Departments of Licensing and Regulatory Affairs, Insurance and Financial Services, Agriculture and Rural Development, Michigan Economic Development Corporation, and Michigan Community Service Commission. The Genesee County Sheriff's Office was also present.

Tasks accomplished:
• Pushed the 1/18 water activity map on social media.

• Issued news release #09 regarding donations.
• Posted social media content regarding donations.
• Worked with FEMA External Affairs to organize a congressional/legislative conference call for tomorrow at 2.30 p.m.
• Updated daily internal talking points and general talking points.
• Confirmed the water filter video is now on available on Comcast On-Demand. The public service announcement began running Monday, Jan. 18., although it may take a couple of days for all cable boxes to receive the updated content.
• Monitored news media and social media for trends and misinformation. No corrections to news stories were required.
o Topics being covered included:
□ Democratic debate mention by Hillary Clinton
□ Flint as Governor Snyder's Hurricane Katrina
□ Class-action lawsuits filed today against the state
□ State of the State speculation – Flint water plan
□ President Obama possibly meeting with Flint Mayor in D.C. today

• Drafted a news release with the nightly water activity numbers – however, a decision was made in consultation with the Governor's Communications Office that this release will be held until 8:30 a.m. tomorrow (1/20) so as not to conflict with the numbers the Governor gives during his 7 p.m. State of the State address tonight.

Agriculture and Rural Development (MDARD)

Tuesday Jan 19, updated and planned for MDARD FDD ICS sampling team and environmental assessment of the food and food service establishments in the Flint water distribution zone Including location of training for the team and staging area for the sampling supplies and return of collected samples collocated at the Genesee Co. EOC. MDARD FDD ICS sampling team will be starting to do evaluations Wednesday afternoon. Additionally, we may start collecting water samples Thursday morning depending upon requests for samples from Food and Food Service establishments.

Resolved question about one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, the firm was visited and found to inactive with no animals on site.

Continued coordination with the FDA Detroit District office for food establishments with joint jurisdiction in the Flint water distribution area.

American Red Cross (ARC)

The American Red Cross resumed assembly of water test kits today at ARC headquarters.
We deployed and supported 11 teams for neighborhood canvassing (Water Response).
We supplied lunches for all of the Water Response Teams today, and will feed all of the teams again tomorrow.
The volunteer reception center (VRC) was in full operation Tuesday. 31 volunteers were processed today. The VRC will be in operation on Wednesday.
We continued warehouse and inventory management efforts.
A total of 71 Red Cross volunteers were active on this operation today.

Civil Rights (MDCR)

Continue to review activities to provide support and assistance to assigned Human Services branch and other SEOC entities. Also monitoring media and coverage of rallies and events.

Community Health (MDCH)

White House press release identified the Department of Health and Human Services (DHHS) as the lead for the federal government response to the public health crisis in Flint. This means that HHS will, in collaboration with FEMA, will identify and mobilize the capabilities of the rest of the federal partners – including the Small Business Administration, the Environmental Protection Agency (EPA), and the Departments of Housing and Urban Development (HUD), Education and Agriculture (USDA) – that are already working to help residents in Flint.

The goal of the federal response will be to help state and local leaders identify the size and scope of the problem, and work with them to make and execute a plan for mitigation of the short- and long-term health effects of lead exposure. HHS will have a team on the ground in Flint this week. The team will be led by Dr. Nicole Lurie, HHS Assistant Secretary for Preparedness and Response (ASPR). Dr. Lurie will begin engaging with state and local officials today and will travel to Flint tomorrow (1/20/16)

In order to fully leverage the Department's strengths, the HHS team will include HHS Acting Assistant Secretary for Health Dr. Karen DeSalvo, whose office manages the President's Task Force on Environmental Health and Safety Risks to Children, and who will be the primary interface with state and local public health officials. Two U.S. Public Health Service Commissioned Corps officers will also help with the day-to-day responsibilities in Flint

Confirmed with MDHHS PIO and Tom Page (Executive Director for 2-1-1) that two new websites (helpforflint.com and Flintkids.org) will be announced during the State of the State Address this evening, instructing individuals interested in volunteering or making a donation to go to those links to do so. Also, confirmed that the Governor's Office and 2-1-1 are prepared to accept an influx of calls as a result of the Governor's State of the State Address.

Updated resource request for EPA pamphlets, to include an order for an additional 3,000 in Spanish. Communicated this with logistics. Shipment locations and POC were confirmed with SEOC logistics. EPA confirmed that the shipment would be sent ASAP.

Commander Seligman, from SAMHSA, contacted MDHHS and confirmed the establishment of a Disaster Distress Helpline, which has been approved by the JIC. SAMHSA will issue the press release. This was communicated to the JIC and MDHHS PIOs. A conference call was held this afternoon with SAMHSA, CHECC DBH SMEs, and MDHHS EMCs to discuss getting the Disaster Distress Hotline up and running. Another call will be scheduled before the end of the week to discuss additional details before going "live." Genesee County Community Mental Health will also participate in this call.

The CHECC provided statistics depicting that the WebMD Medscape communication sent last week reached +64,000 healthcare

providers in addition to +16,000 medical doctors, for a total of +80,000 recipients. This information was also provided to the MDHHS PIO.

Followed-up with LHD EPC regarding an inquiry received from the LEOC indicating that a family had been evicted from their home due to the children having high blood lead levels. The GCHD EPC was instructed to reach-out to the family in order to ensure, first and foremost, that if the children do have high blood lead levels that they receive the care and case management that is required. Secondly, to work with the local Health and Human Services office for housing assistance The EPC was asked to contact the MDHHS EMC if this approach is unsuccessful, in order to close the loop.

CHECC provided a message on the MI-Volunteer Registry website that encourages registrants to volunteer to support Flint Water Response efforts taking place this week and into the weekend.

Corrections (MDOC)

Brent Travelbee, Mike Farmer and Todd Bechler on duty at the SEOC today.

OPERATIONAL PERIOD UPDATE· The new operational period is extended through Tuesday, January 26, 2016 at 0800 hours

All previous requests for vehicles, personnel and warehouse equipment have been filled and continue to be on site to assist with water distribution. Director Washington is providing full support to our assistance efforts.

We will continue to staff the SEOC as a full-time partner as we have assets deployed into the field. All resources are documented on the appropriate forms and shared with the SEOC staff. Additional resource requests are coming in frequently and we are working hard to locate the requested resources while still maintaining minimal local facility operational requirements from the providing facility.

The MDOC is dedicating a considerable amount of resources and staff to this effort. We are working closely with the Logistics Chief to locate needed resources and fulfill resource requests in a timely manner. All MDOC resources have reported today, Tuesday, January 19, 2016 as requested.

We are building up additional resources for Wednesday, January, 20, 2016. Additional vans will be needed for Water Resource Teams. We are working with DTMB to secure additional Fleet vehicles as well as reach out to facilities and parole/probation offices.

MDOC RESOURCES DEPLOYED: Tuesday, January 19, 2016
